The following Bill was read a first time at the meeting of the Legislative Council held on May 11th 1908.

A Bill

To provide for the Regulation of Wireless Telegraphy.

BE it enacted by the Governor of the East Africa Protectorate with the advice and consent of the Legislative Council thereof:—

Licences for wireless telegraphy.

1. (1) A person shall not establish any wireless telegraph station or instal any apparatus for wireless telegraphy in any place except under and in accordance with a licence granted in that behalf by the Governor.
- (2) Every such licence shall be in such form and for such period as the Governor may determine, and shall contain the terms, conditions and restrictions on and subject to which the licence is granted and any such licence may include two or more stations or places.
- (3) If any person establishes a wireless telegraph station without a licence in that behalf or instals or works any apparatus for wireless telegraphy without a licence in that behalf, he shall be guilty of an offence under this Ordinance and on conviction he shall be liable to a fine not exceeding one thousand and five hundred rupees or to simple imprisonment for a term not exceeding twelve months or to both, and in either case be liable to forfeit any apparatus for wireless telegraphy installed or worked without a licence, but no proceedings shall be taken against any person under this Ordinance except by the order of the Governor.

- (4) If a Magistrate is satisfied by information on oath that there is reasonable ground for supposing that a wireless telegraph station has been established without a licence in that behalf or that any apparatus for wireless telegraphy has been installed or worked in any place or on board any ship within his jurisdiction without a licence in that behalf, he may grant a warrant to any police officer or any other officer appointed in that behalf by the Governor and named in the warrant, and a warrant so granted shall authorise the officer named therein to enter and inspect the station or place or ship and to seize any apparatus which appears to him to be used or intended to be used for wireless telegraphy therein.
- (5) The Governor may make regulations for prescribing the form and manner in which applications for licences under this Ordinance are to be made and fees payable on the grant of any such licence.
- (6) The expression "Wireless Telegraphy" means any system of communication by telegraph as defined in the Indian Telegraph Act 1883, without the aid of any wire connecting the points from and at which the messages or other communications are sent and received. Provided that nothing in this Ordinance shall prevent any person from making or using electrical apparatus for actuating machinery or for any purpose other than the transmission of messages.

Licence for experimental purposes &c ..

Where the applicant for a licence proves to the satisfaction of the Governor that the sole object of obtaining the licence is to enable him to conduct experiments in wireless telegraphy, a licence for that purpose shall be granted, subject to such special terms, conditions and restrictions as the Governor may think proper, but shall not be subject to any rent or royalty.

2. A person shall not work any apparatus for wireless telegraphy installed on any ship whilst that ship is in the Protectorate waters, otherwise than in accordance with regulations made in that behalf by the Governor, and the Governor may by any such regulations impose penalties for the breach of any such regulations not exceeding one hundred and fifty rupees for each offence and may provide for the forfeiture on any such breach of any apparatus for wireless telegraphy installed or worked on such ship. Save as aforesaid nothing in this Ordinance shall apply to the working of apparatus for wireless telegraphy installed on any foreign ship.

NOTICE.

1. All land available for allotment outside townships will be granted in future on the following conditions :—

Freehold can only be acquired on a homestead farm of 320 acres.

All other grants will be on leasehold tenancies of 99 years at the rentals given below for each class of land.

Table showing the ordinary maximum size of farms, and the rents to be demanded in the first instance.

| Class. | Highlands. | Lowlands. | Rent per acre per annum. |
|--------|------------|------------|--------------------------|
| I | 900 acres. | 320 acres. | 18 cents. |
| II | 1,400 „ | 640 „ | 12 cents. |
| III | 2,600 „ | 1,200 „ | 6 cents. |
| IV | 5,000 „ | 2,000 „ | 3 cents. |

2. The rents given above will be revisable on a basis of 5 per cent on the unimproved value of the land, subject (except where the land in question at the time of valuation is included in a Township) to maxima of 56 cents and one rupee 69 cents respectively at the 33rd and 66th years.

Example. Take the case of a farm classified as first class and rated at 18 cents an acre. This rent will be demanded for the first 33 years. During the 33rd year it will be assessed at its prairie value, that is, at the price at which it would sell if it were waste land without any improvements. If five per cent of the price thus calculated is found to be 56 cents an acre or more the rent for the next 33 years will be 56 cents; if less, at such lesser rate.

The same procedure will be followed in the 66th. year, the maximum rate of rent in the last period of the lease being Rs. 1.69 per acre.

3. No one is entitled to an exact area of so many acres; but will receive a grant approximating the maximum areas above mentioned according to class, or a smaller area if so desired. And no land will be allotted until it has been beaconed off and classified.

4. Possession will be given in the first instance by a certificate of occupation. The lease will not be granted till development has taken place and may be claimed after three years. The property will be liable to confiscation if the necessary development has not been effected in 5 years from occupation. The conditions of development are briefly,

- (a) in the highlands, white occupation and the expenditure of 40 times the rent.
- (b) in the lowlands, either the two conditions as in (a) or the expenditure of 60 times the rent.

5. A preliminary fee of Rs. 75 will be required for each application. The balance of survey fees will be demanded according to area before possession is given.

The following districts or parts thereof are included in the term "Highlands".

Commercial Value of the Copper Ores.

The copper exists in samples No. 25 and 26 as thin coatings of Malachite (basic copper carbonate) on the grains of the rock. The ore represented by these samples could not be concentrated mechanically and could only be extracted by the wet method, by leaching out and precipitation of the copper with scrap iron, but it is doubtful whether the process would pay. The material is too poor for export. It is possible that the whole of the ore in depth may occur as sulphide and it may then be possible to concentrate it to a rich ore which could be exported in that condition.

It would be advisable to prove the lode in depth by boring.

No. 11 sample of crystals of quartz (supposed diamonds Ndarugu district near Fort Hall.)

DESCRIPTION.—This consists of small irregular fragments and bipyramidal crystals of quartz.

No. 12 sample graphite 6 miles East of Tsavo.

DESCRIPTION.—This is graphitic gneiss, containing only a small quantity of graphite. The material is of no commercial value, but some of the flakes are well developed, and areas where rocks such as this are found are worth investigating in order to ascertain if veins of pure graphite occur.

* NOTE.—Amphibole (Hornblende) (K. J.)

† BIOTITE.—Mica group, common as a constituent of mica schist, gneiss and granite (K. J.)
