A. G. DOHERTY,
Chief Veterinary Officer.

GOVERNMENT NOTICE No. 401.

S. 23217/1.

THE PUBLIC TRUSTEE'S ORDINANCE, 1925.

RULES.

IN EXERCISE of the powers conferred by Section 26 of the Public Trustee's Ordinance, 1925, His Excellency the Acting Governor in Council has been pleased to make the following Rules:—

1. These Rules may be cited as "The Public Trustee's Rules, 1925."

PART I.

Administration of Deceased Estates.

2. The Public Trustee shall make a complete inventory of every estate of which he is an executor or the administrator and shall keep an account of all receipts, payments, and dealings with every such estate. He shall retain all letters received and copies of all letters written by him, and all deeds, writings and papers of or relating to such estate, and shall permit all persons interested to inspect and take copies of the same: Provided that searches for and copies of all such deeds, writings and papers of or relating to such

Accounts to be kept.

estate as aforesaid will on the request of any person interested be made by the Public Trustee, on payment of the fees set forth in the scale of fees in the Schedule hereto.

Accounts to be
passed in court.

3. On the completion of the administration of an estate the Public Trustee shall file in court his account and produce the vouchers relating to the same to the taxing officer, together with an affidavit in verification; and after fourteen clear days' notice has been given by the Public Trustee to all persons interested who are resident in the Colony by inserting a notice in the Gazette and by posting notices at the Supreme Court and in a conspicuous place at the office of the Public Trustee setting forth a day and hour to be appointed by the taxing officer for the passing of such accounts, the same may be examined and taxed by the taxing officer in the presence of any person who may attend upon such notice; and objection may be taken to the account or to any item or parts thereof, and the taxation thereof brought under review by the court in the same manner, as near as may be, as in the case of any proceedings in court.

A certificate under the hand of the taxing officer or of a judge of the court to the effect that the accounts have been examined and found correct shall be a valid and effectual discharge in favour of the Public Trustee as against all persons whatsoever.

Interim
accounts.

4. The Public Trustee may on giving such notice as in the last preceding section mentioned, pass interim accounts prior to the completion of the administration.

Administration
of estates of
deceased
European
officers.

5. The administration of the estates of deceased European officers shall be limited to getting in and realising the assets of the deceased within the jurisdiction, paying liabilities and remitting the balance to the legal personal representative of the deceased. Such remittances shall be made by the Treasurer at the request of the Public Trustee, instructing the Crown Agents to pay the same: Provided that the Public Trustee shall if the estate prove solvent, cause any watch, jewellery, letters or other property of such deceased which in his opinion ought not to be sold, to be securely packed and forwarded to the Crown Agents for the Colonies, and if the estate shall prove insolvent such watches, jewellery, letters or other property of the deceased as aforesaid shall only be forwarded by the Public Trustee to the Crown Agents for the Colonies on his being satisfied, either by deposit of security or otherwise, that the said legal personal representative will remit the value of such property as aforesaid to the Public Trustee within such time as may be prescribed by the Public Trustee. The Public Trustee shall give notice to the Governor that this has been done.

When the accounts of the Public Trustee shall have been passed by the court, the Public Trustee shall forthwith transmit to the Governor an office copy of the accounts filed in the court, of the affidavit in verification and of the certificate of the passing thereof. In the event of an administration not being completed within the period of six months from the date of the death of such officer the Public Trustee shall report the same to the Governor, stating the cause of delay in the completion of such administration and the Governor shall forward such report to the Secretary of State for the Colonies.

Fees.

6. (1) All work done by the Public Trustee or by his agents in the administration of an estate shall be charged according to the scale of fees prescribed in the schedule hereto.

(2) The Public Trustee shall be entitled to reimburse himself for any payments made by him or his agents in respect of any estate in his or their charge which a private administrator of such estate might have lawfully made.

(3) All fees and charges received by the Public Trustee shall be paid by him into the Treasury and shall form part of the public revenue of the Colony.

PART II.

Trusts.

7. The Public Trustee shall keep the following accounts, statements and other records, namely :—

Books to be kept by Public Trustee.

No. 1. Cash Book.

No. 2. A Ledger Account of Trusts which shall contain separate and distinct accounts for each trust and shall show in detail every debit and credit item and every transaction relating to each trust.

No. 3. A Register of Trusts in which shall be registered full particulars of the property comprised in each trust, showing the nature and value of the trust-property, rents and interests, payable and collected, and all dealings with the trust-property.

8. The cash book shall be balanced at the close of every month and shall be laid before the Public Trustee, who shall satisfy himself that the balance is correct, and shall initial the book in token of his having so satisfied himself. A full abstract of same and of all dealings with Trust Funds shall be sent to the Treasurer every month, signed by the Public Trustee.

Cash book.

9. The Public Trustee shall not at any time retain on his hands a larger cash balance than one hundred and fifty shillings. Any excess above that sum shall be lodged as soon as possible to the credit of the Public Trustee in an account opened in his name in the National Bank of India Limited.

Balance to be kept in hand.

10. The Public Trustee may invest or retain invested money belonging to any trust and coming to his hands in any investment authorised by the trust instrument, or (save as otherwise provided by that instrument) authorised by Rule 5 hereof for the investment of trust funds, and may (save as so provided) retain any investment existing at the date of the commencement of the trust. Provided that he shall not invest in or hold any investment in such manner as to expose himself to liability as the holder thereof, unless he is satisfied that he is fully indemnified or secured against loss.

Investment of monies.

11. It shall be lawful for the Public Trustee to invest trust monies in his hands in any of the following securities, viz. :—

Authorised investments.

(a) Any investment authorised by law for the time being in England as a trust investment;

(b) Any investment in the purchase of, or a first charge or charges secured on real property with the Colony up to three-fifths of the value thereof, as estimated after due inquiry, and which charge or charges shall be registered with the Registrar of Titles;

(c) Fixed deposits in banks approved by the Governor.

Closing of
accounts.

12. (1) The Public Trustee's accounts shall be closed on the 30th day of June and the 31st day of December in each year and a copy of each half-yearly account shall be filed and retained in the office of the Public Trustee, and no person, except the Treasurer and the Government Auditor, shall be entitled to inspect the same or any of the trust accounts in the possession of the Public Trustee except in pursuance of an order of the court.

(2) The Public Trustee's accounts shall be audited from time to time by the Government Auditor.

Calculation of
fees.

13. The fees payable to the Public Trustee in respect of his administration of any trust shall be calculated in the following manner :—

A fee of 1 per cent. per annum on the capital value of the estate, and $1\frac{1}{2}$ per cent. on the net annual income accruing for the benefit of any trust either from money invested or from properties held in trust : Provided that if the capital value of the estate exceeds Shs. 500/- and does not exceed Shs. 1,000/- there shall be charged one fee of Shs. 10/- per annum, and if it does not exceed Shs. 500/-, one fee of Shs. 2/- per annum instead of the above-mentioned percentages.

Public Trustee
as trustee under
a will.

14. When the Public Trustee has been appointed a trustee under any will, the executor of the will or the administrator of the estate concerned after obtaining probate or letters of administration with will annexed, shall notify the appointment to the Public Trustee in writing, and if so required by the Public Trustee shall supply him with a copy of the will, and of any trust instrument or other documents affecting the trust, and such particulars as to the nature and value of the trust property and the liabilities (if any) attaching to such property or the holder thereof, and the names and addresses of any beneficiaries under the trust, and such other information as the Public Trustee may consider it desirable to obtain in any particular case. After having been supplied with such information the Public Trustee shall decide whether the trust shall be accepted or refused, and shall give the executor or administrator notice of such acceptance or refusal, and in case of acceptance shall notify in writing his consent to act in the trust and the terms upon which his consent is given.

Payment of
beneficiaries.

15. All money payable by the Public Trustee to the beneficiaries shall be payable at the office of the Public Trustee. When payment is remitted by the post the cost of remittance including postage charges must be borne by the person at whose request or for whose benefit the remittance is made.

Payment of
advances.

16. The Public Trustee may make advances for the purposes of any trust in his hands out of any cash balance to the credit of his account with the National Bank of India Limited.

Identification
of payees.

17. The Public Trustee may at any time require such evidence as he may think sufficient that a person is alive and is the person to whom any money or property is payable or transferable, and may refuse payment or transfer until such evidence is produced.

Beneficiaries not
to be found.

18. When a person appearing to be beneficially entitled to any sum under a trust in the hands of the Public Trustee or to be interested in the trust property cannot be found or it is not known whether he is living or dead, the Public Trustee may apply to the court for directions as to the course to be

taken with reference to such person, and until an order of the court is made, shall retain any sum payable to such person and may invest the same as provided in Rule 5 and accumulate the interest thereof.

19. The Public Trustee shall not accept any trust for religious purposes which involves the exercise by him as trustee of any religious observance or ceremony or the decision of any questions as to the religious merit or character of any individual or institution.

Trusts for religious purposes.

20. The Public Trustee shall not accept any trust which involves the management or carrying on of any business except for the purpose of winding up forthwith such business in order to realise the trust funds. In any case in which it is necessary to wind up any business the Public Trustee shall be entitled to employ at the expense of the trust, such person or persons, as may, in his opinion, be necessary for the purpose of so winding up the business, and shall not be liable for any loss which may occur in the management of such business.

Trusts involving management of business not to be accepted.

21. Subject to the provisions of the Ordinance and of these Rules, and to the terms of any particular trust, the Public Trustee may in the administration of any trust or estate, take and use professional advice and assistance in regard to legal and other matters, and may act on credible information (though less than legal evidence) as to matters of fact.

Professional assistance.

22. Any officer or agent of the Public Trustee who shall be authorised by him in writing in that behalf may take an oath, make any declaration, verify any account, and give personal attendance at any court or place.

Taking of oaths.

23. The powers and duties of an *ex officio* agent appointed under the Ordinance and of all *ex officio* agents hereinafter to be appointed shall be as follows:—

Powers and duties of *ex officio* agents.

(a) To administer all estates of deceased natives, Somalis and Arabs of the gross value of Shs. 1000/- or under in the name of the Public Trustee;

(b) To pay all claims owing by such estates on satisfactory proofs that the same are due;

(c) To receive all debts due to such estates and in the name of the Public Trustee to give valid receipts for same;

(d) To dispose of by public auction all movable property belonging to such estates;

(e) To take all necessary legal proceedings in connection with debts due to estates in course of administration and to appear in court in support of same;

(f) At the end of each month to submit to the Public Trustee the files of all completed cases for his approval and sanction;

(g) To furnish to the Public Trustee at the end of each quarter a concise statement showing the number and value of cases administered during the period and the fees collected thereon.

By Command of His Excellency the Acting Governor in Council.

Nairobi,

This 22nd day of September, 1925.

THE ELECTRIC POWER ORDINANCE, 1919.

REGULATIONS.

IN EXERCISE of the powers conferred upon him by the Electric Power Ordinance, 1919, His Excellency the Acting Governor in Council has been pleased to make the following Regulations :—

- Short title.** 1. These Regulations may be cited as “ the Electric Power Regulations, 1925.”
- Definitions.** 2. For the purpose of these Regulations the following words and expressions shall have the following meanings, unless a different intention appears from the subject or context :
- “ Installation ” includes all material or apparatus situated upon any premises for use or intended for use in connection with the supply of electrical energy to such premises.
- “ Premises ” includes any building, room, tenement, hut, shed or other erection, and the land occupied or used or authorised for occupation or use in connection therewith.
- “ Public road ” means any road to which the public have lawful right of access and includes the whole width of the road reserve.
- Other expressions to which meanings are assigned in the Electric Power Ordinance, 1919, have the same respective meanings in these Regulations.
- Installations.** 3. Except where exemption from compliance is granted by the Governor for good reasons shown, all works and installations shall be erected, constructed, maintained and operated so as to conform with the Regulations for the Electrical Equipment of Buildings issued by the Institution of Electrical Engineers of Great Britain (8th edition), and published in 1924, subject to such amendments as have been or may subsequently be made thereto, and also to conform with the extracts taken from the Board of Trade Regulations and the Home Office Regulations relating to Factories and Workshops, published in the 7th Edition of the Wiring Rules issued by the said Institution of Electrical Engineers in March, 1916 :
- Provided further that the powers conferred on the Board of Trade and Secretary of State by the aforesaid Home Office Regulations for Factories and Workshops shall be exercised by the Governor.
- Fire risks.** 4. A licensee in delivering electrical energy to a consumer's terminals shall exercise all due precautions so as to avoid risk of causing fire on the premises.
- Protection from lightning.** 5. Where any portion of any electric line or any support for an electric line is exposed in such a position as to be liable to cause injury from lightning it shall be efficiently protected against such liability.
- Records.** 6. Whenever in these Regulations the results of tests are ordered to be recorded, such records shall be kept by the Licensee and shall be open to inspection by the Director of Public Works or such other person as he may depute for the purpose.

7. Every low pressure and medium pressure main shall be tested for insulation after having been placed in position and before it is used for the purposes of supply, the testing pressure being not less than twice the maximum pressure to which it is intended to be subjected in use, and in any case at least 500 volts, and the results of the tests of each main shall be duly recorded.

Insulation of
low pressure and
medium pressure
circuits.

8. High pressure and extra high pressure circuits shall not be brought into use unless the insulation of every part thereof has withstood the continuous application during half an hour in the case of every electric line of a pressure exceeding the maximum pressure to which it is intended to be subjected in use that is to say : In the case of every electric line to be used for a pressure not exceeding 10,000 volts, twice the said maximum pressure; and in the case of a line to be used for a pressure exceeding 10,000 volts, a pressure exceeding the said maximum pressure by 10,000 volts. In the case of every machine device or apparatus the testing pressure shall be 50 per cent. greater than the said maximum pressure. The results of each test shall be duly recorded by the licensee.

Testing of
insulation of all
parts of high
and extra high
pressure
circuits.

9. (1) The insulation of every circuit used for the supply of electrical energy, including all machinery, apparatus and devices forming part of, or in connection with, that circuit shall be so maintained that the leakage current shall not under any conditions exceed one-thousandth part of the maximum supply current and suitable means shall be provided for the indication and localisation of leakage. Every leakage shall be remedied without delay.

Maintenance of
insulation.

(2) Every such circuit shall be tested for insulation at least once in every week and the results of the tests shall be duly recorded by the licensees.

(3) Provided that where any part of any electric circuit is connected with earth in accordance with these Regulations the provisions of these Regulations shall not apply to that part of that circuit so long as the connection with earth exists.

10. (1) Transformers shall be placed either in sub-stations, in premises or on poles. Where transformers are out of doors they shall be enclosed in watertight cases. Where sub-stations are on poles they shall be at such a height as to make them inaccessible except by means of a ladder or other special appliance. Where transformers are placed within a sub-station on premises they shall be inaccessible except to authorised persons.

Transformers.

(2) In every case where a high pressure or extra high pressure supply is transformed to a lower pressure or electrical energy is transformed up to above high pressure some suitable automatic and quick acting means shall be provided to guard against danger by reason of the lower pressure system becoming accidentally charged above its normal pressure by contact with or leakage from the higher pressure system.

(3) The metallic portion of every transformer with the exception of the conductors thereof shall be efficiently connected with earth.

11. Every electric circuit shall be protected by a suitable fuse or automatic circuit breaker.

Circuit breaker
for electric
circuits.

Connection of
circuits with
earth.

12. (1) *Continuous Current Circuits*.—Where the pressure of a supply between adjacent conductors of a three wire continuous current system exceeds 125 volts, the intermediate conductor shall be connected with earth in accordance with the following conditions :—

(a) The connection with earth of the intermediate conductor shall be made at one point only on each distinct circuit, namely, at the generating plant, and the insulation of the circuit shall be efficiently maintained at all other parts.

(b) The current from the intermediate conductor to earth shall be continuously recorded, and if it at any time exceeds one-thousandth part of the maximum supply current steps shall be immediately taken to improve the insulation of the system.

(2) *Alternating Current Circuits*.—Alternating current circuits shall be connected with earth in accordance with the following conditions :—

(a) The connection with earth shall be made only where energy is delivered to each circuit, that is to say at a generating station or sub-station and shall wherever practicable be made at a neutral point in the circuit and in such manner as will ensure at all times an immediate and safe discharge of energy.

(b) The connection with earth shall be efficiently maintained except when it is interrupted by means of a switch or link for the purpose of periodical tests for ascertaining whether any current is passing by means of the connection with earth.

(c) The insulation of the mains shall be efficiently maintained at all other parts.

(d) Tests shall be periodically made to ascertain whether any current is passing by means of the connection with earth, and if at any time the current so passing exceeds one-thousandth part of the maximum supply current of the circuit steps shall be immediately taken to improve the insulation. The tests and any action taken shall be duly recorded by the licensee.

(3) *Concentric Mains*.—Concentric mains used either for continuous or for alternating current shall be connected with earth in accordance with the following conditions :—

(a) The connection with earth shall be made :

(i) By means of the external conductor.

(ii) Only at the point or points where energy is given to each circuit, namely, at a generating plant or sub-station.

(b) The insulation of the external conductor shall be efficiently maintained at all other parts.

(c) The external conductor shall form a complete metallic sheathing round the inner conductor.

(d) The connection with earth shall be efficiently maintained except when it is interrupted by means of a switch or link for the purpose of periodical tests for ascertaining whether any current is passing by means of the connection with earth.

(e) Tests shall be periodically made to ascertain whether any current is passing by means of the connection with earth, and if at any time the current passing by means of the connection with earth exceeds one-thousandth part of the maximum supply current of the circuit, steps shall be immediately taken to improve the insulation. The tests and any action taken shall be duly recorded by the licensee.

13. Underground electric lines shall be thoroughly insulated and laid in accordance with the standards of the British Engineering Standards Committee. They shall be protected from mechanical damage by steel armouring, wooden boxing, or earthenware, stoneware, concrete, or fibre conduits or pipes. They shall be laid wherever possible under the footpaths, and with a cover of at least 12 inches from the surface of the pavement. Where laid under the roadway this cover shall be not less than two feet.

Underground
electric lines.

(1) All conduits, pipes, casings, and steel boxes used as receptacles for electric lines shall be constructed of durable material and shall be of ample strength to prevent damage from heavy traffic, and reasonable means shall be taken to prevent the accumulation of gas in such receptacles.

(2) Where any underground electric lines cross or are in proximity to any metallic substance special precautions shall be taken against the possibility of any electrical charging of the metallic substance from any line or from any metallic conduit pipe or casing enclosing any line.

(3) Every portion of any high pressure or extra high pressure electric line where brought above the surface of the ground or in any subway not in the sole occupation of the licensee shall be completely enclosed either in a tube of highly insulated material embedded in brickwork, masonry, or cement concrete, or in strong metal casing efficiently connected with earth.

(4) When any high pressure or extra high pressure electric line is laid beneath the surface of the ground, efficient means shall be taken to render it impossible that the surface of the ground or any neighbouring electric line or conductor shall become charged by leakage from the high or extra high pressure line.

(5) A high pressure or extra high pressure electric line shall not be used for the supply of energy before it has been completely laid, properly jointed, examined and tested or until it is in sole charge of a licensee, and every such line shall during its use be in the sole charge of the licensee.

(6) All metallic conduits, pipes or casings containing high or extra high pressure electric lines shall be efficiently earthed and shall be so jointed and connected across all street boxes and other openings so as to make good electrical contact throughout their whole length.

(7) Where the conductors of any electric lines placed in any conduit are not continuously covered with insulating material they shall be secured in position and no unfixed uninsulated material of a conducting nature shall be contained in the conduit. Adequate precautions shall also be taken to ensure that no accumulation of water shall take place in any part of the conduit, and to prevent any dangerous access of moisture to the conductor or the insulators.

Street boxes.

14. The covers of street boxes shall be so secured that they cannot be opened except by means of a special appliance. Street boxes shall be either filled with cable compound or oil, or if not so filled shall be inspected from time to time for the presence of gas and suitable action shall be taken to check its influx and accumulation.

Minimum size of conductors.

15. The sectional area of any conductor in any electric supply line shall not be less than 0.00849 square inches and the minimum size of any conductor of an overhead line shall be such as to have an actual breaking load of not less than 560 pounds.

Stresses in overhead conductors.

16. The stress in overhead conductors shall not exceed the following limits:—25,000 lbs. per square inch for hard drawn copper; 12,500 lbs. per square inch for aluminium; 34,000 lbs. per square inch for steel, and 22,500 lbs. per square inch for iron in the event of the simultaneous occurrence of a minimum temperature of 40 degrees Fahr. and a wind pressure of 18 lbs. per square foot of diametral plane in the case of all lines, except within ten miles of the coast where a wind pressure of 25 lbs. per square foot is to be allowed for. The span between supports and the sag shall be determined to conform to the above limiting stresses. The maximum sag shall be computed on the assumption that the conductor is subject to a temperature of 122 degrees Fahr.

Clearance for overhead lines.

17. The height from the ground of any line conductor at any point on the span at all temperatures below 122 degrees Fahr. shall not, except with the consent of the Director of Public Works, be less than the height hereunder stated:—

For low and medium pressures ... 18 feet.

For high pressures ... 20 feet.

For extra high pressure not exceeding
66,000 volts ... 20 feet.

For pressures exceeding 66,000 volts the height shall be subject to such order as the Governor may give in each particular case.

No overhead line shall come within two feet of any other overhead line or cables except where it may be permitted to pass either set of lines between other lines at a pole or support, provided that in cases where guard wires are necessary the clearance shall be increased to three feet from the aforesaid lines or cables.

Overhead lines shall be so erected as to be inaccessible to any person without the use of a ladder or other special appliance and unless efficiently protected by insulating material shall in no case be nearer to any portion of a building than seven feet.

Where an overhead electric line crosses or is in proximity to any metallic substance, precautions shall be taken against the possibility of the line coming into contact with the metallic substance by breakage or otherwise.

Telephone lines carried on the same supports as other electric lines shall have a clearance at all temperatures below 122 degrees Fahr. of not less than 18 feet from the ground and where crossing a railway of not less than twenty feet from rail level.

Supports for overhead lines.

18. Every support shall be so located as to avoid obstructing or interfering with pedestrian or vehicular traffic. Every support shall be of durable material and properly strengthened against forces due to wind pressure, change of direction of lines and unequal length of span. The factor of safety of such

supports, taking into account any struts or stays provided, shall be such that the moment resulting from a wind pressure of 30 lbs. per square foot of plane surface and 18 lbs. per square foot of diametral plane upon a cylindrical surface upon the lines and supports shall not exceed one-half the applied moment which is sufficient to cripple the support if of iron, steel or ferro-concrete, and shall not exceed one-fourth of the breaking stress in the case of wood.

Special precautions shall be taken to prevent the corrosion of all metal work at or below the surface of the ground.

All electric lines shall be attached to suitable insulators carried on cross arms or brackets of suitable material and cross section, and they shall be so attached to the insulators or guarded that they cannot fall away from the supports.

Earth wires, where led down poles, shall be protected by a casing for a distance of 8 feet from the ground. A test shall be made at intervals not exceeding twelve months to ensure that the earth wire is intact and effective. The results of such tests shall be duly recorded by the licensee.

19. In running electric lines along a public road where no telegraph or telephone lines exist, a licensee shall keep to that side of the public road which shall be approved by the Postmaster General for the purpose, and in running service lines to the opposite side of the public road a licensee shall arrange such lines so as to interfere as little as possible with the route on that side of any future telegraph or telephone line.

Location of
overhead
electric lines.

20. (1) No electric line shall be erected on the same side of a public road as Government telegraph or telephone and/or other lines, and no pole shall be erected within 30 feet of the latter, except with the approval of the Postmaster General. Wherever an electric line crosses over or under other wires such crossing shall be at right angles and precautions shall be taken by the licensee to prevent contact, due to breakage or otherwise, between the line conductor and the other overhead wire, or between the other wire and the line conductor. Except with the approval of the Postmaster General such precautions shall consist of an efficient system of guard wires.

Protection of
telegraph and
telephone wires.

(2) Where overhead electric lines at high pressure or extra high pressure intersect Government telegraph or telephone lines the electric lines shall be subject to such special conditions as may be required by the Postmaster General in each case of such intersection.

(3) Where an electric line runs parallel and adjacent to a Government line suitable and approved transposition of the power wires shall be effected if so required by the Postmaster General, the expense being borne by the licensee.

(4) Where the erection of any electric line necessitates the alteration of any existing telegraph or telephone lines and such alteration is approved by the Postmaster General, the expense of such alteration shall be borne by the licensee.

(5) Where telegraph or telephone lines are operated and maintained by any person, body of persons or public authority other than the Post Office and Telegraph Department, the notice and approval required by this Regulation shall be given to and obtained from such person, body of persons or public authority.

21. (1) Where an overhead electric line is erected after the coming into force of these Regulations, adequate precaution to prevent danger from a broken line conductor, from leakage and

Precaution to
prevent danger.

from lightning shall be taken by the licensee, and the means whereby this is to be effected shall be approved by the Director of Public Works before any part of such electric line be erected.

(2) All metalwork other than conductors shall be permanently and efficiently connected with earth. For this purpose a continuous earth wire shall be provided and connected with earth at four points in every mile, the spacing between the points being as nearly equidistant as possible, or, alternatively, the metal work shall be connected to an effective earthing device at each individual support. The design and construction of the system of earth connections shall be such that when contact is made between a line conductor and metal connected with earth the resulting leakage current shall not be less than twice the leakage current required to operate the devices which make the line dead.

(3) All stay wires other than those which are connected with earth by means of a continuous earth wire shall be insulated to prevent danger from leakage. For this purpose an insulator shall be placed in each stay wire at a height of not less than ten feet from the ground.

Road and
railway
crossings.

22. After the coming into force of these Regulations where an overhead line is erected along or across a public road or railway reserve or within a township or railway station all wires including earth and auxiliary conductors shall be placed at least two feet higher than the appropriate height from the ground specified in Regulation 17, and the following additional precautions shall be taken to prevent danger :—

(a) In the case of a line erected along a public road or within a township or railway station there shall be provided :

(i) Duplicate insulators supporting the conductors; or

(ii) A device to ensure that in the event of a line conductor falling it shall be put to earth; or

(iii) Other means approved by the Director of Public Works or General Manager, Uganda Railway, as the case may be.

(b) In the case of a line erected across a public road or railway reserve there shall be provided :

(i) Duplicate insulators for supporting the line conductor and a device to ensure that in the event of a line conductor falling it shall be put to earth; or

(ii) Duplicate insulators supporting duplicate conductors tied at intervals not exceeding five feet; or

(iii) Other means approved by the Director of Public Works or General Manager, Uganda Railway, as the case may be.

Service lines
from
distribution
lines.

23. Service connections from overhead lines shall be taken direct from insulators and shall not be tapped off between supports. They shall be led as directly as possible to insulators firmly attached to some portion of the consumers' premises which is not accessible to any person without the use of a ladder or other special appliance. Every portion of a service line, except an earthed neutral, which is outside a building and which is within seven feet from any portion thereof, or is in any way accessible therefrom without the use of a ladder or other special appliance shall be efficiently protected by insulating material of not less than 600 megohm grade.

24. (1) Where lines at different high pressures are supported on the same poles or supports, means shall be provided for automatically and effectively earthing the lower pressure line in the event of the higher pressure line making contact with the lower pressure line.

Different pressure lines on same poles.

(2) Where low pressure and high pressure lines are carried on the same poles or supports they shall be subject to such conditions as may be prescribed by the Governor.

(3) Low pressure and extra high pressure lines shall not be carried on the same poles or supports.

(4) Telephone lines supported on electric line poles shall be subject to the provisions of Regulation 17. All such telephone wires shall be connected to the telephone instrument through suitable transformers and protective devices with fuses and lightning arresters placed in the circuits.

25. Every pole or support within a public road reserve carrying high pressure or extra high pressure lines shall have attached to it a danger notice in a form approved by the Director of Public Works and in the case of lattice or similar poles shall be provided with an efficient guard to prevent unauthorised climbing.

Danger notice.

26. A system of distributing mains shall be separated into sections corresponding approximately to the different feeders, and these sections shall be inter-connected only through suitable circuit breakers or fuses arranged so as to be easily inspected.

Measures for restricting area liable to stoppage.

27. From the time when a licensee commences to supply energy through any distributing main he shall maintain a supply sufficient for the use of all the consumers for the time being entitled to be supplied from that main, and that supply shall, except so far as the Governor in Council may otherwise from time to time permit, be constantly maintained: Provided that for any purpose connected with the efficient working of the undertaking the Director of Public Works may give permission to a licensee to discontinue the supply at such intervals of time and for such periods as he may think expedient. When the supply is so discontinued reasonable notice to all persons likely to be affected shall be given of such discontinuance, and of the probable duration thereof.

Licensee to provide constant supply.

28. A supply of energy to any consumer shall be at standard pressure or other pressure permitted by the licence. The pressure shall be constantly maintained subject to a variation not exceeding four per cent. above or below the fixed pressure under any conditions of supply which the consumer is entitled to receive or such other variation as the Director of Public Works may from time to time allow. The frequency shall be 50 complete periods per second and shall be maintained subject to a variation not exceeding $2\frac{1}{2}$ per cent. above or below 50.

Pressure and frequency of supply at consumers' premises.

The pressure and/or frequency shall not be altered or departed from to an extent greater than the aforesaid variations except by consent of the Director of Public Works and upon such terms and conditions as he may impose and after public notice has been given during a period of one month in such manner as the Director of Public Works may require of the intention of the licensee to apply for consent to alter the same.

29. (1) If, after making all proper examination of an installation by testing or otherwise, a licensee is reasonably satisfied that:

Testing installations.

(a) The wiring and/or fittings are not suitable for the voltage being employed; or

(b) A leakage exists at some part of the circuit of such extent as to be a source of danger and that such leakage does not exist at any part of the circuit belonging to the licensee; or

(c) Any other requirements of these Regulations are not being complied with;

then, and in any such case, the licensee shall not commence a supply or shall discontinue the supply of energy to the consumers' terminals, as the case may be, and shall give immediate notice in writing to the consumer of the reason for not commencing or for discontinuing the supply. In either case supply shall not be given until the licensee is reasonably satisfied that the installation is in conformity with these Regulations.

(2) A licensee shall at his own cost make all proper examinations and tests before commencing a supply of energy to a consumer's terminals, but if an installation fails to comply with these Regulations or if a supply has been discontinued in accordance with any provision of the Ordinance or of these Regulations, the licensee shall be entitled to charge a fee of twenty shillings for re-examination and retest of the installation before giving a supply of energy.

(3) If any consumer is dissatisfied with the action of a licensee in refusing to give or in discontinuing or in not recommencing the supply of electrical energy to his premises, the wires and fittings of that consumer shall, on his application and payment of the prescribed fee, be tested for the existence of leakage by an electric inspector or such person as the Governor may appoint. This provision shall be endorsed upon every notice given under this Regulation.

(4) All tests of consumers' installations shall be duly recorded by the licensee.

By command of His Excellency the Acting Governor in Council.

Nairobi,

This 28th day of September, 1925.

R. W. LAMBERT,

Clerk to the Executive Council.

GOVERNMENT NOTICE No. 405.

THE NATIVE AUTHORITY (AMENDMENT)
ORDINANCE, 1912.

NOTICE.

IN EXERCISE of the powers thereunto enabling me, I hereby appoint the persons named in the Schedule annexed hereto to be Official Headmen for the area named therein.

Nairobi,

24th September, 1925.

O. F. WATKINS,

Ag. Chief Native Commissioner.

SCHEDULE.

KIKUYU PROVINCE—FORT HALL DISTRICT.

Name.	Area.	With effect from.	Remarks.
Waichegwa wa Njuguna	A. 7.	1st August 1925.	On 6 months' probation Vice Wainaina wa Kilabara deposed.
Njuguna wa Nguru	A. 9.	1st August 1925.	On 6 months' probation vice Nguru wa Ngathi deceased.

GOVERNMENT NOTICE No. 406.

NATIVE AUTHORITY ORDINANCE, 1912.

NOTICE.

IT is hereby notified for general information that the appointments of Mwinyikombo wa Mangisi and Kiziwe Kinwasa of Bombo and Shimba Locations respectively in the Digo District, Coast Province are cancelled, with effect from 23rd September, 1925.

Nairobi,

24th September, 1925.

O. F. WATKINS.

Acting Chief Native Commissioner.

GENERAL NOTICE No. 936.

S. 20064/1.

NOTICE.

THE following changes of title in the staff of the Medical Department have been approved by the Secretary of State for the Colonies:—

Principal Medical Officer to be Director of Medical and Sanitary Services.

Deputy Principal Medical Officer to be Deputy Director of Medical Service.

Chief Sanitation Officer to be Deputy Director of Sanitary Service.

Senior Bacteriologist to be Director of Laboratory.

Medical Officer of Health to be Sanitation Officer.

GENERAL NOTICE No. 937.

NOTICE.

TENDERS FOR GRAZING IN KINANGOP FOREST.

TENDERS are invited for the grazing rights for a period of two years from October 15th, 1925, over an area of approximately 2,500 acres in extent situated in the Western Aberdare Forest Reserve between the old Nyeri-Naivasha track and the Sattima Valley and bounded on the East by the forest edge and on the West by the Forest Reserve boundary.

2. The successful tenderer will be given a licence the terms of which may be obtained from the undersigned. The grazing area may be inspected by arrangement with the Forester, Kinogop Forest Station, P.O., Naivasha.

3. The basis of tender to be an annual licence fee payable in advance on the date of the issue of the licence and thereafter on October 15th, 1926.

4. Tenders will be received up to noon on October 12th, 1925, and should be addressed to the Conservator of Forests, P.O. Box 337, Nairobi.

5. The highest or any tender will not necessarily be accepted.

Nairobi,

23rd September, 1925.

H. M. GARDNER,

for Conservator of Forests.

GENERAL NOTICE No. 938.

NOTICE.

IVORY AUCTION SALE.

APPROXIMATELY 13,000 lbs. of Government ivory will be sold by public auction at 10 a.m. at Kampala, on Wednesday the 28th October, 1925.

2. Catalogues giving full details will be available for inspection at the following offices on or after the 10th October, 1925:—

TREASURY:

Entebbe.

Kampala.

Jinja.

Masindi.

Mbale.

CUSTOMS:

Nairobi.

Mombasa.

Zanzibar.

THE TRADE COMMISSIONER:

Nairobi.

3. All lots will be on view on the previous day.

The Treasury,

Entebbe, Uganda,

17th September, 1925.

H. C. WILLBOURN,
*for Postmaster General,
Kenya and Uganda.*

GENERAL NOTICE No. 926.

UGANDA RAILWAY.

TENDERS FOR THE SUPPLY OF WOOD FUEL,
ESCARPMENT DISTRICT.

TENDERS are invited for the supply of 230,000 cubic feet of wood fuel to the Uganda Railway from Eucalyptus trees in the Escarpment District.

2. The plantations in which the wood is lying can be inspected at any time by arrangement with the Forester, Lari Forest Station, Uplands. The whole of the quantity mentioned is to be supplied to the Railway within four months from the date of the first delivery. The earliest date delivery will commence is to be specified in the tender.

3. The wood to be supplied free of bark, which bark would become the property of the contractor.

4. The successful tenderer will be required to enter into a contract the terms of which can be obtained on application to the Chief Storekeeper, Uganda Railway, P.O. Box 40, Nairobi.

5. The contractor must observe such rules and regulations under the Forest Ordinance which may be in force during the period of the contract, and must pay royalties due to the Government at the rate of Shs. 2 per 100 stacked cubic feet before removal from the forest.

6. The tenders must specify the price per 100 cubic feet of wood cut to specification and stacked as indicated by the Railway. The price quoted to include all royalties.

7. Sealed tenders marked "Tenders Wood Fuel, Escarpment" should reach the Chief Storekeeper's Office by noon of the 2nd October. Late tenders will not be considered.

8. The lowest or any tender will not necessarily be accepted.

Nairobi,
16th September, 1925.

D. EDWARDS,
Registrar

GENERAL NOTICE No. 941.

IN HIS MAJESTY'S SUPREME COURT OF KENYA,
AT NAIROBI.

INSOLVENCY JURISDICTION.

CAUSE No. 8 of 1925.

IN THE MATTER OF ANGE MARIE, DEBTOR.

PURSUANT to a petition, dated the 6th day of July, 1925, by the above-named debtor, and on the application of the said debtor, and on reading the said petition and upon hearing the said debtor, it is ordered that the said debtor be and he is hereby adjudicated insolvent, and whereas it appears to the Court that the appointment of a Receiver for the property of the said insolvent is necessary, it is also ordered that a receiving order be made against the said insolvent and a receiving order is hereby made against the said insolvent, and Mr. Chunilal Motibhai Patel of Nairobi is hereby appointed Receiver of the property of the said insolvent, and it is further ordered that the Receiver's remuneration be fixed at 5% on the total amount realised less any sums paid to creditors out of proceeds of their securities, and it is further ordered that the said Receiver do enter into a security bond to the satisfaction of the Registrar of this Court.

All persons claiming to be creditors of the above-named insolvent are hereby required to tender proofs of the alleged debt as required by Sections 24 and 25 of Provincial Insolvency Act of 1907 on or before the 27th day of November, 1925, after which date this Court will proceed to frame a Schedule of such persons as shall have proved themselves to be creditors of the above-named insolvent, and the Receiver will be at liberty without publishing any further notice to distribute all assets which shall have come into his possession.

Given under my hand and the seal of the Court, this 17th day of September, 1925, at Nairobi.

J. E. R. STEPHENS,
Judge.

GENERAL NOTICE No. 954.

NOTICE.

NOTICE is hereby given that the undermentioned goods will be sold by public auction at the Custom House, Mombasa, on the 2nd November, 1925, if not cleared before that date, and the proceeds will be applied first to the payment of freight and charges and next of duties.

The surplus, if any, will be paid to the proprietor of the goods on his application in writing for the same within 12 months from the date of sale, but if on expiration of that date no such application shall have been received the surplus will be forfeited and shall be applied as if it had originally been paid as duty due and payable.

A quantity of confiscated goods will also be put up for auction.
