GENERAL NOTICE NO 260

RABIES PROGRESS REPORT

21ST FEBRUARY, 1933

Since the last report a case of rabies in a jackal has come to notice, and has been confirmed by the Kubete Laboratory. The jackal was killed on a European farm in the Lumbwa area. The history of the case is as follows: the jackal attacked a young goat and a native woman who endeavoured to rescue the goat was bitten by the jackal; the goat died and the jackal was killed. The native woman was taken into Lumbwa by the owner of the farm for treatment.

Further reports from this area state that previous to this incident a jackal bit a native herder and the animal escaped, later a European-owned dog was bitten outside the house of his owner by a jackal; the dog was destroyed and again the jackal escaped. The native was sent for treatment.

It is suspected, however, that in each instance the same jackal was concerned, and it is fortunate that the animal has been destroyed.

It has also come to notice that a native child was bitten in the Loliondo district in Tanganyika Territory by a jackal. The child was sent to Nairobi for treatment; the jackal was destroyed. It is suspected that the jackal was rabid but unfortunately no material was collected for confirmation.

No reports have been received of suspected rabies on the Kenya side of the Kenya-Tanganyika border.

Lumbwa—A total of 131 dogs have been shot in Songhor district, and it is hoped shortly to commence poison baiting in that area.

Baiting is being carried out in the Songhor Police district.

Poison baits were distributed on the farm on which the above-mentioned positive case of rabies in a jackal occurred, and it is reported that there are now no dogs on that farm. Adjoining farms were also baited and in addition the Lumbwa township.

South Kavondo—Poison baiting has been completed in the Bassi location, and the following animals have been found dead: 549 dogs, 12 hyenas, 53 jackals, 42 civets, 9 mongooses.

Baiting has been carried out along the Kisii-Lumbwa border as far as Police Post No 3 in North Mugirango location, in the Nyaribari location on the Kisii-Masai border, and in South Kitutu: 971 dogs, 8 hyenas, 62 jackals, 37 civets, 4 mongooses have been found dead.

The baiting of the Nyaribari location will complete the whole of the Kisii territory.

2,347 poison baits have been distributed in the Karmgu location with a known destruction of 152 dogs, 8 hyenas and 6 wild cats.

2,540 poison baits have been distributed in the Kadem location with a known destruction of 125 dogs, 12 hyenas and 8 mongooses.

Natives in the Marungu, Kadem and Gwassii locations have been destroying their own dogs with the result that the number left is not great.

Baiting has been commenced in the Gwassii location, and since a suspicious case of rabies was reported in this location some time ago, the Chief issued instructions that all dogs are to be destroyed,

and he is willing to give every possible support to the campaign.

More than 8,000 baits were distributed in the Bunyabasi location, and some further baits were distributed in the Buregi location. The chief of the latter reports finding carcasses of a further 57 hyenas and 20 dogs. The chief of the Bunyabasi location reports that the following animals have been found dead: 110 hyenas, 1 leopard, 60 dogs, 15 jackals, 35 small cats, etc. This completes the distribution of baits in the Bunyabasi location and baiting is being commenced in the Bukiria location.

Sotik—Baits have been distributed as follows since the last report: 3,590 baits on occupied farms in the Sotik area, 7,000 baits in the Lumbwa Reserve chiefly on the boundary of that reserve with the Mau Forest area where it is believed that wild carnivora abound, 1,915 baits in the Lutem area, 1,700 baits in Location No 10, 3,800 baits in the Amal area, and re-baiting has also been carried out in the Kericho district.

Kibigon—Baiting has been continued in the East Kano location with a further destruction of 415 dogs.

Molo-Mau Summit Area—Arrangements have been made to commence operations in this area at an early date.

GENERAL NOTICE NO 261

DEPARTMENT OF AGRICULTURE

LOCUST REPORT, 23RD FEBRUARY, 1933

UGANDA

Except for the Eastern Province which is reported to be clear of flies, there has been a general increase in the number of flying swarms maturing from hopper bands which have escaped destruction. Wet weather has hampered anti-hopper measures in the Northern Province.

Further hopper bands have been reported in the Eastern and Northern Provinces, and some mature flying swarms are present in Buganda where further egg-laying has occurred. Considerable kills of both hoppers and settled flies have been recorded.

TANGANYIKA TERRITORY

Reports of egg-laying and hatching are now general, but destruction campaigns are in progress and the situation is not regarded as serious. All Provinces are affected except the Northern and Tinga Provinces which are reported clear.

KENYA

Flying swarms—Four young adult swarms entered Trans Nzoia last week from Uganda, but no report has been received as to their present position. Young swarms have been reported flying from the east near Donyo Sabuk, and a large swarm has done considerable damage to grazing at Athi River.

Hoppers—Small hopper bands have been reported from Nyeri, Sagana, Ruu and North and Central Kavirondo, and local anti-hopper measures are being taken. All hoppers in Machakos and in the Cherangani have now been destroyed.
