GAZETTE NOTICE NO. 9888

THE SEEDS AND PLANT VARIETIES ACT

(Cap. 326)

PLANT BREEDERS' RIGHTS

AMNESTY FOR PLANT BREEDERS' RIGHTS

IN EXERCISE of the powers conferred by section 17 of the Seeds and Plant Varieties Act, the Minister for Agriculture, after consultation with representatives of such organizations deemed to have substantial interests as appear to the Minister to be concerned, notifies the general public and declares that a one-time amnesty be granted for varieties that existed before the operationalization of the Plant Breeders Rights Regulations and for which applications had been received to authorized officer on or before 30th April, 2001.

These varieties shall be considered eligible for plant variety protection subject to them meeting all the other stipulated requirements prevailing as on 30th April, 2001 for the grant of Plant Breeders' Rights as contained in the Seeds and Plant Varieties Act, Cap 326.

APPLICATIONS FOR PLANT BREEDERS RIGHTS APPLIED BEFORE THE DEADLINE OF 30TH APRIL, 2001 AND NOT CONTESTED

THE STATE CORPORATION ACT

(Cap. 446)

THE KENYA COCONUT DEVELOPMENT AUTHORITY ORDER

(L.N 165 of 2007)

IN EXERCISE of the powers conferred by paragraph 6 (iii) of the Kenya Coconut Development Authority Order, L.N. No. 165, 2007, the Minister for Agriculture upon recommendation of the Board of the Kenya Coconut Development Authority and, after consultation with the Minister for Finance, imposes the following coconut industry levies:

SCHEDULE OF LEVIES

Registration and Permit Categories Fees (KSh.)	Fees (KSh.)	Remarks
Nursery Operations		
Registration fee	100	Once
Nursery operations annual permit	250	Annual
Dealers of coconut based products and by-products		
Registration fee	200	Once
Dealers annual permit	1,000	Annual
General Retailers of Toddy (Mangwe)		
Registration fee	200	Once
Annual permit for Toddy Retailers		
In respect of premises situated in the urban municipal centres	10,000	Annual
In respect of premises situated in the urban municipal centres	2,000	Annual
Distributors to Toddy		
Annual permit for Toddy distributors	5,000	Annual
For each additional premises outside the same district	500	Annual
Permit for harvesting coco wood from senile and dead trees (harvesting of productive coconut trees is restricted)	100	Per tree
Permit for transporters of coco wood	1,000	Annual
	200	Per load
Reissue of lost/defaced permits/ registration certificates	200	Each time

Dated the 7th September, 2009.

WILLIAM ARAP RUTO,
Minister for Agriculture.

THE AGRICULTURE ACT
(Cap. 318)

THE HORTICULTURAL CROPS DEVELOPMENT AUTHORITY
ORDER, 1995

(L.N. 230 of 1995)

APPOINTMENT

IN EXERCISE of the powers conferred by paragraph 2 of the Horticultural Crops Development Authority Order, 1995, the Minister for Agriculture appoints:

Under paragraph 2 (g) (i)—

Ngumbao Kennedy Mulwa;

Under paragraph 2 (g) (ii)—

Robert J. Kigunda;

Under paragraph 2 (g) (vi)—

Stephen Kamau Mbugua;

to be members of the Board of Horticulture Crops Development Authority, for a period of three (3) years, with effect from 10th September, 2009.

Dated the 11th September, 2009.

WILLIAM ARAP RUTO,
Minister for Agriculture.

GAZETTE NOTICE NO. 9891

THE COMPANIES ACT
(Cap. 486)

THE KENYA FERRY SERVICES LIMITED

APPOINTMENT

IN EXERCISE of the powers conferred by the Memorandum and Articles of Association of the Kenya Ferry Services Limited, the Companies Act (Cap. 486) of the laws of Kenya, the Minister for Transport appoints—

ANTHONY WARUI GITARI,

to be a member of the Board of Directors of the Kenya Ferry Services Limited, for a period of three (3) years, with effect from 30th August, 2009.

Dated the 1st September, 2009.

C. A. MWAKWERE,
Minister for Transport.

GAZETTE NOTICE NO. 9892

THE HOUSING ACT
(Cap. 117)

APPOINTMENT

IN EXERCISE of the powers conferred by section 3 (2) of the Housing Act, the Minister for Housing appoints—

JAMES RUTHA WAGEMA

as Managing Director of the National Housing Corporation, for a period of three (3) years, with effect from 8th August, 2009.

Dated the 15th September, 2009.

SOITA SHITANDA,
Minister for Housing.

GAZETTE NOTICE NO. 9893

THE HOUSING ACT
(Cap. 117)

APPOINTMENT

IN EXERCISE of the powers conferred by section 3 (2) of the Housing Act, the Minister for Housing appoints—

Elias Kaburu Muriithi,
Reginald Okumu,
Wilson Maina,
Grace Wanyonyi,
Permanent Secretary, Ministry of Finance,
Permanent Secretary, Ministry of Housing,
Permanent Secretary, Ministry of Lands,
Permanent Secretary, Ministry of Local Government,

as Members of the Board of Directors of National Housing Corporation, for a period of three (3) years, effective from 15th September, 2009.

Dated the 15th September, 2009.

SOITA SHITANDA,
Minister for Housing.

GAZETTE NOTICE NO. 9894

THE LABOUR RELATIONS ACT
(No. 14 of 2007)

COLLECTION OF TRADE UNION DUES

IN EXERCISE of the powers conferred by section 48 of the Labour Relations Act, the Minister for Labour:

(a) Revokes the order published under Gazette Notice No. 10242 of 2007.

(b) Orders every employer who employs not less than five (5) members of the Kenya Guards and Allied Workers Union (KEGAWU)—

to deduct every month the sum of specified in the schedule in respect of trade union dues from the wages of his/her employees who are members of that trade union;

to pay within ten (10) days of the deduction, the total sums deducted under the first item of the schedule by crossed cheque made payable to Kenya Guards and Allied Workers Union (KEGAWU) into that union's account No. 233-652-860 at the Kenya Commercial Bank, K.I.C.C. Branch, Harambee Avenue, Nairobi;

to pay within ten (10) days of the date of deduction, the total sums deducted under item two of the schedule, by crossed cheque made payable to the Central Organization of Trade Unions (Kenya) into that organizations account No. 140-792-7 at Barclays Bank of Kenya Limited, Queensway Branch, P.O. Box 30011, Nairobi.

to notify that trade union and the organization in writing within one (1) month of the payment;

to make written returns to the registrar of Trade Unions within one (1) month of making all the payments to that trade union and to that organization.

SCHEDULE

Deductions:

1. The sum of one hundred shillings (KSh. 100) from the wages of each employee per month.
2. The sum of fifty shillings (KSh. 50) from the wages of each employee.

Dated the 15th September, 2009.

JOHN MUNYES,
Minister for Labour.

WATER ACT
(No. 8 of 2002)

THE CATCHMENT MANAGEMENT STRATEGY

IN EXERCISE of the powers conferred by section 15 of the Water Act 2002, the Minister for Water and Irrigation approves for implementation the Catchment Management Strategy for Rift Valley catchment area for the period 2009-2014 formulated by the Water Resources Management Authority as appended below.

PART I: BACKGROUND

1. Introduction

1.1 Overview

The vulnerability of the scarce water resources together with centralised system of management and non performing institutions in the Kenyan water sector called for reforms which among others caused the enactment of the Water Act 2002 and consequently the establishment of Water Resources Management Authority (WRMA). The Authority has the mandate to manage the national water resources which under the new paradigm is done on the basis of catchment areas. A total of 6 major catchment areas have been created in Kenya one of which is Rift Valley Catchment Area. This catchment is responsible for the management of Rivers Turkwel, Kerio, Ewaso Ngi'ro South, Turasha, Njoro and Malewa as well as the rift valley lakes Turkana, Baringo, Bogoria, Nakuru Elementaita, Naivasha, Solai, Magadi and Kamnarok. The management is undertaken with the involvement of stakeholders through Catchment Area Advisory Committee (CAAC) at catchment level and Water Resource Users Associations (WRUAs) at sub-catchment level. Rift Valley catchment area suffer severe water scarcity. The mean annual rainfall range from 200mm (lower catchment area) to 1200mm upper catchment areas). The water shortage is further being exacerbated by global climate change and catchment degradation.

Catchment Management Strategy Formulation Process

The Catchment Management Strategy (CMS) is a tool for a planned and systematic management of water and related catchment resources with the participation of stakeholders. As such the formulation of the strategy was consultative, which enhances ownership and encourages participation of stakeholders during its implementation. The process involved iterative technical discussions and stakeholder participation to ensure incorporation of pertinent issues emanating from the water and related sectors.

2. Policy, Vision, Mission and Principles

2.1 Policy direction and legal framework

The Sessional Paper No. 1 of 1999 on Water Resources Management and Development provides the policy direction on water resources management. It is complemented by Economic Recovery for Wealth and Employment Creation Strategy (2003-2007), Poverty Reduction Strategy Paper (PRSP-2000) and the Investment Plan of 2003 together with vision 2030. The policy direction emphasizes the following:

- Treating water as a social and an economic good;
- Preservation, conservation and protection of available water resources;
- Sustainable, rational and economical allocation of water resources;
- Supplying adequate amounts of water that meets acceptable standards for the various needs;
- Ensuring safe wastewater disposal for protection of public health and environmental integrity;
- Developing a sound and sustainable financial system, for effective and efficient water resources management, water supply and water-borne sewage collection, treatment and disposal.

The commitment of the Kenya Government to the water sector reforms is demonstrated by the enactment of the Water Act 2002, which provides a legal framework for the reform process and mandates WRMA to effectively manage water resources on the basis of catchment areas. This is achieved through the Catchment Management Strategy (CMS) as outlined in section 15 of the Water Act 2002.

In order for the strategy to be focused, WRMA has adopted a three tier approach, which entails setting the broad objectives (O), specifying Targets (T) and developing strategic Actions (A) for every strategy outlined in the CMS. The specified objectives are intended to enable reaching the goals of the specific strategy; the strategic actions aim at achieving the objectives while targets or indicators are used to measure the extent to which the goals have been achieved. The CMS is intended to be valid for a period of five years after which revision would be necessary to conform with environmental realities.

2.2 Vision and Mission

Vision

The vision of Rift Valley Catchment Area in management of water resources is to prudently manage catchment area guaranteeing access to adequate and quality water for all. This underscores water adequacy

in line with the national Vision 2030. It calls for the Rift Valley catchment area to conserve the catchment to ensure access to adequate quantity and quality water for all. The CMS will therefore be used as a tool to realise this vision.

Mission

The mission statement for Rift Valley Catchment Area conforms with the overall mission for WRMA to maintain synergy. It states that Rift Valley Catchment undertakes to manage, regulate and conserve water resources judiciously, involving stakeholders to enhance equitable allocation and environmental sustainability. Thus stakeholder participation is vital hence their commitment to observe honesty, courtesy, integrity, equity and accountability in management of water resources.

2.3 Overall Goals

The following are the five goals that Rift Valley catchment area will be looking forward to achieve within five years of implementation of this strategy:

- (i) Sustainable water management which includes the enhancement and protection of natural flow regimes and improvement of water quality;
- (ii) Enabling environment to protect the water ecosystem and habitat;
- (iii) Equitable water allocation which promotes effective use and gives priority to the maintenance of Reserve;
- (iv) Collaboration between WRMA and all stakeholders to achieve sustainable water resource management in the catchment;
- (v) Development of adequate and safe water resources infrastructure to meet the water security needs of region.

These goals were developed and agreed upon in a participatory manner and hence their realisation will be dependent on stakeholder participation.

2.4 Key Principles and Concepts

Concepts

The conceptual framework for catchment management strategy has been developed based on the vision through the mission, goals, objectives, targets to operational strategic actions from which implementable activities can be developed. The operationalisation of the strategy is dependent on the assets and strengths of the region which include.

- The Mau and Aberdare Ranges, Cherangani and Mt. Elgon as the major water towers;
- The internal drainage lakes Turkana, Baringo, Bogoria, Nakuru Elementaita, Naivasha, Solai, Magadi and Kamnarok as well as Rivers Turkwel, Kerio, Ewaso Ngi'ro South, Turasha, Njoro and Malewa;
- The biodiversity of the catchment area and the associated habitats
- The agricultural potential in upper reaches and commercial activities in urban centers
- The human resource base and their socio-economic activities

The approach adopted in this CMS with regard to water resources management, emphasizes vision setting in defining the stage for the process. This is followed by resource directed management which emphasizes resource class, the reserve and setting of quality objectives. The whole set up is linked to the source directed measures which emphasize water allocation and effluent discharge management.

Key Principles

This CMS is formulated within the fundamentals of Integrated Water Resources Management (IWRM) underpinned by the Dublin principles on water resources management. The principles have been elaborated into 7 operational principles outlined below for Rift Valley catchment to conform with the overall goals.

- Adopt the precautionary principle. The CMS seeks to make decisions based on sound science.
- Ensure equity. The CMS seeks opportunities for all sectors of the community to benefit equitably from the region's water resources.
- Conserve natural resources. The CMS seeks optimal use of the region's non-renewable resources, encouraging efficient use and the search for alternatives.

- Maintain ecological and socio-cultural values. The natural environment provides goods and services that are fundamental to life and economic activity, as well as intrinsic values.
- Enhance regional prosperity. The CMS seeks to enhance the regional economy, particularly through actions and new technologies that will benefit catchment assets and/or deliver benefits through the sustainable use of catchment assets.
- Maintain and improve water security. Advocates for improvements in water availability, access and reliability as well as water use efficiency.
- Strengthen understanding, participation and partnerships. Recognises the important role of the region's community in achieving the regional vision and goals.

3. Basin Characterization

3.1 Basin Characteristics

Rift Valley Catchment Area is situated within the Great Rift Valley part of Kenya and comprises the following districts: Turkana North, Turkana South, Turkana Central, North Pokot, Pokot Central Pokot East parts of Pokot West, Baring North, Baringo, Koibatek, Nakuru North, Nakuru South, Nakuru Central Naivasha, Molo, Narok North and South, parts of Keiyo, parts of Laikipia, parts of Laikipia West, parts of Trans-Nzoia West, parts of Marakwet, parts of Kajiado, parts of Kiambu and parts of Nyandarua. It covers a total area of approximately 130,452km².

However, management of water resources is oriented to Management Units (MUs) which are drainage basin based and are static as oppose to the dynamic administrative district boundaries. The Catchment Area covers a total area of approximately 130,452km², with an estimated population of about 4.1 million (2006.) Rift Valley being the bread basket of Kenya, the population is mainly engaged in farming activities for their livelihood.

The principal features include the Mau and Aberdare Ranges, Cherangani hills and Mt. Elgon as major water towers. The catchment area is an inland drainage basin hosting lakes Turkana, Baringo, Bogoria, Nakuru Elementaita, Naivasha, Solai, Magadi and Kamnarok all of which are saline except Lake Naivasha. The lakes are habitats of valuable biodiversity and hence many are designated as Ramsar Sites.

Natural catchment conditions

The catchment receives bimodal type of rainfall with a mean annual rainfall of 562mm. It is a water scarcity area with water demand far exceeding available surface water resources while use of groundwater is limited by its chemical composition (high fluoride levels and salinity in some areas). The catchment can be divided into 3 distinct zones, the Upper zone comprising Mau East ranges (Maasai Mau forest, Sururu and Likia), Aberdare Ranges, Eastern side of Cherangani Hills (Embobut forest) and Tugen Hills (Lembus); the middle zone comprising the Kinangop plateau dissected by Malewa, Turasha and Marmanet rivers; and the lower zone comprising the floor of the Rift Valley and flood plains extending up to Lakes Turkana and Natron.

Due to intensive agriculture, creation of settlements and urbanisation, the catchment has been grossly degradation worsening the water scarcity situation and contributing both point and non-point sources pollution

3.2 Issues, Challenges and Potentials

Issues and Challenges

The issues and challenges encountered in Rift Valley catchment area can be summarised but not limited to the following:

- Soil erosion, sedimentation and other forms of degradation of water resources including wetlands
- Deforestation of water towers;
- Cultivation of riparian areas and degradation of river banks;
- Catchment degradation
- Water scarcity (decline in river flows and poor yielding boreholes)
- Degradation/pollution of water resources
- Water use conflicts
- Encroachment into water towers and wetlands;
- Quarrying and mining
- Illegal and over-abstraction of water

- Inefficient water use
- Uneven distribution of water resources in time and space.

Potentials

Rift Valley has high potential among other for: -

- Agriculture and livestock production;
- Industrial development;
- Tourism development;
- Floriculture and horticulture development;
- Fisheries development;
- Geothermal power production;
- Mining;
- Research on biodiversity

PART II: STRATEGIES FOR CATCHMENT MANAGEMENT

4. Classification – Management Units

This chapter presents management approaches that are considered appropriate for progressive improvement of the catchment. The basis for determining the management units for CMS is outlined and the water resources within the catchment classified in terms of quality for equitable allocation for various uses.

4.1 Development of Management Units

The Catchment Management Units (CMUs) are spatial areas with similar resource management issues. They are developed based on drainage characteristics and similarity in issues and challenges associated with management of water resources. Based on this criteria, 10 CMUs were delineated for Rift Valley catchment area. To enhance effectiveness in management of water resources, the CMUs are managed from specific sub-regional offices of WRMA.

The Objectives and Targets of for CMU classification

Objectives

- Classify the water resources within agreed management zones
- Determine the measures necessary to achieve the Resource Quality Objectives

Targets

- The class of water resource is set
- The Resource Quality Objectives (RQOs) are set

4.2 Water Resource Classification System

The water resource classification system is developed based on three elements namely Ecological (E), Livelihood (L) and Commercial (C). These elements are used to describe the Water Resources Management Units (WRM Units) as outlined below.

- Ecological (E) WRM Units: are areas with almost natural ecological characteristics. The focus for water resources management is the protection unit for water catchment.
- Livelihood (L) WRM Units: are areas with predominantly rural settlement with dominant small scale subsistence practice. Water resources management in this unit involves equitable allocation and protection of water resources.
- Commercial (C) WRM Units: are typically urban and/or industrial agglomeration areas including their peri-urban. Water resources management in these units mainly focuses on protection of the resource.

4.3 Strategic Actions for Management Units Classification

The following are the strategic actions necessary to achieve the targets formulated above.

Strategic actions

- Classify surface water resources spatially
- Classify groundwater resources & springs spatially
- Set the Resource Quality Objectives (RQOs) and test them in pilot areas
- Ensure that Management Units satisfy management requirements

5. Water Balance and Water Demand Management

This chapter provides the status of water availability in the catchment versus water demand. Some of the vital components of

water balances is the Reserve and future water demands. The information is important in identifying water stress areas and hence support development of water storage and water allocation plans.

5.1 Water Balance Reconciliation

One important purpose of water management is to match or balance the demand for water with its availability, through suitable water allocation arrangements among the different water uses.

The goals and objectives of water balance are as follows:

Goal

Equitable water allocation which promotes effective use and gives priority to the Reserve

It is generally recognised, that equitable water allocation needs to be based on a reliable estimate of the water balance. To this effect, the objective below has been formulated.

Objectives

- (i) Investigate water balance and find reconciliation solution

The targets which have been set by the catchment as a measure for the achievement of the objectives are as follows

- To provide timely, sufficient and reliable water balance for Rift Valley catchment area
- Assess the occurrence of deficit and develop priorities for reconciliation
- Improve assessment of the reserve

5.2 Strategic Actions for Water Balance and Demand Management

The strategic actions necessary to achieve the targets are:

- Assess the availability of natural water resource quantity
- Assess the actual use in detail for pilot areas
- Assess the actual demand in detail for pilot areas
- Develop future baseline scenarios
- Develop scenarios for reconciling water requirements with available resource to address deficits including transfer options
- Review and update the methodology for better water balancing

6. Water Allocation and Water Use Management

This section outlines the strategies for water allocation and compliance to Water Resources Management Rules 2007 in Rift Valley catchment area. It emphasizes collaborative intervention with stakeholder participation to ensure equitable allocation and enforcement of water use charges.

6.1 Water Allocation Planning

Water allocation planning is undertaken to ensure equitable allocation of water among the various users. The goals for undertaking water allocation planning and the objectives for achieving these goals are:

Goal

- Equitable water allocation which promotes effective use and gives priority to the Reserve

Objectives

- To ensure equitable allocation and regulation of water use;
- To meet the economic and social development objectives through sustainable management of water resources including their proper allocation;
- To regulate and control the use of water resources;
- Implement solutions for reconciling water supply and demand;

The main instrument to guide water allocation is the Water Allocation Plan (WAP). The plan takes into account the interaction between upstream and downstream water users. This includes ploughing back resources upstream to sustain management efforts to ensure perennial availability of water for all dependants.

Targets developed for water allocation planning include the following

- (a) Water abstraction permit system in place to ensure lawful water use;
- (b) Water allocated is used sustainably, rationally and economically amongst competing users taking a pro-poor approach;

- (c) Increased volume of recycled water used in the catchment;
- (d) An allocation criteria for equitable utilisation of water in the catchment developed;
- (e) Designed comprehensive operational plans for harmonising abstraction records;
- (f) Effective metering, monitoring and compliance is in place;
- (g) Identify areas and level of over-allocation and forestall over-allocation.

6.2 Implementation of the water allocation system and use management

The implementation of water allocation and use management is achieved through permitting and water use system which is structured into classes depending on quantity to be abstracted. The processing of the allocation is managed through stakeholder involvement. These include the Water Resources Users Associations (WRUAs) and Catchment Area Advisory Committees (CAACs) as well as Water Resources Management Authority (WRMA) Regional and National offices. Larger abstractors require more institutional involvement in processing than small abstractors.

6.3 Strategic Actions for Water Allocation Planning

The following are the strategic actions necessary to achieve the targets formulated above.

- Assessment of water resources;
- Identification of major water use/users;
- Development of allocation plan (including thresholds for sub-catchments and categorising abstractors);
- Operationalising water abstraction permit system;
- Development of enforcement plan;
- Development of a roll out plan for water use charges;
- Promote water conservation measures and water use efficiency through awareness campaigns;
- Cross-checked implementation of other CMS activities such as awareness creation;
- Train staff on permitting processes;
- Enforce installation of meters at water abstraction points;
- Permit system put in place and applications processed promptly;
- Development of water allocation plan.

7. Water Resource Protection

This chapter describes the approach and options adopted in order to protect the water resources from further deterioration and restore their natural status.

7.1 Status of Water Resources in Rift Valley Catchment and Protection Measures

The focus of WRMA in this chapter is to control the water resources in the catchment in respect of quantity and quality. This relates closely to the determination of the Reserve. The Reserve determines the minimum quantity and quality of the water resource that is set aside for basic human and environmental uses.

The overall goal in protecting water resources is to ensure

- Sustainable water management which includes the enhancement and protection of natural flow regimes and improvement of water quality.

The objectives developed to enable achievement of the goal are:

- (i) To ensure that Reserve is met at all times
- (ii) Ensure protection of water resource and minimize negative impacts of waste discharge and disposal

The protection of the resource involves prevention of pollution of water resources which would otherwise cause direct or indirect alteration of the chemical, physical, biological, or thermal properties of the water resource so as to make it:

- Less fit for any beneficial purpose for which it is or may reasonably be expected to be used for.
- Harmful or potentially harmful to.
- (i) The welfare, health or safety of human beings;

- (ii) Any aquatic, non aquatic life or property;
- (iii) The environment

Regarding pollution from point and non-point sources, the strategy proposes to address them integratively.

The main point sources of pollution in Rift Valley Catchment are:

- (i) Agro-based industries (coffee, tea factories and sugar);
- (ii) Livestock based industries (slaughter houses, milk plants, tanneries);
- (iii) Sewerage works in large towns;
- (iv) Car washing sites in towns;
- (v) Mining and quarrying.

To enhance the protection process, WRMA has developed a three structured approach by classifying the surface water resources as follows

- (i) Satisfactory : no immediate stress, pressure or threat
- (ii) Alert: stress, pressure or threat identified or anticipated
- (iii) Alarm: water levels declining, water quality deteriorating (stress, pressure or threat identified)

The classification will enable prioritising interventions. As the status of the water resources improves, the classes will be evaluated and redefined to reflect the achievements.

The groundwater resources on the other hand are classified according to their perceived importance and in categories shown below:

- Strategic aquifer: aquifers used to supply significant amounts/ proportions of water to an area where there are no alternatives, or where alternatives would take time and high investments to develop.
- Major aquifer; high-yielding aquifers with good quality water.
- Minor aquifer; moderate-yield aquifers with variable water quality.
- Poor aquifer; low-yield aquifers with poor to reasonable quality water.
- Special aquifer; aquifers or parts of aquifers designated "special aquifers" by the Authority.

The targets developed to ensure water resources protection are

- All water bodies classified and RQOs defined
- Reserve quantity defined for all surface water bodies
- Reserve quantity defined for all strategic and major GW aquifers
- System for Reserve Quality defined and applied to water bodies
- Effluent regulations enforced for all Category C and D polluters
- District Environmental Committees fully sensitised on WRM Rules 2007
- System of water use charges for effluent load defined
- Codes of Practice for Effluent Discharge developed & disseminated in region
- Pricing strategy for waste discharge developed

7.2 Strategic Actions for Protection of Water Resources

The following are the formulated strategic actions necessary to achieve the targets for protecting water resources.

- Assess quality status of surface water resource
- Assess quality status of ground water resource(aquifers)
- Assess polluters with major negative impact on water resources quality
- Develop collaborative engagements with polluters to comply with discharge standards
- Classify the water resources quality(Implement reserve and RQOs) in pilot areas
- Formulate develop and disseminate code of practice for EDCPs
- Review and evaluate EIA/EA reports for all projects /programmes with significant impacts on water resource

- Carry out inspection, monitoring and data gathering on solid and liquid waste
- Training on water resources quality assessment.
- Define and interpret classification system and RQOs for RVCA region
- Analysis of hydrological records
- Analysis of groundwater records & aquifer characteristics
- Develop collaborative arrangements to ensure category C and D polluters comply with regulations
- Capacity building of District Environmental Committees
- Application of Reserve quality system in pilot areas
- Facilitate formulation codes of practice for effluent discharge
- Provide regional contributions to system of water use charges for effluent load
- Provide regional contributions and dissemination of codes of practice for effluent discharge
- Pollution prevention guidance
- Identify and prioritise stressed water resources
- Incorporating environmental impact assessment (EIA) in all development projects/programmes with significant impacts on water resources;
- Strengthening inspection, monitoring and data gathering on municipal wastewater and solid waste disposal
- Carrying out public awareness campaigns on water, sanitation and hygiene
- Formulating water quality standards for different classes of water resource
- Controlling nutrient, sediments and pollution discharge into water bodies

8. Catchment Protection and Conservation

This chapter provides details regarding the strategy for catchment protection and conservation. The approach is based on the zoning of the catchment for ease of developing interventions compatible with particular zones.

8.1 Catchment Degradation and Management Focus

Human intervention for socio-economic gains without due regard to environmental management has caused accelerated degradation which has impacted negatively on water resources.

The goal developed to ensure catchment protection is:

Enabling environment to protect the water ecosystem and habitat

The two objectives developed to ensure that the goal is achieved are

- (i) To integrate protection and conservation approach together with stakeholders
- (ii) To attain protection and conservation of catchment assets

To address these issues and to reverse the trend, emphasis should be put on two issues namely *conservation* and *protection* of the water resources. In this regard, the two issues should be addressed in terms of a process rather than procedure. Therefore, the protected areas as well as the conservation areas should have relevant approaches and strategies to effectively address change in land use and catchment degradation. To enhance protection, land use types / protected areas have been identified broadly as follows

Protected areas – water towers / forests: Protected areas are those areas which are or which need to be reserved and legally protected for purposes of water catchment.

Groundwater conservation areas: This is mainly in the middle lowlands and the coastal region where it is the main source of water since the region is semi-arid.

Springs and wetlands: Springs and wetlands form sources of water for streams and maintain stream-flow during dry seasons.

Riparian zones: These are areas around water bodies such as lakes, rivers, pans, wetlands and dams. They protect the water bodies by filtering sediments from incoming runoff.

Farmlands: These areas are major potential sources of sediments especially when farming is done conventionally.

Rangelands are areas which have fragile ecosystems and high potential of surface runoff and flash flood generation.

Shoreline zones support specific and unique ecosystems to enhance biodiversity hence the need for conservation. They are prone to degradation through flooding and salt accumulation.

The targets which have been set to be achieved through catchment protection are

- Integrated and coordinated protection of water towers and surface water
- Integrated and coordinated management of wetlands and shoreline ecosystems
- Integrated groundwater and spring rehabilitation and protection
- Develop in conjunction with stakeholders conservation and protection plans to minimize catchment degradation

8.2 Integrated and Coordinated Protection of the Catchment Land

Catchment protection requires participation of various stakeholders. The process involves the steps outlined below

- Preparation of inventories and general maps
- Assess available information together with key partners
- Delineation and prioritisation of catchment land areas
- Catchment zoning and management cooperation in the zones
- Planning and facilitation of land protection.
- Provision of advisory services to implementing agencies
- Provide financial and capacity building support
- Implement protection activities
- Monitor use and assess the effect.

8.3 Strategic Actions for Catchment Protection and Conservation

The strategic actions necessary to achieve catchment protection are:

- Complete inventory, surveys, maps etc for all protection and conservation areas
- Prioritization and delineation of the strategic and major areas for conservation and protection
- Agreed zoning of the catchment areas for integrated protection and conservation management
- Rehabilitation of groundwater conservation areas
- Protect river bank reserves to maintain environmental flow
- Initiate and support to rehabilitate and protect pilot water catchment areas
- Harmonise programmes in rehabilitation of land use, agriculture, forests, wildlife and settlement
- To prevent that the identified priority areas from being allocated against the public interest
- Develop incentive plans to encourage water and catchment management

9. Institutional Development Support

This chapter provides information on the WRMA and WRUA development and proposes mechanisms for institutional collaboration and outlines measures required to enhance the capacity of different institutions to perform their roles for improved integrated water resources and catchment management.

9.1 Institutional Roles

Institutional strengthening is key for integrated management of water resources. The WRMA institutions include the National, Regional and Sub-regional offices. The others are Catchment Area Advisory Committees (CAACs) and Water Resources Users Associations (WRUAs) which provide avenues for the participation of stakeholders and water users in management of water resources.

The goal below has been developed to ensure stakeholder participation

The WRMA collaborates with all stakeholders to achieve sustainable water resource management in the catchment

To achieve the goal above, the following objectives have been developed

- (i) Institutional arrangements for integrated water resource management are in place at all levels
- (ii) Institutions are supported and empowered
- (iii) WRMA coordinating institutions for effective water resource management

Stakeholder participation in water resources is generally difficult to realise and this is associated with

- Insufficient resources
- Inadequate community engagement
- Inadequate knowledge and skills
- Lack of co-governance
- Lack of integrated concept for water resource management
- Lack of public awareness of the values of the catchment assets

It is therefore imperative that these deficiencies need to be addressed in order to enhance stakeholder participation.

The following are the targets necessary to ensure achievement of the goal and the objectives

- WRMA offices in the catchment to be fully operational;
- All key catchment management stakeholders participating in and agreeing on CMS financing and implementation;
- All government agencies with key roles in catchment management cooperate in implementing the CMS in their annual work programs;
- The WRUAs have formally adopted the CMS as a reference document, reflecting relevant sections of it appropriately in their planning schemes and/or implementing relevant actions through their programs;
- To increase the number and geographic coverage of WRUAs participating in catchment management in the region, and increase the active membership of community groups;
- Increase community awareness and understanding of the condition of catchment assets and associated trends (unsustainable consumption patterns);
- Stakeholders manage water resources effectively and sustainably through participatory approach;
- Progressive improvement in capacity of water resource management at all levels;
- Supporting formation of new WRUAs

9.2 Participatory water Governance

The strategy on stakeholder participation aims at optimizing stakeholder involvement in water resources management. In this context, there is need to encourage corporate governance as well. At local level, the effectiveness in management of water resources is envisaged to be realised through WRUA participation by implementing the Sub-Catchment Management Plans (SCMPs). The SCMPs are developed from the Strategy through stakeholder participation. These SCMPs are developed through the main stages listed below:

- (a) Planning of overall process
- (b) Mobilization of stakeholders
- (c) Introduction to SCMP process
- (d) Problem identification and analysis
- (e) Collect data, provide information
- (f) Solution identification and analysis
- (g) Develop Sub-Catchment Management Plan (SCMP)
- (h) Implement SCMP

9.3 Sub-Catchment Management Plans and Strategic Actions

The development of SCMPs require adequate data. Since these may not be available at the beginning but are expected to improve from time to time, the SCMPs will be revised periodically preferably annually commensurate with the data updates.

The strategic actions formulated to achieve the targets are:

- Operate WRMA offices in the catchment effectively;

- Carry out training needs assessment for next 5 years;
- Carry out identified training;
- Identify hot spots and facilitate formation of WRUAs;
- Capacity build WRUAs to undertake water resource management;
- Support development of SCMPs;
- Support Implementation of SCMPs (provide technical support to WRUAs);
- Develop regional communication mechanisms to enhance stakeholder participation;
- Implementation of communication mechanism between stakeholders;
- Active participation and effective inputs in integrated water resource management at sectoral cooperation
- Joint projects /studies /new agreements with stakeholders
- Encourage research in water and catchment management

10. Water Infrastructure Development

This section provides details on the strategy for infrastructure development. Rift Valley catchment is in a low rainfall potential area with periodic droughts and extreme water scarcity. Therefore storage structures should aim at increasing availability and reliability of water resources both spatially and temporally.

10.1 Development of Storage

The goal for development of storage is to ensure:

Sufficient and safe water resource infrastructure to meet the water security needs of the dependants

The objectives to be realised in storage development are:

- To prepare inventory and assessment of existing infrastructure;
- To develop Code of Practice for the water resource infrastructure development;
- To increase storage capacity and improve water security;
- To build capacity to regulate storage development and disaster control.

The issues related to storage in Rift Valley catchment area focus mainly on water scarcity. WRMA will adopt the following strategies to increase yield and ensure safety measures in RVCA:

- Assess storage needs and desire;
- Decentralise the development of storage by mobilising resources at the individual, community and commercial levels;
- Identify stakeholders and define the role of each player;
- Develop implementation plans in a participatory manner;
- Review permit requirements to encourage more investment on storage;
- Consider strategic storage at sub-catchment level to meet various competing demands;
- Lobby for incentives for development of storage infrastructure e.g. zero rate VAT on plastic domestic storage tanks;
- Scale up action on strategic dam construction;
- Encourage water storage at household level;
- Facilitate the construction of check-dams;
- Encourage Public Private Partnership to increase storage;
- Lobby the local authorities to pass bylaws requiring roof catchment and/or storm water retention facilities;
- Ensure that existing and future storage structures remain safe through annual inspections.

The targets that were set for infrastructure development are as follows:

- Development of sufficient storage to reduce water deficit;
- Strengthened WRMA capacity able to handle demand for WRM Infrastructure
- Development of flood management plans for Perkerra and in Naork
- Development of Codes of Practice and stakeholder acting according to their mandates

- Inventory of all WRM infrastructure by location and storage capacity

10.2 WRMA Capacity to Regulate Water Resource Development

The WRMA mandate with respect to the development of storage is:

- To identify the need for storage. This emerges in cases where demand for water cannot be met by non-regulated flows or damage caused by floods requires control measures upstream. Storage of flood flows is one of the options of making water available to meet demands of mitigate impact of floods;
- To identify storage sites and to undertake feasibility studies of the sites to demonstrate the potential of the site to meet the water demands or in cases of flood mitigation, the capacity of the sites to attenuate the floods;
- To develop business plans for storage sites to demonstrate the investment potential for their development;
- To facilitate the development of water storage infrastructure;
- To regulate the development and operation of storage infrastructure through permits and other regulatory instruments, including the inspection of storage facilities either during or after construction.

The priority areas that have been identified with respect to storage development are:

- Improving the reliability of the resource for public water supplies;
- Ensuring the Reserve for over-abstracted rivers where the Reserve is threatened or violated and where water-use conflicts are related to availability of the resource. In this case, storage should be targeted for those who are causing the rivers to be over-abstracted;
- Rangelands where dispersed storage facilities provide access to pasture;
- River valleys where floods cause damage.

10.3 Strategic Actions for Storage Development

The strategic actions formulated for storage development are:

- Identification of priority areas for storage development and water transfers;
- Development and marketing of feasibility / business plans to meet key storage needs;
- Institution capacity developed to initiate storage infrastructure development;
- WRMA capacity enhancement on regulatory and technical aspects of water resource infrastructure development;
- Assist stakeholders in constructing rainwater harvesting facilities, dams and pans, and exploring alternative water sources;
- Support planning, design and implementation of disaster control measures;
- Identification of priority areas for groundwater storage development;
- WRUA capacity developed to initiate groundwater storage infrastructure development;
- Dam safety risk registered and classified;
- Support to mechanisms for safe operation and effective maintenance of storage facilities;
- Support establishment of information exchange system for water related disasters;
- Inventorize existing water storage infrastructure.

11. Rights Based Approach / Poverty Reduction

This chapter identifies specific aspects of rights based issues that are water related and which can be taken into account within the context of the water resources management. It is envisaged that through political guidance and support, the rights of the vulnerable and disadvantaged groups to water will be upheld.

11.1 Cross Cutting Issues

The cross cutting issues to be incorporated in water resource management include:

- Human Rights,
- Conflict resolution,
- Poverty reduction,
- Water security,
- Good governance,
- Gender equity; and
- HIV/AIDS mainstreaming.

The overall goal for right based approach in water resources management is:

Ensuring equitable water allocation which promotes effective use and gives priority to the Reserve

The objective developed to ensure right based approach in water resources management is to ensure that:

Cross-cutting issues are integrated in water resource management

The target which has been set for enhancing right based approach is:

To use participatory tools to support Rights Based Approach and poverty reduction

11.2 Mainstreaming Cross Cutting Issues and Strategic Actions

The incidences of violation of water rights, conflicts, and pollution have dramatically increased due to increased competing uses of water. In addition to arbitration and legal mechanisms, avenues for resolution to ensure fair play will be created and supported by the region in the context of the catchment management strategy.

Strategic Actions for mainstreaming cross cutting issues are:

- Give priority to meeting basic human and ecological needs in water allocation;
- Capacity building for gender balanced CAACs and WRUAs;
- Implement work place HIV/AIDS policy;
- Establish complaints mechanism;
- Capacity building of vulnerable groups in accessing water.

12. Monitoring and Information Management

This chapter presents the strategy for ensuring that the water resources and the catchment monitoring systems provide timely reliable data and relevant information needed for catchment and water resource management. Therefore functioning monitoring network needs to be assured.

12.1 Monitoring Framework

The overall goal to ensure effective monitoring is that

- WRMA has the capacity to enable good management decisions based on reliable information

Monitoring will involve data collection, processing and information generation for decision making in management of water resources and its associated catchment attributes.

The objectives to enable achievement of water resources monitoring and assessment are as follows.

- To establish and maintain monitoring network and monitor water resources and provide information system;
- To provide reliable information for decision making in water resource management;
- To monitor and evaluate implementation of CMS.

Monitoring, evaluation and reporting are important elements of the monitoring cycle. Since a number of stakeholders are also interested in water resources information, the approach to monitoring should be holistic. In this context, the region will integrate regional catchment monitoring, evaluation, reporting and development of a strategic approach to assess:

- Baseline condition of the region's catchment assets;
- Trends in condition of the catchment assets, and the values they provide;
- Short-term and long-term threats and risks to the catchment assets;
- Effectiveness of actions in achieving goals and targets for the catchment assets and the ecosystem;
- Current and future use of the catchment assets;

- Progress in implementation of actions defined in the CMS.

The following targets are proposed for achieving the catchment monitoring objectives.

- Prioritised water resources management monitoring programs in place;
- Monitoring network for other key catchment assets in place;
- Reliable and complete data available for the catchment assets (provided by the prioritised monitoring network);
- Monitoring and tracking of action for water resources management implementation in place;
- Water resources management information system in place;
- The information based on reliable data used for catchment management.

In order to create impact in monitoring, the surface water stations have been categorised into national, management units, sub-management units and special stations in order of priority. Each category will provide information for specific management purpose. Apart from surface water, ground water and climate / weather data will be similarly monitored. Capacity building for effective monitoring is also emphasized.

12.2 Monitoring and Implementation

The implementation of the CMS also require monitoring. This is intended to be achieved through progress on strategic actions as overseen by the lead stakeholder for that particular action. Depending on the nature of the action, the activity therefore may involve planning and undertaking the action directly, or it might involve facilitating and coordinating others to participate in implementing the action and undertake monitoring participatorily. The key tool for monitoring the CMS will be the action implementation briefs.

12.3 Strategic Actions

The following are the strategic actions necessary to achieve the targets.

- Develop an agreed framework for integrated monitoring of catchment condition;
- Implement key water resource monitoring;
- Implement key catchment monitoring network and provide maps;
- Develop and implement remaining monitoring network for water resources assets;
- Procure modern monitoring equipment (surface water, groundwater, water quality);
- Operate and maintain the network;
- Prepare data needed for database development;
- Develop and carry out abstraction surveys;
- Ensure water quality monitoring, development and implementation of laboratory facilities;
- Develop and implement water resource information management system;
- Identify and agree on information needs of stakeholders and develop mechanisms for information dissemination and exchange;
- Maintain, operate and apply as appropriate water resource information management system;
- Ensure adequate training & capacity building of staff;
- Design and establish a WRM Action Tracking System / Database system;
- Review from time to time the information needs of all stakeholders.

13. Financing and Implementation

This section presents details regarding the WRMA approach to financing water resource management activities in Lake Victoria South catchment area. The chapter looks at both the financial needs of WRMA to implement its activities and the investment needs as a whole to ensure sustainable water resource development and management.

13.1 Financial Sustainability

Financial sustainability is intended to achieve self sufficiency in the region based on income generated by water use fees pursuant to the

Water Resources Management Rules 2007. In order to achieve this, the total financial requirements need to be assessed and a strategy on how the resources can be mobilized developed. To mobilise investments from the organisations, proper investment, planning and sound estimate of the revenues need to be developed. Since funding is also needed from external sources, the estimated total requirements need to be agreed within Sector Wide Approach (SWAP). Additionally, other opportunities such as public-private partnership modalities for provision of water resource management services will be explored.

The overall goal in water resources financing is:

- Financial sustainability to enable RVCA implement the CMS and other WRM activities

The objectives considered necessary to achieve the goal are as follows:

- To facilitate funding mechanisms and resource mobilization to implement stakeholder initiated water resource management activities
- To facilitate Public Private sector Partnerships opportunities in water resource management
- To ensure sufficient revenue is generated

Water is considered an economic good and its provision should be at a cost. This therefore calls for levying charges for water abstraction in its natural form to be commensurate with the amount abstracted. The amounts so generated will be ploughed back to meet the cost of water resources managements.

The following targets have been set for financial sustainability in water resources management

- Revenue collection increased annually by 30% over the next 5 years;
- WRUAs capacity improved and supported;
- Resource mobilised for implementation of CMS and other WRM activities in the catchment.

13.2 Financing Strategies

The strategic areas from which the region is targeting to mobilise funds include:

- Government of Kenya allocation: It is anticipated the Government will support the implementation of the strategic actions as documented in the CMS to ensure sustainability of water resources management;
- Part of the Revenue raised from user fees will be ploughed back to the region to support the implementation of the CMS;
- The region will support WRUAs to develop proposals to source for funds. The support institutions targeted include LATF, CDF, WSTF, NGOs and Private sector. WRUAs will also be encouraged to undertake entrepreneurship based on economic use of water to generate income;
- Development partners will be encouraged to support the implementation of the CMS as the reforms stabilise and to make the water resources management possible.
- Key partners will also be encouraged to commit resources with their programmes to support management of water resources. These partners include RDAs, WSBs, NIB, ALRMP and the private sector.

WRMA will undertake to develop a comprehensive business plan outlining its strategic positioning and avenues of raising revenue. This will include a comprehensive investment appraisal to clearly delineate sources of income and formulate a road map for financial sustainability. WRMA through MWI may need to make a case to the Ministry of Finance for various fiscal incentives to support WRM activities. This may include removal of VAT and import duty on dam construction, groundwater development equipment and raw materials for rainwater harvesting storage facilities.

In the light of mobilising resources, the following strategic actions have been formulated.

- Develop 5 year work plan and budget, consistent with water sector investment plan (SIP)
- Develop and implement roll-out plan for water use charges
- Prepare proposals to support SCMPs

- Mobilise resources to support SCMPs
- Identify and prepare projects in collaboration with the private sector.

RICHARD MUSANGI,
Chairman, Water Resources Management Authority.

Approved by

C. K. NGILU,
Minister for Water and Irrigation.

GAZETTE NOTICE NO. 9896

THE TRUST LAND ACT

(Cap. 288)

SETTING APART OF LAND

NOTICE is given that the land described on the schedule hereto has been duly set apart in accordance with the provisions of part IV of the Trust Land Act, for the purpose specified in the said schedule.

SCHEDULE

Place.—Kibanda Hasara.

Purpose.—Religious/Educational Purpose.

Area.—9.600 Ha. Approximately.

DESCRIPTION OF LAND

This land is situated approximately 6,200 meters to the South East of Mariakani Township the boundaries are demarcated on the ground and are described as follows: Starting from a point N3. Which is an Iron Pin Concrete from which Spot height 174 Spot Height 193 are 2810m and 2,700m distant on bearing of 344° 00'00" and 183° 45'00" respectively.

Thence for 74.15m on a bearing of 56° 04'04" to point N 4, thence for a distance of 20.08m on the bearing of 151° 26'52" to point N 5, thence for a distance of 42.19m on the bearing of 65° 01'56" to point N 6, thence for a distance of 52.14m on the bearing of 75° 46' 00" to point N 7, thence for a distance of 106.43m on the bearing of 27° 54' 13" to point N 8, thence for a distance of 48.94m on the bearing of 39° 02'44" to point N 9, thence for a distance of 112.19m on the bearing of 142° 11'00" to point N 10, thence for a distance of 75.37m on the bearing of 98° 13' 21" to point N 11, thence for a distance of 83.81m on the bearing of 91° 54' 28" to point N 12, thence for a distance of 80.47m on the bearing of 126° 00'40" to point N 13, thence for a distance of 33.39m on the bearing of 171° 25' 24" to point N 14X, thence for a distance of 81.89m on the bearing of 189° 15' 32" to point N 16X, thence for a distance of 89.11m on the bearing of 262° 54' 56" to point N 15X, thence for a distance of 35.56m on the bearing of 256° 27' 08" to point N 17, thence for a distance of 69.52m on the bearing of 320° 33' 46" to point N 18, thence for a distance of 48.31m on the bearing of 269° 26' 33" to point N 19, thence for a distance of 25.23m on the bearing of 199° 25' 34" to point N 22, thence for a distance of 32.11m on the bearing of 207° 12'12" to point N 15, thence for a distance of 103.00m on the bearing of 126° 17' 37" to point N 14, thence for a distance of 80.24m on the bearing of 126° 36' 03" to point N 20, thence for a distance of 379.88m on the bearing of 305° 53'24" to point N 3.

All bearings given above are magnetic. A plan of the area may be inspected at the office of the District Commissioner.

Dated the 10th September, 2009.

Z. A. MABEA,
Commissioner of Lands.

GAZETTE NOTICE NO. 9897

THE REGISTRATION OF TITLES ACT

(Cap. 281, section 71)

ISSUE OF A PROVISIONAL CERTIFICATE

WHEREAS Chandrakant Natwarlal Gor, the legal attorney of Bhupinder Singh Chana, of P.O. Box 11932-00400, is registered proprietor lessee of that piece of land known L.R. No. 209/90/9, situate in the city of Nairobi, by virtue of a lease registered as No. I.R. 80481/1, and whereas sufficient evidence has been adduced to show that the said lease issued thereof has been lost, notice is given that after the expiration of ninety (90) days from the date hereof, I shall issue a provisional certificate of title provided that no objection has been received within that period.

Dated the 18th September, 2009.

(Cap. 300, section 33)

REGISTRATION OF INSTRUMENT

WHEREAS (1) Paul Nyongesa Ochieng and (2) Linet Ajiambo Ochieng, are the registered proprietors of that piece of land known as Samia/Butabona/1589, situate in the district of Busia, and whereas the High Court of Kenya at Busia, has ordered that the said piece of land be cancelled and the original title be reinstated to the original owner, and whereas all efforts made to compel the registered proprietors to surrender the land title deed issued in respect of the said piece of land to the land registrar have failed, notice is given that after the expiration of thirty (30) days from the date hereof, provided no valid objection has been received within that period, I intend to reinstate the said land title deed and proceed with the registration of the documents therein.

Dated the 18th September, 2009.

F. M. O. MAKORI,
Land Registrar, Busia/Teso Districts.

GAZETTE NOTICE NO. 9939

THE REGISTERED LAND ACT

(Cap. 300, section 33)

REGISTRATION OF INSTRUMENT

WHEREAS Daniel Maina Kibage, of Embu in the Republic of Kenya, is registered proprietor of that piece of land known as Kyeni/Kigumo/911, containing 2.20 hectares or thereabout, situate in district of Embu, and whereas the resident magistrate's court at Embu, in civil suit No. 81 of 1988, has ordered the said piece of land be registered in the name of the defendant, Sammy Njeru Kivuti Rupia, and whereas the executive officer has in pursuance to an order of the said court executed a transfer of the said piece of land in favour of Sammy Njeru Kivuti Rupia, and whereas all efforts made to compel the registered proprietor to surrender the land title deed issued in respect of the said piece of land by the land registrar have failed, notice is given that after the expiration of thirty (30) days from the date hereof, provided no valid objection has been received within that period, I intend to dispense with the production of the said land title deed and proceed with the registration of the said instrument of transfer and issue a land title deed to the said Sammy Njeru Kivuti Rupia, and upon such registration the land title deed issued earlier to the said Daniel Maina Kibage, shall be deemed to be cancelled and of no effect.

Dated the 18th September, 2009.

J. M. MUNGUTI,
Land Registrar, Embu District.

GAZETTE NOTICE NO. 9940

THE REGISTERED LAND ACT

(Cap. 300, section 33)

REGISTRATION OF INSTRUMENT

WHEREAS Rosemary Waringa Kago (deceased), is the registered proprietor of that piece of land known as Githunguri/Githunguri/1943,

containing 0.0235 hectare or thereabouts, situate in the district of Kiambu, and whereas the senior resident magistrate's court at Githunguri, in succession cause No. 55 of 2007, has issued grant of letters of administration to (1) Elizabeth Wanjiku Waringa and (2) Joseph Kimama Ngugi, and whereas the said land title deed issued earlier to the said Rosemary Waringa Kago (deceased), has been reported missing or lost, notice is given that after the expiration of thirty (30) days from the date hereof, provided no valid objection has been received within that period, I intend to dispense with the production of the said land title deed and proceed with the registration of the said instrument of R.L. 19 and R.L. 7, and issue a land title deed to the said (1) Elizabeth Wanjiku Waringa and (2) Joseph Kimama Ngugi, and upon such registration, the land title deed issued earlier to the said Rosemary Waringa Kago (deceased), shall be deemed to be cancelled and of no effect.

Dated the 18th September, 2009.

J. K. NDIRANGU,
*Land Registrar,
Kiambu District.*

GAZETTE NOTICE No. 10083

THE UNIVERSITIES ACT

(Cap. 210 B)

THE UNIVERSITIES (ESTABLISHMENT OF UNIVERSITIES)
(STANDARDIZATION, ACCREDITATION AND SUPERVISION)
RULES, 1989

(L.N. 56 of 1989)

INOORERO UNIVERSITY

ISSUANCE OF LETTER OF INTERIM AUTHORITY

PURSUANT to the provisions of Rule 9 of the Universities (Establishment of Universities) (Standardization, Accreditation and Supervision) Rules, 1989, the Commission for Higher Education on the 18th Day of September, 2009 issued a letter of interim authority for the establishment of Inoorero University as a private university in Kenya from the date of issue.

Particulars of the University:

Name.—Inoorero University.

Postal Address.—P.O. Box Number 60550 - 00200, Nairobi, Kenya.

Location.—Inoorero Centre, Forest Road, Parklands, Kenya.

Sponsorship.—Inoorero University Trust Registered Trustees.

Academic Character.—The University will distinguish itself as the "Enterprise University" whose main drivers will be technology, market relevance, creativity, innovation and entrepreneurship. The course delivery and administration will be technology enabled to promote access in higher education while ensuring quality.

Inoorero University will seek to build practical job creation skills through incubation of viable student enterprises developed in the process of learning and research while at the University. The University will therefore promote entrepreneurial culture and partner with industry.

Dated the 14th September, 2009.

KIHUMBU THAIRU,
Chairman.

E. M. STANDA,
Commission Secretary.

GAZETTE NOTICE NO. 10084

THE ADVOCATES ACT

(No. 18 of 1989)

LIST OF ADVOCATES WHO HAVE OBTAINED PRACTISING
CERTIFICATES FOR THE CURRENT YEAR BEFORE 1ST FEBRUARY, 2009

Abdalla, A. N.	Nairobi	Anjarwalla, K. S.	Nairobi
Abdullahi, A. M.	Nairobi	Anyango, A. R.	Nakuru

GAZETTE NOTICE NO. 10085

THE CO-OPERATIVE SOCIETIES ACT

(No. 12 of 1997)

INQUIRY ORDER

WHEREAS I have on my own accord, decided that an inquiry be held into the by-laws, working and financial conditions of Sukari Sacco Society Limited (CS/2185), and in accordance with sections 58 and 73 of the Co-operative Societies Act.

Now therefore, I authorize (1) Luke Omwansa, Senior Co-operative Officer, Nairobi North District and (2) Nickson M. Baya, District Co-operative Auditor, Taita Taveta District, to hold an inquiry within twenty-five (25) days from the date thereof at such place and time as may be expedient and duly notified by them.

The attention of all officers and members of the society is directed to the following sections of the Co-operative Societies Act.

Section 60 (1)—Cost of inquiry.

Section 60 (2)—Recovery of costs of expenses.

Section 73—Surcharge.

Section 94—Offences.

Dated the 31st August, 2009.

F. F. ODHIAMBO,
Commissioner for Co-operative Development.

Finance Director,
Imagine IMC Limited.

GAZETTE NOTICE NO. 9858

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED UP-GRADING OF
RANG'ALA-SIAYA-BONDO-OWIMBI-LUANDA
KOTIENO (C28 /0246) AND D246/E126 JUNCTION-
MANYWANDA-MISORI (E126/E139) ROADS

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Up-grading of Rang'ala-Siaya-Bondo-Owimbi-Luanda Kotieno (C28 D/246) and D246/E126 Junction-Manywanda-Misori (E126/E139) Roads.

The proposed project will involve upgrading to bitumen standards of Rang'ala-Siaya-Bondo-Owimbi-Luanda Kotieno (C28 /D246) and D246/E126 Junction-Manywanda-Misori (E126/E139) Roads. The road traverses two districts, Siaya in the north and Bondo in the south. The road is about 102 km. long and provides access into the district headquarters of Siaya and Bondo.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil erosion	<ul style="list-style-type: none"> Control earthworks. Install drainage structures properly. Install erosion control measures. Landscape embankments and re-vegetate gravel sites. Management of excavation activities. Damaged drainage systems should be rebuilt or rehabilitated.
Air pollution	<ul style="list-style-type: none"> Control speed of construction vehicles. Prohibit idling of vehicles. Residences should be 500m from downward wind of asphalt mixing sites. Water should be sprayed during the construction phase on excavated areas, deviations routes, and temporary access roads leading to borrow pits, and asphalt mixing sites. In filling sub-grade water spraying is needed to moisten the material and to assist in compaction. After compaction, water spraying should be regular to prevent dust.

Possible Impacts

Mitigation Measures

Noise pollution

- Plant shrubs and trees along road and on approach to the towns (e.g. Acacia sp. and Lantana sp.).
- Regular maintenance of plant and equipment.
- Impose speed limits for all vehicles, especially at the trade centers and busy junctions.
- Sensitize workforce.
- Supervise construction traffic.
- Sensitize drivers of construction vehicles.
- Maintain plant and equipment
- Workers in the vicinity of high level noises to wear safety & protective gear
- Impose speed limits for all vehicles, especially at towns and settlements

Water pollution

- Sensitize motorists/road users
- Incorporate erosion control measures
- Works on culverts to be done in the dry season.
- Solid waste at construction camps, and equipment maintenance workshops should not be dumped in or near any water bodies (rivers, streams, etc.) along the project road or area of influence.
- Proper handling, storage and disposal of oil and oil wastes.
- Proper disposal of wastewater/sewage at Contractor's/ workmen's camps.

Oil pollution

- Proper storage, handling and disposal of oil and oil waste.
- Maintain plant and equipment.
- Maintenance works of construction vehicles should be carried out at the Contractor's camp.

Construction camp

- Sufficient measures will be taken in the construction camps i.e., provision of garbage bins and sanitation facilities. If septic tanks are installed, waste will be cleared periodically.
- Special attention shall be paid to the sanitary condition of camps.
- Garbage will be disposed of periodically.
- Sensitization campaign on STDs will be mandatory at the camps and in the community.

Deviations

- Plan deviations.
- Adhere to road reserve if possible.
- Obtain permission from inhabitants if deviation goes beyond right of way.
- Reinstate deviations (and old tracks) to original condition.
- Management of traffic along deviations.
- Pay compensation for crops/property removed/destroyed by deviations on inhabited land
- Monitor rehabilitation of deviations

Road safety

- Install warning signs and speed bumps on approach to the towns and settlements.

Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> • Provide parking bays for heavy goods vehicles and public transport vehicles. • Install fencing along the carriageway at major urban centers. • Enforce speed limits. • Monitor road accidents. • Provide shoulders along the road to allow livestock to use these instead of the road

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Nyanza Province.
- (d) District Environment Office, Siaya District.
- (e) District Environment Office, Bondo District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,
National Environment Management Authority.

GAZETTE NOTICE NO. 9859

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED REFURBISHMENT, RE-
COMMISSIONING AND OPERATION OF FURFURAL
REFINERY PLANT AT ELDORET MUNICIPALITY
INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed refurbishment, recommissioning and operation of furfural refinery plant.

The project entails refurbishment, re-commissioning and operation of the dormant of Bio-Refinery plant at Eldoret. The proposed project will involve manufacture of furfural, acetic acid and formic acid using maize cobs as raw materials. The project is located on L.R. No. Eldoret Municipality/Block 10/34, Eldoret Town, Rift Valley Province.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Noise, dust, smell and air pollution;	<ul style="list-style-type: none"> • Work to be done during the day hours when most people are at work • Spray water to areas to be worked on for repaired to minimize dust generation • Workers to wear protective clothing such as boots, mouth nose masks
Waste oil, grease, and petrol	<ul style="list-style-type: none"> • Separate serviceable parts from unserviceable ones • Use containers in undertaking the repairs/ servicing to contains servicing agents • Sell the waste pipes to scrap metal dealer
Possible Impacts	Mitigation Measures

Dust and noise pollution	<ul style="list-style-type: none"> • The construction firm will be encouraged to use well-serviced and appropriate machines and equipment so as to minimize noise. • The demolition to be done during the when most people are at work.
Solid waste	<ul style="list-style-type: none"> • Provide waste handling facilities such as solid waste bins and will ensure that such wastes are disposed of regularly and appropriately. • Separation of solid waste generated • Recycling usable materials • Disposal of unusable materials/waste efficiently and at designated and approved sites.
Waste water and Sewage	<ul style="list-style-type: none"> • Ensure that the existing Effluent Treatment Plant at site is renovate and appropriate measures are taken to ensure effluent from the plant meet the standards set by NEMA before discharging to the Municipal sewer.
Increased Energy Demand	<ul style="list-style-type: none"> • All staff of the Company will be sensitized to ensure efficiency use of energy. • Install energy-efficient lighting systems in the Plant, Administration Block and other buildings within the project site including lighting of essential common areas of the compound. • The Proponent will ensure that the refurbished standby power generator is kept in well serviced condition to fulfill its function.
Increased water demand	<ul style="list-style-type: none"> • Efficient & economical use of water • Storage of rain water to irrigate during the dry season
Raw materials (maize cobs) spillage on the road	<ul style="list-style-type: none"> • Use of vehicles with appropriately designed body work to prevent spillage • Enforcement of on site speed controls • Road on site regularly sprinkled with water to reduce dust • Switching vehicle engines off during loading and unloading.
Occupational health hazards	<ul style="list-style-type: none"> • Provision of protective equipments and clothing to workers, • Training of workers, • Adherence to OHS Act rules & regulations, • Construction of adequate drainage systems,

The full report of the proposed project is available for inspection during working hours at:

- (n) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (o) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- (p) Provincial Director of Environment, Rift Valley Province.
- (q) District Environment Office, Uasin Gishu District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,
National Environment Management Authority.
GAZETTE NOTICE NO. 10089

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED DEVELOPMENT OF A
PERMANENT LUXURY CAMP AT EKIME SITE IN MWINGI
NATIONAL RESERVE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development of a permanent luxury camp at Ekime site in Mwingi National Reserve.

The Proposed project entails development of a permanent luxury camp at Ekime site in Mwingi National Reserve, Mwingi District on a specific site area that has been approved by the Kenya Wildlife Service (KWS). The luxury tented camp development activities will mainly involve the civil works associated with construction and operations of:

- A maximum of 30 bed self-contained camps providing luxury accommodation to tourists with facilities such as dining area, bar/lounge, kitchen, swimming pool, Spa and associated changing room, senior staff houses, junior staff quarters, ablution facility for junior staff.
- Storm water and sewerage treatment works.
- Protective guard rail on the Tana River side of the camp.
- Perimeter wall electric fence and Access all weather murrum road network.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil erosion, siltation, flooding	<ul style="list-style-type: none"> • The site preparation process will be done with utmost care to ensure that excavation is done systematically and carefully without raising dust and creating unpleasant heaps of soils. • All disturbed areas are well landscaped to improve on visual intrusion • Storm water drainage lines are well constructed to reduce incidences of ponding and flooding. • The Contractor undertakes to rehabilitate any degraded environment especially the reconstructed/redeveloped part of the area • The degraded environment especially excavated areas prone to soil erosion will be rehabilitated <i>in-situ</i> (as the construction progresses) to avoid soil being washed down gradient and into River Tana • Any loose soils are compacted to avoid any wash offs.
Ponding risks, groundwater and river contamination	<ul style="list-style-type: none"> • Proper construction of sewerage treatment works (Green Water System) and drainage lines. • Carry out proper landscaping and up depressions at the time of construction and immediately after
Accidents and occupational risks	<ul style="list-style-type: none"> • The implementation of safety measures and emergency plans to contain accident risks associated with vehicle transport, operation of any sophisticated machinery and other related activities. Protection from bandits & Wildlife.

Possible Impacts Mitigation Measures

- Emergency response plans/procedures including details (phone numbers and location) of the KWS Adamson's Falls Camp, nearest dispensaries, hospitals and the proponents site representative will be provided to the Site Foreman / Site Manager for action in case of any accidents during construction

- All staff is trained on the use of any unfamiliar machinery and equipment that may pose danger to the user before they are allowed to use them. Particularly important is the provision of protective clothing, helmets, nose masks etc.

- Increased water demand
- Apply for a permit from the Water Resources Management Authority Offices in Mwingi Outpost to abstract water from Tana River.

- The water abstracted from the river is treated (full chemical and bacteriological analysis is done) to establish if it is fit for construction & domestic use.

- There is proper management of water usage.

- Installation of a reservoir water tank and water conserving taps that turn-off automatically when water is not being used.

- Recycling of water used in the swimming pool.

- Solid and liquid waste generation
- A reputable solid waste handler will be contracted to regularly collect solid waste for appropriate disposal.

- Adequate provision of strategically placed waste bins all over the Camp compound to ensure that there is no idle litter that can be accessed by baboons.

- Non-usable solid waste materials generated during the construction shall be transported for appropriate disposal either in Maua.

- Due to the proximity of the Camp to Tana River, the proponent undertakes to provide well constructed sewage lines all draining into sewage treatment plant.

- KWS does not approve the use of lagoons for waste treatment in National Park area.

- All waste receptacles shall be at least 50m away from Tana River Bank

- Staff education on the importance of sound environmental management through proper handling and disposal of generated waste due to the fragile environment where the Camp is located.

- Noise, air pollution during camp construction and operation
- Noise control measures will be implemented at the site area if the noise levels exceed 85 dBA for a continuous 8 hours exposure.

- Protection against the effect of the noise exposure among the workers should be effected

- Sound levels reaching the inner ear may be effectively attenuated by the use of protective devices, such as earplugs and earmuffs.

Possible Impacts Mitigation Measures

	<ul style="list-style-type: none"> • Appropriate selection of machinery would minimise noise pollution • Minimize the use of explosives during the excavation process • Construction Supervisors shall be encouraged to sensitise construction workers to switch off engines of vehicles or machinery not being used • Sensitise vehicle drivers to avoid hooting or raving of engines • Ensure construction machinery is kept in good working condition. • Spraying of water during construction to reduce dust emission • KWS to regularly monitor the construction progress and assist in identifying issues that require immediate attention
Risk of fire and site security	<ul style="list-style-type: none"> • Install and maintain fire fighting equipment and machinery. • Sensitise the workers on fire risks & use fireproof materials • Provide emergency numbers at strategic points. • Potable fire fighting equipment are located at strategic points • Provision of security during from bandits and wildlife during the construction & operation phases.
Tana River and groundwater water pollution	<ul style="list-style-type: none"> • No domestic or any other hazardous waste is disposed of at the site or the nearby river water body. • A riparian reserve distance of 30 meters away from the river water body will be provided for to avoid pollution and protect the Camp from any potential flooding. • KWS is encouraged to ensure compliance by developer. • Ensure that machinery and used oil from vehicles is not released to the ground through the provision of mode of collection and appropriate disposal. • Clear instruction to machine and vehicle servicing personnel on this provision should be made available.
Degradation of existing vegetation	<ul style="list-style-type: none"> • Maintain existing trees and plant more indigenous species to rehabilitate the Camp environment and improve the scenic beauty of the area. • Carry out regular watering and maintenance of the trees that have been planted.
Unnecessary bright or flood lights	<ul style="list-style-type: none"> • Provide dim light and or Turning off all unnecessary lights at night to avoid unnecessary attraction to wild animals during the night.
Effect of camp on wildlife	<ul style="list-style-type: none"> • Wetland area of the Park is avoided • Location of the Camp has avoided any known migratory path that would interfere with the movement of animals.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.

(c) Provincial Director of Environment, Eastern Province.

(d) District Environment Office, Mwingi District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,

*for Director-General,
National Environment Management Authority.*

GAZETTE NOTICE NO. 10090

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF A PERMANENT LUXURY CAMP AT GOLO 1 SITE LOCATED IN MERU NATIONAL PARK, MERU DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development of a permanent luxury camp at Golo 1 site located in Meru National Park, Meru District.

The Proposed project entails development of a permanent luxury camp at at Golo 1 site located in Meru National Park, Meru District on a specific site area that has been approved by the Kenya Wildlife Service (KWS). The luxury tented camp development activities will mainly involve the civil works associated with construction and operations of:

- A maximum of 30 bed self-contained camps providing luxury accommodation to tourists with facilities such as Dining Area, Bar/Lounge, Kitchen, swimming pool, Spa and associated changing room, senior staff houses, junior staff quarters, ablution facility for junior staff.
- Storm water and sewerage treatment works.
- Protective guard rail on the Murera River side of the camp.
- Perimeter wall electric fence and Access all weather murram road network.
- The proposed site is located next to Murera River within the Meru National Park. The Murera River bisects the Meru National park with the Bisanadi National Reserve.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil erosion, siltation, flooding	<ul style="list-style-type: none"> • The site preparation process will be done with utmost care to ensure that excavation is done systematically & carefully without raising dust and creating unpleasant heaps of soils. • The Contractor undertakes to rehabilitate any degraded environment especially the reconstructed/redeveloped part of the area. • The degraded environment especially excavated areas prone to soil erosion will be rehabilitated <i>in-situ</i> (as the construction progresses) to avoid soil being washed down gradient and into River Murera.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>		
	<ul style="list-style-type: none"> Any loose soils are compacted to avoid any wash offs. All disturbed areas are well landscaped to improve on visual intrusion. Storm water drainage lines are well constructed to reduce incidences of ponding and flooding. 		<ul style="list-style-type: none"> KWS does not approve the use of lagoons for waste treatment in National Park area. All waste receptacles shall be at least 50m away from Murera River Bank. Staff education on the importance of sound environmental management through proper handling and disposal of generated waste due to the fragile environment where the Camp is located.
Ponding risks, groundwater and river contamination	<ul style="list-style-type: none"> Proper construction of sewerage treatment works (Green Water System) and drainage lines. Carry out proper landscaping and up depressions at the time of construction and immediately after. 	Noise, air pollution during camp construction and operation	<ul style="list-style-type: none"> Noise control measures will be implemented at the site area if the noise levels exceed 85 dBA for a continuous 8 hours exposure. Protection against the effect of the noise exposure among the workers should be effected. Sound levels reaching the inner ear may be effectively attenuated by the use of protective devices, such as earplugs and earmuffs. Appropriate selection of machinery would minimise noise pollution. Minimize the use of explosives during the excavation process. Construction Supervisors shall be encouraged to sensitise construction workers to switch off engines of vehicles or machinery not being used. Sensitise vehicle drivers to avoid hooting or raving of engines. Ensure construction machinery is kept in good working condition. Spraying of water during construction to reduce dust emission. KWS to regularly monitor the construction progress and assist in identifying issues that require immediate attention.
Accidents and occupational risks	<ul style="list-style-type: none"> The implementation of safety measures and emergency plans to contain accident risks associated with vehicle transport, operation of any sophisticated machinery and other related activities. Protection from bandits & Wildlife. Emergency response plans/procedures including details (phone numbers and location) of the KWS Adamson's Falls Camp, nearest dispensaries, hospitals and the proponents site representative will be provided to the Site Foreman / Site Manager for action in case of any accidents during construction All staff is trained on the use of any unfamiliar machinery and equipment that may pose danger to the user before they are allowed to use them. Risk of fire and site security	<ul style="list-style-type: none"> Install and maintain fire fighting equipment and machinery Sensitise the workers on fire risks & use fireproof materials. Provide emergency numbers at strategic points. Potable fire fighting equipment are located at strategic points. Provision of security during from bandits and wildlife during the construction & operation phases.
Solid and liquid waste generation	<ul style="list-style-type: none"> A reputable solid waste handler will be contracted to regularly collect solid waste for appropriate disposal. Adequate provision of strategically placed waste bins all over the Camp compound to ensure that there is no idle litter that can be accessed by baboons. Non-usable solid waste materials generated during the construction shall be transported for appropriate disposal either in Maua. Due to the proximity of the Camp to Murera River, the proponent undertakes to provide well constructed sewage lines all draining into sewage treatment plant. 	Tana River and groundwater water pollution	<ul style="list-style-type: none"> No domestic or any other hazardous waste is disposed of at the site or the nearby river water body. A riparian reserve distance of 30 meters away from the river water body will be provided for to avoid pollution and protect the Camp from any potential flooding. KWS is encouraged to ensure compliance by developer. Ensure that machinery and used oil from vehicles is not released to the ground through the provision of mode of collection and appropriate disposal.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>	<i>Possible Impacts</i>	<i>Mitigation Measures</i>

- Clear instruction to machine and vehicle servicing personnel on this provision should be made available.
- Maintain existing trees and plant more indigenous species to rehabilitate the Camp environment and improve the scenic beauty of the area.
- Carry out regular watering and maintenance of the trees that have been planted.
- Provide dim light and or Turning off all unnecessary lights at night to avoid unnecessary attraction to wild animals during the night.
- Wetland area of the Park is avoided
- Location of the Camp has avoided any known migratory path that would interfere with the movement of animals.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- Provincial Director of Environment, Eastern Province.
- District Environment Office, Meru District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,
National Environment Management Authority.

GAZETTE NOTICE NO. 10091

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT (No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DREDGING WORKS AT THE PORT OF MOMBASA

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed dredging works at the port of Mombasa, by Kenya Ports Authority (KPA).

The dredging project involves deepening and widening of the navigation channel to the port of Mombasa and at the turning basin in front of the proposed Kipevu West container terminal at Port Reitz. It would therefore affect the 3 harbours of Port Reitz, Kilindini Port and Entrance Harbour. Also incorporated into the project is maintenance dredging at the existing berths 1-18. The required dredging volumes at Turning Basin, Navigation Channel at Inner Port and Port Entrance are estimated at 4.7, 0.2 and 2.4 million m³, respectively.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Dredging work	• Restrict overflow operation during

	dredged material loading
	• Reduce dredging volume per day
	• Installation of silt protection curtain surrounding grab dredger
	• Use special dredging equipment to minimize agitation of bed material if the material is significantly contaminated
Disposal of dredged materials	• Dredged materials will be disposed at designated open water dumping site keeping a distance more than 3km from biological sensitive areas, such as existing coral reef, sea grass bed and Mombasa Marine National Reserve.
	• Disposal period will be mainly during SE Monsoon Season (from April to September) considering preferable local current system which could avoid significant impacts on the biological sensitive areas due to turbid water dispersion from the dumping site.
Effluent discharge from calling ships	• KPA will inspect the ships and/or liaise with the ship administration to establish whether there is any waste on board.
	• Any waste found will be received at the designated facilities such as East Africa Environment Company (EAM).
Accidental oil spill	• Evaluate future traffic volume for design of sufficient port facilities
	• Ensure operation in line with the ship handling manual. The manual has been designed specific to the Port of Mombasa by Japan Marine Science Inc on behalf of KPA. KPA pilots were part of the design and will be trained after the proposed dredging works.
	• KPA will install new navigation buoys and leading lights to allow for safer navigation of the channel.
	• Special short-based radar and/or reflectors will be installed for safe navigation and collision avoidance.
	• Updated pilot qualification or additional training will be undertaken.
	• Additional tugs, lighters and mooring and pilots requiring special skills will be made available.
	• In order to respond to possible accidental oil spill, the Port of Mombasa already has an emergency response program.
	• Specialized oil spill response equipment will be available to deal with small to medium spillages. This equipment will include containment booms, recovery devices, oil recovery or dispersant application vessels.
	• During dumping the material will be released at sea bottom to minimize plume generation.
	• Fishers to be provided with motorized boats to enable them fish further offshore during the dredging period.
	• Monetary compensation for fishers to assist in restoration of livelihood lost during dredging.
	• Continuous monitoring during dredging to ensure contaminated sediments are captured and dumped at appropriate sites.
Possible Impacts	Mitigation Measures
Removal of sub-marine	• Leave some undisturbed patches (reservoirs) between the dredging areas,

sediment	to speed up re-colonization and recovery. This is already implied in the works structure as dredge areas are clearly marked and some areas will remain undisturbed.
	<ul style="list-style-type: none"> • Use of appropriate engineering technology reductions in the amount of suspended sediment
Chemical impacts	<ul style="list-style-type: none"> • The method of disposal to be used is containment of the contaminated sediments. The contaminated sediments would therefore be disposed in a containment facility to be constructed at the site of the proposed container terminal project in Port Reitz. • Monitoring program be put in place to ensure that contaminated sediments are not inadvertently disposed at sea.
Oceanographic impacts	<ul style="list-style-type: none"> • In case of high turbidity levels, include setting up of continuous monitoring stations during the entire dredging period. It is important to note that continuous monitoring stations should be set to monitor turbidity levels at ten (10) selected locations (especially at the Mombasa Marine Park and nearby sensitive habitats such as coral reefs) during the dredging period in order to adopt the necessary mitigation measures and further validate the model results.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.

(c) Provincial Director of Environment, Coast Province.

(d) District Environment Office, Mombasa District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,

National Environment Management Authority.

GAZETTE NOTICE NO. 10092

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PROPOSED HOUSING DEVELOPMENT ON PLOT NO. 20522 MAVOKO MUNICIPALITY SABAKA LOCATION, MACHAKOS DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed housing project.

The project entails construction of 140 No residential 3 bedroom maisonettes measuring 108 square metres complete with a shopping center and associated external works in hitherto open land with scanty vegetation.

The proposed project is located on plot L.R. No.20522, Mavoko Municipality, Sabaki location Machakos district.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Workers accidents and hazards when handling hazardous wastes.	<ul style="list-style-type: none"> • Adequate collection and storage of waste should be provided on site, and safe transportation to, and disposal methods at designated areas. • All receptacles for storing hazardous wastes should be adequately covered. • All employees should be required to wear protective clothing when handling hazardous wastes. • All workers should be adequately insured against unforeseen accidents.
Air pollution by dust generated during construction process.	<ul style="list-style-type: none"> • All personnel working on the project should be trained prior to starting construction on methods for minimizing air quality impacts during construction. • Construction vehicle drivers should be under strict instructions to minimize unnecessary trips, refill petrol fuel tanks in the afternoon and minimize idling of engines. • All active construction areas should be watered at least twice a day to reduce dust. • All trucks hauling soil, sand and other loose materials shall be covered. • All paved access roads should be swept daily. This includes all paved parking areas and stage areas at construction site. • Traffic speed of construction/other vehicles should be restricted to not more than 15 mph • Careful screening of construction site to contain and arrest construction-related dust. • Vegetation should be replanted in disturbed areas as soon as possible. • Exposed stockpiles of e.g. dust and sand, should be enclosed, covered, and watered daily, or treated with non-toxic soil binders. • Windbreakers should be installed at the windward side of the construction site. • All workers on the site should be required to wear protective clothing while on duty.
Proliferation of uncollected solid waste.	<ul style="list-style-type: none"> • Wastes to be collected regularly to control air pollution and vermin/insects etc. • Receptacles will be provided for waste storage prior to collection. • Resource recovery should be encouraged once the project takes off so as to shrink waste stream and recover non-recyclables. • Refuse collection vehicles should be covered to prevent scatter of wastes by wind. • Wastes will be collected by a licensed operator to avoid illegal final dumping at unauthorized sites. • All persons involved in refuse collection will be in full protective attire.
Noise pollution by construction activities.	<ul style="list-style-type: none"> • Portable barriers should be installed to shield compressors and other small stationery equipment where applicable.

	<ul style="list-style-type: none"> • Use of equipment designed with noise control elements should be adopted where necessary. • Trucks used at the construction site should be routed away from noise sensitive areas in the neighbourhood, where feasible. • Idling time for pick up trucks and other small equipment should be minimized to limited time. • Use of very noisy equipment should be limited to daytime only. • All workers operating in noisy areas or operating noisy equipment should be provided with earpieces to protect against extreme noise.
Workers accidents during construction process.	<ul style="list-style-type: none"> • All workers should be sensitized before construction begins, on how to control accidents related to construction. • A comprehensive contingency plan should be prepared before construction begins, on accident response. • Accordingly, adherence to safety procedures should be enforced. • All workers, pursuant to labour laws, shall be insured against accidents. • All workers should be instructed to wear protective clothing during construction, including helmets. • Construction work should be limited to daytime only
Increased surface run off leading to flooding, from paved grounds and expansive roofs.	<ul style="list-style-type: none"> • Surface run off and roof water should be harvested and stored reservoir for re-use. • Storm water management plan that minimizes impervious area increases infiltration by use of recharge areas, and use of retention, and/or retention with graduated outlet control structures, should be used.
Increased pressure on infrastructure and services, i.e. traffic related conflicts, water, power and sanitation.	<ul style="list-style-type: none"> • A clear entry/exit must be provided along the access road, off Mombasa road • Adequate roof and underground water storage tanks should be provided to complement the supply from the Mavoko Municipal Council. • Expansion of the capacity of water to accommodate the increased demand in the area by the Council.
Mushrooming of food kiosks	<ul style="list-style-type: none"> • Kiosks should be provided on site, with adequate sanitation, during construction process. • Pursuant to the Physical Planning Act (Cap.286), development control is to be enforced around the project site to control such structures.
Water supply pipes breakdown.	<ul style="list-style-type: none"> • Before construction begins, it should be determined where water pipes are located to avoid reticulation break down • Regular inspection and maintenance of water pipes.
Possible Impacts	Mitigation Measures
Inadequate human waste disposal by workers during construction	<ul style="list-style-type: none"> • As provided for by the Building Code, a temporary latrine should be provided on site to be used by construction workers

process and occupation • Should use Bio-box technology for effluent treatment during occupation of the houses

- Fire outbreak
- Fire fighting equipment to be strategically installed within each unit.
 - Regular inspection of fire fighting equipment, e.g. extinguisher.
 - Residents to be trained on how to prevent fire outbreak and how to respond in case of such emergency.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Eastern Province.
- (d) District Environment Office, Machakos District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,
National Environment Management Authority.

GAZETTE NOTICE NO. 10093

THE LOCAL GOVERNMENT ACT (Cap. 265)

THE TOWN COUNCIL OF KAJIADO APPROVAL OF BY-LAWS

PURSUANT to section 205 of the Local Government, notice is given that the Town Council of Kajiado, has with the approval of the Deputy Prime Minister and Minister for Local Government made the under mentioned by-laws:

- (a) The Town Council of Kajiado (General Nuisance) By-laws, 2009.
- (b) The Town Council of Kajiado (Public Markets) By-laws, 2009.
- (c) The Town Council of Kajiado (Advertisement) By-laws, 2009.
- (d) The Town Council of Kajiado (Public Roads and Streets) By-laws, 2009.
- (e) The Town Council of Kajiado (Commercial Cycles) By-laws, 2009.
- (f) The Town Council of Kajiado (Commercial and Private Schools) By-laws, 2009.
- (g) The Town Council of Kajiado (Quarrying) By-laws, 2009.
- (h) The Town Council of Kajiado (Business Permits) By-laws, 2009.
- (i) The Town Council of Kajiado (Control of Grazing) By-laws, 2009.
- (j) The Town Council of Kajiado (Public Lavatories) By-laws, 2009.
- (k) The Town Council of Kajiado (Taxi Cab) By-laws, 2009.
- (l) The Town Council of Kajiado (Parking Places and Omnibus Stations) By-laws, 2009.
- (m) The Town Council of Kajiado (Off Street Parking Designated Parking) By-laws, 2009.
- (n) The Town Council of Kajiado (Sand) By-laws, 2009.
- (o) The Town Council of Kajiado (Building Order (Adoptive)) By-laws, 2009.
- (p) The Town Council of Kajiado (Pounds) By-laws, 2009.
- (q) The Town Council of Kajiado (Carts) By-laws, 2009.
- (r) The Town Council of Kajiado (Control and Dog Permits) By-laws, 2009.
- (s) The Town Council of Kajiado (Drainage and Sewerage) By-laws, 2009.

- (t) The Town Council of Kajiado (Dangerous and Offensive Trades) By-laws, 2009.
 (u) The Town Council of Kajiado (Fire) By-laws, 2009.
 (v) The Town Council of Kajiado (Cemetery) By-laws, 2009.
 (w) The Town Council of Kajiado (Second Hand Goods) By-laws, 2009.
 (x) The Town Council of Kajiado (Slaughterhouse) By-laws, 2009.
 (y) The Town Council of Kajiado (Hawkers) By-laws, 2009.

The same will now have the force of law within the area of jurisdiction of the Town Council of Kajiado from the date of publication of this notice.

By Order of the Town Council of Kajiado.

Dated the 15th September, 2009.

H. O. WANYUNDI,
Town Clerk.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.

SUBSCRIPTION AND ADVERTISEMENT CHARGES

With effect from 9th August, 2005, subscription and advertisement fee for the *Kenya Gazette* are as follows:

SUBSCRIPTION CHARGES:
