THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITYENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED SEWER LINE DIVERSION OF THE EPZA
SEWER LINE LOCATED BETWEEN PLOT NUMBERS: LR.
337/976, LR.337/1074 AND LR 337/2719 IN ATHI RIVER

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the Proposed Sewer Line Diversion of the Epza Sewer Line.

The proponent intends to create a sewage diversion of around 110 meters for its factory expansion project on No. LR. 337/2719. The diversion is to provide space for the factory expansion. The site is located in Athi River in Mavoko Municipality. The site is located between Plot Numbers: 337/976, 337/1074 337/2719.

The project anticipates the following impacts and mitigation measures:

| Possible Impacts | Mitigation Measures |
|------------------|---|
| Location | <ul style="list-style-type: none"> Ascertain the location of all the water pipes, electrical installation and other possible interferences within the area of sewer construction. Elevations should be taken at intervals in case of change of gradient. Bench marks should be placed at convenient intervals for use during construction. |
| Trenching | <ul style="list-style-type: none"> A specially equipped tractor will be required for this section and properly trained staff by the contractor |
| Foundations | <ul style="list-style-type: none"> A suitable bedding for the sewer concrete pipes will be required and they should maintain the necessary grade. Acceptable grading as per the consultants expert should be provided If rock is present it should be removed to a depth of 4 to 6 inches below the bottom of the pipes' placement. if the soil is soft it will have to be stabilized with a packed layer of gravel or broken rock |
| Removing Water | <ul style="list-style-type: none"> Frequently the trench will collect water especially because we are in the rainy season The sewer will have to be layed from the lowest part of the line to permit the water to flow away from the completed sections centrifugal pumps will be required to be used for dewatering the trench. |

| | |
|-----------------------------------|--|
| Placing the concrete pipes | <ul style="list-style-type: none"> For muddy material a diaphragm pump will be required. For wet sections well points will be used or a drain with open joints and bedded with gravel built underneath the sewer to remove the water. The concrete pipes will have to be placed in their exact positions, the elevation of the pipes will be checked and if correct a joint will be made. Where an immediate connection is not made, a vitrified - clay will have to be connected to the branch bell to prevent entrance of dirt or ground water. |
| Provision for Factory Connections | <ul style="list-style-type: none"> Branches or slants, for factory connections must be installed at the proper locations and with the stubs pointing to the correct side of the location. The position decided on, may be marked by a stake just in advance of concrete pipe laying. |
| Backfilling | <ul style="list-style-type: none"> Because of the current construction activities in the area, the need for a firm backfill will be required because of the traffic issue Compaction will be required during backfill with sand or gravel backfill. |
| Inspection | <ul style="list-style-type: none"> Careful, skilled and continuous inspection of every phase of sewer construction will be required Inspection will include examining each section of the concrete pipe to make sure that it is unbroken and usable, checking the position of the pipes in the trench for line and grade, watching the forming of the joints, requiring proper bedding and backfill placement, determine the need for trench drainage to ensure that good work can be done, grade boards and gradient lines should be checked frequently for accuracy. |
| Measuring Infiltration | <ul style="list-style-type: none"> As soon as each section is completed, tests should be conducted to determine the level of infiltration or leakage into the sewer. An exfiltration test will be required. |
| Record Keeping | <ul style="list-style-type: none"> Because sewers are buried after construction careful records will be required during construction. The records should show the location and size and the starting and ending points. |

The full report of the proposed project is available for inspection during working hours at:

- The Director-General, National Environment Management Authority, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- The Permanent Secretary, Ministry of Environment and Natural Resources, National Hospital Insurance Fund Building, Community, 4th Floor, P.O. Box 30521, Nairobi.
- Provincial Director of Environment, Nairobi Province.
- District Environment Officer, Nairobi West District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, National Environment Management Authority, to assist the authority in the approval process of the project.

Dated the 12th November, 2009.

PURSUANT to regulation 21 of environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed National Co-operative Housing Union (NACHU) prestige Housing Scheme.

The proposed project will comprise of Type A semi detached luxury maisonettes housed on 70 No. plots of minimum size 21.0 x 8.5m, each maisonette is to have a plinth area of 100m². The second proposal will have Type B and will be composed of flats planned and arranged in 10 No. Each block is to accommodate 16 No. flats with a plinth area of 102.0m² per flat. The proposed project will be located on L.R. No. 23405 Mavoko Municipal Council.

The project anticipates the following impacts and mitigation measures:

| Possible Impacts | Mitigation Measures |
|-------------------------|---|
| Soil | <ul style="list-style-type: none"> Excavating only necessary areas. Containment of soil heaps to prevent erosion caused by runoffs, wind and from machinery. Reduce the use of heavy machinery whenever possible. Use of light machinery at the site during construction process. Leaving trees outside designated areas of construction activities. Excavating only construction areas. |
| Water Resources | <ul style="list-style-type: none"> Construction of drainage systems. Prevention of pollution during construction activities to minimize effects that may arise during surface runoffs. Prevention of any pollution resulting from construction activities. Instituting water savings strategies to minimize water use. Construction of drainage channels to ensure waste water handling. Ensure reuse of waste water by sprinkling at the site to reduce excessive dust. Construction of leak proof drains. Instituting water saving strategies/practices. Landscaping of the construction site. |
| Air and Noise pollution | <ul style="list-style-type: none"> Limiting construction traffic movement and operation to efficient and necessary activities Routine maintenance of vehicles and other machinery to be used during construction process Minimizing transportation activities to day time only Erection of buffer fence to retain most of the noise to the construction site |

- The road leading to the site be sprinkled with water to mitigate excessive dust emission
- Limiting construction activities to day time only
- Sensitize construction drivers and machinery operators to switch off engines when not being used.
- Regular serving of construction and transport machinery to ensure that they are in good working condition and to reduce emissions

| | |
|--|--|
| Visual Intrusion | <ul style="list-style-type: none"> Use of commercial bill boards to keep construction activities out of sight from immediate neighborhood. Fencing out the construction site. Landscaping and gardening to restore biodiversity and aesthetic properties of the project site. |
| Solid Waste | <ul style="list-style-type: none"> Waste minimization by avoiding unsustainable construction practices. Sorting of waste. Provision of dust bins to hold waste before disposal. Reuse where possible or sale to authorized waste handlers/collectors. |
| Occupational Health and safety | <ul style="list-style-type: none"> Workers training on safety. Risk analysis for all activities, materials and equipment. Provision of protective clothing. Emergency response plan. Need for firefighting equipment to be made available on site. Inclusion of fire exit route. |
| Effluent discharge | <ul style="list-style-type: none"> Effluent discharge shall be channeled to the main sewer line that serves the area. All effluent to meet NEMA standards for discharge to a sewer line. |
| Public nuisance in form of smoke, smell and visual intrusion | <ul style="list-style-type: none"> Provision of adequate spatial conditions in the project design to avoid congestion and related public health and social problems. Provision of trade opportunities for residents and surrounding community. Construction of spacious driveways and walk ways. |

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PROSPECTING AND MINING OF MANGANESE ORE AT GANZE, KILIFI DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed prospecting and mining of manganese ore at Ganze, Kilifi District.

The proposed project entails prospecting, mining and sale of manganese (Mn) ore. The project will be located in Ganze Location, Ganze Division, Kilifi District in Coast Province of Kenya and covers about 15 sq.km.

The project anticipates the following impacts and mitigation measures:-

| Possible Impacts | Mitigation Measures |
|--|--|
| Vegetation loss and Soil erosion | <ul style="list-style-type: none"> PRANAAV will undertake <i>Alovera</i> and adaptive grass planting as the construction progresses to avoid the soil being washed or carried by wind. Places of least vegetation cover will be identified for the campsite and only construction points will be completely cleared to ensure minimum vegetative disturbance. Proper roof catchments and gutters will be put in place to control the possible increased runoff. Temporary storage tanks will be supplied to trap this water for irrigating planted vegetation. |
| Ponding Risk from construction | <ul style="list-style-type: none"> The Proponent will do landscaping, and fill the depressions including borrow pits and disused quarries. Pumping of water into suitably designed drainage outlets into the seasonal stream will be ensured. The quality of the discharged water will be monitored in keeping with the Legal Notice 120, of 2006. |
| Air pollution from Dust and Engine exhaust gases | <ul style="list-style-type: none"> Prompt compaction of loose soils and aggressive grass replanting will be implemented. The distance to the nearest population concentration is about 1.5km. the impact of the dust on the surrounding people is therefore unlikely. Water will be sprinkled on to the disturbed off-pit soil to reduce flying dust. Dust screens will be erected to contain flying dust and employees/ construction workers will be provided with personal protective equipment (PPE), to reduce possible dust and noxious gas inhalation. |
| Obstruction by disposed Excavated Soil | <ul style="list-style-type: none"> Public movement through this mining spots will generally be restricted. Emergency responses which might be hindered by the obstruction will be provided for by clear operating procedures. |

Waste into the Environment

- Most of the excavated materials will be used for fill-ups and some will be applied in landscaping.
- The staff will not be residing on site but appropriate
- sized potable septic tanks will be availed to staff during their working hours and to keep with the movement of operations.
- Quality standards will be adhered to through initial testing and periodic monitoring in line with the requirements of NEMA contained in the Legal Notice 120, of 2006.
- Appropriate soakpits system will be constructed.
- The proponent will ensure that it enlists a licensed private company specialized in the handling oil and solid waste wherever necessary.
- Biodegradable kitchen waste will be composted on site for tree planting manure.
- A Good Housekeeping as part of the company policy will be implemented at the facility.

Surface and Ground Water Contamination

- The mining operations may stop temporarily during the very wet season when working the mines becomes difficult and dangerous.
- The project will have an adequate drainage, on site containment to minimise uncontrolled storm water.
- Well documented procedures for maintenance of the drainage system will be implemented and staff will be trained accordingly.
- Oil waste will never be allowed into the environment; proper containment and accidental spill absorption regime will be implemented at all time.
- Vegetative pollutant traps and continual monitoring of the waters on site and surrounding areas will form part of the pollution control efforts by the company.

Noise pollution and Vibrations nuisance

- The contractor will ensure that the operations of most of the machinery such as excavator, loader shovel and graders are concentrated within 100m-radius and that all workers are provided with and using PPE such as earmuffs.

Health deterioration of facility workers

- Vibrations and noise surveillance instruments will be availed periodically to check on any excesses.
- Dust containment and suction systems will be installed.
- Use of PPEs will be strictly enforced.
- Welders will be provided with respirators, eye protections and dust coats to minimize inhalations.
- Regular medical checks will be done and records maintained of the employees.
- Staff working at the site on permanent basis will have medical cover.
- Sanitation related education and practice will form part of the facility's regular routine, to avoid incidences of infections such as cholera, bilharzias and malaria. Swapping of work stations for staff will reduce level exposure.

The full report of the proposed project is available for inspection during working hours at:

- (a) The Director-General, National Environment Management Authority, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF A HOUSING ESTATE ON L.R. NO. 10426 /36, 37, 38 & 39, MAVOKO MUNICIPALITY, MACHAKOS DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the Proposed Development of a Housing Estate on L.R. No. 10426 /36, 37, 38 & 39, Mavoko Municipality.

The proponent intends to put up a housing estate comprising a total of 262 low cost bungalows of two and three bedrooms, 3 No. Plots have been set aside for sale to commercial developers (to bring commercial outlets closer to the estate) using regulated designs while 2 No. Plots have been set aside for development of a kindergarten.

The proposed development site comprises four plots registered as L.R. Nos. 10426/36, 37, 38 & 39 and is located outside Athi River town in Machakos District. The site lies about 0.7 km off Mombasa Road, opposite Athi River Steel Plant Limited.

The project anticipates the following impacts and mitigation measures:

| Possible Impacts | Mitigation Measures |
|--|--|
| Air pollution, dust generation and noise pollution | <ul style="list-style-type: none"> • Spray water during construction work. • Control speed and movements of construction vehicles noting that access to project site is off a busy highway. • Use of low-sulphur diesel for diesel-operated machinery. • Use of appropriate PPE by construction workers. • No unnecessary hooting by project and residents vehicles. • Restriction of construction activities to day time. • Use of equipment designed with noise control elements. |

Clearing of vegetation

- Temporarily fencing off noisy machinery such as vibrators.
- Planting of ornamental trees along perimeter fence and within site.
- Planting of grassed lawns.
- Establishment of flower gardens within project project site.
- No disturbance to areas not affected by the project so as to minimise impacts on environment.

Generation of solid waste

- Re-use of construction debris and other wastes
- Proper containment and disposal of solid waste at all project phases
- Contracting a licensed waste collection and disposal company
- Awareness raising on proper solid waste disposal
- Re-use of timber off-cuts and wooden supports for fuel
- Waste to be properly segregated and separated to facilitate re-use.

Increased demand for water and electricity

- Conservation (wise use) of water.
- Provision of adequate water storage facilities.
- Installation of rainwater harvesting structures.
- Re-use of water where possible.
- Install water conserving taps.

Increased demand for electricity

- Use of energy saving bulbs within the houses
- Inclusion of a solar water heating & lighting systems to reduce on use of electricity
- Make use of natural lighting in the houses
- Energy conservation measures to be practised

Occupational health and safety risks

- Use of suitable personal protective equipment (PPE).
- Insurance of all workers.
- Site to be sprinkled with water to minimize dust.
- Use of stable ladders and other climbing/support structures.
- Sensitise workers on construction safety measures.
- Cleanliness and organisation at the construction site.
- Fencing or covering of risky areas such as deep pits.
- Safety signage.
- Use of permit-to-work authorizers for risky jobs.
- Engagement of skilled labourers.
- Food handlers to be monitored for hygienic practises.

Fire hazards and accidents

- Acquire fire fighting equipment.
- Sensitise workers on fire safety.

- No storage of inflammables at site.
- Keep well stocked first aid box.
- Proper handling and use of tools and machinery.
- Have a trained first aider on site.
- Adequate road warning signs to traffic regulations.
- Erection of speed bumps.
- Guarding of site and estate by a reputable security firm.
- Constant site patrol.
- Adequate screening of visitors to the site & estate.
- Collaboration with existing security machinery.
- Partnership with neighbours and police in community policing.
- Keep a record of visitors to the construction site and estate.

The full report of the proposed project is available for inspection during working hours at:

- (a) The Director-General, National Environment Management Authority, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) The Permanent Secretary, Ministry of Environment and Natural Resources, National Hospital Insurance Fund Building, Community, 4th Floor, P.O. Box 30521, Nairobi.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
