THE ENVIRONMENTAL MANAGEMENT AND

CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT

FOR THE PROPOSED RESIDENTIAL DEVELOPMENTS FOR MTWAPA HEIGHTS LIMITED IN MTWAPA ON PLOT NO. MN/III/3464, KILIFI DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed residential development for Mtwapa heights limited in Mtwapa on plot MN/III/3464, Kilifi District.

The proposed project entails putting up:

- (a) 90 units of 3 bedroom houses on four storey building in a 1.8 acres.
- (b) 66 units of 4 bedroom maisonettes on a 0.0778 acres.
- (c) 10 units of 2-bedroomed house and 5 shops.
- (d) Club house, swimming pool.

The project is located along Mombasa-Kilifi Highway behind Coca Cola coastal bottlers which is about two kilometres from Mtwapa Town on plot MN/III/3464, Kilifi District. Current site has old building at the core used to be site office for the former four farms limited which will be demolished during project preparations.

The following are the anticipated impacts and proposed mitigation measures.

Possible Impacts

Mitigation Measures

Increased exploitation of raw materials

- Source building materials from suppliers who use environmentally friendly processes in their operations.

- Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered.

- Ensure that damage or loss of materials at the construction site are kept minimal through proper storage.

- Use at least 5% to 10% recycled refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills.

Ecosystem disturbance

- Ensure proper demarcation and delineation of the project area to be affected by construction works.

- Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage.

- Designate access routes and parking within the site.

- Preserve of trees and plant more after construction.

- Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction.

Run off and soil erosion

- Create storm water management practices, such as piping systems or retention tanks, which can be carried over after the building is complete.

	<ul style="list-style-type: none"> • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site. • Ensure that any compacted areas are ripped to reduce run-off. 		<ul style="list-style-type: none"> • Ensure proper planning of transportation of materials to ensure that vehicle fills are increased in order to reduce the number of trips done per vehicle or the number of vehicles on the road.
Solid waste generation	<ul style="list-style-type: none"> • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of. • Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects. • Donate recyclable/reusable or residual materials to local community groups, institutions and individual local residents or home owners. • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. • Purchase of perishable construction materials such as paints should be done incrementally to ensure reduced spoilage of unused materials. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste. • Use construction materials containing recycled content when possible and in accordance with accepted standards. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site. • Dispose waste more responsibly by dumping at designated dumping sites or landfills only; the use of a registered waste disposal company is encouraged. 	Noise Pollution	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.
		Depletion of energy resources	<ul style="list-style-type: none"> • Ensure electrical equipment, appliances and lights are switched off when not being used. • Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy. • Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts. • Monitor energy use during construction and set targets for reduction of energy use.
		Exploitation of water resources	<ul style="list-style-type: none"> • Promptly detect and repair of water pipe and tank leaks. • Ensure taps are not running when not in use. • Install water conserving taps that turn-off automatically when water is not being used. • Promote recycling and reuse of water as much as possible. • Install a discharge meter at water outlets to determine and monitor total water usage.
		Effluent emissions	<ul style="list-style-type: none"> • Provide means for handling sewage generated by construction workers and premises while in operation. • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
Air/ Dust pollution	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes each day to reduce dust generation by construction vehicles. 	Violation of rules and Regulations.	<ul style="list-style-type: none"> • Ensure that all building plans are approved by the Local Authority and the local Occupational Health and Safety Office. • Registration of the premises under the Occupation health and safety Act 2007. • A general register should be kept within the facility as stipulated in Occupation health and Safety Act 2007.
Air pollution	<ul style="list-style-type: none"> • Sensitise truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, 2. switch off or keep vehicle engines at these points. 	Mishaps	<ul style="list-style-type: none"> • The abstract of the Occupational Health and Safety must be displayed at prominent places within the site.

- Injuries caused by machineries and equipments.
- Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place.
 - Ensure that the premises are insured as per statutory requirements (third party and workman's compensation).
 - Develop, document and display prominently an appropriate SHE policy for construction works.
 - Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used in construction do comply with the prescribed safety and health standards and be appropriately installed maintained and safeguarded.
 - Ensure that equipment and work tasks are adapted to fit workers and their ability including protection against mental strain.
 - All machines and other moving parts of equipment must be enclosed or guarded to protect all workers from injury.
 - Arrangements must be in place to train and supervise inexperienced workers regarding construction machinery use and other procedures/operations.
 - Equipment such as fire extinguishers must be examined by a government authorised person. The equipment may only be used if a certificate of examination has been issued.
 - Reports of such examinations must be presented in prescribed forms, signed by the examiner and attached to the general register.
- Catastrophes
- Well stocked first aid box which is easily available and accessible should be provided within the premises.
 - Provision must be made for persons to be trained in first aid, with a certificate issued by a recognized body.
 - Fire fighting equipment such as fire extinguishers and hydrant systems should be provided at strategic locations such as stores and construction areas.
 - Regular inspection and servicing of the equipment must be undertaken by a reputable service provider and records of such inspections maintained.
 - Signs such as "NO SMOKING" must be prominently displayed within the premises, especially in parts where inflammable materials are stored.
- Food and toxins.
- Develop a suitable system for the safe collection, recycling and disposal of chemical wastes, obsolete chemicals and empty chemical containers to avoid their reuse for other purposes and to eliminate or minimize the risks to safety, health and environment.
 - Ensure that all chemicals used in construction are appropriately labelled or marked and that material safety data sheets containing essential information regarding their identity, suppliers classification of hazards, safety precautions and emergency procedures are provided and are made available to employees and their representatives.

- Keep a record of all hazardous chemicals used at the premises, cross-referenced to the appropriate chemical safety data sheets.
- There should be no eating or drinking in areas where chemicals are stored or used.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT

FOR THE PROPOSED LANDFILL DEVELOPMENT ON PLOTS
NO. NYERI MUNICIPALITY/BLOCK 4/91, 99 AND 100, NYERI
MUNICIPALITY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed landfill development on plot Nos. Nyeri Municipality Block 4/91, 99 and 100, Nyeri Municipality.

The project involves development of a sanitary landfill to improve waste management in Nyeri Municipality. The project is located on Plots. No. Nyeri Municipality/Block 4/91, 99 and 100.

The following are the anticipated impacts and mitigation measures:

Possible Impact	Mitigation Measures
Clearance of vegetation and soil erosion	<ul style="list-style-type: none"> • Areas susceptible to erosion should be protected by installing necessary temporary and permanent works. • Minimize disturbance to flora and fauna in the neighbouring areas. • Erect barriers to all open excavations to keep off animals and workers.
Air and noise pollution	<ul style="list-style-type: none"> • Ensure that noisy machineries are insulated/temporary fencing. • Noise hazard signs should be put displayed where necessary. • Ensure strict enforcement of speed limits. • Avoid excavation works in dry weather and control dust emissions by sprinkling water. • Noise standards should be enforced to protect workers and area residents. • Workers subject to unacceptable noise

	<ul style="list-style-type: none"> levels should wear earplugs and their working time within these areas should be limited. Workers should be trained on safe work procedures regarding control of hazardous dust exposure. Dust generating activities like excavation and handling of soil should be avoided during strong winds. Limit construction activities to day-light hours only.
Occupational health and safety	<ul style="list-style-type: none"> Hazardous areas should be secured and all workers provided with PPEs and their use enforced. Enforce compliance with labour laws and health and safety rules and provide with first aid facilities. Ensure that all workers have insurance covers.
Fire hazards and accidents	<ul style="list-style-type: none"> Install proper fire fighting equipments during and after construction. Avoid storage of flammable materials near possible fire source. Sensitize workers on fire safety.
Transportation impacts	<ul style="list-style-type: none"> Improve the access roads. Minimize waste scattering during transportation. Ensure the transportation trucks complies with environmental standards.
Disposal of non degradable waste	<ul style="list-style-type: none"> Minimize waste going to landfill by establishing an incineration plant to dispose waste like papers.
Increase in LFG, GHG emissions, dust and odours	<ul style="list-style-type: none"> Proper application of cover material (soil) at the close of each day. Dust control measures to be applied where deemed necessary through watering.
Potential contamination of soil, sub-soil and groundwater from leachate.	<ul style="list-style-type: none"> Proper leachate transfer should be applied to minimize contamination. Waste should be removed from the borders of cells to reduce the risk of uncontrolled leachate generation. Monitor the head of leachate in the cell – not to exceed 1 ft in accordance with international specifications. Implement groundwater monitoring program. The cells lining and the collection system should be correctly installed in cells to avoid potential leachate infiltration in the soil and sub-soil layers. Definition of a storm water management system is required to collect and treat the water run off and specification of the slope for future cells. Implement monthly monitoring program of perimeter wells and surface effluents must meet environmental effluent discharge standards. Minimize potential infiltration of uncontrolled leachate into the groundwater.
Public/occupational health and safety	<ul style="list-style-type: none"> Develop a health and safety plan by establishing disposal procedures as well as including requirements for the applicable labor laws. Install a perimeter fence around the site
Risk of nuisance or disease from vectors	<ul style="list-style-type: none"> Proper application of cover material (soil) at the close of each day.
Flaring gas	<ul style="list-style-type: none"> Install gas monitoring wells at conventional spacing and/or in sensitive

locations for monitoring the potential migration of landfill gases from the landfill.

Implementation of the EMP	<ul style="list-style-type: none"> Proponent should include environmental considerations in monthly progress reports and indicate progress in the implementation of mitigation measures as outlined in the EMP.
Information dissemination	<ul style="list-style-type: none"> Develop a community liaison and public information program.

The full report of the proposed project is available for inspection during working hours at:

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED HOUSING DEVELOPMENT ON L.R. NO. 12715/631, MAVOKO MUNICIPALITY, MACHAKOS DISTRICT

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed housing development.

The project involves construction of 300 residential flats complete with related facilities. The units will be 80 two bed roomed and 220 three bed roomed residential flats contained in 30 residential blocks.

The project is located on L.R. NO. 12715/631, Mavoko Municipality, Machakos District.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Clearance of vegetation and soil erosion	<ul style="list-style-type: none"> Minimize disturbance to flora and fauna in the neighbouring areas. Apply soil erosion control measures. Establish grass lawns, flower gardens and trees around and within the site.
Water & energy use	<ul style="list-style-type: none"> Provide adequate water storage facilities & reuse water where possible. Residents should use energy conserving lighting bulbs. Raise awareness on water and energy conservations.
Solid waste management	<ul style="list-style-type: none"> Contract a licenced waste collection and disposal company or MCM.

- Proper containment & disposal of solid waste in all project phases.
- Segregate, separate and re-use construction wastes.
- Project to be connected to BioBox Treatment System.
- Maintain internal sewer system and network during operation.
- Ensure that noisy machineries are insulated/temporary fenced.
- Noise hazard signs should be put displayed where necessary.
- Machinery should be well lubricated and serviced.
- Ensure strict enforcement of on-site speed limits.
- Avoid excavation works in dry weather and sprinkle water to reduce dust.
- Restrict construction activities to day time only.
- Provide and enforce use of proper PPEs.
- Ensure that all workers have insurance covers.
- All lifting equipments should be inspected and well maintained.
- Shield construction activities to minimize accidents.
- Provide first aid facilities and have some workers trained in first aid.
- Use stable and safe ladders and scaffolds & display safety signs on site.
- Engage skilled labourers and appoint a safety supervisor.
- Install proper fire fighting equipments during and after construction.
- Avoid storage of flammable materials near possible fire source.
- Sensitize workers on fire safety.
- Contract a reputable security firm to guard the site and the premise.
- Collaborate with authority and have community policing on security issues.

THE ENVIRONMENTAL MANAGEMENT AND

CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR PROPOSED RENOVATIONS OF A PETROL STATION ON PLOT NO. NGENDA/KIMUNYU/997 IN ICHAWERI, GATUNDU TOWN

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed upgrade of a petrol station.

The proposed project entails repairing the canopy over the pumps, the sales office, rehabilitating the drainage system, replacing the underground fuel tanks, repairing the drive ways, walkways, acceleration and deceleration lanes, repairing the Interceptor Tank and the washrooms.

The project is located on plot No. Ngenda/Kimunya/997 at Ichaweri next to the entrance to the late Hon. Jomo Kenyatta's home. It is along Kenyatta road 3.5Km to Gatundu Town. The property is approx. 1Km from Mutomo Market and owned by Hon. Mama Ngina Kenyatta. The plot has structures that will be renovated, repaired and some upgraded to meet the site engineers specifications to support the petrol station operations. The entire plot measures approx. 19.13 Acres.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Air pollution	<ul style="list-style-type: none"> • Control speed and operation of construction vehicles. • Prohibit idling of vehicles. • Spray water on excavated areas. • Maintenance of construction plant and equipment. • Sensitize construction workers. • All bare areas should be landscaped after construction. • Workers should be provided with dust masks if working in sensitive areas.
Noise pollution	<ul style="list-style-type: none"> • Maintain plant equipment. • Construction should be carried out only during daytime i.e 0800 – 1700 HRS. • Workers to wear ear muffs if working in noisy section. • Management to ensure that noise from the station is kept within reasonable levels.
Traffic density	<ul style="list-style-type: none"> • Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. • Presence of boards directing patrons to the site. • Strict adherence to traffic rules.
Soil erosion and compaction	<ul style="list-style-type: none"> • Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion. • There should be designated pathways and driveways for movement to avoid unnecessary compaction. • All bare areas should be well landscaped after completion.
Solid waste	<ul style="list-style-type: none"> • Construction debris should be collected by a licensed private contracted waste collection company. • Excavation waste should be re-used or

backfilled.

- Waste generated should be collected by a privately contracted waste collection company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities.
- The site should have waste receptacles with bulk storage facilities at convenient points to prevent littering during occupation
- Oil leaks and spills
 - Machinery should be well maintained to prevent oil leaks.
 - Contractor should have a designated area where maintenance is carried out and that is protected from rain water.
 - All oil products should be stored in a site store and handled carefully.
- Loss of vegetation
 - Designate access pedestrian routes and parking zones that are cabro paved
 - Provide signs marked do not Walk/ Park on the grass.
 - The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
- Occupational Health and Safety
 - Provide Personal Protective Equipment.
 - Train workers on personal safety and how to handle equipments and machines.
 - Report any accidents / incidences and treat and compensate affected workers.
 - Provide sufficient and suitable sanitary conveniences which should be kept clean.
 - The site will be fenced off using iron sheets during renovation.
- Security
 - The site will be fenced off using iron sheets during renovation.
 - Demolish all temporary kiosks on site.
 - Round the clock security for the facility.
 - Adequate lighting and an alarm system installed at strategic points.
- Ecological considerations (flora & fauna)
 - The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
- Fire preparedness
 - Fire fighting drills carried out regularly.
 - Fire fighting emergency response plan.
 - Ensure all firefighting equipment is regularly maintained, serviced and inspected.
 - Fire hazard signs and directions to emergency exit, route to follow and assembly point in case of any fire incidence.

The full report of the proposed project is available for inspection during working hours at:

- (i) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (j) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- (k) Provincial Director of Environment, Central Province.
- (l) District Environment Officer, Thika District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.
