THE ENVIRONMENTAL MANAGEMENT AND

CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT

FOR THE PROPOSED HOUSING ESTATE ON PLOT NO.
12715/449, MLOLONGO AREA IN MAVOKO MUNICIPALITY,
ATHI RIVER

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the construction of the proposed housing estate in Mlolongo, Athi River.

The project will involve construction housing estate of twelve (12) similar, five (5)-storey residential blocks each floor comprising eight (8), two bed roomed units, totaling to 576 units to be used as single family dwellings. The estate will have ample parking within the perimeter masonry wall.

The proposed site is on a 2.041 hectare parcel of land, Plot L.R. No. 12715/449, Mlolongo area in Mavoko Municipality. It is situated near Syokimau along Beijing Road about 250M off Mombasa Road.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Loss of top soil cover	<ul style="list-style-type: none"> • Avoid unnecessary movement of soil materials from the site. • Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off. • Control construction activities during rainy/wet conditions to control soil movement. • Resurface/pave open areas after the completion of the project. Introduce suitable and well-managed vegetation to generate surface covers on the open areas and to control soil movement by erosion agents including water and wind. • Provide suitable storm water drainage channels to effectively discharge water to safe areas. Such channels need to be regularly maintained and repaired to avoid point discharges in case of breakages or blockages.
Increased power surge and black outs in addition to increased energy costs.	<ul style="list-style-type: none"> • Switch off all electrical appliances when not in use. • Optimize operations of electrical equipment to enhance energy conservation. • Put off all lights immediately when not in use/required or are not needed. At end of functions take necessary measures to switch off lights immediately. • Use energy conserving electric lamps for general lighting. • Make use of alternative source of energy such as solar power, which is renewable.
Noise and vibration	<ul style="list-style-type: none"> • Construction works should be carried out only during the specified time which is usually as from 0800 hrs to 1700 hrs. • Machineries should be maintained regularly to reduce noise resulting from

	friction.		and machinery
	<ul style="list-style-type: none"> Workers should be provided with Personal Protective Equipment such as earmuffs when operating noisy machinery and when in a noisy environment. There should not be unnecessary honking of the involved machinery. Provision of bill boards at the construction site gates notifying of the construction activity and timings. Shield the areas under works to reduce noise propagation. 		<ul style="list-style-type: none"> Sensitize the workers on fire risks & use fireproof materials Provide emergency numbers at strategic points. Potable firefighting equipment are located at strategic points Provision of security during the construction & operation phases. Ensure that all workers have access to communication facilities (phones etc.) for quick emergency response.
High water demand	<ul style="list-style-type: none"> Avoid excessive use of the water supplied on site Water use should follow approvals by the Council's Water Department. Encourage water reuse/recycling during both construction and operational phases. Roof catchments should be provided with rainwater harvesting systems to enhance collection and storage of the run-off. Such water can be used in watering flower gardens and all kinds of cleaning required on site. Provide notices and information signs on means and needs to conserve water resource to awaken the civic consciousness with regard to water usage and management. Install water conserving taps that turn-off automatically when water is not in use. 	Surface drainage system	<ul style="list-style-type: none"> During construction, the design (of the drainage system) should ensure that surface flow is drained suitably into the public drains provided to control flooding within the site. Drainage channels should be installed in all areas that generate or receive surface water such as car parking, driveways and along the building block-edges of the roofs. The channels should be covered with gratings or other suitable and approved materials to prevent occurrence of accidents and entry dirt that would compromise flow of run-off. The channels should be designed with regards to the peak volumes such as periods or seasons when there is high intensity of rainfall which is also not common in the project area but just in case such an event occurs, they should never at any time be full due to the resulting heavy downpours. The drainage channels should ensure the safe final disposal of run-off /surface water and should be self-cleaning which means it should have a suitable gradient. Storm water generated from roof catchments should be harvested, stored and made use in various household activities such as general cleaning. This will reduce run-off reaching the drainage channels. Paving of the side walkways, driveways and other open areas should be done using pervious materials such as cabro to encourage water recharge and reduce run-off volume
Sewage and effluent disposal	<ul style="list-style-type: none"> The design of the sewer layout should consider the estimate discharges from individual sources and the cumulative discharge of the entire project. The gradient should be sufficient to ensure and maintain maximum depth of flow and junctions effectively designed and installed. All drain pipes passing under the building, driveway or parking should be of heavy duty PVC pipe tube encased in 150mm concrete surround. All manholes on drive ways and parking areas should have heavy-duty covers set and double sealed airtight as approved by specialists. All waste pipes should have cleaning eyes accessible from outside and free to every part of the system for inspection, cleaning and repair Sanitary facilities should be kept clean always, through regular washing 	Increased dust and gaseous emissions	<ul style="list-style-type: none"> Provide personal protective equipments, materials and clothing such as nose masks and goggles to workers during demolition and construction phases. Regular and prompt maintenance of construction machinery and equipment. This will minimize generation of hazardous gases and other suspended particulate matter. Control over areas generating dust particles. Such areas should be regularly cleaned or sprinkled with water to reduce dust. Such areas can be enclosed to mitigate effects of wind and hence controlling propagation of dust to the neighbours. Use environmentally clean fuels/gasoline such as Unleaded Gasoline (ULG).
Security and fire	<ul style="list-style-type: none"> Protecting the Site from a fire outbreak will be achieved through sound engineering, reliable operations, written operating procedures, trained employees, good preventive and predictive maintenance techniques and commitment to safety. The proponent and the contractor shall provide firefighting equipment during the construction and operation phases of the building facility and also ensure that the following are done; Install and maintain firefighting equipment 	Accidents and occupational risks	<p>The proponent and the contractor will ensure that:</p> <ul style="list-style-type: none"> The implementation of safety measures

and emergency plans to contain accident risks associated with vehicle transport, operation of any sophisticated machinery and other related activities.

- All staff is trained on the use of any unfamiliar machinery and equipment that may pose danger to the user before they are allowed to use them. Particularly important is the provision of protective clothing or gear. These include working boots, overalls, helmets, goggles, earmuffs, masks, gloves among others.
- A fully equipped first aid kit.
- The contractor should have workmen's compensation cover. It should comply with workmen's compensation Act, as well as other ordinances, Regulations and Union Agreements.
- Adequate sanitary facilities should be provided and standard cleanliness maintained.
- Food handlers preparing food for the workers at the site should be controlled and monitored to ensure that food is hygienically prepared.
- Workers should always be sensitized on social issues such as drugs, alcohol and diseases. There should be a training program, if possible, to facilitate this.
- Regular maintenance of machinery on site should be done.
- Special attention shall be paid to the handling and disposal of all solid waste generated during construction and operation phases.
- A reputable solid waste handler will be contracted to regularly collect solid waste for appropriate disposal following the Local Authority Guidelines.
- There will be adequate provision of strategically placed waste bins all over the building compound to ensure that there is no idle litter
- The materials should be properly segregated and separated to encourage recycling of some of them. Some demolished stone materials can be used as backfills.
- Non-usable solid waste materials generated during the demolition and construction shall be transported for appropriate disposal in one of the designated dumping sites.
- The proponent undertakes to provide well constructed sewage lines all draining into the designated sewer system next to the site.

Solid and liquid waste generation

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED BOUNDARY WALL, STOREY UNITS, MARKET STALLS, BRIDGES AND FOOTPATHS IN MUKURU AND KIBERA IN KENYA RAILWAY RESERVE

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed boundary wall, storey units, market stalls, bridges and footpaths.

The project involves the construction of boundary wall, 1490 residential and 1539 business relocation units, market stalls, bridges and footpaths.

The project area stretches from the 534/6 km mark to the 539/9 km mark within the Nairobi- Kibera section (5.3 Km) and Likoni Road to Mombasa Road within the Makadara- Embakasi section (7 Km) totaling some 12.3 Kilometers.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environment al/Social Issue</i>	<i>Management & Mitigation and /or Enhancement Measures</i>
Oil spillage	<ul style="list-style-type: none"> • Ensure no spillage occurs
Materials spillage	<ul style="list-style-type: none"> • Ensure use serviceable machinery • Ensure no littering of the compound
Littering the site	<ul style="list-style-type: none"> • Ensure safe storage of materials • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. • Use at least 5%-10% recycled refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills.
Vegetation disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for vehicles and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. • Designate access routes and parking within the site. • Introduction of vegetation (trees and grass) on open spaces and around the project site and their maintenance • Design and implement an appropriate landscaping programme to help in revegetation of part of the project area after construction.
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in reservoirs so that it can be used for wetting and/or cooling purposes. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed. • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm

	<p>water into the soil.</p> <ul style="list-style-type: none"> • Ensure that construction vehicles are restricted to use existing graded roads • Ensure that any compacted areas are ripped to reduce run-off. Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Interconnected open drains will be provided on site. • Roof catchments will be used to collect the storm water for some office uses. • Construction of water storage tanks to collect storm water for office and plant uses. 	Increased energy consumption	<ul style="list-style-type: none"> • Ensure electrical equipment, appliances and lights are switched off when not being used • Install energy saving bulbs/tubes at all lighting points instead of incandescent bulbs which consume higher electric energy • Plan well for transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts • Monitor energy use during construction and set targets for reduction of energy use.
Increased solid waste generation	<ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Reduction at source 2. Recycling 3. Reusing 4. Incineration 5. Sanitary landfilling. • Through accurate estimation of the dimensions and quantities of materials required. • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste metal and plastic containers to reduce waste at site • Dispose waste more responsibly by contracting a registered waste handler who will dispose the wastes at designated sites or landfills only. • Waste collection bins to be provided at designated points on site 	High Water Demand	<ul style="list-style-type: none"> • Water to be brought in from the City Water and Sewerage Company • Harness rainwater for office & gardening • Install water conserving taps that turn-off automatically when water is not being used • Promote recycling and reuse of water as much as possible • Install a discharge meter at water outlets to determine and monitor total water usage • Promptly detect and repair of water pipe and tank leaks • Sensitise construction workers to conserve water by avoiding unnecessary toilet flushing etc • Ensure taps are not running when not in use
Air Pollution	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. Regularly watering access roads and borrow pit sites in close proximity to human settlements during the dry season in order to suppress dust generation and particulate settlement • Avoid excavation works in extremely dry weather. • Mixing should not be done on windy location • All access roads and work areas to be regularly sprinkled with water • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles • Personal Protective equipment to be provided to employees (breathing protection gear) 	Generation of wastewater	<ul style="list-style-type: none"> • Provide means for handling/treating sewage generated at the construction site • Provide means for handling/treating sewage generated at the construction site • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated • Ensure compliance with The OSHA (Building Operations and Works of Engineering Construction Rules), L.N. 40 of 1984
Noise and Vibration	<ul style="list-style-type: none"> • Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitise construction drivers to avoid reversing of vehicle engines or hooting • Ensure that construction machinery is kept in good condition to reduce noise generation. Limiting the extraction of gravel from borrow pits to normal working hours as legally provided for by Kenyan Laws and not outside 7:00 to 18:00 hours; • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures (containers) to minimize ambient noise levels. • Trees to be planted around the site to provide some buffer against noise propagation • The noisy construction works will entirely be planned to be during day time when most of the neighbours will be at work 	Human Health And Safety.	<ul style="list-style-type: none"> • Sensitizing local communities not to allow children to play in flooded borrow pits during the rainy season; Conducting indoor spraying for mosquitoes. Conducting an awareness campaign covering construction equipment operators at borrow pits and the local community on matters of HIV/AIDS
		Oil spills	<ul style="list-style-type: none"> • Install oil trapping equipments in areas when there a likelihood of oil spillage such during the maintenance of construction equipment. Soil in such an area will be well protected from contamination
		Social and Economic Effects	<ul style="list-style-type: none"> • Compensation and Relocation Plan to take into account compensation for loss of location shelter, trading stalls, crops and other structures. Limiting borrow pit sites to infertile and uncultivated pieces of land as much as is possible and Compensating individuals for any losses incurred to personal property as a result of the operation of the borrow pits. • Enhance consultations with the locals on the activities affecting them and include them on impact reduction
		Solid waste generation	<ul style="list-style-type: none"> • Provide solid waste handling facilities such as waste bins and skips • Ensure that solid waste generated at the proposed development is regularly disposed of appropriately at authorized dumping sites • Ensure that occupants of the proposed development manage their waste efficiently through recycling, reuse and proper disposal procedures. • Donate redundant but serviceable equipment to charities and institutions
		Sewage release into environment	<ul style="list-style-type: none"> • Provide adequate and safe means of handling sewage generated at the proposed

- Energy Consumption
- Switch off electrical equipment, appliances and lights when not being used
 - Install energy saving fluorescent tubes at all lighting points within the proposed development instead of bulbs which consume higher electric energy
 - Monitor energy use during the operation of the project and set targets for efficient energy use
 - Sensitise the occupants to use energy efficiently
- Water Exploitation.
- Promptly detect and repair of water pipe and tank leaks
 - Residents to conserve water e.g. by avoiding unnecessary toilet flushing.
 - Ensure taps are not running when not in use
 - Install water conserving taps that turn-off automatically when water is not being used
 - Install a discharge meter at water outlets to determine and monitor total water usage
- Health & Safety Risks.
- Implement all necessary measures to ensure health and safety of workers and the general public during operation of the proposed development project as stipulated in Factories and Other Places of Work Act Cap 514
- Safety & Security of the premises and surrounding areas
- Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premises during night hours. Hazard-warning signs "NO SMOKING"

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED SUBDIVISION OF REMAINING 3,053
ACRES IN KIU RANCH, LR NO. 7612 MUKAA DISTRICT,
MALILI DIVISION, NGAAMBA LOCATION

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed subdivision of remaining 3,053 acres in Kiu ranch.

The project proposes to subdivide the remaining portion of its ranch to its 1006 members. It also wishes to allocate 2,760 acres to the former squatters on its land as directed by the high court. This final subdivision will involve a total of 3,053 acres which after putting aside 500 acres for roads, social amenities etc will see the members share the remainder with each member getting only about 2.7 acres.

The proposed project will be in Kiu ranch, plot L.R No.7612 Mukaa district, Malili division, Ngaamba location.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Changes in hydrology/impended drainage	<ul style="list-style-type: none"> • Avoid allocating to members river valleys, steep hill sides and identified wetlands • Ensure efficiency of drainage structures through proper design and maintenance • Use society funds to vegetate degraded valleys and hillsides
Flora and Fauna	<ul style="list-style-type: none"> • Work only according to the survey briefs. • Surveyor to Endeavour to access only areas where beacons are to be placed. • Avoid allocating sensitive ecological areas to individuals
Soil erosion	<ul style="list-style-type: none"> • Control earthworks & compact loose soils • Ensure management of any excavation activities • Control activities especially during rainy conditions
Solid Wastes	<ul style="list-style-type: none"> • Bring only required materials to site. • Avoid unnecessary excavations • Compost organic waste on site • Stockpile all mortar aggregate and use as landfill on the ranch
Air pollution	<ul style="list-style-type: none"> • Work only on designated areas • Engage sensitive construction workers. Ear muffs and other ear protectors
Public health and occupational safety	<ul style="list-style-type: none"> • Train staff/workers on occupational health and safety.
Deforestation and bush clearance	<ul style="list-style-type: none"> • Sensitize members on environment conservation • Enforce provision of the Agriculture Act 2003 Amendment that calls for 10% of land to be put under forests/trees • Encourage members to plant trees along the fences • Encourage members to use plants such as kei-apple, euphorbia etc as fences/hedges around their parcels • Sensitize members on the dangers of overstocking and why they must respect the carrying capacity of the land • Sensitize members on the advantages of planting drought resistant food crops
Loss of Wildlife Habitat	<ul style="list-style-type: none"> • Set aside ecologically sensitive areas as nature conservation blocks within the ranch • Partner with Government Agencies and NGO's to come up with best ways of managing the animals within the community

	<ul style="list-style-type: none"> • Sensitise the members on the importance of conserving our wildlife • Partner with KWS to relocate the cheetahs to designated game reserves as they are an endangered species • Partner with KWS to relocate unmanageable game to designated parks
Fragmentation of Land to Uneconomical units	<ul style="list-style-type: none"> • Rigorously Enforce the zoning laws • Set minimum sizes for parcels in agricultural zones
Aesthetic Loss	<ul style="list-style-type: none"> • Avoid vegetation clearance on hilltops, valleys • Preserve all mature trees as much as is practical

RONGO COUNTY, MIGORI DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed rosewood nursing home and mortuary

The proposed project involves construction of a nursing home and mortuary. The design of the proposed project includes:

- A reception area
- Viewing room
- Storage chamber for bodies (not suitable for viewing but with refrigeration at a temperature of 4°C)
- Room for records and for storing personal effects

The proposed project site is located on plot no. Kamagambo/kabuoro/1561, Rongo County, Migori District

The following are the anticipated impacts and proposed mitigation measures:

Possible Mitigation measures

Impact

Soil erosion and siltation	<ul style="list-style-type: none"> • Site excavation works to be planned such that a section is completed and rehabilitated while another section begins. • Landscape the site and its surroundings to address aesthetics as well as soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
Noise Pollution	<ul style="list-style-type: none"> • The construction works will entirely be planned to be during day time. No construction shall be undertaken at night. • Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise levels. • Workers operating noisy machinery should be provided with ear muffs or plugs. • Noise hazard signs should be put displayed where necessary. • Iron sheets or other suitable means should be used to reduce noise exposure to neighbors or passersby. • Noisy machinery should be modified or replaced with better machinery, well lubricated and serviced. • Construction should take shortest time possible.
Disturbance of soil and destruction of soil structure by excavation	<ul style="list-style-type: none"> • Excavation material will be loaded into trucks and be transported to designated disposal sites and/or used to backfill/infill abandoned quarry pits within the area to assist in their rehabilitation and after-use plans. • Design and implement an appropriate landscaping program to help in re-vegetation of part of the project area after construction • Reuse of the topsoil in landscaping
Building materials waste scattering and associated pollution and blockage of drainage channels leading to flooding	<ul style="list-style-type: none"> • Ensure that construction materials left over at the end of construction are used in other projects rather than being disposed of. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements • Minimize waste through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. • Ensure that drainage channels are reinforced to prevent damage by construction equipment.
Air /Dust pollution	<ul style="list-style-type: none"> • Landscaping shall provide for grass cover and well-manicured lawns. • Avoid spillage of loose soil to the road where it will be disturbed and blown by traffic.
Oil spills	<ul style="list-style-type: none"> • Ensure that all transport and construction equipment are in good serviceable condition and no service is carried out on site. • Ensure that no fuels or oils are stored on site but procure them when needed.
Storm-water drainage	<ul style="list-style-type: none"> • Open drains adjacent to site will be used • Construction of water storage tanks to collect storm water for construction purposes and

gardening.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED 200 3-BEDROOMED APARTMENTS ON
L.R. NO.7149/26, MAVOKO MUNICIPALITY, MACHAKOS
COUNTY.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed 200 3-bedroomed apartments.

The proposed development will entail construction of 200 spacious apartments (in 20 blocks each having 10 units) with excellent finishes on a five acre compound. They will be 3 bedrooms (plus DSQ) with a plinth area of approximately 150 sq metres. These will be built in phases development will include a jogging track, ample parking, baby swimming pool, Gazebo, baby class, shops and recreational areas.

The proposed project is located on plot L.R. No. 7149/26, before Mlolongo, along Mombasa Road, Mavoko Municipality. The site is next to the railway line after Muthama Heights and EasyPark apartments

The following are the anticipated impacts and proposed mitigation measures:

Environmental issue

Mitigation Measures

Soil Erosion and Compaction

- The contractor will provide adequate soil conservation structures to ensure that areas prone to soil erosion are protected from runoff.
- Areas susceptible to erosion shall be properly sloped and compacted to reduce the effect of runoff, and shall be seeded immediately;
- Rehabilitation of exposed sites as soon as practicable
- The site preparation activity should be scheduled
- Re-plant degraded areas with local species common in the area to complement natural vegetation regeneration to improve ground cover.

Occupational Health and Safety

- Workers will be provided with adequate Personal Protective Equipment during the construction phase, these will include safety boots, overalls, helmets, goggles and earmuffs. Workers will also be provided with safety harnesses and proper secure equipment for scaling heights
- Workers will be provided with a well stocked first aid box, which will be replenished at all times and managed by trained first aiders.
- Sensitize workers on occupational health and safety.
- Adequate sanitary facilities will be provided with proper segregation for both genders where applicable.

Air and dust pollution

- Fencing off the entire construction site
- The contractor to protect stockpiles of friable material subject to wind-throw by wetting, or with barrier or windscreen;
- Restrict speed on loose surface roads during dry or dusty conditions; incidence
- Suppress dust during dry periods by use of water sprays;
- Maintain equipment in good running condition-no vehicle to be used that generates excessive black smoke;
- Enforce vehicle load restrictions to avoid excess emissions from engine overloading;
- The contractor shall institute appropriate measures to minimize or avoid air quality impacts. This can be achieved through formulation of air quality management plan
- The contractor to minimize/control emission of dust due to traffic movement and erosion of stockpile material and exposed soil.
- The contractor to ensure that all equipment used and all facilities erected on site are designed and operated to control the emission of smoke, dust, fumes and any other air impurity into the atmosphere;

Noise Pollution and Excessive Vibration

- The contractor shall comply with the legal requirements for the managements of the noise impact specified in the recently

gazetted noise quality regulations.

- The contractor shall formulate noise management plan for minimizing the generation of noise and vibration from construction activities occurring on site and its impact on surrounding residents, businesses and workers.
- All internal combustion equipment will have properly functioning silencers or mufflers;
- Neighbours to the site to be notified about the construction schedule and activities, including blasting, should it be required;
- Restriction of construction activities to daytime only..

Increase in Solid Waste

- Proponent will use an integrated solid waste management system by source reduction, recycling, composting, reuse or sanitary land filling.
- The proponent will ensure that debris is collected by a NEMA approved waste handlers.
- There will be a central collection point for waste generated preferably with segregation of the same.

Effluent Disposal

- The proponent will provide or construct proper waste receptacles to avoid littering.
- The proponent will connect to Mavoko sewer trunk line along Mombasa road.
- The proponent will ensure that the materials used for construction are of the right standards as per the building code.
- The proponent will ensure that there are routine checks for the sewer lines to ensure that there are no leakages.

Security

- The proponent will ensure that guards are available and proper intrusion surveillance equipments are installed and are working all the times.

Traffic Movement for Construction Vehicles

- The proponent will ensure that there is adequate lighting in all areas and risk assessment is done regularly to identify any new threats.
- The proponent will ensure the neighbours are informed through signage about irregular movements and guards to be used to direct traffic

Water Resources and Water quality

- Measures shall be instituted to minimize erosion and sediment transport, especially during construction activities.
- These measures should include: limiting areas cleared of vegetation, stabilizing the soils on the sloppy areas with stone pitching and planting of grass.
- Remedial measures shall be implemented by the Contractor in the event of erosion resulting in the sedimentation of surrounding areas after due consideration of the costs and benefits of such removal activity
- Infrastructure shall be designed to ensure that contaminated run-off does not reach watercourses
- In the event of an oil spill the procedures contained in the emergency response plan will come into effect.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF A BITUMEN PLANT ON PLOT NO. 209/13714 ALONG MOMBASA ROAD, NAIROBI

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed construction of a bitumen plant.

The project will involve building an emulsion bitumen plant with a boiler- bitumen preheating tank and one bitumen pump, a guardhouse, Sanitary facilities and a paved driveway running from the gate.

The proposed site for construction of a bitumen plant is in Nairobi Municipality on plot no 209/13714 along Masai Road, off Mombasa road. The proposed project site measures approximately 5 hectares.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Changes in hydrology/impended drainage	<ul style="list-style-type: none"> • Proper initial site exploration to avoid potential ground water contamination. • Proper Installation of drainage structures on site • Establishing water balance taking into consideration probable climatic events. • Install cascades to break the impact of water flowing in the drains. • Ensure efficiency of drainage structures through proper design and maintenance. • Provide gratings to the drainage channels. • Regular checks on any sludge along drainage channels.
Soil erosion	<ul style="list-style-type: none"> • Control earthworks • Rehabilitate degraded environment to avoid siltation and wash offs. • Ensure management of excavation activities • Provide soil erosion control and conservation structures where necessary. • Proper disposal of excavated loose soils.
Air pollution through dust and gaseous emissions	<ul style="list-style-type: none"> • Control speed and operation of vehicles on site • Training of all workers on proper use

	and maintenance of PPE's.		stability analysis.
Noise pollution	<ul style="list-style-type: none"> Prohibit idling of vehicles. Regular maintenance of plant and equipment. All activities to be restricted to daytime. Employees working in areas with high noise levels to wear appropriate safety & protective gear e.g. earplugs & earmuffs. Appropriate selection of machinery with engineered noise prevention designs e.g. acoustic cladding Sensitize drivers and machine operators on the effects of noise. 	Fire safety training/ Emergency response procedures (ERPs)	<ul style="list-style-type: none"> Accurate assessment of work safety from rock fall and land slides Develop an elaborate ERP and prominently display abstracts of the same on site Conspicuously display emergency response contacts on site Train all stakeholders on ERP at the site Ensure all equipments are in good working condition Provide adequate and appropriately serviced fire fighting equipments Provide fire fighting appliances on site. Ensure all fire fighting equipments are in good working condition. Put up simple instructions on how to handle fires, product spills, and armed robbery and product contaminations Assembly points and refuge bays are to be erected and easily accessible in 15 min time from anywhere at the site. Provide emergency numbers at strategic points Provide appropriately marked fire exists and auxiliary doors
Oil pollution	<ul style="list-style-type: none"> Proper storage, handling and disposal of new and used oil and related wastes e.g. selling to licenced oil waste handlers. Maintain plant and equipment to avoid leaks Maintenance of vehicles should be carried out at a designated point that should be appropriately slabbed to prevent percolation of oil and where appropriate, install an interceptor tank. Develop a spill prevention and control plan Provide workers handling the oil with suitable protective clothing like gloves to avoid skin contact with the same 	Record Keeping	<ul style="list-style-type: none"> Collection and analysis of relevant environmental data at the site. Data of maintenance of fire fighting equipment and vehicle movement in and out of the site
Water resource	<ul style="list-style-type: none"> Management of water usage. Avoid unnecessary wastage especially at the car washing bay Developing an appropriate water management system minimising the impact on water users in the area. Considering re-use of water. Considering the potential impact to the water balance prior to commencing any de-watering activities. 	Internal Audits	<ul style="list-style-type: none"> Monitoring will involve measurements, observations, evaluations assessment of changes in waste management Noise levels, workers safety e.t.c.
Contractors lay down area	<ul style="list-style-type: none"> Special attention should be paid to the sanitary facilities (pit latrines), they should be kept clean and well lit 	Security	<ul style="list-style-type: none"> Security men should always be available to alleviate cases of robbery and other related incidences on site Installation of security lighting especially at the site.
Road safety	<ul style="list-style-type: none"> Enforce speed limits for all vehicles accessing the site Provide bill boards around the site to notify all stakeholders about the development. 	Solid wastes/ waste rock	<ul style="list-style-type: none"> Provide appropriate mechanisms of handling workshop scrap, and non process related industrial wastes. Provide adequate measures for handling waste to be disposed-off and lift height specifications or to be used in upgrading of the existent road network around the site Recyclable wastes like the oil cans, scrap metals, used tyres should be sold to licensed waster recyclers
Public health and occupational safety	<ul style="list-style-type: none"> Ensure proper solid waste disposal and collection facilities Provide First Aid kits on the site Sensitize stakeholders/workers on environmental management Provision of all necessary PPEs. Workers should be trained on occupational health & safety and First Aid administration A comprehensive risk assessment and healthy and safety audits should be conducted for the site 	Scraps and other debris on site including rock debris	<ul style="list-style-type: none"> Use of an integrated solid waste management system i.e. through a hierarchy of options: Wastes generated as a result of facility decommissioning activities will be characterized in compliance with standard waste management procedures. Disposal locations will be selected by the proponent based on the properties of the particular waste stream
Geo-Technical safety	<ul style="list-style-type: none"> Assessment of natural topography and stability monitoring around the site. Access ramps and road alignments should be included in geotechnical 		<ul style="list-style-type: none"> All machinery, equipment, structures and tools that will not be used for other purposes should be removed and

recycled/ reused say in other projects

- Where recycling/reuse of the machinery, equipment, implements, structures, tools and other waste is not possible, the materials should be taken to approved dumpsites
- Oil spills and leaks
 - Clean and treat all oil contaminated areas
 - Suitably dispose all used oil and oil handling materials
- Vegetation disturbance
Land deformation: soil erosion, drainage problems
 - Implement an appropriate re-vegetation programme to restore and improve the site
 - During the re-vegetation period, appropriate surface water runoff controls will be taken to prevent surface soil erosion;
 - Monitoring and inspection of the area for indications of erosion will be conducted and appropriate measures taken to correct any occurrences;
 - Fencing and signs restricting access will be posted to minimize disturbance to newly-vegetated areas;
 - Comprehensive landscaping of the site
- Loss of income
Reduced ability to support dependants
Loss of quality of life
 - The safety of the workers should surpass as a priority of all other objectives in the decommissioning project
 - Adapt a project – completion policy: identifying key issues to be considered earlier before decommissioning.
 - Assist with re-employment and job-seeking of the involved workforce.
 - Compensate and suitably recommend the workers to help in seeking opportunities elsewhere.
 - Offer advice and counselling on issues such as financial matters.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Nairobi Province.
- (d) District Environment Officer, Embakasi and Makadara Districts.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director General, NEMA, to assist the Authority in the decision making process of the plan.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
