WHEREAS Munga Kubo Munga (ID/2121542), is registered proprietor of that piece of land known as Kilifi/Mtwapa/849, and whereas the High Court of Kenya at Malindi in civil suit No. 18 of 2009, has ordered and vested the said piece of land in custody of Munga Kubo Munga, notice is given that after the expiration of thirty (30) days from the date hereof, provided no valid objection has been received within that period, I intend to dispense with the production of the said instrument and proceed with the registration of the said instrument of transfer and issue a land title deed to the said William Mathias Kubo, and upon such registration the land title deed issued earlier to the said Munga Kubo Munga, shall be deemed to be cancelled and of no effect.

Dated the 3rd February, 2012.

A. O. JUMA,
Land Registrar,
Kilifi/Kaloleni/Malindi/Ganze Districts.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LONGONOT GEOTHERMAL POWER PROJECT IN LONGONOT CONCESSION, SOUTH OF LAKE NAIVASHA

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed longonot geothermal power project.

The project will involve construction of associated steam field and infrastructure.

comprising approximately of 26 production wells, eight injection wells and seventeen well pads.

The proposed Longonot geothermal prospect is located in the Kenya Rift Valley approximately 60 km northwest of Nairobi and 10 km east of the Olkaria geothermal development.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Issues Mitigation Measure

Vegetation and habitat disturbance	<ul style="list-style-type: none"> • Protect migration routes. • Minimise periods of well testing to minimize disturbance to animals. • Timing of well testing to avoid effects on hunter prey dynamics. • Protect any local populations of protected, important or endangered species.
Avian behavior	<ul style="list-style-type: none"> • Incorporate spikes on top of the well head separators (towers next to wells) to prevent use by birds of prey. • Use of dual circuit transmission lines – these have 2 x 3 power lines in a vertical alignment with sufficient space between them to prevent collision with large birds. • Use of insulation around connections on pylons to prevent electrocution of birds. • Avoiding habitat removal during the breeding bird season. • Use of horizontal separators which reduce the volume of steam emissions.
Minimizing habitat loss	<ul style="list-style-type: none"> • Using temporary fencing to prevent inadvertent damage to habitats adjacent to the construction area. • Ensure the way leave area width is at its minimum for least Removal of vegetation. • Re-planting of vegetation where appropriate with locally occurring vegetation to prevent the incursion of opportunistic invasive species. • Undertake selective clearance by removing tall woody species leaving saplings, for quick regeneration of vegetation along the way-leave. • Avoid pilling of clear-felled vegetation on standing live vegetation which would hinder movement of wildlife.
Disrupting key Wildlife corridors	<ul style="list-style-type: none"> • Throughout the design stage ensure that the plant layout does not site near key corridors. • Protect migration routes. • Raise pipelines in key locations.
Pollutant emissions from well testing	<ul style="list-style-type: none"> • Minimise periods of well testing.
Vehicle emissions during construction	<ul style="list-style-type: none"> • Turn off idling vehicles. • Design well pad to ensure haul roads are as far away as possible from sensitive habitats.
Fugitive dust emissions from the construction of road infrastructure	<ul style="list-style-type: none"> • Construction equipment will be designed and used in a manner which minimizes dust generation. • Water spray dampening of soils and spoil will be undertaken to prevent dust blow during hot, dry weather conditions. • Careful location, grading and management of stockpiles of soil and similar materials to prevent wind blow • Sealing and / or revegetation of completed earthworks will be undertaken as soon as reasonably practicable.

Emitting harmful gases	<ul style="list-style-type: none"> • Preparation of surfaced site roads early in the construction programme – on unsurfaced areas of the site, vehicle speeds will be limited to less than 20 mph. • Sheetting of lorries during transportation of friable construction materials and spoil. • Minimising drop heights for material transfer activities, such as unloading of friable materials. • Cleaning of surfaced roads and maintenance of unsurfaced roads to reduce offsite transport of soils and to avoid dust generation Wheel washing facilities for vehicles entering the public road system.
Noise emissions from well testing and from HDVs	<ul style="list-style-type: none"> • Technological options that include total or partial reinjection of gases with geothermal fluids. • Timing venting to when the ambient conditions are suitable. • Use of abatement systems to remove H₂S and Hg emissions from NCGs. • Well maintained plant and vehicles. • Localized screening where appropriate. • Selecting equipment with lower sound power levels or further reducing source noise levels by increasing the performance of attenuators. • The location of noise emitting plant as far as practicable from any sensitive receptors and directivity could be used, particularly with regard to fans and cooling systems.
Presence of Workers Camp	<ul style="list-style-type: none"> • Produce Social Management Plan. • Produce a Construction Camp Management Plan.
Soil erosion during well pad formation and construction of facility	<ul style="list-style-type: none"> • Appropriate design of foundation installations taking into account the management of soils and water and the possibility of encountering shallow groundwater.
Spillages	<ul style="list-style-type: none"> • Best site management practices will be adopted to reduce the potential for leaks/spillages of potentially polluting substances.
Creating slurry from the damping down of dust.	<ul style="list-style-type: none"> • Mitigation includes ensuring excess water is not used in damping down operations.
Discharges of wastewater	<ul style="list-style-type: none"> • Waters from the process should be reinjected.
Reduction of lake water levels and degradation of ground water resource	<ul style="list-style-type: none"> • The use of brine and/or steam condensate from the first wells will be investigated. This would significantly reduce the temporary raw water supply requirements. • Undertake water supply options assessment.
Increased storm water runoff from roads and well pads	<ul style="list-style-type: none"> • Storm water from the production and injection pads will be collected separately on each pad site. Storm water generated within any high risk area of any well pad will drain to the drilling sumps and soak into ground. Other storm water generated from within the well pads will collect at the pad boundaries where it will be allowed to soak into ground. Drainage will likely consist of V-shaped miter drains on either side of the access roads with soak away sumps at 200m intervals to prohibit excessive runoff and sediment erosion.

- | | |
|--|--|
| Drill cuttings and fluids | <ul style="list-style-type: none"> • Reuse of drilling fluid, where feasible • Disposal of water based drilling fluids into the bore hole following toxicity assessment. Water based cuttings are typically reused if they are non-toxic (e.g. as construction fill) or disposed of in a suitable facility. |
| Construction waste can cause pollution, contamination and a burden to the local waste infrastructure | <ul style="list-style-type: none"> • Minimise construction waste through use of construction waste management plan. • Grade and sort benign waste such as wood off-cuts on site into different categories and make this available at no cost to the local community to take away and reuse. • All waste metals generated on site during the construction Phase should be collected separately and stored in a suitable, secure location prior to disposal. Contaminated waste metals will require recovery by a suitable waste contractor for decontamination, if available. "Clean" waste metals can be recycled within the community. • Wherever possible, uncontaminated building rubble will be utilized within the site for hardcore or other land reclamation purposes. Contaminated building rubble will be sent off site to a suitable disposal facility capable of treating or disposing of the material without the loss of contamination at the disposal site, either by leaching or other mechanism. |
| Health and Safety | <ul style="list-style-type: none"> • Produce a Health and Safety system based on the requirements of ISO18001. • Health and Safety Plan to include a process hazard analysis and HAZOP. • Blowout and Pipeline Failure Plan. • Fire Safety and Emergency response Plans. • Fire and emergency alarms/ precautions etc to be implemented in the design. |
| Interaction between the development/ workforce and the local community | <ul style="list-style-type: none"> • Produce a HIV/AIDS framework in line with IFC guidelines. • Produce a Community Development Plan to guide community interactions. • Consultation Programme. |

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL DEVELOPMENT ON
TITLE NO. NGONG/NGONG/52926 IN NGONG-MATASIA,
OLKEJUADO COUNTY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed residential development.

The project entails construction of 54 maisonettes (4Br with servant quarter each) in addition to two shops, a borehole and an effluent treatment plant.

The plot is located off Kiserian-Ngong Road, Lower Matasia area about 4.5 km. from Ngong Town or about 5 km. from Kiserian Shopping Centre. It is about 0.7 km. off the Ngong-Kiserian Road to the East. The plot size is approximately 6 acres and currently vacant.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Issues</i>	<i>Mitigation Measures</i>
Occupational health and safety	<ul style="list-style-type: none"> • Provision of PPEs to workers. • Erecting a protective fence. • Erect scaffoldings and dust screens. • Install safety signs. • Document and display on site emergency procedures. • Create health and safety awareness. • Switch of equipment not in use. • Carry out activities with high noise levels and high vibrations during the day. • Construct temporary toilets during construction. • Maintain high standards of hygiene and cleanliness. • Provide and maintain high levels of cleanliness and conducive sanitation. • Create health and safety awareness of occupants. • Install safety signs. • Ensure adequate evacuation capacity. • Provision of protective clothing.
Traffic obstruction	<ul style="list-style-type: none"> • Stagger deliveries and collections of materials. • The neighborhood association shall enlist new neighbours in infrastructure development and maintenance.
Improper effluent disposal into natural water systems	<ul style="list-style-type: none"> • The proposed effluent treatment plant proposed has been evaluated and approved by NEMA and Nairobi City Council. The effluent plant discharge shall be monitored monthly to ensure the discharge meets legal specifications all the time.
Negative effects on flora and fauna	<ul style="list-style-type: none"> • Ensure effluent treatment plant discharge water meets environmental standards.
Improper solid waste disposal	<ul style="list-style-type: none"> • During construction, re-use materials excavated materials where possible.

Exhaust Emission to the environment	<ul style="list-style-type: none"> • Ensure all solid waste is corrected by an authorized waste handler. • To minimize emission from construction vehicles/equipment, idling of shall be prohibited. • Implementation of a regular maintenance programme on vehicles and equipment to reduce emissions shall be done.
Insecurity	<ul style="list-style-type: none"> • This shall be a gated community. • Control of access and movement within the premises. • There shall be security guards at all times. • Ensure adequate lighting of common.
Fire risk	<ul style="list-style-type: none"> • The completed project shall be fitted with safety facilities including alarm, firefighting equipment and fire exits. • There shall be detailed emergency response plan that shall be communicated to all residents.

The full report of the proposed project is available for inspection during working hours at:

FOR THE PROPOSED LONGONOT GATE GOLF RESORT AND
HOLIDAY HOMES PROJECT ON L.R. NO. NAIVASHA/
MARAIGUSHU BLOCK 10/13 IN KEDONG RANCH VILLAGE,
LONGONOT LOCATION, NAIVASHA DISTRICT, NAKURU
COUNTY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Longonot gate golf resort and holiday homes project.

The project will involve construction of residential houses, golf course, electrification and solar powered electrical perimeter fence, road networks, dams, water supply and reticulation, septic tanks, drilling 4 boreholes, police post and cemetery.

The proposed project is located on L.R. No. Naivasha/Maraigushu Block 10/13 (Kedong), Kedong ranch village, Munyo sub location, Longonot location, Longonot Division, Naivasha district in Rift Valley Province. The area targeted for development measures approximately 2400 acres located on the foot hills of Mt. Longonot bordering Mt. Longonot National Park. On the northern side the fresh water Lake Naivasha is approximately 10 kilometres from the northern end of the proposed development.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Issues</i>	<i>Mitigation Issues</i>
Changes in land use	<ul style="list-style-type: none"> • Ensure compliance with existing planning policy. • Landscaping and introduction of Vegetation. • Maintenance of landscaped gardens, conservation and management of vegetation and gardens.
Changes in hydrology or impended drainage	<ul style="list-style-type: none"> • Proper installation of drainage structures • Install cascades to break the impact of water flowing in the drains. • Ensure efficiency of drainage structures through proper design provide gratings to the drainage channels.
Vegetation clearance	<ul style="list-style-type: none"> • There should be minimal removal of indigenous plants. • Areas not used for construction should be demarcated and plants left undisturbed. • An appropriate landscaping programme should be designed.
Public health and occupational safety	<ul style="list-style-type: none"> • Train staff/workers on occupational health and safety. • Provide full protective gear & workmen's compensation cover in addition to the right tools and operational instructions & manuals. • Adopt sound waste management system to ensure proper solid waste disposal and collection facilities Adopt sound housekeeping practices. • Engage the services of qualified personnel and/or ensure training. • Ensure use of standard construction materials and to the specifications. Avoid undesirable, substandard, hazardous or unauthorized materials during construction & maintenance. • Sensitized staff on social/health issues such as drugs. • Ensure machinery and equipment servicing and maintenance as per schedules & legal requirements. • Post strategically the Factories and Other Places of Work Act Abstract & provide material safety data sheets. • Post clear warning signs eg. 'No unauthorized use of machines', ensure there are guards on moving parts etc. • Provide fully equipped First Aid kits & train staff on its use. • Ensure adherence with the legal requirements- Factories Act.
Solid waste management	<ul style="list-style-type: none"> • Follow the prevailing NEMA regulations on waste collection, storage, transportation and disposal. • Construct adequate & standard Septic tanks. It must be monitored for timely exhaustion. • Incorporate suitable facilities for collection, segregation and safe disposal of solid wastes. • Provide a waste collection centre and appropriately labelled bin preferably colour coded for various categories of waste into organic remains, plastics and

	polythenes, glass, paper, metal, wood etc.	Air pollution	<ul style="list-style-type: none"> • Enclose the site with dust-proof net. • Control speed and operation of construction vehicles. • Discourage idling of vehicles. • Spray to dry soils in excavated areas to suppress dust. • Regular maintenance of construction plant and equipment. • Engage sensitive construction workers. • Use of clean fuels. • Provide barriers such as walls and trees around site boundaries to provide some buffer against dust propagation.
	<ul style="list-style-type: none"> • Dustbin cubicles must be protected from animals and rain. • Bins should be regularly cleaned and disinfected. • Provide possibilities for waste recycling options - in-house and off-site. • Identify suitable solid waste disposal arrangements. • Ensure that materials that have to be disposed are handled by a licensed handler. • Ensure that materials to be disposed are dumped in designated areas. • Provide an appropriate storage facilities for building materials and wastes to avoid littering the compound. • Provide solid waste handling facilities such as waste bins and skips. 	Soil disturbance	<ul style="list-style-type: none"> • Control earthworks. • Install drainage structures Properly. • Compact loose soil. • Landscaping. • Ensure management of excavation activities. • Control activities specially during rainy conditions. • Provide soil erosion control structures on the steep side during construction phase.
Dust emissions	<ul style="list-style-type: none"> • Ensure that water is poured in areas where dust is emitted to avoid emitting dust into the air. • Avoid excavations in very dry weather. • Speed of vehicles should be limited. 	Water quality	<ul style="list-style-type: none"> • Water storage tanks and pipe work should be well maintained and checked regularly for integrity and defective installation be removed and replaced appropriately. • Inspect the drainage system regularly and ensure that it is free of debris including slit and other materials which may reduce its efficiency. • Ensure use well designed septic tanks. • Provide sanitary facilities for construction workers.
Exhaust fumes	<ul style="list-style-type: none"> • Construction machines should be serviced regularly to avoid excess emission of fumes. • Vehicle used should be in good mechanical condition. • Drivers and other machine operators should be instructed to minimize emissions. 	Liquid waste management	<ul style="list-style-type: none"> • Provide adequate and safe means of exhausting filled septic tanks. • Conserve water e.g. by avoiding unnecessary toilet flushing. • Ensure taps are not running when not in use. • Install water conserving taps that turn-off automatically when water is not being used. • Install a discharge meter at water outlets to determine and monitor total water usage.
Noise pollution	<ul style="list-style-type: none"> • Signs to warn people on noise. • Use of machines that make less noise. • Plant trees around the site to reduce noise transmission around the campus. 		
Fire safety and preparedness	<ul style="list-style-type: none"> • Firefighting equipment should be installed in easily accessible places. • Signs of assembly points in case of fire should be made at appropriate point (s). • Conduct training on fire fighting, evacuation and emergency response. • Adapt effective emergency response plan. • Maintain/service fire fighting machinery regularly. • Provide emergency numbers at strategic points. • Sensitize the residents on fire risks i.e. conduct regular fire drills. 		
Road safety	<ul style="list-style-type: none"> • Enforce speed limits for vehicles especially along roads leading to the site. • Provide bill boards at the site/entrance to notify motorists about the development. • Construct safe & un-obstructed acceleration and deceleration. 		
Oil pollution	<ul style="list-style-type: none"> • Proper storage, handling and disposal of oil and oil wastes. • Maintain plant and equipment to avoid leaks. • Maintenance of construction vehicles should be carried out in the contractors yard off the site. 		

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITYENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR
THE PROPOSED KIKAMBALA 7.5 MVA 33/11KV SUBSTATION
IN KILIFI DISTRICT

PURSUANT of regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the construction of the proposed Kikambala 7.5 MVA 33/11 KV substation.

The project will involve installations of Reactors, 7.5MVA Transformer, disconnect Switches, bushings, Surge Arresters, Standoff Insulators and Earthing Switches, Lightning Arresters, an open area for electrical equipment such as the air-cooled reactors, typically about 4.5 high, and switchgear, typically about 5m high. In addition it will include an auxiliary services building, fire deluge pump house and tank among others.

The proposed site on land parcel subdivision number 2112 Section III Mainland North at Kikambala in Kilifi District it is located on about 1 acre parcel of land. It is off Mombasa – Malindi road within Kikambala division approximately 20 km from Mombasa City Centre.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Demand of Raw Material	<ul style="list-style-type: none"> • Source building materials from local suppliers who use environmentally friendly processes in their operations. • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. • Use at least 5% - 10% recycled refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills.
Vegetation disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment and storage. • Designate access routes and parking within the site. • Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance. • Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction.
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in tanks so that it can be used for cleaning purposes. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of

	<p>detention and/or retention with graduated outlet control structure will be designed.</p> <ul style="list-style-type: none"> • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to use existing graded roads. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Interconnected open drains will be provided on site. • Roof catchments will be used to collect the storm water for some substation uses. • Construction of water storage tanks to collect storm water for substation uses.
Increased solid water generation	<ul style="list-style-type: none"> • Use of an integrated solid waster management system i.e. through a hierarchy of options: Reduction at source, Recycling, Reusing, Incineration, Sanitary land filling. • Through accurate estimation of the dimensions and quantities of materials required. • Use of durable, long lasting material that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site. • Dispose waster more responsibly by contracting a registered waste handler who will dispose the wastes at designated sites or landfills only. • Waste collection bins to be provided at designated points on site.
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on site speed limit regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. • Personal Protective equipment to be provided to employees and worn.
Exhaust emission	<ul style="list-style-type: none"> • Vehicle idling time shall be minimized • Alternatively fuelled construction equipment shall be used where feasibly

	<p>equipment shall be properly maintained.</p> <ul style="list-style-type: none"> Sensitise truck drivers to avoid unnecessary running engines of stationary vehicles and to switch off engines whenever possible.
Noise and vibration	<ul style="list-style-type: none"> Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being use. Sensitise construction drivers to avoid running of vehicle engines or hooting. Ensure that construction machinery are kept in good condition to reduce noise generation. Ensure that all generators and heavy duty equipment are insulated or placed in enclosures (containers) to minimize ambient noise levels. Trees to be planted around the site to provide some buffer against noise propagation. The noisy construction works will entirely be planned to be during the day time when most of the neighbours will be at work.
Increased energy consumption	<ul style="list-style-type: none"> Ensure electrical equipment, appliances and lights are switched off when not being use. Install energy saving bulbs/tubes at all lighting points instead of incandescent bulbs which consume higher electric energy. Plan well for transportation of materials to ensure that fossil fuels (diesel, transformer oil, petrol) are not consumed in excessive amounts. Monitor energy use during construction and set targets for reduction of energy use.
Increased Water Demand	<ul style="list-style-type: none"> Water to be brought in from the City Water and Sewerage Company. Harness rainwater for office & gardening. Install water conserving taps that turn-off automatically when water is not being used. Promote recycling and reuse of water as much as possible. Install a discharge meter at water outlets to determine and monitor total water usage. Promptly detect and repair of water pipe and tank leaks. Sensitise construction workers to conserve water by avoiding unnecessary toilet flushing etc. Ensure taps are not running when not in use.
Generation of waste water	<ul style="list-style-type: none"> Provide means for handling sewage generated at the construction site. Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies.

	<ul style="list-style-type: none"> Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
Statutory Requirements	<ul style="list-style-type: none"> Ensure compliance with The OSHA (Building Operations and Works of Engineering Construction Rules), L.N. 40 of 1984.
Worksite Safety and Health Hazards to employees	<ul style="list-style-type: none"> Ensure compliance with the Occupational Safety and Health Act (OSHA) 2007 provisions e.g. employees to be provided with appropriate PPE.
Oil spills Hazards	<ul style="list-style-type: none"> Install oil trapping equipments in areas when there is a likelihood of oil spillage such as during the maintenance of construction facility. Soil in such an area will be well protected from contamination.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED ECOLOGUE AT HAGENIA, ABERDARE NATIONAL PARK

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the Proposed Ecologue at Hagenia, Aberdare National Park.

The project entails construction of a 30 bed eco-lodge that shall consist of one-level structures on elevated wooden decks and with semi-permanent solid walls of natural materials that blend well with the environment with minimum concrete. In addition it will comprise of 15 luxury cabins, a club house, swimming pool and private lone huts for dining and bird watching.

The proposed project will be located at Hagenia site within Aberdare National Park on a 35 acre piece of land. The site is six kilometres south-west of Chania River and the Chania Picnic site.

The following are the anticipated impacts and proposed mitigation measures:

Environmental issue	Mitigation Measures
Hydrology and Drainage	<ul style="list-style-type: none"> Existing and new tracks should have provisions for side drains, mitre drains and culverts all located at appropriate points,

	<p>that is, employing the principle of discharging water off the road little and often, particularly on sloped terrain.</p> <ul style="list-style-type: none"> The drains must lead to the safest point of discharge (usually a water course). These structures must be regularly maintained.
Soil Erosion	<ul style="list-style-type: none"> Only minimal bush clearing should be done With regard to creating and or gravelling of tracks, if recommendations for frequent drainage off the road are taken into consideration, then erosion will be minimized. The installation of check-dams (using sticks and stones, or naturally occurring biological material) and scour checks along the drains will also prevent erosion. Again these structures must be regularly maintained. Excavations of the site will be confined only within the sections upon which constructions is taking place. Excavated earth will be held away from locations of the site not susceptible to surface runoff of storm water. The earth removed from external disposal will require to be deposited on sites without the risk of being washed down during rains and where it will not compromise other land use activities in those areas. Extra precautions on control of soil erosion will be required on construction during periods of heavy rainfall. Re-vegetate exposed areas on the site so as to mitigate further erosion of soil. Landscaping with indigenous species will help to mitigate soil erosion during the operation phase of the project.
Water Resources	<ul style="list-style-type: none"> Flows rates in the River or springs that are intended to be used as water sources should be established The Proponent should liaise with WRMA to obtain the necessary permit to draw water River water used for the eco-lodge's supply will have to be tested and treated accordingly. Parameters for testing should include suspended solids, nitrates, phosphates, pH, conductivity, organic matter and fluoride. Care should be taken to ensure that water tapped comes right from the source. Dosing with chlorine should be sufficient for the purposes of the eco-lodge, as this water is not intended for potable use. This can be done through automated procedures or manually, but whichever method is chosen, it is important that the residual concentration of 0.2 to 0.5 mg/l (depending on bacterial contamination levels) after 30 minutes of contact time is maintained in order to ensure bacterial disinfection. Good environmental practice would entail properly recording and filing water treatment procedures, so that in the absence of the person normally responsible for treatment of water, any other assigned person is able to competently carry out this function. In the same vein, guests as well as staff should be sensitized with regard to minimizing water usage. In order to reduce water consumption, guests should be encouraged not to have their clothes washed while they are at the Ecolodge. In addition, camps should arrange to take their linen, uniforms etc to Nyeri or Nairobi for washing.
Noise and Vibrations	<ul style="list-style-type: none"> Ensure that construction equipments are maintained at the best operating conditions

	<p>to avoid unnecessary noise.</p> <ul style="list-style-type: none"> All equipment and machinery must be regularly maintained. Guests must be advised to keep noise levels down, especially when watching game. Playing radios and ghetto-blasters should not be permitted within the Ecolodge. Hooting must also be prohibited. Driver guides should adhere to Kenya Association of Tour Operators (KATO) codes of ethics, especially during game drives. Ensure workers are provided with the necessary personal protective equipment including earplugs or earmuffs when operating or working with noisy equipment. Power generators should be installed in acoustically designed structures to prevent noise pollution.
Air Quality	<ul style="list-style-type: none"> Drivers are advised to avoid idling and unnecessary idling of their vehicles while within the Park Regular servicing of vehicles to avoid emitting of fumes beyond the required levels
Solid Waste	<ul style="list-style-type: none"> Proper disposal of construction wastes and debris outside the National Park at approved dump site. Segregate waste Adopt reduce, reuse, recycle philosophy Waste to be taken to Nairobi until suitable local options is available. Train local communities to recycle/ reuse waste
Construction/ Burrow Materials	<ul style="list-style-type: none"> Bonafide/ environmentally friendly materials sources Restricted use of certain specified materials Burrow pits to be located outside the National Park, ensure controlled excavation, and rehabilitation after use.
Aberdares National Park	<ul style="list-style-type: none"> Monitor locations of wildlife within the National Park. Implementation of the Management Plan for the Forest Ecosystem and the National Park.
Vegetation	<ul style="list-style-type: none"> Prohibit off-road driving Encourage neighbouring communities to grow vegetables to supply the camps Prohibit planting of non-endemic species in the National Park. Encourage communities to grow wood for campfire and energy sources

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
