ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PETROL STATION ON L.R. NO. 27/313, IN RIDGEWAYS ALONG KIAMBU ROAD, NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Petrol Station on L.R. No. 27/313, in Ridgeways along Kiambu Road, Nairobi County.

The Proponent (Rispha Gathitu Wainaina) of the proposed Petrol Service Station is proposing to carry on construction of a canopy over the pump islands, installation of fuel dispenser pumps and installation of the underground storage tanks and the piping. A single-storey building will be constructed housing the service bays (with greasing pits), car wash, generator and compressor room. Another building shall be housing a canteen, ATM points, convenient shop, washrooms, general office, bulk store, tyre centre and M-Pesa shop on the ground floor and salon, barber shop, cyber cafe, washrooms, cell phone shop, boutique, chemist and office on the upper floor. The proposed project shall also provide parking, an air (pressure) and water point and construction of a wastewater treatment plant/system for wastewater disposal since the area has no sewer.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Changes in hydrology/impended drainage	<ul style="list-style-type: none"> • Proper Installation of drainage structures • Install cascades to break the impact of

water flowing in the drains

- Ensure efficiency of drainage structures through proper design and maintenance
- Provide gratings to the drainage channels
- Regular checks on any sludge along drainage channels
- Visual checks of oil interceptors and drainage channels for any leaks

Soil erosion

- Control earthworks
- Rehabilitate degraded environment to avoid siltation and wash offs.

- Compact loose soils
- Ensure management of excavation activities

- Control activities especially during rainy conditions

- Provide soil erosion control and conservation structures where necessary.

Air pollution through dust and gaseous emissions

- Control speed and operation of construction vehicles

- Water should be sprayed during the construction phase of excavated areas

- Regular maintenance of construction plant and equipment

- Proper use of PPEs

Noise pollution

- Sensitize drivers of construction machinery on effects of noise

- Maintain plant equipment (if present/used)

- Construction activities to be restricted to daytime

- Workers in the vicinity of or involved in high-level noise to wear respective safety & protective gear i.e. earplugs & earmuffs

Oil pollution

- Proper storage, handling and disposal of new oil and used oil and related wastes

- Maintain plant and equipment to avoid leaks

- Maintenance of construction vehicles should be carried out in the contractors yard (off the site)

- Provide oil interceptors along the drains leading from car wash, service bays, oil storage areas and dispensing pump islands

Water resource

- Management of water usage. Avoid unnecessary wastage especially at the car washing bay

- Recycling of water at the construction phase where possible

- Use of water conservation signs at the wash rooms and install water conserving taps

Contractors lay down area

- Special attention should be paid to the sanitary facilities on site especially disposal of human waste.

- Garbage should be disposed off in accordance with Municipal Council requirements

Road safety

- Enforce speed limits for construction vehicles especially along road links leading to the site

- Provide bill boards at the site/entrance to notify motorists about the development

Public health and occupational safety

- Ensure proper solid waste disposal and collection facilities

- Design of sewerage system should be as

provided in the plans

- Provide First Aid kits on the site
- Ensure there is no ponding to eliminate breeding of mosquitoes during construction
- Workers should be trained on occupational health & safety and first Aid administration
- Train staff on petroleum product handling

Fire safety training/
emergency response
procedures (ERPs)

- Training in fire fighting and regular drills
- Ensure equipment is in good working condition.
- Put up emergency response contacts
- Put up ERP notification instructions

Fire outbreak

- Put up simple instructions on how to handle fires, product spills, LPG incidents, armed robbery and product contaminations
- Install fire-fighting equipment as provided by municipal council fire department.
- Sensitize the residents on fire risks i.e. conduct regular fire drills
- Adapt effective emergency response plan
- Provide emergency numbers at strategic points

Security

- Provide security guards and facilities during construction period
- Security men should always be available to alleviate cases of robbery.

Water quality and waste
management

- Construct oil interceptors and monitor daily
- Strict adherence to the provisions of Waste Management and Water Quality Regulations
- Construct adequate and standard wastewater treatment plant/system
- Reduce waste at source, recycling and disposal of unrecyclable waste in approved dumpsites. The proponent should explore engaging the services of a registered waste handler

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi

(c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MOUNT KENYA WILDLIFE ESTATE AT
OL PEJETA CONSERVANCY, LR NO 2781/1, LAIKIPIA EAST
DISTRICT, LAIKIPIA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Mount Kenya wildlife Estate at Ol Pejeta Conservancy, L.R. No. 2781/1, Laikipia East District, Laikipia County.

The Proponent (Ol Pejeta Conservancy) of the proposed development of Mt. Kenya Wildlife Estate is proposing to carry on construction of 66 residential houses made up of both 3 bed villas and 4 bed villas which will be built within a secure enclosed estate (using the existing fence) filled with harmless "plains game".

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Devegetation, soil erosion	• Develop soil erosion control measures during and after clearing works.
Alteration of landscape quality	• Clear vegetation only where necessary.
	• Replace any vegetation damaged accidentally.
	• Undertake construction works during dry seasons to minimize chances of erosion.
	• Have a collective drainage system for the area and vegetated outlets.
Lack of cooperation and misunderstanding amongst various key stakeholders	• Enhance consultation activities and stakeholders' scope of coverage during EIA study.
	• Provide technical and socio-economic facts about the proposed project.
Possible accidents and injuries to workers on the site	• Keep a general accident inventory at the site.
	• Provide and enforce use of protective clothing and equipment.
	• Prepare evacuation plans including provisions for emergency exits, fire alarms, standby car for emergency and rescue, and a First Aid box.
Increased generation of solid wastes such as debris, pieces of plastic, metals etc	• Ensure separation of biodegradable and non-biodegradable wastes.
	• Encourage use of recyclable materials.
	• Provide adequate waste collection bins.
	• Sell wastes to NEMA licensed recyclers and fabricators.
	• Preserve reusable wastes such as pieces of metal for future use in maintenance works.
Possible noise pollution disturbing the neighborhood.	• Restrict noisy construction works to daytime only.
Possible disturbance to animal serenity	• Schedule construction time with movement of wildlife in the Ranch in mind.
Destruction of the cultural manyatta	• Relocate the manyatta to a more strategic point (plans are underway to put the manyatta outside Golf 2 (main gate) in a more business strategic

	location as this is the point for tourist entry).
Possible occurrence of liquid wastes disposal problems such as leaking sewer lines, overflowing sewage, and obnoxious smells due to inadequacies of the Jet 3000 GDP Sewage Treatment Plants.	<ul style="list-style-type: none"> • Ensure adequate maintenance through regular checks on sewer lines damage or blockages. • OPDC should work in partnership with NAWASCO or any other NEMA licensed body during the operation of the sewage plant. • OPDC should obtain a license for wastes disposal from NEMA in line with the Waste Management Rules 2006.
Possible overflows and the resultant foul smells and health risks.	<ul style="list-style-type: none"> • OPDC should set up a waste management monitoring system for the Jet 3000 GDP plants.
Localized solid wastes management problems within the project site	<ul style="list-style-type: none"> • OPDC to set aside and construct a central garbage collection point for onward transportation to NEMA approved dumping site. • Provide adequate enclosed garbage points in every cluster for containing wastes before transportation to the central point. • Ensure prompt collection of garbage from the central dumping site by NEMA approved service provider to ensure that the garbage is not held beyond reasonable number of days. • OPDC to create awareness among the residents on the need to separate biodegradable and non-biodegradable wastes. • OPDC to sensitize residents to use organic wastes generated from their kitchens as compost in their kitchen gardens.
Possible attacks by wildlife on humans resulting in injuries and deaths	<ul style="list-style-type: none"> • OPDC to continue implementing its stringent policies on control of wildlife. • Create awareness to residents and visitors on possible wildlife attacks. • Have enough guides/security guards in place. • Put in place a rapid response system in case of attacks by wildlife.
Possible overexploitation/depletion of ground water resource	<ul style="list-style-type: none"> • Adhere to water permit conditions. • Monitor water levels. • Ensure efficiency in water use. • Alternate underground water use with roof catchments/rain water harvesting.
Disposal of wastes near boreholes	<ul style="list-style-type: none"> • Ensure borehole sanitary seals are working efficiently. • Monitor water quality periodically. • Erect a fence around the borehole.
Possible overexploitation/depletion of ground water resource	<ul style="list-style-type: none"> • Adhere to water permit conditions. • Monitor water levels. • Ensure efficiency in water use. • Alternate underground water use with roof catchments/rain water harvesting.
Vegetation degradation around water holes and dams	<ul style="list-style-type: none"> • Plant trees and grass around the borehole. • Construct acceptable number of small capacity water holes/dams spread across the project site.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED COMMERCIAL AND RESIDENTIAL
DEVELOPMENT FOR VISHWA DEVELOPERS LIMITED ON
PLOT NO. 209/11154 IN SOUTH 'C', NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed a commercial and residential development on plot no. 209/11154 in South "C", Nairobi County.

The Proponent (Vishwa Developers Ltd) is proposing to construct a commercial and residential development which will include 480 housing units and a shopping mall.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Vegetation and animal disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works • Designate access routes, truck parking and equipment areas within the site • Preserve of some individual trees within the site. • Introduction of vegetation (trees, shrubs and grass) and landscaping on open spaces and their maintenance.
Increased storm water run-off and Soil Erosion	<ul style="list-style-type: none"> • Surface runoff and roof water should be harvested and stored in underground reservoir for reuse • There should be a storm water management plan that minimizes impervious area infiltration. • Apply soil erosion control measures that will reduce run-off velocity and increase infiltration of storm water into soil • Site excavation works is well planned to allow site rehabilitation in stages • Open drains all interconnected will be provided on site. • Roof catchments will be used to collected storm water for some domestic use • Construction of water storage tanks to

Increased solid waste generation	<p>collect storm water for domestic uses</p> <ul style="list-style-type: none"> • Use of an integrated solid waste management system e.g. 1. Source reduction. 2. Recycling 3. Compositing and reuse 4. Combustion 5. Sanitary land filling. • Through accurate estimation of the size and quantities, order materials in the sizes and quantities that are needed. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed off. • Ensure that damaged or wasted construction materials are recovered for refurbishing and use in other projects. • Donate recyclable/reusable or residual materials to local institutions and individual local residents • Use durable, long-lasting materials that will not need to be replaced so often. • Provide facilities for proper handling and storage of construction materials to avoid damage or exposure to the elements of weather. • Running educational campaigns amongst residents to encourage reuse or recycling of the solid waste. • Private waste disposal company to be contracted to transport and dispose the solid waste from site • Dispose waste more responsibly by dumping at designated dumping sites or landfills only. 	
Dust Emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. • Personal Protective equipment to be worn. • Avoid excavation works in extremely dry weathers. 	
Exhaust emission	<ul style="list-style-type: none"> • Vehicle idling time shall be minimized. • Fuelled construction equipment shall be used where feasible and shall be properly tuned and maintained. • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off engines at these points. 	
Noise and vibration	<ul style="list-style-type: none"> • Sensitize truck drivers and machine operators to switch off engines of vehicles or machinery when not in use. • Sensitize truck drivers to avoid gunning of engines or hooting especially near sensitive areas e.g. churches, residential areas and hospitals. • Ensure all generators and heavy equipment are insulated or placed in enclosures to minimize ambient noise levels. • The noisy construction works entirely be planned to be during day time. 	
Increased energy consumption	<ul style="list-style-type: none"> • Ensure electrical equipment, appliances and lights are switched off when not 	<p>being used.</p> <ul style="list-style-type: none"> • Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume a lot of energy. • Ensure planning of transportation of materials to ensure that fossil fuels are not consumed in excessive amounts. • Monitor energy use during construction and set targets for reduction of energy use.
High water demand		<ul style="list-style-type: none"> • Water to be drawn from the existing borehole on site. • Harness rainwater for domestic use and gardening. • Install water conserving taps that turn off automatically when water is not being used. • Promote recycling and reuse of water as much as possible. • Sensitize staff to conserve water by avoiding unnecessary usage of water.
Generation of sewage/effluent		<ul style="list-style-type: none"> • Provide means for handling sewage generated by construction workers. • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are violated.
Hydrology and water quality degradation		<ul style="list-style-type: none"> • Identify areas where refueling and vehicle maintenance activities and storage of hazardous materials, if any will be permitted. • Ground water will be collected during construction contained and disposed of in accordance with all applicable regulations.
Vector and water borne disease incidence		<ul style="list-style-type: none"> • Complete refuse collection and handing service to be provided.
Incidents, Accidents and dangerous occurrences		<ul style="list-style-type: none"> • Ensure that materials are stored or stacked in such manner as to prevent fall or collapse. • Ensure the provisions for reporting incidents, accidents and dangerous occurrences during construction. • Enforce adherence to safety procedures and prepare contingency plan for accident response in addition to safety education and training. • Provide all staircases with suitable handrails on both sides. • Ensure that construction workers are not locked up such that they would not escape in case of emergency. • Design suitable documented emergency preparedness and evacuation procedures to be used during any emergence and such procedures must be tested at regular intervals. • Immediately stop any operations where there is an imminent and serious danger to health and safety and evacuate workers.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED JUJA ESTATE DEVELOPMENT PLOT L.R. NO. 17564/255 AND 17564/256, THIKA, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Juja Estate Development on plot L.R. No. 17564/255 and 17564/256, Thika, Kiambu County.

The Proponent (Juja South Estate Limited) of the proposed Juja Estate development is proposing to carry on construction of residential apartments, shopping facilities and a public school. The development will comprise of ground, first, second and third floors.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Vegetation clearing	<ul style="list-style-type: none"> Minimal clearing of vegetation. The Project Manager in collaboration should ensure that those trees that are to be protected insitu should be protected, clearly identified on the construction plan. Removal of vegetation to take place only within demarcated construction site. Non-essential removal of vegetation to be avoided. No development on slopes with a gradient > 16%. Re-vegetation should incorporate natural vegetation.
Solid waste management	<ul style="list-style-type: none"> Efficient use, re-use and re-cycling of materials to minimise on solid waste. Segregation of waste before appropriate disposal. The contractor should provide disposal bin around the site. Paper and glass to be sent for reuse/ recycling. The contractor should prepare a waste management plan for management of solid waste.
Liquid waste	<ul style="list-style-type: none"> Concrete batching and mixing should occur at one particular point and the site should be bunded or paved. Contaminated water from construction works should be directed to a containment area where it could be reused at the construction site. Portable toilets should be provide on site so as to mitigate pollution of subsurface

Noise and vibration pollution and visual intrusion

water in case where pit latrine are used

- Schedule noisy activities during the normal working hours of between 8am to 5pm.
- Ensure that the operation of the existing quarrying do not exceed 0.5 centimetres per second beyond any source, property boundary or 30 metres from any moving source.
- Assess the risk of the quarry to the development and liaise with the quarry owner and the authority to ensure that the risk of the quarry are assessed and an informed decision taken.
- Put off machines and equipments when not in use.
- Ensure machinery is well maintained to reduce noise emitted;
- The contractor should adhere to the provision in the Environmental Management and Coordination (Noise and Excessive Vibration pollution) (control) regulations, 2009.
- Provide worker with appropriate PPEs when working under noisy environment e.g. ear plugs

Air/dust pollution

- Site vegetation correctly according to rehabilitation guidelines stated in the EMP; and
- Practice dust management techniques, including watering spraying to suppress dust.
- Move earth and sand in covered vehicles/ transport.
- All plant to be of good condition with acceptable smoke emissions.
- Practice selective clearing of vegetation.
- Set up dust barriers/ screens at strategic locations.
- Provide and enforce the appropriate use of Personal Protective Equipment (PPE) against dust.

Soil erosion and sedimentation

- Practice selective vegetation clearing where necessary.
- Install adequate storm water management measures such as sand filters, wet ponds.
- Replant cleared vegetation as soon as possible and landscape the cleared areas.
- Avoid vegetation clearing especially on steep slopes during the rainy season.
- Schedule earth moving activities during the dry season.

Increased water demand due to construction works

- The contractor should sensitize construction workers on the importance of proper water management.
- Replace or repair leaking pipes supplying water to the construction sites to minimized wastage from leakages or pipe burst.
- The Contractor should ensure provision of adequate water storage facilities on the construction site.
- Reuse of waste water from the construction activities for curing of concrete surfaces and cleaning of equipment.
- Direct construction water runoff to areas where it can soak into the ground or be collected and reused.
- Lock water tank valves to prevent

Occupational health and safety	<ul style="list-style-type: none"> • unauthorized use. • Repair water equipment as needed to prevent unintended discharges. • Provide Personal Protective Equipment • Train workers on personal safety and how to handle • equipments and machines • Contractor should contract a qualified Health and Safety advisor to conduct training and monitoring of construction works; • The Contractor should train several workers in First • Aid; • Workers should be inducted with training on health • and safety by DOSHS certified health and safety • advisor; • Report any accidents / incidences and treat and • compensate affected workers • Provide sufficient and suitable sanitary conveniences which should be kept clean • Provide and enforce the use of Personal Protective Equipment (PPE); • The contractor should provide install fire fighting equipment; • The Contractor should erect safety and informative signages; • The contractor should develop site Health and Safety guidelines; • Maintain an incident/ accident register;
	<ul style="list-style-type: none"> • Place portable fire extinguishers at suitable locations; • Smoking on site or burning of waste should be prohibited; • Electrical works such as electrical wiring should be done by qualified technicians or engineers • Train and induct workers on the use of fire extinguishers and other fire fighting equipments; • Allocate a fire assembly point; • Ensure fire safety warnings are prominently displayed at appropriate locations where fires are likely to occur; • Develop a Fire Safety Plan through a qualified specialist and implement the provision of the plan at the workplace
Fire risk and management	
Loss of biodiversity	<ul style="list-style-type: none"> • vegetation within the drainage lines is not to be cleared; • modifications to the design of the development to ensure spaces are left to allow for regeneration of loss biodiversity; • Post project restoration of loss habitat through re-vegetation of affected areas
Ground and surface water quality	<ul style="list-style-type: none"> • No water abstraction for construction from streams or river; • No construction activities to occur in any wetlands; • No concrete batching to occur directly on the ground. Concrete batching area should be bunded to prevent contamination of soils and surface water

Electricity usage	<ul style="list-style-type: none"> • features; • Plant to have drip trays to contain any potential leakages of fuels and oils; and • Erect a meter in the premises to check on total kilowatts used and for billing purposes. • Switch off light that are not in use. • Use of energy conserving bulbs/ tubes. • Use of natural light for lighting purposes • Use natural ventilation from windows and doors and avoid using Air Con that use electricity. • Provide a standby generator in the premises in cases power goes out.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Scrap Metal Smelter and Steel Manufacturing Plant will be located on Plot No. LR 17483/1, Mavoko Municipality, Machakos County.

The Proponent (Arvind Engineering Ltd) of the proposed construction of a scrap Metals Smelting & Steel Manufacturing plant in Mavoko Municipality, Machakos County. The proponent is proposing to extract various metals from ore to create more refined metals products. Smelting involves heating the ore with a reducing agent such as coke, charcoal or other purifying agents.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Safety of workers	<ul style="list-style-type: none"> • Restrict visitors and factory workers mostly into the structure under renovation. • Establish tapes. • Safety should be observed by all within

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED LPG FILLING PLANT AT THE KENOL
KOBIL DEPOT OFF OLD AIRPORT ROAD, KISUMU, KENYA

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed KenolKobil LPG Bulk Storage and Filling Plant located Off Old Airport Road, Kisumu.

The Proponent (Kenol Kobil Limited,) of the proposed LPG Filling Plant at the Kenol Kobil Depot off Old Airport Road, Kisumu, Kenya has proposed to carry out

Construction of a Liquefied Petroleum Gas (LPG) Bulk Storage and Filling Plant for receiving, storage of bulk LPG and filling of cooking gas into cylinders for distribution in Kisumu and the neighbouring region of Nyanza, Western and part of Rift Valley Provinces. The project will involve the installation of 8 Mounded 54MT Tanks and all associated Civil Works, installation of a Filling Station and related conveyor system, construction of a filling hall, concreting of all driveway within the plant, construction of office and ablution blocks, installation of a fire fighting system for the entire plant and construction of a fire water storage tank.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Clearing of depot site area	<ul style="list-style-type: none"> Utilize appropriate clearing techniques (e.g. Hand clearing as opposed to mechanized clearing). Maintain native ground cover and low growing vegetation by selective removal of obstructing trees. Minimizing clearing and disruption to the site vegetation. Replant disturbed sites with native plant species.
Soil erosion	<ul style="list-style-type: none"> Soils excavated for the construction of the LPG facility shall be disposed offsite or used for backfilling where possible. Existing vegetation shall be minimally disturbed during the construction. Re-plant degraded areas with local species to improve ground cover.
Air pollution (dust, fuel emissions)	<ul style="list-style-type: none"> Prohibit idling of vehicles. Water shall be sprayed during the construction phase on excavated areas to reduce dust emission. Regular maintenance of plant and equipment. Provision of dust masks for use while working- in dusty conditions. Use of serviceable vehicles and machinery to avoid excessive smoke emission.
Noise pollution	<ul style="list-style-type: none"> Noise reduction/ hearing protection devices when working with noisy equipment. Use serviceable equipment with low noise emission Instruct truck and machinery operators to avoid raving of engines
Management of solid waste	<ul style="list-style-type: none"> Provide solid waste collection facility for the temporary storage of waste prior

to disposal.

- The storage yards should be provided with solid waste disposal facilities such as waste bins/chutes.
- Excavation activities to be done preferably during the dry season to avoid soil erosion

Site area and groundwater
water pollution

Ensure that machinery and used oil from vehicles is not released to the ground through the provision of mode of collection and appropriate disposal.

- Clear instruction to machine and vehicle servicing personnel on this provision to be made available.

- Construct a drainage system within and around the depot site leading to an interceptor.

- Carry out regular drainage and interceptor maintenance.

Risk of fire

- Install Mounded LPG Tanks and include the use of fireproof electrical installations at the facility

- Install adequate fire fighting installations and provision for adequate water storage.

- Provide emergency stop switch around the facility

- Installation of Gas Detectors

- Provide a "First Aid Box", with proper equipment with proper training of Depot staff on how to administer first aid

- Address the depot fire prevention and control capacity.

- Install Fire alarms, smoke detectors, etc. for fire warning and prevention

- Staff training and regular drills on fire prevention and control will be encouraged to ensure proper preparedness for fire control in the depot

- The fire control equipment will be regularly serviced after installation to ensure efficient performance when required

Physical hazards

- Appropriate hand and foot protection (PPE) during the manual clearing of vegetation;

- Adopting ergonomic work flow designs that fit physical tasks to employees and not vice versa while maintaining a balance with productivity

Working at heights

- Use construction site barrier tapes to isolate the site(working) area to bar intruders from accessing the area in case of a dropping object

- Test structures for integrity prior to undertaking work;

- Implement a fall protection program that includes training in climbing techniques and use of fall protection measures, Provide Safety Belts

- Inspection, maintenance, and replacement of fall protection equipment.

- Provide first aid facilities at the site

- Use of helmets and other protective devices will mitigate against scratches, bruises; lacerations and head injuries due to dropping objects

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED M.T.S. OVERPASS AND ROADWAYS
CONNECTING PLOTS L.R. NOS. 437 AND 438/I/MI AND
3910/VI/MN SITUATED AT KPA PORT ROAD AND MAKUPA
CREEK RESPECTIVELY, MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed M.T.S. Overpass & Roadways connecting Plots L.R. Nos. 437 & 438/I/MI and 3910/VI/MN situated at KPA Port Road and Makupa Creek Respectively, Mombasa County.

The Proponent (Makupa Transit Shade Limited) of the proposed M.T.S Overpass to link Plots L.R. Nos. 437 & 438/I/MI (port area) and 3910/VI/MN within Makupa Creek is proposing to carry on construction of a two-lane overpass linking two properties owned by the proponent on developed Plots L.R. Nos. 437 & 438/I/MI located at K.P.A., Port Road and L.R. No. 3910/VI/MN located at adjacent to the Makupa Creek next to the Municipal Dumpsite area which is earmarked for rehabilitation. The proponent operates a container depot business on Plots L.R. Nos. 437 & 438/I/MI while L.R. No. 3910/VI/MN is vacant property earmarked for use in port related activities once the overpass becomes operational. The length of the overpass is approximately 100M and is structured to capitalize on the Makupa Creek constrictions, considering the location of the proponent's facilities.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Tidal prism change	<ul style="list-style-type: none"> Reduce the gradient of the slopes of overpass terminals. Continually monitor the tidal regime change of the creek. Monitor the stability of adjacent properties regarding renewed tidal erosion and provide sufficient and suitable embankments by stabilizing the overpass terminal areas. Restore ancient adjacent reclaimed and filled areas of the creek, which are not in use as constructed areas, into salt marshes in order to compensate the loss of tidal prism and the surface of intertidal areas.
Water quality	<ul style="list-style-type: none"> Slowing down the tipping processes and funneling pier motor materials Undertake construction of stabilization bunds and backfilling of overpass terminals during low tides.

	<ul style="list-style-type: none"> The construction of the bunds can be particularly planned to coincide with the spring low tides. Use French drains and underground piping to ensure continued flow of fresh water into the creek area. Decrease time frame over which the overpass construction activities are to take place, to avoid the daily re-suspension of sediments. Ameliorate the impacts of the daily re-suspension of sediments by the suctioning of sediments that have resettled. Monitor the quality of storm water discharging from the overpass upon commissioning.
Chemical disturbances	<ul style="list-style-type: none"> The materials to be used as backfill for the overpass terminals will be tested for chemical loading or possible contamination. Such materials will only be obtained from sites that are compliant with NEMA Regulations.
Habitat alterations	<ul style="list-style-type: none"> Directing disposal of backfilling materials using silt curtains. Ensure that there is no spread of backfilling materials to adjacent areas within the terminal areas of the overpass i.e. sites that are not within the plot boundaries of the proponent's area that is not going to be used for the construction of the overpass.
Impact on Marine life	<ul style="list-style-type: none"> The key mitigating factor on marine life form during construction of the overpass will be to ensure that project activities are conducted during the low tides to minimize impact on sea dwelling organisms. Develop and implement a monitoring programme for marine life forms to determine resilience upon completion of the overpass development activities and seek the cooperation of Kenya Marine and Fisheries Institute (KMFI) in this regard. The rapid undertaking of the overall overpass construction to conceptually decrease the severity and range of impacts in space and time.
Potential instability	<ul style="list-style-type: none"> Use of appropriate substrate for creating terminal bunds and backfilling. Conducting scheduled compaction tests at defined levels of the overpass construction process. Ensure engineering integrity. Allow adequate time for curing of piers and concrete area upon completion.
Shoreline alterations	<ul style="list-style-type: none"> Observe the conditions of use of the land as stipulated under the title deeds for the land.
Landscape changes	<ul style="list-style-type: none"> Comply with the provisions of the draft zoning plan for Changanwe area and its environs. Overpass will occupy a lower topology compared to some sections of the surrounding land use.
Health and safety of workers at construction stage	<ul style="list-style-type: none"> Provision of appropriate and adequate Personal Protective Equipment (PPE) to employees including life jackets. Have stand-by competent rescue personnel and a boat /ambulance. Enforcement and proper use of PPE by all workers at site. Provision of appropriate tools,

equipment and machinery in sound working conditions to employees.

- Develop clear policies on treatment of injured personnel.
- Provide insurance cover to workers on site.
- Reduce employees' exposure to dust and noise at the workplace.
- Installation of guard rails.
- Monitoring the integrity of the guard rails overtime.

Safety at operational stage of the overpass

The full report of the proposed project is available for inspection during working hours at:

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi

(c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

GAZETTE NOTICE NO. 12407

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RECLAMATION OF LAND FROM THE SEA AT MAKUPA CREEK ON PLOT L.R. NO. 4106/VI/MN, OFF MAKUPA CAUSEWAY WITHIN MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed reclamation of land from the sea at Makupa Creek on Plot L.R. No. 4106/VI/MN, off Makupa Causeway within Mombasa County.

The Proponent (Makupa Transit Shade Limited) of the proposed reclamation of land from the sea at Makupa Creek on Plot L.R. No. 4106/VI/MN, off Makupa Causeway is proposing to carry on construction reclamation of land from the sea at Makupa Creek on Plot L.R. No. 4106/VI/MN off Makupa Causeway in Mombasa County, for the purposes of light industrial use in port related activities. Although the total land area available for reclamation is 15.27Ha as per the deed plan, the proponent will only reclaim approximately 20% of the plot area. This will also serve the purposes of increasing the area available for light industrial activities on adjoining plot L.R. No. 3910 which is also owned by the proponent.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Tidal prism change	<ul style="list-style-type: none"> • Reduce the gradient of the slopes of overpass terminals. • Continually monitor the tidal regime change of the creek. • Restore ancient adjacent reclaimed and filled areas of the creek, which are not in use as constructed areas, into salt marshes in order to compensate the loss of tidal prism and the surface of intertidal areas.

Water quality

- Monitor the stability of adjacent properties regarding renewed tidal erosion and provide sufficient and suitable embankments by stabilizing the overpass terminal areas.
- Slowing down the tipping processes and funneling pier motor materials.
- Obtaining and use of coarse gravel and rock boulders from quarries rather than fine material for creation of bunds and backfilling.
- Undertake construction of stabilization bunds and backfilling of overpass terminals during low tides.
- The construction of the bunds can be particularly planned to coincide with the spring low tides.
- Use French drains and underground piping to ensure continued flow of fresh water into the creek area.
- Decrease time frame over which the overpass construction activities are to take place, to avoid the daily re-suspension of sediments.
- Ameliorate the impacts of the daily re-suspension of sediments by the suctioning of sediments that have resettled.

Chemical disturbances

- Monitor the quality of storm water discharging from the overpass upon commissioning.

- The materials to be used as backfill for the overpass terminals will be tested for chemical loading or possible contamination.

Habitat alterations

- Such materials will only be obtained from sites that are compliant with NEMA Regulations.

- Directing disposal of backfilling materials using silt curtains.

- Ensure that there is no spread of backfilling materials to adjacent areas within the terminal areas of the overpass i.e. sites that are not within the plot boundaries of the proponent's area that is not going to be used for the construction of the overpass.

Impact on Marine life

- The key mitigating factor on marine life form during construction of the overpass will be to ensure that.

- project activities are conducted during the low tides to minimize impact on sea dwelling organisms.

- Develop and implement a monitoring programme for marine life forms to determine resilience upon completion of the overpass development activities and seek the cooperation of Kenya Marine and Fisheries Institute (KMFI) in this regard.

- The rapid undertaking of the overall overpass construction to conceptually decrease the severity and range of impacts in space and time.

Potential instability

- Use of appropriate substrate for creating terminal bunds and backfilling.

- Conducting scheduled compaction tests at defined levels of the overpass construction process.

- Ensure engineering integrity.

- Allow adequate time for curing of piers and concrete area upon completion.

- Shoreline alterations
- Observe the conditions of use of the land as stipulated under the title deeds for the land.
 - Implement a specific monitoring of sedimentary processes in the creek by means of bathymetric surveys, for a minimum period of five years after construction.
 - The shoreline area abutting the development will be stabilized through construction of a reinforced retaining wall.
- Landscape changes
- Ensure that dredged and filled areas are restricted to those previously established by the deed plan conditions as set out in the title deed.
 - Comply with the provisions of the draft zoning plan for Changamwe area and its environs.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- (c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
