1200 and above	100
<b>Water Kiosks/Standpipes</b>	
Bulk sale	35
Resale at Water Kiosk/20 litres	KSh. 2

## 1.1 Sewerage Tariff

- Sewerage is charged at 75% of the water billed for all customers
- Disconnected water accounts shall be charged based on the average of the last three months' sewer charges before the disconnection.
- Customers with no water connection:
  - Domestic Customers, Government and Schools.: flat rate of Kshs. 300 per month
  - Commercial customers: 75% of volume of water used as per the metered source of water.

## 2.0 Miscellaneous Charges

## 2.1 Meter Rent per Month

<i>Meter rent</i>	
<i>Size (Inches)</i>	<i>Approved (KSh.)</i>
½	50
¾	50
1	250
1 ½	250
2	250
2 ½	450
3	450

<i>Meter rent</i>	
<i>Size (Inches)</i>	<i>Approved (KSh.)</i>
4	800
>4	1,500

## 2.2 Deposits

<i>Water Deposit</i>	
<i>Connection Type</i>	<i>Approved (KSh.)</i>
Domestic customer (single dwelling)	1,500
Domestic customer (single connection serving more than one single dwelling including flats) consuming more than 200m <sup>3</sup>	10,000
Water Kiosks where anticipated monthly consumption is:	
Less than 50m <sup>3</sup>	1,000
Between 50m <sup>3</sup> and 100m <sup>3</sup>	2,000
Between 100m <sup>3</sup> and 150m <sup>3</sup>	2,500
More than 150m <sup>3</sup>	3,000
Retail shops, workshops and offices consuming more than 10m <sup>3</sup>	3,000
Bar, restaurant and lodgings more than 15m <sup>3</sup>	5,000
Hotel class "A" and "B" less than 150m <sup>3</sup>	10,000
Hotel class "C" and "D" more than 150m <sup>3</sup>	15,000
Hospitals more than 150m <sup>3</sup>	20,000
Minor construction site (temporary connection) less than 200m <sup>3</sup>	10,000
Large construction site (temporary connection) more than 200m <sup>3</sup>	50,000
Light industries less than 200m <sup>3</sup>	10,000
Medium industries between 200m <sup>3</sup> and 300m <sup>3</sup>	15,000
Heavy industries more than 300m <sup>3</sup>	20,000
Health centres/dispensaries less than 150m <sup>3</sup>	5,000
Schools/colleges/other institutions more than 200m <sup>3</sup>	10,000
Schools less than 200m <sup>3</sup>	5,000
Topping up of consumer deposit after disconnection based on actual average consumption for domestic consumers	The actual cost subject to a minimum of 2,500

## 2.3 Other Charges

<i>Service</i>	<i>Approved (KSh.)</i>
For special reading of a meter	200
For cutting off supply at the request of customer	200
For turning on supply otherwise than in respect of a first connection	200
For turning on supply after disconnection for non-payment	500
Water Bowser (own transport) per m <sup>3</sup>	180
Water Bowser by WSP	2,500
For testing a meter at the request of the consumer where it is not found to register incorrectly to any degree exceeding 5%	The actual cost subject to a minimum of 500
Exhauster Service (Company Exhauster)	5,000 for other customers and 4,000 for informal settlements
Private Exhausters (Dumping into the company's sewer system)	15,000 per truck per month

<i>Penalties</i>	<i>Approved (KSh.)</i>
Self reconnection after cut off for non payment	5,000 and billing to be backdated from date of cut off
Surcharge for illegal connection-Domestic	10,000 and regularise connection
Surcharge for illegal connection-Commercial/ school/college/ hospital	40,000 and regularise connection
Surcharge for illegal connection-Construction site	100,000 and regularise connection
Surcharge for illegal connection- Industry	500,000 and regularise connection
Illegal connection Sewerage	Charges equal to those of illegal connection of water per category
Surcharge for tampering with meters (this to	5,000

include meter removal, reversing of meter, etc)	
Surcharge for direct suction of water from the supply line using a pump	10,000
Surcharge for meter loss or damage	Cost of meter

## 3.0 Analysis of Cost Structure

Below is the summary of the cost structure that makes up the total costs incurred by MUWASCO:

<i>Expenditure Item</i>	<i>2014/15</i>	<i>2015/16</i>
Operations (Million Kshs)	75	75
Maintenance (Million Kshs)	10	10
Regulatory Levy (Million Kshs)	1	1
WSB Administrative Fees (Million Kshs)	14	14
Minor Investments (Million Kshs)	18	18
Loan Repayment (Million Kshs)	25	25
Total Costs (Million Kshs)	143	143
Projected Revenue (Million Kshs)	1	1
Total Cost Coverage (%)	100	100

## 4.0 Conditions attached to the tariff approval

- (i) ALL the parties concerned should further take note that the newly proposed tariff was approved on condition that all the assumptions made in the tariff projections shall be monitored and MUWASCO shall be expected to meet the targets below:

<i>Target</i>	<i>2014/15</i>	<i>2015/16</i>
Water Coverage (%)	75%	80%
Water quality standards (%)	100% compliance with the quality standards	
Non Revenue Water (%)	33	26
Hours of Supply (Hrs)	22	23
Staff per 1000 connections	6	6
Metering ratio (%)	95	100
Collection Efficiency (%)	95.00	95.00
Resale at Kiosk	Regulate resale by kiosk vendors at Kshs 2 per 20-litres. Tariffs at kiosks must be displayed at strategic points for public awareness	

- (ii) Licensee Administrative Fee : In recognition that this is the transition period and the licensee administrative fee may cease to be paid on enactment of the Water Bill, 2014, the item of licensee administrative levy shall on notice by WASREB be struck out from the tariff structure and the tariffs payable by consumers shall be adjusted to reflect this.
- (iii) Performance Evaluation: Performance targets to be met and ascertained by WASREB, at the end of the 1st year of the tariff period. Non achievement of the set targets without justifiable cause shall lead to penalty.
- (iv) Loan Repayment:

MUWASCO shall immediately establish a standing order with TWBSB where it shall remit on a monthly basis, equal installments loan repayments.

	<i>FY 14/15</i>	<i>FY 15/16</i>
Annual cumulative loan repayment (Million KSh.)	25.41	24.96

- (i) Regulatory Levy: the WSP shall remit the regulatory levy on monthly basis being 1% of the billing as per Legal Notice No. 36 of 2008.

MOSES M. NAIVASHA,  
Chief Executive Officer,  
Tana Water Services Board (TWSB).

Approved by:

ROBERT GAKUBIA,  
Chief Executive Officer,  
Water Services Regulatory Board (WASREB).

## THE PHYSICAL PLANNING ACT

(Cap. 286)

## COMPLETION OF PART DEVELOPMENT PLAN

(PDP 12/2/ct/2014/1 for Existing Residential Plot)

NOTICE is given that the above-mentioned development plan was on 16th April, 2014, completed.

The plan relates to land situated within Mombasa Island.

A copy of the part development plan as prepared has been deposited for public inspection at the offices of County Physical Planning Officer, at Bima Tower Annex.

The copy so deposited is available for inspection free of charge by all persons interested at offices of County Physical Planning Officer, at Bima Tower Annex, between the hours of 7.45. a.m. to 4.30 p.m. Monday to Friday.

Any interested person who wishes to make any representation in connection with or objection to the above-named part development plan may send such representations or objections in writing to be received by the District Physical Planning Officer, P.O. Box 83876-80100, Mombasa, within sixty (60) days from the date of publication of this notice and such representation or objection shall state the grounds on which it is made.

Dated the 12th May, 2014.

MR/5021530 M. NTABO,  
for Director of Physical Planning.

## GAZETTE NOTICE NO. 3346

## THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

## THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MIXED USE DEVELOPMENT ON PLOTS LR NO. 29173, 7785 / 345 and 7785 / 352 IN RUNDA, NAIROBI COUNTY

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (The Grove Limited) is proposing to develop a mixed use complex with a boutique hotel, a retail centre and office block on L.R. Nos. 29173, 7785/345 and 7785/382 situated in Runda (Northern Bypass) in Nairobi County.

The proponent proposes to develop a commercial centre that will have a 200 bed residential hotel comprising 14,223 square meters, a retail centre comprising 5,192 square meters on two floors and a basement parking for sixty one (61) vehicles and over-ground parking for ninety two (92) vehicles with outdoor seating, a four floor office block with a total area of 14,266 square meters having 8 offices per floor and a basement parking, and over-ground parking for four hundred (400) vehicles. Total parking in the complex will be for seven hundred and thirty six (736) vehicles. The hotel and the office blocks will have lifts to cater for the upper floors.

The following are the anticipated impacts and proposed mitigation measures:

Potential Impacts	Mitigation Measure
	Construction phase
Dust	<ul style="list-style-type: none"> <li>Water sprinkling of the ground.</li> <li>Regular water addition to unpaved roads to be used by trucks.</li> <li>Control the speed and movement of construction vehicles.</li> </ul>
Noise	<ul style="list-style-type: none"> <li>Restrict construction activities to day time hours.</li> <li>Machines should be serviced to reduce</li> </ul>

on noise.

Destruction of the physical environment	<ul style="list-style-type: none"> <li>Landscaping and replanting that will blend with the environment.</li> <li>Levelling of soils at the end of earth works.</li> <li>Proper disposal of the excavated soils.</li> </ul>
Health and safety Hazards	<ul style="list-style-type: none"> <li>Document emergency response procedures.</li> <li>Use of suitable personal protective equipment (PPEs).</li> <li>Use of stable ladders and other climbing/support structures that have been tested and approved.</li> <li>Train the construction workers on safety measures.</li> <li>Fencing/covering of risky areas such as deep pits.</li> <li>Safety signage to be put up before commencement of works.</li> </ul>
Contamination of water Resources by sewage	<ul style="list-style-type: none"> <li>Provision of sanitary facilities for the construction staff.</li> <li>Installation of adequate water supply</li> </ul>
Increase in traffic flow	<ul style="list-style-type: none"> <li>Put up adequate road traffic signage.</li> <li>Temporary access from the Northern bypass.</li> </ul>
Fire hazards and accidents	<ul style="list-style-type: none"> <li>Install fire fighting facilities during both the construction and operation phases.</li> <li>Sensitize workers on fire safety during all project phases.</li> <li>First aid box to be kept on site as well as training on its use.</li> <li>Conduct fire drills to test preparedness of staff.</li> </ul>
	Operation phase
Destruction of the physical environment	<ul style="list-style-type: none"> <li>Site landscaping and planting of tree belts to prevent soil erosion and to reduce wind velocity.</li> </ul>
Indiscriminate disposal of solid waste	<ul style="list-style-type: none"> <li>Provision of adequate number of solid waste containers.</li> <li>Contract a licensed solid waste transporter.</li> </ul>
Disposal of liquid waste	<ul style="list-style-type: none"> <li>Connect to the sewerage system.</li> </ul>
Increase in traffic flow	<ul style="list-style-type: none"> <li>Put up adequate road traffic signage.</li> </ul>
Storm water	<ul style="list-style-type: none"> <li>In consultation with other developers provide adequate measures to channel storm waters to storm water drains.</li> </ul>

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

SALOME MACHUA,  
for Director-General,  
National Environment Management Authority.

## THE ENVIRONMENTAL MANAGEMENT AND

## CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY  
 ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
 FOR THE PROPOSED ALUMINIUM BEVERAGE CAN  
 FACTORY ON PLOT LR NO. KJD/ KAPUTIEI-SOUTH/ 3875,  
 ENORETET VILLAGE WITHIN SULTAN HAMUD AREA OF  
 NKAMA LOCATION, KENYWA DIVISION OF MASHURU  
 SUB- COUNTY IN KAJIADO COUNTY

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (GZ Industries Kenya Limited) is proposing to set up an Aluminium Beverage Can Factory on Plot LR No. KJD/ KAPUTIEI-SOUTH/ 3875, about 6 kilometres past Sultan Hamud Town in Enoretet Village within Sultan Hamud area of Nkama Location, Kenyewa Division of Mashuru Sub- County in Kajiado County

The project will encompass the following: production / factory plant, accommodation and recreational facilities; a dining/ kitchen facilities, an office block, changing rooms, clinic, gate houses, road works and storm water drainage facilities, perimeter wall / fence, external service utility areas (diesel storage, LPG storage, compressor/ vacuum pumps, cooling towers etc.), external walkways and landscaping, waste water treatment facility.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Soil erosion	<ul style="list-style-type: none"> <li>• Proper planning of site clearing or disturbance of the natural vegetation.</li> <li>• Isolated sites with installations and frequent human presence that require re-vegetation will be surrounded by less palatable native species to act as plant screens and make less attractive to foraging wildlife.</li> <li>• Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted.</li> </ul>
Air quality	<ul style="list-style-type: none"> <li>• Provide personnel with Personal Protective Equipment &amp; Clothing (PPE&amp;C) such as dust masks, boots among others. Mechanism should be put in place to ensure PPE&amp;C are specific for the activities at hand and are always worn within the project sites;</li> <li>• The stockpiles of earth generated during construction works, unpaved access roads and areas used for handling fine construction materials should be palliated with water regularly in order to suppressed evolution of particles;</li> <li>• All machinery and equipment should be maintained in good working condition in order to minimise emissions to acceptable standards;</li> <li>• Train construction and delivery trucks drivers on pre-cautionary measures that enable curb emissions for example advise on techniques to reduce dust evolution especially when driving in areas of dense human settlement or nearing the project site to avoid creating dusty conditions; techniques to conserve fuel and reduce emission by switching off the engines when vehicles are idling;</li> <li>• Construction trucks delivering materials</li> </ul>

to site should be covered in order to minimise spread of fugitive emissions to the surrounding areas;

Risk of leaks and spill	<ul style="list-style-type: none"> <li>• No burning of materials should be permitted at the project site;</li> <li>• Use clean energy to fuel project vehicles, equipments and machines in order to reduce air pollutants</li> <li>• Conduct regular maintenance of site equipment and machinery to ensure leakages are controlled or detected early;</li> <li>• Project vehicles and equipment should be serviced according to manufacturer's requirements to limit release of exhaust emissions;</li> <li>• Investigate the possibility of fitting catalytic converters in machines with engines so as to convert harmful substance in the exhaust fumes to less harmful substances;</li> <li>• Safety procedures for fuel storage and re-fuelling should be well understood and implemented by site staff; and oil residuals including waste oil, lubricants, used filters, should be carefully collected and stored for safe disposal, in order to prevent spillover effects of contaminant hydrocarbons into storm water or groundwater resources;</li> <li>• Protect project area from fire by posting warning signs in area where hydrocarbon fuels are used;</li> <li>• Observe the requirements of the emission control regulations</li> </ul>
Occupational health and safety issues	<ul style="list-style-type: none"> <li>• Ensure the working hours are controlled and that employees are not allowed to extend the working hours beyond an acceptable limit for purposes of gaining extra pay;</li> <li>• Ensure that all construction works close to existing infrastructure is supervised from the relevant authorities to guide activities such as excavation near the oil pipeline and railway line;</li> <li>• Ensure that ALL requirements as stated by KPC approval are adhered to at all phases of the project development;</li> <li>• Educate community, visitors and employees (both direct and indirect) against interfering with KPC infrastructure for example pipelines; and</li> <li>• Ensure appropriate road safety signages are strategically placed and drivers adhere to the requirements of such signage;</li> <li>• Erect speed breaks where human and vehicular traffic have high interaction opportunities;</li> <li>• Avoid activities likely to activate mudslides or rockfalls when working in steep areas for example avoid pouring excess water in muddy areas or steep slopes with soil; and</li> </ul>
Noise and vibration	<ul style="list-style-type: none"> <li>• Conduct periodic noise measuring and monitoring to determine levels and extent of harmful noise;</li> <li>• Clearly label the high noise areas.</li> <li>• Provide PPE (hearing protection) to persons operating within or visit</li> </ul>

identified high noise areas;

- In order to meet noise level requirements, the works equipments should be equipped with standard noise attenuation features. Machines that exceed acceptable noise limits should be equipped with silencers or lagging materials or specially designed acoustic enclosures;
- Inform local residents when construction activities are likely to generate excessive noise in order to minimize disruption to local residents;
- Sensitise truck drivers to switch off engines while offloading materials; to avoid gunning vehicle engines or hooting especially when passing through sensitive areas such as churches, schools, residential areas and hospitals.

#### Pollution

- The management should ensure that solid waste is collected in a centrally placed area and the person responsible for collecting the waste is licensed by NEMA and the County Government of Kajiado to collect and dispose of waste.
- The management should ensure that liquid waste from the proposed site is directed to the appropriate drains to the proposed waste water treatment works and further back to the natural water drains from Mashuru hills (to the south west of the proposed project site).

#### Traffic Management

- The management team should seek relevant approvals from the Ministry of Roads/ Kenya National Highways Authority (KENHA) who may then advise on the creation of an access entrance so as to reduce traffic congestion on the main highway;
- The management should assign personnel to be in charge of traffic within the property/ factory premises in order to avoid traffic congestion within the property;
- The possibility of communal modes of transport for employees should be explored.

#### Fire Management

- Construct a band wall between the factory perimeter and the KPC oil pipe line to the north east of the proposed plot- to protect both the GZ Industries facilities and the KPC oil pipeline incase of a fire incident or accident;
- Ensure that all persons on site where anti-static footwear and clothing to avoid any static ignition;
- Place portable fire extinguishers at suitable locations, according to the activities in the operation programme in conformity with the Factories and other Places of Work (Fire Risk Reduction) Rules, 2007;
- Development of fire emergency procedures and pinning them up in a place where all workers can access them;
- Training all staff on fire safety policy and procedures;
- Allocating a fire assembly point;

#### Loss of livelihood

- Provide earlier notice to all affected parties concerning the development;
- Dismissal procedures should be compliant with the Employment Act, 2007;
- Residence to be notified prior to any decommissioning of the proposed factory buildings and any other facility on site.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Kajiado County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

SALOME MACHUA,

*for Director-General,*

MR/4944934

*National Environment Management Authority.*

#### GAZETTE NOTICE NO. 3348

#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

#### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PETROL STATION ON PLOT L.R NO. NAIVASHA PLOT 396/71 (PREVIOUSLY 396/28) ON MOI SOUTH LAKE ROAD, NAIVASHA MUNICIPALITY OF NAKURU COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Naivasha Health Park Limited) is proposing to construct a service station on plot L.R No. Naivasha Plot 396/71 (Previously 396/28) on Moi South Lake Road, Naivasha Municipality of Nakuru County

The actual design components of the proposed Project include: Construction of a Petrol Station structure, construction of 12no. shops, construction of 74 Parking lots, a car wash, a Lube bay, tyre centre, convenience store, landscaped court, Sewage treatment plant, development of utilities (water, drainage, electricity etc).

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measures</i>
Solid waste generation	<ul style="list-style-type: none"> <li>• Provide solid waste handling facilities such as waste bins and skips</li> <li>• Ensure that solid waste generated at the development is regularly disposed of appropriately at authorized dumping sites</li> <li>• Donate redundant but serviceable equipment to charities and institutions</li> </ul>
Sewage management	<ul style="list-style-type: none"> <li>• Provide adequate and safe means handling sewage generated at the Hotel</li> </ul>

- Energy consumption
- Switch off electrical equipment, appliances and lights when not being used
  - Install occupation sensing lighting at various locations such as storage areas which are not in use all the time
  - Install energy saving fluorescent tubes at all lighting points within the proposed development instead of bulbs which consume higher electric energy
  - Monitor energy use during the operation of the project and set targets for efficient energy use
  - Sensitize the occupants to use energy efficiently
- Air/Dust Pollution
- Ensure strict enforcement of on-site speed limit regulations
  - Avoid excavation works in extremely dry weathers
  - Sprinkle water on graded access routes each day to reduce dust generation by construction vehicles.
- Higher and Safety Risks
- Implement all necessary measures to ensure health and safety of workers and the general public during operation of the Proposed Petrol Station project as stipulated in Factories and Other Places of Work Act Cap 514
  - Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premises during night hours.
- Run off and soil erosion
- Create storm water management practices, such as piping systems or retention ponds or tanks, which can be carried over after the building is complete.
  - Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
  - Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site.
- Noise pollution
- Sensitize construction vehicle drives and machinery operators to switch off engines of vehicles or machinery not being used.
  - Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as schools, residential areas and hospitals.
  - Ensure that construction machinery are kept in good condition to reduce noise generation
  - Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nakuru County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

GAZETTE NOTICE NO. 3349

# THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED PETROL STATION ON PLOT NO. 1499  
NAMANGA, OFF NAMANGA-NAIROBI ROAD IN KAJIADO  
COUNTY

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Gulf Energy Limited) is proposing to construct a service station on plot L.R NO 1499 Namanga off Namanga – Nairobi Road in Kajiado County

The petrol service station will comprise of a an impermeable concrete surface under the canopy,a u-shaped drainage tunnel with a steel grill top,underground fuel tanks (30m3 diesel tank, 15m3 kerosene, 30m3 super petrol) ,three breather points,a Heavy duty covered man hole for each of the underground tanks,Station manager office and station sales office,a store ,Sanitary facilities both for ladies and gents ,a septic tank ,3 pit interceptor, ,Compressor and generator section,a steel canopy,ribbed concrete finish under the steel canopy ,2 pump isles,electronic fuel dispensers,associated piping work,fire assembly points,Entrance and exit

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measure</i>
Noise and Vibration levels	<ul style="list-style-type: none"> <li>• Barricading the area (erecting a boundary wall)</li> <li>• Construction activities to be conducted during the day.</li> <li>• Provision of appropriate Personal Protective equipment to protect workers from occupational noise</li> <li>• Regular maintenance of plants and equipment</li> <li>• Shutting down of engine vehicles when not in use to reduce on noise levels</li> <li>• Conducting of noise measurements from different positions within and outside the workplace to establish prevailing noise levels and recommending appropriate mitigation measures.</li> </ul>
Air pollution	<ul style="list-style-type: none"> <li>• Use of dump method to mitigate on dust by sprinkling water on areas to be excavated.</li> <li>• Soil compaction</li> </ul>
Pressure on existing infrastructure i.e. roads, power, water among others	<ul style="list-style-type: none"> <li>• Erection of warning and informative signs. i.e. notices, bill boards at the site during the construction phase and traffic control along the connecting road.</li> </ul>
Contamination of the ground with oil and grease substances	<ul style="list-style-type: none"> <li>• Maintenance should be carried out at designated service bays to avoid contamination of environment by</li> </ul>

Oil leaks and spills	<p>resultant oil and greases.</p> <ul style="list-style-type: none"> <li>• Regular inspection of underground tanks for leakages</li> <li>• Construction of a three pit oil interceptor tanks to separate oil from sludge.</li> <li>• Double walling of underground tanks to guard against leaks</li> <li>• Protecting the underground tanks with corrosion prevention materials</li> <li>• Prioritizing the upgrade of equipment and installation of existing facilities of a network after a defined age.</li> <li>• Careful siting of the project to ensure that it lies in an environment that is far from environmental receptors including sewers, tunnels, vaults, surface water reservoirs etc.</li> </ul>
Destruction of soil structure	<ul style="list-style-type: none"> <li>• Ensure use of manual labour and hand tools where appropriate.</li> <li>• Ensure the contractor takes the shortest time possible.</li> </ul>
Soil and Ground Water contamination	<ul style="list-style-type: none"> <li>• Regular hydraulic pressure testing of the underground tanks.</li> <li>• Non destructive testing, for example, ultrasound testing.</li> </ul>
Generation of contaminated waste water and storm water	<ul style="list-style-type: none"> <li>• Minimization of volume of storm water generated from vehicle fueling stations and AST containment areas through installation of roofs or other types of covers</li> <li>• Implementation of secondary containment procedures that avoid accidental or intentional releases of contaminated containment fluids</li> <li>• Segregation of clean drainage and potentially contaminated drainage, treating the latter through oil/water separators. Oil water separators may include baffle type or coalescing plate type. They should be properly designed, operated, and maintained to achieve the desired water treatment results.</li> </ul>
Scraps and other debris on site	<ul style="list-style-type: none"> <li>• Use of an integrated solid waste management system i.e. through a hierarchy of options</li> <li>• Wastes generated as a result of facility decommissioning activities will be characterized in compliance with standard waste management procedures. Disposal locations will be selected by the contractor based on the properties of the particular waste stream.</li> </ul>
Health and Safety	<ul style="list-style-type: none"> <li>• During construction, increased dust, noise and air pollution levels could impact on health and safety, particularly in the direct impact zone.</li> <li>• During the operation of the project health and safety conditions will be linked more on handling of petroleum products. These will be effectively mitigated on through the use of appropriate PPEs at all times and proper handling of the petroleum products.</li> </ul>

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Kajiado County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,

for Director-General,

MR/4944776

National Environment Management Authority.

GAZETTE NOTICE NO. 3350

## THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED KPC LINE1 PIPELINE REPLACEMENT PROJECT BETWEEN MOMBASA AND NAIROBI

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Pipeline Company Limited) is proposing to construct a new 20-inch pipeline within the existing right of way (ROW) between Nairobi and Mombasa (a distance of approximately 450 km); construct four new pump stations at Changamwe, Maungu, Mtito Andei, and Sultan Hamud; install two sets of new pumps in each of the above stations; and decommission the existing 14-inch pipeline.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Damage to surficial and sub-surface archeological artifacts	<ul style="list-style-type: none"> <li>• Engage an archeologist during the pre-construction and construction phase to monitor top soil stripping and excavation activities and recover any artifacts or fossils uncovered by such activities. The archeologist should also evaluate the construction camp sites for any artifacts.</li> </ul>
Impacts on cultural change and conflict	<ul style="list-style-type: none"> <li>• Provide cultural awareness training to all EPC contractor staff members in order to respect local cultures where the project is carried out. The training should be provided in a culturally sensitive and ethical manner.</li> <li>• Incorporate cultural awareness programs in the EPC contractor's HSE Plan for the proposed project.</li> </ul>
Interference with existing land use patterns and access routes	<ul style="list-style-type: none"> <li>• Consult local communities during the trenching exercise to ensure that certain sections of the ROW are not trenched while construction activities continue in other trenched sections to allow cross over access to humans and animals.</li> </ul>
Destruction of cultural heritage	<ul style="list-style-type: none"> <li>• Retain competent professionals to assist in the identification and protection of cultural heritage and report any chance finds for necessary actions.</li> <li>• Create provisions for the management of the accidental discovery of cultural material including burials. In the event that cultural objects are</li> </ul>

Temporary blockage of fauna to water resources and foraging grounds	<p>encountered, immediately contact the National Museums of Kenya; if a burial site is discovered, immediately contact the local community leaders for advice and guidance.</p> <ul style="list-style-type: none"> <li>• Allow a crossing of 800m for every 2km of excavated trench to allow human and animals to cross-over the ROW.</li> <li>• Accelerate the construction of pipeline in elephant ranges.</li> <li>• Consider development of alternative water resources for the animals if the pipeline trench is dug up and will not allow animals to safely cross over the ROW</li> </ul>	
Pitfalls resulting from trenching	<ul style="list-style-type: none"> <li>• Provide a temporary crossing over the trench to enable the small mammals, reptiles and amphibians cross easily before backfilling of soil is done.</li> <li>• Consider provision of a ramp to enable trapped animals to get out and monitor trenches for animal rescue at the expense of the Contractor</li> </ul>	<p>Contamination of surface water</p> <ul style="list-style-type: none"> <li>• KWS and KFS should screen contractor's construction plant, equipment, containers, etc. KWS and KFS to enhance security surveillance at the cost of the contractor</li> <li>• Ensure compliance with L.N. 120 discharge limits for potentially contaminated wastewater.</li> <li>• On site refueling will be done by trained personnel using mobile fuel browsers and will be at least 10 meters away from surface water body.</li> <li>• Hydrostatic test water should be discharged to the source water at an approved location along the waterway or to an upland area within the same catchment area where it may evaporate or infiltrate. Discharged hydrostatic testing water should be tested to ensure it meets Legal Notice No. 120: Water Quality Regulations, 2006 requirements.</li> <li>• The proponent to ensure sufficient emergency shutdown valves in the pipeline is provided at the design stage particularly for river crossings (more than 30m wide).</li> <li>• The proponent to regularly monitor the pipeline through the SCADA system and through regular ground and aerial surveillance.</li> <li>• The proponent to maintain pipeline integrity through pigging activities.</li> <li>• The proponent to develop procedures for monitoring river crossings during flooding</li> <li>• The proponent to regularly maintain the ROW.</li> <li>• The pipeline to be coated with anti-corrosion coating and be supplemented by cathodic protection.</li> </ul>
Potential attacks by wild animals in protected areas	<ul style="list-style-type: none"> <li>• KWS to provide security to all construction workers on a full-time basis during the construction of the pipeline within the national parks and other protected areas</li> <li>• KWS should restrict movement of construction personnel to the ROW construction workspace areas</li> <li>• Construction camp sites should be located outside the protected areas</li> <li>• Construction activities should be restricted between 07:00hrs and 18:30hrs within the protected areas</li> <li>• KWS/Contractor should sensitize workers within wildlife areas on hazards associated with working within protected areas</li> </ul>	
Animal movement diversions	<ul style="list-style-type: none"> <li>• Construct temporary watering points in areas where the trench and laid pipes would create a temporary barrier.</li> <li>• Construction of pipeline should be speeded in parks.</li> <li>• Excavation of long trenches should be avoided at the crossings.</li> </ul>	<p>Disruption of river crossings</p> <ul style="list-style-type: none"> <li>• For water crossings, the contractor should seek the necessary Authority and Permits from WRMA and other lead agencies for construction, damming and diversion of water from rivers.</li> <li>• The contractor shall prepare detailed drawings for construction of pipeline water crossings and a method statement for construction.</li> </ul>
Introduction of alien invasive species	<ul style="list-style-type: none"> <li>• Fully decontaminate all construction plant and equipment to be used for the project to the approval of relevant authorities. In protected areas such as Parks and Reserves, relevant authorities (such as KWS and KFS) will be involved to ensure decontamination process is satisfactory</li> <li>• Import gravel for renovating access roads within ROW from approved borrow pits.</li> <li>• KPC will work closely with relevant authorities such as the KWS and KFS if alien invasive species start appearing following completion of the construction phase of the proposed pipeline.</li> </ul>	<p>Soil erosion and sedimentation</p> <ul style="list-style-type: none"> <li>• The contractor to implement soil erosion prevention measures such as covering excavated soil with say plastic sheeting.</li> <li>• The contractor should also work with speed in such a way that the excavated soil is reused to cover the trench in the shortest time.</li> <li>• Appropriate crossing methods should be applied for river crossings to prevent erosion</li> <li>• Preconstruction and construction activities should if feasible take place during dry seasons for areas prone to stormwater and flooding damage</li> </ul>
Impacts of poaching in protected areas	<ul style="list-style-type: none"> <li>• Screen contractor personnel working within the national parks and other protected areas. Contractor should work within the construction space of the ROW in full compliance of KWS</li> </ul>	<p>Impacts to groundwater</p> <ul style="list-style-type: none"> <li>• During the construction phase, there will be proper storage and handling of containers and tanks, including storage of containers with hazardous liquids in secondary containment structures;</li> </ul>

Construction phase impacts of noise	<ul style="list-style-type: none"> <li>Safety distances will be maintained for liquid transfer, vehicle equipment and washing; 30m to waterbodies, 60m from water supply wells, and 130m from municipal or community water wells;</li> <li>Training of employees on the spill prevention measures will be conducted;</li> <li>Maintenance of emergency spill kits in all service vehicles will be promoted</li> </ul>
	<ul style="list-style-type: none"> <li>The contractors should comply with the requirements of Kenyan legislation on noise and international guidelines to ensure that noise levels do not exceed limits stipulated in them.</li> <li>The contractor should provide hearing protection equipment to their workers and ensure that a hearing conservation program is implemented if the occupational noise levels exceed those stipulated in Kenyan regulations on noise.</li> <li>The contractor should ensure that construction plant and equipment is properly maintained to prevent excess noise being generated due to improper maintenance of equipment</li> </ul>
	<ul style="list-style-type: none"> <li>KPC should immediately commence a sensitization process for community members along the ROW to formalize any underground utilities to avoid destruction during the construction phase</li> <li>The EPC contractor should endeavor to be compassionate prior to uprooting any "unplanned" utilities and taking precautionary steps to avoid such destruction</li> </ul>
	<ul style="list-style-type: none"> <li>The EPC contractor should have an HIV/AIDS Policy in place so that no discrimination takes place at the work site</li> <li>The EPC contractor should have a peer educator program for HIV/AIDS and other wellness programs such as stress and stress management</li> </ul>
Increased HIV/AIDS infection cases	<ul style="list-style-type: none"> <li>The EPC contractor must have a documented HR management system which includes clearly defined recruitment policies of Kenya citizens</li> <li>The EPC contractor should be an equal opportunity employer and must provide the first opportunities for employment to locals living near the construction spreads along the ROW</li> <li>The EPC contractor should engage the provincial administration (DO, Area Chiefs, etc.) in posting vacancies for employment as soon as they arise on provincial administration notice boards.</li> </ul>
Employment opportunities	<ul style="list-style-type: none"> <li>The EPC contractor will be required to comply with the OSHA and its subsidiary legislation as it applies to the proposed pipeline project;</li> <li>The EPC contractor will be required to comply with the Construction</li> <li>HSE Plan developed in this EIA Study;</li> <li>HSE risk assessments will be conducted by the EPC contractor for</li> </ul>
Impacts on public safety	

all construction spreads to ensure that appropriate risk control measures are implemented throughout the construction phase;

- The EPC contractor will arrange for HSE induction training of all staff working on the proposed project. Refresher HSE training will be provided continually based on task risk assessments to be performed for all activities to be performed during the construction phase.
- The EPC contractor will be required to comply with international petroleum industry HSE standards and codes of practice for the design and construction management of the proposed project.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

KODIA BISIA,  
for Director-General,

MR/4730619 *National Environment Management Authority.*

#### GAZETTE NOTICE NO. 3351

#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

#### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MASTER PLAN FOR GALANA OIL KENYA, MOMBASA ROAD, NEAR ATHI RIVER, MACHAKOS COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Galana Oil (K) Limited) proposes to construct the following infrastructure: service station, LPG pumps/ compressor sheds, truck loading and offloading area, LPG filling plant and immediate storage, lubes store, fire water tank, fire pump house, truck parking facility, control room, gated access, petroleum tanks, office blocks, borehole, and wash rooms on Plot L.R. No. 337/857 Mombasa Road near Athi River, Machakos County.

The following are the anticipated impacts and proposed mitigation measures:

#### *Environmental Impacts Mitigation Measures*

Geology and soils	<ul style="list-style-type: none"> <li>All quarry sites shall be clearly indicated on the plan and approved by the local authority for use.</li> <li>To prevent erosion all non-built up areas should be landscaped.</li> </ul>
Surface water	<ul style="list-style-type: none"> <li>If possible initial construction activities should be undertaken during the dry</li> </ul>

	<ul style="list-style-type: none"> <li>season to prevent water/soil run-off especially on side slopes.</li> <li>Water should also be diverted away from the project footprint areas through properly constructed drainage channels.</li> <li>Ensure that spills emanating from construction plant and equipment are cleaned immediately before release to the environment.</li> <li>Contractor to adhere to construction HSE management plan during the construction phase.</li> </ul>
Air Quality	<ul style="list-style-type: none"> <li>Develop and implement effective measures for minimization of dust followed by rehabilitation in a timely manner.</li> <li>Contractor to ensure that construction plant and equipment is in a good state of repair at all times to prevent adverse exhaust air emissions.</li> </ul>
Waste	<ul style="list-style-type: none"> <li>Develop and implement safe procedures for management of nonhazardous and hazardous wastes in accordance with L.N. 121: Waste Management Regulations, 2006.</li> </ul>
Noise and vibration	<ul style="list-style-type: none"> <li>Contractor's plant and equipment should comply as a minimum with requirements of L.N. 25: Noise Prevention and Control Rules, 2005.</li> <li>The power plant will be designed to maintain noise levels at 70dB (A) at the fence line.</li> <li>The Proponent will develop, rollout and implement a written hearing conservation program for those employees that may be exposed to noise environments exceeding 90 dB (A) over an 8-hour time weighted average period or 85 dB (A) continuous noise. This is in accordance with L.N. 25: Noise Prevention and Control Rules 2005.</li> </ul>
Creation of employment opportunities	<ul style="list-style-type: none"> <li>Implement where feasible measures to employ local community members.</li> <li>Develop and put into practice strategies to minimize crime, to include effective communication with landowners to inform them about the movement of work teams, and codes of conduct for contractors and employees creation.</li> </ul>
Increased risk of disease with influx of workers and opportunity seekers	<ul style="list-style-type: none"> <li>Implement measures to manage expectations about job creation.</li> <li>Develop and implement a HSE program for employees.</li> </ul>
Social divisions over limited jobs and perceived preferential access	<ul style="list-style-type: none"> <li>Develop and implement transparent employment and procurement measures which comply with the regulatory framework and maximize local benefits.</li> </ul>
Accidents as a result of increased traffic	<ul style="list-style-type: none"> <li>Implement measures to ensure that traffic and road safety hazards are minimized.</li> </ul>
Traffic	<ul style="list-style-type: none"> <li>Develop and implement measures to repair regularly used roads to the project site especially the turn-off to the project site.</li> <li>Ensure that contractor vehicles comply with axle load limits.</li> <li>Develop and implement a traffic management plan to take advantage of off-peak hours for delivery of construction materials and abnormal loads.</li> </ul>

#### Health and Safety

- Develop and implement contractor safety rules which include the relevant provisions of OSHA, WIBA and their respective subsidiary legislation.

#### Corporate Social Responsibility

- Specifically ensure that the construction complies with L.N.40: Building Operations and Work of Engineering Construction Rules, 1984.
- The proponent with the help of the local administration and local NGOs (such as People to People Tourism) should develop guiding principles for determining how the company selects which causes to support the local community that will contribute to sustainable benefits for the community.
- The Proponent should also participate in community driven development initiatives, which may involve donation of people's time, skills and knowledge.
- The proponent is advised to:
  - Put in place education sponsorship programs
  - Consider constructing a primary school for the local children
  - Support community health workers
  - Liaise with local NGO's in supporting the local community.
  - One outstanding NGO in the area known as People to People Tourism which advocates for children's health especially within the local slums.
  - The Proponent is advised to liaise with the organization as well as identify other thematic areas in which they can offer their support to the community.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Machakos County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY  
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED EXPANSION OF PEKERRA IRRIGATION  
SCHEME IN MARIGAT DISTRICT, BARINGO COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board) is proposing to Expand Pekerra Irrigation Scheme in Marigat District, Baringo County by developing an additional 2,000 ha of irrigated area.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Scars on landscape	<ul style="list-style-type: none"> <li>Before works begins, landowners to sign contracts with the MoR which include terms and conditions of payment, the amount of land to be excavated and rehabilitation measures to be carried out.</li> <li>The area to be excavated should be cordoned off, which tend to be very deep and pose a danger to livestock and children.</li> </ul>
Soil erosion	<ul style="list-style-type: none"> <li>Scour checks and gabion mattresses will be introduced in the side drains at specified intervals, depending on the gradient of the slope.</li> <li>Grouted stone pitching and rock fill gabion works will be necessary to protect culvert inlets and outlets and control soil erosion.</li> <li>The specified cut and fill gradients must be adhered to, and the embankments should be planted with shrubs and grasses to reduce erosion of road embankments.</li> <li>Areas that have been cleared of vegetation must be planted after completion of works. Indigenous trees and shrubs should be planted along the project road.</li> </ul>
Pits and quarries	<ul style="list-style-type: none"> <li>The gravel pits and quarries will be operated as instructed by the Engineer taking into consideration the safety aspects to avoid accidents and incidents</li> </ul>
Blasting rocks along road reserves	<ul style="list-style-type: none"> <li>It should be done during the day, and residents in the vicinity of the area being blasted should be suitably warned of blasting activities, including the time and date.</li> </ul>
Air pollution	<ul style="list-style-type: none"> <li>Dumping the gravel pit area, and occasional spraying with water along the deviation routes or earth along the road section.</li> <li>Slowing the speed of traffic on deviations by using bumps and/ or clearly marked road signs may contribute to reducing dust levels.</li> </ul>
Hydrology and drainage	<ul style="list-style-type: none"> <li>Construction of culverts so that flow in the rivers and streams is unimpeded and improved drainage along the project road through side drains.</li> <li>These may be lined, and may require cascades to break the impact of water flow in them, particularly in sections with gradients greater than 4%.</li> <li>The area traversed by the proposed road for upgrading has a high traffic it is thus important to observe road safety through use of road signs.</li> </ul>
Road safety	
Visual enhancement	<ul style="list-style-type: none"> <li>A well-designed road fits in well with its surrounding because its design reflects the principles of regional landscape design. These principles can and should be applied whether or not the area being considered is one of special physical beauty</li> </ul>
Public health	<ul style="list-style-type: none"> <li>A central canteen for the workforce at the construction camp would</li> </ul>

contribute towards the general good health in the camp as kitchen wastes can be disposed of in an organized manner, while hygiene can be monitored.

- Workmen should be provided with suitable protective gear.
- Drainage of quarries and burrow pits to prevent them from impounding water which will act as good breeding places for mosquitoes and other disease causing vectors.
- Ensuring that there are proper solid and liquid waste collection and disposal facilities.
- Ensuring that clean, potable, and economical water is supplied to the populace to prevent the outbreak of waterborne diseases.
- Observing high degree of cleanliness during and after construction of the project.
- Gravel pits must be landscaped and reinstated or back-filled with overburden if the depth of the overburden is sufficient to allow for this.
- Terracing and replacement of fencing is part of the rehabilitation process.
- Contractor to plant trees to replace those that have been removed during excavation.
- All the people who live along the road will be alerted of the improvement works.
- The proponent in collaboration with the District Works Officer (DWO) will be expected to disseminate information regarding the road design and upgrading works progress to all the other stakeholders along the project route

#### Rehabilitations

#### Awareness

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Baringo County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

#### GAZETTE NOTICE NO. 3464

#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

#### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED EASTERN INDUSTRIAL PARK IN NAIROBI COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Abacus Property Consultants Limited) is proposing to establish an ultra- modern Industrial Park on LR. No.11552. in Mwhikoko estate on the opposite side of River Gatharaini within Nairobi County. These will include heavy and light industries and manufacturing plants, wholesale business and distribution outlets. As the commercial area develops, more segments including banks, shopping centres, retail outlets etc. will then move into the industrial park.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measure</i>
Loss of environmental services	<ul style="list-style-type: none"> <li>• Liaise with the Nairobi County's department of Environment on permission to fell trees Utilize open spaces maximally.</li> <li>• Do not remove trees unnecessarily.</li> <li>• Replant trees on completion of construction Carry out landscaping of open spaces Conduct landscaping.</li> <li>• Participate in tree planting exercises outside whenever there is opportunity.</li> </ul>
Soil excavation/ erosion	<ul style="list-style-type: none"> <li>• Site leveling and excavation works to be planned such that a section is completed and rehabilitated while another section begins.</li> <li>• Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.</li> <li>• Construction of soil- galleys on sloppy sections.</li> <li>• Excavation material will be reused to level the site otherwise be loaded into trucks and be transported to designated disposal sites.</li> <li>• Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements.</li> </ul>
Noise pollution and vibration	<ul style="list-style-type: none"> <li>• The noisy construction works will entirely be planned to be during day time when most of the neighbours will be at work.</li> <li>• Trees around the site will provide some buffer against noise propagation.</li> <li>• Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.</li> <li>• Use well maintained machinery.</li> <li>• Ensure noise is not made while playing squash Ensure adequate sound proofing of the squash court.</li> <li>• Use of hoarding for dust control. Sprinkling of water on dusty surfaces. Adherence with the Building Code, Nairobi County by- laws and EMCA (Noise and Excessive Vibration Pollution Control Regulations and other applicable legislations.</li> <li>• Adequate warnings and cautionary safety signs Provision of appropriate personal protective equipment to workers.</li> <li>• Use of safe working procedures Creation of safety awareness to workers Adequate</li> </ul>

Air /dust pollution	<ul style="list-style-type: none"> <li>• job supervision.</li> <li>• Ensure strict enforcement of on-site speed limit regulations.</li> <li>• Avoid excavation works in extremely dry weathers.</li> <li>• Sprinkle water on graded access routes whenever necessary to reduce dust generation by construction vehicles.</li> </ul>
Solid and water wastes	<ul style="list-style-type: none"> <li>• Design and implement an appropriate landscaping programme to help in re-vegetation of parts of the project area after construction.</li> <li>• Reuse of the top soil in landscaping.</li> </ul>
Air, land and water pollution and degradation	<ul style="list-style-type: none"> <li>• Minimize waste through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials.</li> <li>• Provision of suitable facilities for wastewater disposal (such as a conservancy tank).</li> <li>• Ensure that the minimum statutory distance between the facilities and the river is always maintained (minimum of 6 metres).</li> <li>• Ensure wastes are properly disposed of.</li> </ul>
Water pollution	<ul style="list-style-type: none"> <li>• Open drains connected to Nairobi County storm water drains will be provided on site.</li> </ul>
Security	<ul style="list-style-type: none"> <li>• Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premises.</li> </ul>
Occupational health and Safety	<ul style="list-style-type: none"> <li>• All workers should be provide with full protective gear like working boots, overalls, helmets goggles, earmuffs, masks and gloves.</li> <li>• Construction crew at the site should be sensitised on social issues like drugs, alcohol and other diseases.</li> <li>• A fully equipped and professionally managed first aid kit must be provided within the site at all times.</li> <li>• The contractor should have workmen's compensation cover to comply with Work Injury Benefit Act, as well as appropriate Ordinances, Regulations and Union Agreements.</li> <li>• Adequate facilities should be provided and standard cleanliness maintained.</li> <li>• Food handlers preparing food for the workers should be controlled and monitored to ensure that food is hygienically prepared.</li> </ul>
water and electricity management	<ul style="list-style-type: none"> <li>• Avoid wasting of water supplied to the site during construction</li> <li>• Roof catchments should be provided to harvest rainwater to enhance collection and storage of rainwater.</li> <li>• In order to encourage water conservation during operation stages, the proponent should install water conserving taps that turn off automatically when not in use.</li> <li>• Provide notices and information signs on means and needs to conserve water resource to awaken civic consciousness regarding water usage and management</li> <li>• Incorporate rainwater harvesting in the</li> </ul>

- project design.
- Water reuse and/or recycling.
- Installation of water and electricity meters.
- Consider solar energy harvesting and optimize on natural lighting in the project design.
- Use of energy efficient machines and appliances.
- Provision of a standby generator.
- Human waste management
  - Provide a suitable toilet for construction workers away from the river.
  - Ensure sewage disposal system is well maintained.
- Air pollution
  - Use of low sulphur diesel for diesel vehicles and equipment.
  - Proper maintenance of vehicles and machinery.
- Fire risks
  - Provision of suitable firefighting equipment
  - Sensitize workers on fire safety.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,  
for Director-General,

MR/5021547 National Environment Management Authority.

#### GAZETTE NOTICE NO. 3465

#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

#### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 140MW OLKARIA V GEOTHERMAL POWER PLANT IN GREATER OLKARIA AREA IN NAIVASHA SUB-COUNTY, NAKURU COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Electricity Generating Company Limited) is proposing to construct a 140Mwe Geothermal Power Plant Greater Olkaria area in Naivasha Sub-County, Nakuru County. proposed project involves the construction of a power plant and associated infrastructure such as the cooling tower, steam gathering system, switchyard and transmission line.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Mitigation Measures
Soil erosion	<ul style="list-style-type: none"> <li>• Proper planning of site clearing or disturbance of the natural vegetation.</li> <li>• Isolated sites with installations and</li> </ul>

- frequent human presence that require re-vegetation will be surrounded by less palatable native species to act as plant screens and reduce pressure from wildlife foraging.
- No grey water runoff or uncontrolled discharges from the site/working areas (including wash down areas).
- Water containing pollutants such as cements, concrete, lime, chemicals and fuels shall be discharged into a conservancy tank for removal from site.
- Runoff loaded with sediment and other suspended materials from the site/working areas should be prevented from discharging to adjacent watercourses and/or water bodies must be prevented.
- Potential pollutants of any kind and in any form shall be kept, stored and used in such a manner that any escape can be contained and the water table not endangered.
- Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted.
- Air quality and dust
  - Olkaria is a fragile ecosystem; thus mobile machinery or vehicle maintenance and services should be undertaken away from project site in a yard set aside for this or by an approved garage or service station to prevent any incident of oil and fuel spills that could contaminate soils and possibly ground water quality.
  - Daily monitoring of air quality standards.
  - All construction machinery shall be maintained and serviced in accordance with the manufactures specifications.
  - Workers shall be trained / sensitized on dust minimization techniques and management of air pollution from vehicles and machinery.
  - The removal of vegetation shall be avoided until such time as clearance is required and exposed surfaces shall be revegetated or stabilized as soon as practically possible.
  - Frequent watering of exposed surfaces and piles of soil to prevent airborne dust emissions.
  - Unless inevitable, vehicles shall avoid earth roads susceptible to fugitive dust until dust management routines are done.
  - Incorporate dust/fumes arrestors in the batching plant e.g. use of dust nets.
  - Provision of appropriate protective personal equipment including respirators and aprons.
- Noise and vibration
  - Keep machines and vehicles in good working condition as per manufacturer's instructions.
  - Site and other operational workforce be provided with personal protective equipments (PPEs).
  - Provide signage on high noise levels and adequate notice to any local community to be potentially affected.
  - Daily monitoring of noise levels will

Solid waste	<p>need to be made during operation as per current practice.</p> <ul style="list-style-type: none"> <li>Identifying environmentally acceptable spoil sites for spoil materials and approval by the Resident Engineer.</li> <li>Encourage segregation by providing labelled collection and separation bins.</li> <li>Encourage recycle and reuse measures for some of the spoils generated.</li> <li>Waste disposal should be done by licensed collectors and handlers.</li> </ul>		introduced into this area.
Displacement of persons	<ul style="list-style-type: none"> <li>It is proposed that KenGen in liaison with Kenya Wildlife Service's establish a site that will be accessible to the traders and the tourists who buy their merchandise, especially within Hells Gate National Park.</li> </ul>	Impact on fauna	<ul style="list-style-type: none"> <li>Create awareness among the local communities on the importance of vegetation cover and discourage them from engaging in charcoal burning.</li> </ul>
Occupation health and safety	<ul style="list-style-type: none"> <li>Ensure compliance with all standards and legally required health and safety regulations.</li> <li>Include standard best practice health and safety provisions in the construction contract. The provisions should include insurance to enable the contractor to pay for any and all treatments required by his workers including those of all subcontractors, together with any subsequent lifelong disability payments.</li> <li>Establish and enforce a strict code of conduct for all project drivers including outside suppliers delivering materials.</li> <li>Implement the specified H&amp;S programme throughout the construction period.</li> <li>Provide fire fighting and first aid kits.</li> <li>Establish an emergency response procedure and display on all work areas. This is likely to require one vehicle on site equipped as an ambulance and a paramedic on site at all times during construction activities.</li> </ul>		<ul style="list-style-type: none"> <li>KWS and KenGen should monitor wildlife abundance, distribution and movement in relation to this infrastructural development during construction and operation stages to aid in decision making.</li> <li>Erect bumps in wildlife crossing zones.</li> <li>Vehicular disturbances such as hooting should be discouraged accordingly.</li> <li>Incident records (of poaching, accidents and other human wildlife conflicts etc) should be kept by monitoring and taking of corrective measures.</li> </ul>
Insecurity	<ul style="list-style-type: none"> <li>Ensure that the contractor develops staff code of conduct.</li> </ul>		<ul style="list-style-type: none"> <li>Roads feeding into the park area should be maintained as routes for tourist's activities and wildlife management.</li> </ul>
Impact on flora	<ul style="list-style-type: none"> <li>Monitor invasive plant species at the project area and uproot unwanted germinating plants.</li> <li>Assess concentration geothermal gaseous effluents such as H<sub>2</sub>S, SO<sub>2</sub>, NH<sub>3</sub> and CO<sub>2</sub> (e.g. by use of automatic sensors) and continually test for any evidence of acid rain.</li> <li>Plant soil-erosion preventing grass species such as <i>Cynodon dactylon</i>, <i>Digitaria abyssinica</i>, <i>Pennisetum clandestinum</i> and <i>Hyparrhenia dregeana</i> at bare sloppy grounds or loose soil dumps.</li> <li>Steam pipe insulations should have a well camouflaged colours that are maintained so that animals don't perceive pipelines as barriers.</li> <li>Brine flows and ponds should be located close to the source. Distant flow should be transmitted through closed pipes.</li> <li>Rehabilitate disturbed areas along roads, pipelines and abandoned campsites etc by planting native plant species such as <i>Tarconanthus</i> and <i>A. drepanolobium</i> – this should be done as soon as practicable to avoid colonization by invasive and opportunistic pioneer species.</li> <li>Exotic plants species should not be</li> </ul>		<ul style="list-style-type: none"> <li>Access for earthmoving machines should be regulated.</li> <li>Park rules should be enforced within the park.</li> <li>Brine ponds should be located close to the source. Distant flow should be piped to prevent animal or vegetation contact.</li> <li>At known animal migration corridors pipes should be elevated or buried under the ground surface. Modify pipe loop designs to minimize hindrance to wildlife movement as well as scaring them away. Other design options like pipe burying, wider loops or concave ones should be explored for habitat suitability and to ensure big game can still move along their routine corridors and routes.</li> <li>Limiting vegetation clearing to construction areas.</li> <li>Preparation of a landscape planting plan for the entire project area. Planting plan to be comprised of 75% indigenous species and to be rid of any invasive species.</li> <li>Re-vegetation should target 2 million trees annually until the area is fully re-vegetated.</li> <li>All embankments to be vegetated or stone pitched to prevent soil erosion.</li> <li>Planting a vegetation screen along the steam pipes to reduce visual intrusion across the landscape.</li> <li>Lighting to be switched off when not required.</li> <li>Lighting of temporary working areas and site compounds during periods of darkness to be minimised where possible.</li> <li>Prepare a proper post construction planting plan.</li> </ul>
		Brine disposal	<ul style="list-style-type: none"> <li>Brine ponds should be sited close to the source.</li> </ul>
		Accidental spillage resulting in contamination of chemicals and soil	<ul style="list-style-type: none"> <li>Brine re-injection through re-injection wells into underground reservoir.</li> </ul>
			<ul style="list-style-type: none"> <li>Chemical composition and parameters of the brine should be routinely monitored.</li> <li>Spill and drip trays used during servicing of machinery.</li> <li>Response plans for accidental spills to be formulated and routinely tested.</li> </ul>

- Oil/hazardous pollution
- Bunded storage areas and secondary containment for oil and chemicals.
  - Use of an oil interceptor in the plant.
  - Hazardous materials shall not be stored within 2 kilometres of the top water level of public water supply reservoirs.
  - Hazardous materials shall be stored above flood level.
  - Areas for the storage of fuel and other flammable materials shall comply with standard fire safety regulations.
  - Chemicals and fuel shall be stored in storage tanks within a secure compound. All chemicals and fuels shall be stored in accordance with manufacturer's instructions.
  - Storage areas or secondary containment shall be constructed of waterproof reinforced concrete or approved equivalent, which is not adversely affected by contact with chemicals captured within them.
  - The minimum volume for secondary containment shall be 110% of the capacity of the largest tank system, plus 10% of the total capacity of all other separate tanks and containers within the bund wall with closed valves for controlled draining during rains.
  - Pipe-work carrying product from the tank to facilities outside the containment shall be provided with secondary containment; Tank equipment such as dispensing hoses, valves, meters, pumps, and gauges shall be located within the containment or provided with own containment.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nakuru County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

GAZETTE NOTICE NO. 3466

# THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

## THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED REHABILITATION AND AUGMENTATION OF HOMA BAY SEWERAGE TREATMENT SYSTEM IN HOMA BAY COUNTY

### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Lake Victoria Environmental Management Project Phase II) proposes to set up a Rehabilitation and Augmentation Sewerage Treatment System in Homa Bay County.

The whole process shall dwell on rehabilitation and augmentation measures for the existing Waste water treatment system which comprises of rehabilitation and augmentation of preliminary treatment unit for screening and grit removal, construction of anaerobic ponds, rehabilitation and augmentation of the existing settling tanks and maturation ponds.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Mitigation Measures
Soil and water contamination	<ul style="list-style-type: none"> <li>• Plan emergency response measures in case of accidental oil spills.</li> <li>• Regular servicing and maintenance of construction equipments to avoid oil spills.</li> <li>• At the end of construction works, level off the soils and facilitate vegetation regeneration.</li> <li>• Ensure protection of the local ecosystem by ensuring liquid and hazardous wastes do not find their way into storm drains.</li> <li>• Ensure proper maintenance of drainage system like regular cleaning to ensure smooth flow of the storm water and avoid blockages and overflows especially during rainy seasons.</li> </ul>
Odour, dust and noise pollution	<ul style="list-style-type: none"> <li>• Ensure proper operation and maintenance practices of the waste stabilization ponds.</li> <li>• Provide protective clothing like helmets, dust masks and hardy gumboots to the construction crew.</li> <li>• Maintain vehicles and construction machinery in good working condition in order to minimize gas emissions and noise.</li> <li>• The contractor to regulate night time construction when noise is loudest.</li> <li>• Construction sites and transportation routes to be water-sprayed on dry and windy days up to three times a day, especially if these sites are near sensitive receptors, such as residential areas.</li> </ul>
Solid waste and liquid waste generation	<ul style="list-style-type: none"> <li>• Unusable construction waste, such as damaged pipes, formwork and other construction material, must be disposed off at an approved dumpsite or sold to willing buyers for salvage value.</li> <li>• Arrangements should be made for the regular collection of litter and for its disposal.</li> <li>• Proper solid waste receptacles and storage should be placed at strategic points especially to dispose packaging material from food stuff consumed by employees at lunch time.</li> </ul>
Public health and safety	<ul style="list-style-type: none"> <li>• Sensitize workers and the surrounding community on awareness, prevention and management of HIV/ AIDS through staff training, awareness campaigns, multimedia, and workshops or during community —Barazas.</li> <li>• The ponds to be properly maintained to ensure that the ponds do not become mosquitoes breeding site.</li> <li>• Provide workers with appropriate</li> </ul>

protective clothing such as dust masks, helmet, sturdy gumboots, gloves and overalls.

- Ensure that all construction machines and equipment are in good working conditions to prevent occupational hazards.
- Ensure that fire extinguishers canisters are placed in prioritized areas as per accessibility and proximity of specific fire hazard.
- Provide appropriate human and solid waste disposal facilities.
- Establish a Health and Safety Plan for all works.
- Appoint a trained health and safety team for the duration of the construction work.
- Provide workers with training on safety procedures and emergency response such as fire, oil and chemical spills.

Biodiversity/vegetation • Spare the vegetation that must not necessarily be removed such as trees.

- The contractor will take reasonable precautions to minimize disturbance to the native flora during the construction.
- Ensure protection of the local ecosystem by proper handling of cement during civil works and other solid and liquid wastes.

Discharge of industrial effluent • Monitor discharge of industrial effluent into the sewer including review of consent to operate forms submitted to the MoHB and analysis of wastewater sample from industries discharging into the sewer system.

Road safety and traffic management • Prepare a traffic management plan during the construction activities.

- Monitor adherence to the traffic management plan.
- Review and monitor road safety records to ensure all project related road accidents are being properly investigated and reported.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE ENVIRONMENTAL MANAGEMENT AND  
CO-ORDINATION ACT  
(No. 8 of 1999)

# THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF A SEWERAGE SYSTEM IN BOMET TOWNSHIP, BOMET COUNTY

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Lake Victoria Environmental Management Project II) is proposing to construct a sewerage System in zones 111(Proposed industrial), 110(proposed hide and skin), 61(proposed site for works) and zone 19(proposed slaughter house), in Bomet Township, Bomet County.

The treatment ponds have been designed to treat 1,469m<sup>3</sup>/day mainly to be generated in Chepngaina Sub-location which forms Bomet Township. Two trains have been designed each with six ponds (A1, F1, M1, M2, M3 and M4) with each train capable of treating 734.5m<sup>3</sup>/day. Due to the problem in identifying for land for Waste Stabilization Ponds, only one train with capacity to treat 734.5m<sup>3</sup>/day with associated structures has been considered.

The following are the anticipated impacts and proposed mitigation measures:

Impact	Proposed Mitigation Measures
Open trenches hazardous to individuals	<ul style="list-style-type: none"> <li>• Backfilling trenches as soon as works are completed.</li> <li>• Warning signs at both deep and shallow trenches.</li> <li>• Provide protection rails when constructing sections of the deep trenches.</li> <li>• Dumping of collapsed pipes and surplus excavated material (eyesore).</li> </ul>
Noise pollution	<ul style="list-style-type: none"> <li>• Ensure regular servicing of equipment and machinery.</li> <li>• Enforce workers discipline on site.</li> <li>• Programme work to take minimum time.</li> <li>• Construction works to be done during day time.</li> <li>• Heavy constructing machinery to be enclosed.</li> <li>• Use equipments that have low noise emissions.</li> <li>• Use equipment fitted with noise reduction devices such as mufflers.</li> <li>• Operate noise generating equipment during regular working hours so as to reduce the potential of producing noise during night hours.</li> <li>• Heavy equipment should be transported early morning with proper pilotage.</li> <li>• Construction workers operating equipment that generates noise greater than 80 dB should be equipped with noise protection devices and their use enforced.</li> </ul>
Soil erosion	<ul style="list-style-type: none"> <li>• Water channels to be regularly maintained and repaired to avoid point discharge in case of breakage and or blockage.</li> <li>• Source building materials from known sustainable sites to minimize extraction impacts.</li> <li>• Ensure that any compacted areas are ripped to reduce run off.</li> </ul>
Soil, water and groundwater	<ul style="list-style-type: none"> <li>• Construct oil- water interceptors to capture discharge of oils, fuels and other</li> </ul>

contamination	<p>polluting liquids.</p> <ul style="list-style-type: none"> <li>• Ensure proper handling of lubricants, fuels and solvents while maintaining the equipment.</li> <li>• Control surface runoff by temporarily berming the outlet of the significant storm water features to provide some detention behind the berms.</li> </ul>	<p>removed from site and disposed appropriately in a designated landfill.</p> <ul style="list-style-type: none"> <li>• Contract a NEMA certified waste collection firm to collect sludge waste for central disposal point.</li> <li>• Construction of storm water drainage system; and Construction of offsite pit for handling of sludge.</li> </ul>
Solid waste generation	<ul style="list-style-type: none"> <li>• The bins at both the campsite and construction sites should be emptied regularly to prevent overfilling. Bins should be strategically placed within the campsite and construction sites. They should also be covered to prevent access by vermin and minimize odour.</li> <li>• Use of cleaner technologies / generation to minimize on generation of solid wastes. Solid wastes to be recycled, reused and utilized in an environmentally acceptable manner.</li> <li>• A waste management plan to be developed to handle temporary storage, transport and disposal of hazardous waste. Segregation of wastes before disposal.</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure only NEMA licensed company exhausts the sludge from the waste water treatment plant.</li> <li>• Ensure that once exhausted the sewage is disposed at a NEMA licensed facility for sewage management and disposal.</li> </ul>
Dust emission	<ul style="list-style-type: none"> <li>• Use of appropriate PPE by construction workers</li> <li>• Sensitize the employees on sound environmental management.</li> <li>• Use dust nets at high level of the building.</li> <li>• Provide appropriate enclosure for concrete mixers.</li> </ul>	<p>Effluent handling</p> <ul style="list-style-type: none"> <li>• The system must be designed and adequately sized to be able to treat all the effluent generated from the Bomet Township to the required standards.</li> <li>• Proper servicing of machineries on site according to manufactures details, proper liquid waste collection system should be provided on site, stabilizing lagoons could be constructed to hold waste water before releasing into the river.</li> <li>• Management to apply for a license to discharge effluent to environment.</li> <li>• Employees to be trained on the operation and maintenance of whatever effluent treatment system that will be put in place.</li> <li>• Any pipes leakages and bursts in the system to be promptly fixed.</li> </ul>
Occupational Safety Concerns	<ul style="list-style-type: none"> <li>• Hiring of competent staff to perform works.</li> <li>• Follow proper work guidelines.</li> <li>• Provide insurance to the workers.</li> <li>• There should be presence of fully equipped first aid kit at site.</li> <li>• To have emergency preparedness plans in place.</li> </ul>	<ul style="list-style-type: none"> <li>• Local ground water to be monitored periodically by sampling and testing water from borehole in the neighbourhood every three months to check whether there are any traces of effluent finding their way to ground water aquifers.</li> <li>• Periodic Sampling of two strategic points within River Nyangore.</li> </ul>
Pollution of river Nyagores by unsatisfactory treated waste water	<ul style="list-style-type: none"> <li>• Regular inspection of the system to ensure performance is maintained at high levels.</li> <li>• Blockages should be detected and promptly replaced.</li> <li>• Regular monitoring and sampling of the waste water at influx and effluent points as well as in the receiving water bodies.</li> <li>• Creation of an artificial wetland along the boundary between River Nyagores and the stabilization ponds.</li> </ul>	<ul style="list-style-type: none"> <li>• Treated effluent to be periodically analysed (every three months) to ensure BOD is maintained at 30mg/l or less and COD at 50mg/l or less.</li> </ul>
Occupational Health and safety	<ul style="list-style-type: none"> <li>• Provide appropriate training and regular on occupational health and safety.</li> <li>• Provide appropriate personal protective equipment (PPE) to workers and any visitors including First Aid facilities for staff as per the Occupational Safety and Health Act, 2007.</li> <li>• Develop and implement a detailed and site specific Emergency Response Plans.</li> </ul>	<p>Water usage</p> <ul style="list-style-type: none"> <li>• Approximate volumes of water to be required during construction of the project to be computed in order to put in place mechanisms of reliable supply.</li> <li>• Approximate volumes of water to be required per project in a specified time period to be computed in order to put in place mechanisms of reliable supply.</li> </ul>
Sludge waste from the ponds	<ul style="list-style-type: none"> <li>• Tapping 100% of gases generated from the facility, this will be tapped in the sludge digesters, the gases of which are responsible for the foul smell associated by with wastewater treatment system.</li> <li>• Maintain high standards of hygiene within the system.</li> <li>• The sludge wastes should be promptly</li> </ul>	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.</p> <p>(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. O. OUMA, for Director-General,</p>

MR/4944930

National Environment Management Authority.

GAZETTE NOTICE NO. 3468

**THE ENVIRONMENTAL MANAGEMENT AND  
CO-ORDINATION ACT**

*(No. 8 of 1999)*

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

**ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED WOLFENBERG INTERNATIONAL  
SERVICE STATION ON LAND PARCEL NOS. KISUMU/BUOYE/  
5304 AT BUOYE ON THE KISUMU-AHERO ROAD IN KISUMU  
EAST DISTRICT, KISUMU COUNTY**

**INVITATION OF PUBLIC COMMENTS**

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Wolfenberg International Limited) is proposing to construct and operate a Service Station on land parcel Nos. Kisumu/Buoye/5304 at Buoye on the Kisumu-Ahero road in Kisumu east district, Kisumu County

The project activities will include; Underground storage tanks (USTs), steel storage and dispensers, offices, stores, shops and toilets, tyre sales and repair centre, generator and control rooms; a canopy covering all facilities, service bay and an oil water interceptor.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Contamination of surface water	<ul style="list-style-type: none"> <li>• Monitor the quality of waste water annually. Comply with water quality regulations of 2006.</li> <li>• Pre-treatment of waste water through an oil/water separator (OWS).</li> <li>• Provision of spill response kits for timely and effective management of large scale fuel spills.</li> </ul>
Solid waste management	<ul style="list-style-type: none"> <li>• Contracting a NEMA licensed company for waste collection and onward disposal at relevant landfills.</li> <li>• Segregate waste at source.</li> </ul>
Accidents related to fire hazards)	<ul style="list-style-type: none"> <li>• Purchase of fire fighting equipment and contracting a Fire Services Company for regular maintenance of equipment.</li> <li>• Display safety warning “no smoking , no naked flame.</li> </ul>
Occupational health and safety	<ul style="list-style-type: none"> <li>• Purchase of PPE e.g. goggles, helmets, masks, hand gloves, ear muffs, safety boots, overalls for protection against body contact with petroleum products etc.</li> <li>• Construction crew at the site shall be sensitized on social issues such as alcohol and diseases. Construction crew at the site shall be sensitized on social issues such as alcohol and diseases.</li> <li>• Carrying out annual EHS audits in order to maintain environmental and staff safety standards.</li> </ul>
Sanitation	<ul style="list-style-type: none"> <li>• Drainage of all stagnant water.</li> <li>• Provide sanitary facilities for construction workers.</li> <li>• No burning of any chemical and plastic</li> </ul>

containers.

Traffic hazards	<ul style="list-style-type: none"> <li>• Adequate sanitary facilities shall be provided and standard cleanliness provided.</li> <li>• Provide ample entry and exit points.</li> <li>• Contractor to plan traffic to avoid movement during human movement peak hours.</li> </ul>
Offensive odours	<ul style="list-style-type: none"> <li>• Ensuring that underground bulk petroleum storage tanks covers are properly sealed.</li> </ul>
Loss of biodiversity	<ul style="list-style-type: none"> <li>• Landscaping unpaved areas with appropriate vegetation species (preferably indigenous species) Light compaction of the site.</li> <li>• Plant grass on unpaved storm water ways.</li> </ul>
Oil spillage	<ul style="list-style-type: none"> <li>• The layout design should clearly demarcate drainage and segregate contamination free water and potentially containment water.</li> <li>• Design to include installation of isolation valves at appropriate locations. Emergency disaster preparedness on spills should be developed and implemented.</li> <li>• Directing away spills from the tank farm towards the nearest corner next to the tanks.</li> <li>• Adequate capacity drainage lines, interceptor.</li> <li>• Properly constructed fuel off-loading areas with containment connected to the drainage leading to the OWS.</li> <li>• Checking all cylinders coming into the facility for any defects.</li> <li>• Elimination/control of leakage due to rapture of storage tanks arising from mechanical puncture, corrosion etc.</li> <li>• Elimination/control of leakage due to rapture of piping arising from mechanical rapture, corrosion, pressure build-up, loose connections, etc.</li> </ul>
Sewage	<ul style="list-style-type: none"> <li>• The station will have a septic tank and soak pit.</li> </ul>

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- County Director of Environment, Kisumu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

SALOME MACHUA,

*for Director-General,*

MR/4766570

National Environment Management Authority.

GAZETTE NOTICE NO. 3469

THE ENVIRONMENTAL MANAGEMENT AND

## CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY  
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED CONSTRUCTION OF A NEW KENCHIC  
PROCESSING PLANT THIKA, KIAMBU COUNTY

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenchic Limited) is proposing to construct a chicken processing plant on plot LR. NO. 1428/2 along Garissa road in Ngoliba Thika, Kiambu County.

The processing plant will be divided in to the following sections; Receiving yard, Slaughtering and processing house, blast freezers, Cold stores, Sales area, Water treatment plant, Staff canteen and kitchen, Water storage tanks, Maintenance and workshop, Rendering plant, Waste storage area, Wastewater treatment system, Staff quarters;

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Hydrology and water supply quality degradation	<ul style="list-style-type: none"> <li>• Hazardous substance control and emergency response plan that will include preparation for quick and safe clean up of accidental spill.</li> <li>• Formulate Hazardous materials handling procedures to reduce the potentials for spill during construction.</li> <li>• Identification of areas where refueling and vehicle maintenance activities and storage of hazardous materials, if any, shall be permitted.</li> <li>• Construction of a standard septic tank where all sanitary waste will be directed.</li> <li>• During operation phase waste water containing chicken blood may find their way in the river. The proponent will ensure that the water treatment plant to be constructed will be functional all the time. Water analysis will be conducted quarterly every year once the plant becomes operational.</li> </ul>
Dust and exhaust emission	<ul style="list-style-type: none"> <li>• Strict enforcement of on-site speed limit regulations.</li> <li>• Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles.</li> <li>• Personal protective equipment like dust masks to be provided.</li> <li>• Alternatively fueled construction equipment shall be used where feasible; equipment shall be properly tuned and maintained.</li> <li>• Proper maintenance practices of the waste stabilization pond.</li> <li>• During operation fugitive emissions from leaks in the refrigeration system are possible sources of NH<sub>3</sub> emissions. However this source is expected to be minimal. Refrigeration system will be inspected weekly to detect and repair any leakage.</li> </ul>
Food safety impacts	<ul style="list-style-type: none"> <li>• Maintain good housekeeping and high level of hygiene.</li> <li>• Employ veterinary a full time doctors to test chickens before and after they have</li> </ul>

been slaughtered.

## Biological hazards

- Comply with veterinary regulation concerning poultry processing.
- Workers working in the plant will be required to maintain high level of personal hygiene.
- Providing workers with PPE that is appropriate for the activity (e.g. protective clothing, gloves and masks) for workers in intestine and stomach cleaning operations.
- Ensuring physical segregation of work and welfare facilities to maintain worker personal hygiene.
- Designing holding areas for detained chicken and high-risk materials to avoid direct contact with workers and ensuring that all waste materials, including those from rejected chicken are removed daily.
- Control movement of chicken to avoid spreading diseases.

## Noise pollution and vibration

- Sensitize construction vehicle drivers, machinery operators to switch off vehicle or machinery not being used.
- Ensure that construction machinery is kept in good condition to reduce noise generation.
- Plant trees around the site to provide some buffer against noise propagation.
- Construction works shall entirely be planned to be during day time when most of the neighbors shall be away at work.
- All machinery will be maintained and serviced to reduce pollution.
- During operation there is high likely hood of noise coming from the chicken the proponent will plant trees around the chicken house to act as buffer against noise.

## Incidents, accidents and dangerous occurrences

- Ensure that provisions for reporting incidents and dangerous occurrences during construction phase and operational phase using prescribed forms obtainable from DOSHS are in place.
- Enforcing adherences to safety procedures and preparing contingency plan for accidental response in addition to safety education and training shall be emphasized.
- Ensure that the premises are insured as per statutory requirements (Third party and workman's compensation).
- Develop efficient, clean, well-lit and adequate sanitary conveniences for construction workers.

## Solid waste generation

- Use of an integrated solid waste management system i.e. recover, recycle and reuse.
- Through accurate estimation of the sizes and qualities of materials required, order materials in the sizes and qualities they will be needed, rather than cutting them to size or having large quantity residual materials.
- Ensure that damaged or wasted construction materials are recovered for refurbishing and use in other projects.
- Donate or sell recyclables /reusable or residual materials to local community groups, institutions, and individual local

residents or home owners.

- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure.
- Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.
- Reuse packaging materials such as cartons, cement bags, empty metals and plastic containers to reduce waste at the site.
- Dispose waste more responsibly by dumping at designated dumping sites or landfills only.
- Waste collection bins to be provided at designated points on the site.
- Running educational campaigns amongst residents, e.g. through use of posters, to encourage reuse or recycling of the solid waste.
- Roof water to be harvested and stored to be used for cleaning proposes.
- A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and /or retention with graduated outlet control structure shall be designed.
- Application of soil erosion control measures such as leveling of the project site reduce run-off velocity and increase infiltration of storm water into the soil.
- Ensure those construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site.
- Provision of means for handling sewerage generated by construction workers (there are toilets connected to septic tanks on the site).
- Conduct regular checks for sewage pipe blockages or damages since vices can lead to release of the effluent into the land water bodies.
- Construct a waste water treatment plant where waste water will be treated before it is released to the environment.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Kiambu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,  
for Director-General,

MR/5021531

National Environment Management Authority.

## CO-ORDINATION ACT

(No. 8 of 1999)

### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED FERTILIZER MANUFACTURING PLANT ON PLOT L.R. NO. NO. BLOCK 6/11, NAKURU MUNICIPALITY, NAKURU COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Fertiplant East Africa Limited) proposes to construct a factory for the granulation process of Nitrogen, Phosphorus and Potassium (NPK) fertilizer.

The following are the anticipated impacts and proposed mitigation measures:

Impact	Mitigation Measures
Haphazard storage of building materials.	<ul style="list-style-type: none"> <li>• Provide pathways</li> <li>• Reduce heaps of materials from project site</li> <li>• Keep materials in open where they can be spotted quickly</li> </ul>
Injuries caused by heavy materials fall	<ul style="list-style-type: none"> <li>• Ensure cranes are well maintained.</li> <li>• Pulleys to be greased.</li> <li>• The rope and table be strong and safe.</li> <li>• Platforms should be constructed strongly and avoid their surfaces being slippery.</li> <li>• Load reduction to size/weight manageable</li> <li>• Train workers on ergonomic principles of managing heavy loads.</li> </ul>
Traffic accidents	<ul style="list-style-type: none"> <li>• Signboards should be in large letters and be noticeable.</li> <li>• Provision should be made of good points of vehicle turning in the construction site.</li> <li>• Only trained and skilful and licensed drivers should be engaged in driving vehicles carrying materials to the site.</li> <li>• Drunkardness be forbidden to all drivers.</li> <li>• All vehicles be maintained.</li> <li>• First aid facilities be availed in the site of construction.</li> </ul>
Fire outbreaks	<ul style="list-style-type: none"> <li>• The construction site should have fire fighting equipment including:- <ul style="list-style-type: none"> <li>- fire hydrant</li> <li>- fire extinguishers</li> <li>- hose reel</li> <li>- sand buckets</li> </ul> </li> <li>• Where possible the management to have their own engine or be able to quickly access MCN engine in case of fire outbreaks.</li> <li>• All workers be trained on the skills to fight fire out breaks.</li> <li>• Fire drills be conducted.</li> </ul>
Falling walls, columns, beams and slabs	<ul style="list-style-type: none"> <li>• All specialized works to be carried out by skilled people and supervised by senior technical staff.</li> <li>• Allow good period (21days) of curing for slabs.</li> </ul>

- Accidents
- Train workers on ergonomic principles of heavy physical work. Maintain a natural drainage system as much as possible or reconstruct the site to create the same.
  - Maintain the drainage system impervious and self-flowing.
  - Where open yards are not cemented grass should be planted to absorb rainwater.
  - Sharps to be handled by skilled workers.
  - Sharps not to be positioned on pathways.
  - Sharps be positioned at distances to allow work space.
- Paint vapours
- Keep containers containing these substances tightly all the time.
  - Use of masks during finishing operations
  - Skilled people to handle these substances.
  - Avoid cigarette smoking
- Solid waste generation
- Provision and use of solid waste container
  - Collection, transportation and disposal of the wastes
  - Carry out solid waste segregation to reduce the bulk of waste disposed off.
  - Determine stages of more waste generation and institute control measures.
  - Determine hazardous wastes to be given more attention for storage and collection i.e. more frequency of collection.
- Open spaces on upper floors.
- Educate workers on the risks involved on the upper floors construction. eHNEdu
- Falling heavy objects
- Avoid storing heavy material on the upper floors and along the stairs.
- Weak/slippy ladders
- Educate workers on the use of ladders.
  - Maintenance of ladders.
- Scarfolding
- Regular check ups and Maintenance
- Dust emission
- Use of water sprays to suppress dust.
- Extreme weather
- Use of warm clothing for cold climate
  - Use of light clothing for hot climate.
- Oil and paints spillages
- Scoop all the spilled oils and paints.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nakuru County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,

MR/4766615 *for Director-General,  
National Environment Management Authority.*

GAZETTE NOTICE NO. 3471

THE ENVIRONMENTAL MANAGEMENT AND  
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY  
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED CONSTRUCTION OF A SERVICE  
STATION, ON PLOT LR NO 29C IN MATILIKU OFF EMALI –  
MATILIKU ROAD, MAKUENI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kingsent Petroleum Kenya Limited) is proposing to construct a Service Station on land parcel No 29C Matiliku off Emali – Matiliku Road, Makueni County

The design will involve a steel canopy, ribbed concrete finish under the steel canopy, one pump isles, four underground fuel tanks (5000liters diesel tank, 5000liters kerosene, 2x5000liters super petrol), sanitary facilities for both genders, septic tank, a store, station manager and sales office section, compressor and generator section and underground drained system.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measure</i>
Noise and vibrations	<ul style="list-style-type: none"> <li>• Barricading the area (erecting a boundary wall.</li> <li>• Construction activities to be conducted during the day.</li> <li>• Provision of appropriate Personal Protective equipment to protect workers from occupational noise.</li> <li>• Regular maintenance of plants and equipment.</li> <li>• Shutting down of engine vehicles when not in use to reduce on noise levels.</li> <li>• Conducting of noise measurements from different positions within and outside the workplace to establish prevailing noise levels and recommending appropriate mitigation measures.</li> </ul>
Air pollution	<ul style="list-style-type: none"> <li>• Use of dump method to mitigate on dust by sprinkling water on areas to be excavated.</li> <li>• Soil compaction.</li> </ul>
Pressure on existing infrastructure	<ul style="list-style-type: none"> <li>• Erection of warning and informative signs. i.e. notices, bill boards at the site during the construction phase and traffic control along the connecting road.</li> </ul>
Solid and liquid waste	<ul style="list-style-type: none"> <li>• Proper designing of drainage channels and regular maintenance of the same.</li> </ul>
Contamination of the ground with oil and grease substances	<ul style="list-style-type: none"> <li>• Maintenance should be carried out at designated service bays to avoid contamination of environment by resultant oil and greases.</li> </ul>

Oil leaks and spills	<ul style="list-style-type: none"> <li>• Regular inspection of underground tanks for leakages.</li> <li>• Construction of a three pit oil interceptor tanks to separate oil from sludge.</li> <li>• Double walling of underground tanks to guard against leaks.</li> <li>• Protecting the underground tanks with corrosion prevention materials.</li> <li>• Prioritizing the upgrade of equipment and installation of existing facilities of a network after a defined age.</li> <li>• Careful siting of the project to ensure that it lies in an environment that is far from environmental receptors including sewers, tunnels, vaults, surface water reservoirs etc.</li> </ul>
Destruction of soil structure	<ul style="list-style-type: none"> <li>• Ensure use of manual labour and hand tools where appropriate.</li> <li>• Ensure the contractor takes the shortest time possible.</li> </ul>
Soil and ground water contamination	<ul style="list-style-type: none"> <li>• Regular hydraulic pressure testing of the underground tanks.</li> <li>• Non destructive testing, for example, ultrasound testing.</li> </ul>
Generation of contaminated waste water and storm water	<ul style="list-style-type: none"> <li>• Minimization of volume of storm water generated from vehicle fueling stations and AST containment areas through installation of roofs or other types of covers.</li> <li>• Implementation of secondary containment procedures that avoid accidental or intentional releases of contaminated containment fluids.</li> <li>• Segregation of clean drainage and potentially contaminated drainage, treating the latter through oil/water separators. Oil water separators may include baffle type or coalescing plate type. They should be properly designed, operated, and maintained to achieve the desired water treatment results.</li> </ul>

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Makueni County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

for Director-General,

MR/5021532 National Environment Management Authority.

GAZETTE NOTICE No. 3472

#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

#### ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED GATES OF PEARL CEMETERY, MEMORIAL PARK AND COMMERCIAL CENTRE ON PLOT L.R. NO. 10701 IN KINUNGI, NYANDARUA COUNTY

##### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Eastern Rift Sawmills Limited) proposes to develop a private run cemetery on plot L.R. No. 10701 situated in Kinungi, Nyandarua County.

The project will comprise a crematorium, restaurant, commercial centre and a memorial park on a 63 acre site that is bordered by the Nairobi-Nakuru Highway, to the north, the Kikuyu Escarpment Forest to the Southeast, and a mushroom farm to the west.

The following are the anticipated impacts and proposed mitigation measures:

<i>Anticipated Impacts</i>	<i>Mitigation Measures</i>
Fall Hazards	<ul style="list-style-type: none"> <li>• Provide safety harnesses and scaffolding</li> </ul>
Falling objects	<ul style="list-style-type: none"> <li>• Provide helmets.</li> </ul>
Dust	<ul style="list-style-type: none"> <li>• Water the ground before and during excavation.</li> </ul>
Noise	<ul style="list-style-type: none"> <li>• Use of ear protectors by workers.</li> <li>• Recondition engine exhaust systems.</li> <li>• Engine tune-up.</li> <li>• Establish inspection program for equipment.</li> </ul>
Emissions	<ul style="list-style-type: none"> <li>• Use of respirators by workers.</li> <li>• Recondition engine exhaust systems.</li> <li>• Engine tune-up.</li> <li>• Establish inspection program for equipment.</li> </ul>
Sanitation	<ul style="list-style-type: none"> <li>• Provide temporary sanitary facilities.</li> </ul>
Wastewater and sewage discharge	<ul style="list-style-type: none"> <li>• Discharge to Septic tanks.</li> </ul>
Storage and handling of hazardous materials	<ul style="list-style-type: none"> <li>• Obtain material safety data sheets for all hazardous materials and products handled at the site.</li> <li>• Obtain personal protective equipment for the workers responsible for handling hazardous materials.</li> <li>• Train the workers on safe handling procedures.</li> </ul>
Waste oil contamination	<ul style="list-style-type: none"> <li>• Provide labelled containers for waste oil.</li> </ul>
Disposal of waste oil	<ul style="list-style-type: none"> <li>• Identify a licensed contractor to recycle oil.</li> <li>• Appoint a licensed contractor to collect waste oil.</li> <li>• Adhere to spill control procedures when handling waste oil.</li> </ul>
Spill control	<ul style="list-style-type: none"> <li>• Obtain spill control kit.</li> <li>• Train staff on spill control.</li> </ul>

#### GAZETTE NOTICE NO. 3473

#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

#### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LPG STORAGE AND BOTTLING FACILITY ON PLOT L.R. KISUMU/KOGONY/4813 IN WINAM DIVISION, KISUMU COUNTY

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Green Energy Limited) proposes to construct an LPG Bulk Storage and Filling Plant for the storage of cooking gas and filling cylinders located in Bandani Sub-Location, Kisumu Town Location, Winam Division, Kisumu East District, Kisumu County.

The design will involve installation of one aboveground 60 Metric Ton Capacity tank, off-loading and loading pumps and compressors, LPG cylinder filling, a 100,000L horizontal diesel tank, paving of all driveways, installation of one 80-tonne platform weighbridge, office block, a genset house, fire fighting system, a borehole, LPG tank containment, appropriate drainage channels and lines and access road.

The following are the anticipated impacts and proposed mitigation measures:

Impact	Mitigation Measure
Noise pollution	<ul style="list-style-type: none"> <li>Noise reduction/ hearing protection devices when working with noisy equipment.</li> <li>Use serviceable equipment with low noise emission.</li> <li>Instruct truck and machinery operators</li> </ul>

Air pollution (dust, fuel emissions)	<ul style="list-style-type: none"> <li>to avoid raving of engine.</li> <li>Control speed of construction vehicles;</li> <li>Prohibit idling of vehicles.</li> <li>Water shall be sprayed during the construction phase on excavated areas to reduce dust emission.</li> <li>Regular maintenance of plant and equipment.</li> <li>Provision of dust masks for use while working- in dusty conditions.</li> <li>Use of serviceable vehicles and machinery to avoid excessive smoke emission.</li> </ul>
Solid waste Management	<ul style="list-style-type: none"> <li>Provide solid waste collection facility for the temporary storage of waste prior to disposal.</li> <li>The storage yards should be provided with solid waste disposal facilities such as waste bins/chutes.</li> <li>Excavation activities to be done preferably during the dry season to avoid soil erosion.</li> </ul>
Soil Erosion	<ul style="list-style-type: none"> <li>Soils excavated for the construction of the LPG facility shall be disposed offsite or used for backfilling where possible.</li> <li>Soils shall not be left exposed to wind/water for long.</li> <li>Existing vegetation shall be minimally disturbed during the construction.</li> <li>Reduction of soil erosion and safeguard biodiversity protection.</li> </ul>
Gasleak/fire	<ul style="list-style-type: none"> <li>Re-plant degraded areas with local species to improve ground cover.</li> <li>Install Mounded LPG Tanks and include the use of fireproof electrical installations at the facility.</li> <li>Install adequate fire fighting installations and provision for adequate water storage.</li> <li>Provide emergency stop switch around the facility will be done at appropriate locations to facilitate the cutting off of power in case of emergency.</li> <li>Installation of Gas Detectors.</li> <li>Provide a "First Aid Box", with proper equipment with proper training of Depot staff on how to administer first aid.</li> <li>Address the depot fire prevention and control capacity.</li> <li>Install Fire alarms, smoke detectors, etc. for fire warning and prevention in addition to other fire control equipment besides the fire extinguishers and sand buckets - so as to strengthen the fire control capacity.</li> <li>Staff training and regular drills on fire prevention and control will be encouraged to ensure proper preparedness for fire control in the depot.</li> <li>The fire control equipment will be regularly serviced after installation to ensure efficient performance when required.</li> </ul>
Ground contamination	<ul style="list-style-type: none"> <li>Maintenance should be carried out at designated service bays to avoid contamination of environment by resultant oil and greases.</li> </ul>
Site area and groundwater	<ul style="list-style-type: none"> <li>No domestic or any other hazardous</li> </ul>

pollution

waste is disposed of at the project area.

- Ensure that machinery and used oil from vehicles is not released to the ground through the provision of mode of collection and appropriate disposal.
- Clear instruction to machine and vehicle servicing personnel on this provision to be made available.
- Construct a drainage system within and around the depot site leading to an interceptor.
- Carry out regular drainage and interceptor maintenance including cleaning the interceptors of rubbish to avoid clogging and overflow.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Kisumu County

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

**IMPORTANT NOTICE 1** PRINTED AND PUBLISHED BY THE GOVERNMENT PRINTER, NAIROBI  
**THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

*Kenya Gazette*

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
