GAZETTE NOTICE NO. 6968

THE BIOSAFETY ACT

(No. 2 of 2009)

THE BIOSAFETY (ENVIRONMENTAL RELEASE) REGULATIONS, 2011

THE NATIONAL BIOSAFETY AUTHORITY

REQUEST FOR COMMENTS ON AN APPLICATION FOR ENVIRONMENTAL RELEASE AND PLACING ON THE MARKET OF GENETICALLY MODIFIED GYPSOPHILA CUT FLOWERS IN KENYA

The National Biosafety Authority (NBA) is a State Corporation established through the Biosafety Act (No. 2 of 2009) to regulate all activities involving genetically modified organisms (GMOs) by ensuring safety of human and animal health and provision of adequate protection of the environment. The Act requires the public and other stakeholders to give their comments whenever an application for environmental release and placement on the market of a GMO is submitted to the NBA.

In compliance with the provisions of the Biosafety Act and Biosafety (Environmental Release) Regulations, the Authority announces to the public the receipt of an application from Imaginature Limited for environmental release and placing on the market of genetically modified (GM) Gypsophila cut flowers in Kenya.

Prior to this application, Imaginature Limited in collaboration with Kenya Agricultural and Livestock Organization (KALRO) conducted confined field trials under the supervision of NBA and Kenya Plant Health Inspectorate Service (KEPHIS) in Naivasha.

Conventional Gypsophila flowers (also called Baby's breath) are predominantly white in colour and are solely used for ornamental purposes. They are not consumed by humans or used as animal feed. These flowers are used as filler materials in flower arrangements and bouquets for in-door beautification.

The GM-Gypsophila has been improved through modern techniques by adding a few genetic elements responsible for new range of colours from dark purple and red to light pink coloration in flowers from a model plant called Arapidopsis. The change in colour of the Gypsophila flowers from white colouration has been done in order to fetch premium price in the international Market. Other than the colour change of the flower petals, no other alteration has been introduced in the GM-Gypsophila flowers.

According to the applicant, the GM-Gypsophila varieties will broaden Kenyan farmers' assortment of products, thus promoting their market position as they will be trading in unique products. Also, the combination of higher price and increased volume are expected to increase farmers' annual income from Gypsophila stems. To-date, the GM-Gypsophila has not been approved for commercial growing in any other country and if approved, Kenya will be the first pioneering country in authorizing the production of these varieties. In the first phase, the applicant is targeting limited production by one company based in Naivasha and the flowers will be exported to the USA among others. In future and depending on market needs and regulatory approvals, other production sites and markets will be explored.

Currently, the application is undergoing a science-based review process by the NBA together with relevant Regulatory Agencies and independent experts. The review process is meant to ensure that the alteration done on these flowers by the applicant will not have any adverse effects on humans and animal health or the environment.

The Biosafety Act provides that the public participates in the decision making-process through submission of comments to the Authority. It is in this spirit that we request the public to participate by submitting their comments to the Authority through the provided address. The Authority therefore, will make the final decision on the Application based on safety assessments, socio-economic considerations and comments received by the public.

If after all considerations, the Authority approves environmental release and placing on the market of the GM Gypsophila, due process governing variety testing and release for plant varieties shall apply as

per the national policy, legislation and guidelines for handling genetically modified crops in Kenya.

All interested parties and persons should submit written comments on this Application using a prescribed public comments form, to reach the undersigned not later than 14th July, 2017.

A summarized application dossier, public comments form as well as guidelines for public participation can be accessed through the Authority's website www.biosafetykenya.go.ke. The full application dossier is also available on request at the NBA offices during normal working hours in the contact address below.

Send your written comments to: The Chief Executive Officer, National Biosafety Authority, Commission for University Education Complex, Redhill Road, Off Limuru Road, P.O. Box 28251-00100, Nairobi or by e-mail: gmgypsophila@biosafetykenya.go.ke

Dated the 15th June 2017.

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Erdemann Property Limited, is proposing to develop an industrial park on plot L.R. No.12867/13 off Mombasa-Namanga Road interchange, Mavoko, Machakos County with the following components; 53 godowns, gate house, power services buildings, office block, borehole (existing), waste water treatment plant, landscaped gardens, drive ways and parking spaces and ancillary facilities.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Soil erosion and siltation	<ul style="list-style-type: none"> Site excavation works to be planned such that a section is completed and rehabilitated while another section begins. Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
Soil disturbance	<ul style="list-style-type: none"> Excavation material will be loaded into trucks and be transported to designate disposal sites and/or used to backfill/infill abandoned quarry pits to assist in their rehabilitation and after-use plans. Design and implement an appropriate landscaping program to help in re-vegetation of part of the project area after construction. Re-use of the topsoil in landscaping
Building materials waste	<ul style="list-style-type: none"> Ensure that construction materials left over at the end of construction are used in other projects rather than being disposed off. Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. Minimize waste through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. Ensure that drainage channels are reinforced to prevent damage by construction equipment. Provide waste collection bins, segregate at source and ensure NEMA licensed transporters collect the wastes for appropriate disposal. Make provisions for sanitary facilities/accommodation for workers during construction.

- Noise pollution**
- Adherence to Waste Management Regulations, 2006.
 - The construction works will entirely be planned to be during day time. No construction shall be undertaken at night.
 - Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise levels.
 - Workers operating noisy machinery should be provided with ear muffs or plugs.
 - Noise hazard signs should be put displayed where necessary.
 - Iron sheets or other suitable means should be used to reduce noise exposure to neighbours or passersby.
 - Noisy machinery should be modified or replaced with better machinery, well lubricated and serviced.
 - Construction should take shortest time possible.
 - Adherence to Noise And Excessive Vibration Pollution (Control) Regulations, 2009.
- Damage to utility cables**
- Contractor should consult council, KPLC, KPC, Telkom Kenya Limited and any other company affected on the presence of utility cables and sewer lines.
- Blockage of access roads**
- Alternative access for vehicles and pedestrians passing by the site can be arranged with the Council so that vehicles may be diverted to other roads when major works are ongoing.
 - Transportation of construction materials and construction debris to and from site should be done during weekdays, off peak hours.
- Air /dust pollution**
- Set maximum on-site speeds at 10 kilometers per hour or less.
 - Ensure strict enforcement of on-site speed limit regulations.
 - Avoid excavation works in extremely dry weather.
 - Sprinkle water on graded access routes each day to reduce dust generation by construction vehicles.
 - Provide appropriate dust screens to reduce dust exposure.
 - Provide dust masks to workers in extreme dust producing operations.
 - Use only critical number of workers to reduce exposure.
 - Maximize the use of manual- labor and hand tools.
 - Avoid spillage of loose soil to the road where it will be disturbed and blown by traffic.
 - Strict Adherence to provisions of Air Quality Regulations, 2014.
- Oil spills**
- Ensure that all transport and construction equipment are in good serviceable condition and no service is carried out on site.
 - Ensure that no fuels or oils are stored on site but procure them when needed.
- Storm-water drainage**
- Open drains adjacent to site will be used.

Security**Occupational health and safety**

- Construction of water storage tanks to collect storm water for construction purposes and gardening.
- Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premises.
- All excavations, shafts, pits or openings more than two metres deep should be covered or barred by suitable means when access is not needed.
- No materials should be stored near such excavations.
- All excavation wall over 1.2 metres deep should be reinforced with timber to prevent collapse to persons working inside.
- Supervision of such works should include collaboration with safety supervisors.
- Provide suitable PPE to all exposed workers.
- Reserve each PPE for one worker to avoid sharing.
- Provide adequate sanitary conveniences and in a clean state.
- Provide wholesome drinking and bathing water and facilities for workers.
- Minimize soil disturbance and sprinkle water regularly to reduce dust generation.
- Comply with the provisions of OSHA 2007.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF NAIVASHA-KISUMU STANDARD GAUGE RAILWAY PROJECT (PHASE 2B)

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Railways Corporation, is proposing to construct a 255 km SGR track between Naivasha and the proposed Kisumu Port. This project is phase 2B of the ongoing SGR

construction and will cut through four counties namely; Narok, Bomet, Kericho and Kisumu. The railway tracks are divided into three main categories; Broad gauge, Standard gauge and Narrow gauge ones based on the gauge differences.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Loss of vegetation	<ul style="list-style-type: none"> Retention of vegetation where possible and replanting of trees in other undisturbed areas should be applied. Minimize the destruction or damage of vegetation cover by clearing construction designated areas only. Planting of grass in the cleared way leaves and on the slopes of subgrade.
Introduction of invasive species	<ul style="list-style-type: none"> Screen the construction equipment to avoid the spread of invasive species. Undertake regular monitoring and control of emerging invasive species.
Aquatic species	<ul style="list-style-type: none"> Proposed port located away from fish breeding areas and Hippopotamus grazing zones. Fence off construction zone. Screen construction equipment to avoid the spread of invasive species. Undertake regular monitoring and control of emerging invasive species.
Increased use of local resources	<ul style="list-style-type: none"> Sources of all materials to be inspected prior to acquisition to confirm that they are legitimate operations. Application of EIA licenses before commencement of related projects along the SGR and proposed port including of quarrying activities, camps and station construction, etc. WRMA permits and EIA licenses must be obtained before water abstraction.
Noise and vibration	<ul style="list-style-type: none"> Provision of mufflers on exhausts and standard restrictions to hours of site works especially near communities. Use of ear muffs by construction workers. Utility of machinery with high noise e.g. pile drivers should be conducted at day time; Night operations (if necessary) should only include machinery with low noise emissions. Provide waste handling facilities e.g. waste bins and skips for holding waste generated at terminals and in passenger coaches. Dispose waste at licensed waste treatment sites Strict Adherence to provisions of Waste Management Regulations, 2006.
Visual impact	<ul style="list-style-type: none"> Take care to minimize destruction of vegetation. Only areas earmarked for construction activities should be cleared.
Road traffic disruption	<ul style="list-style-type: none"> Replanting should be done where vegetation is disturbed. Adoption of alternatives to the alignment and their associated above-ground structures; and refinements to the basic engineering and architectural design including layout, built structures etc. to avoid and/or minimize potential adverse impacts. Care will be taken to avoid having open trenches in an area for a long period of time. No overloading of trucks and good driving practices to be practiced. Suitable junction/access point to be provided. Use of appropriate and legible signage. Employment of formal flagmen / women in order to ensure the public safety.
