THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED TWO AND THREE BEDROOM APARTMENTS ON L R NO 2/31/3 IN KIRICHWA ROAD KILIMANI NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co ordination (Impact Assessment and Audit) Regulations 2003 the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent Kenya Power Pension Fund is proposing to develop a high rise residential property of 16 floors comprising of 288 units two and three bedroom apartments on plot L R No 2/31/3 Kirichwa Road Kilimanj Nairobi City County

The following are the anticipated impacts and proposed mitigation measures

<i>Impacts</i>	<i>Mitigation Measures</i>
General site environmental and social management	<p>Develop permit matrix (name phase requirements and lead</p> <p>Plan and give regulators advanced warning of potential problems and start of works</p> <p>Always display on site the emergency number for regulators and local community at key worksites</p> <p>Work sites will be subjected to daily walk round site inspections by the Contractors EHS management staff</p> <p>Establish a safe working environment with an occupational health and safety (OHS) plan that addresses potential hazards identifies preventive and protective measures including training and use of personal protective equipment (PPE) and describes documentation and reporting of accidents diseases and incidents</p>
Air quality management	<p>Develop a dust management plan</p> <p>Maintain a logbook record any exceptional incidents that cause dust either on or off site and the action taken to resolve the situation in the log book</p> <p>Plan site layout – machinery and dust causing activities (e.g access roads stockpiles) should be located away from the site boundary and sensitive receptors where practicable</p> <p>Consider the prevailing wind direction when siting stockpiles to reduce the likelihood of affecting sensitive receptors</p> <p>Sealing or re vegetate completed earthworks as soon as reasonably practicable after completion</p> <p>Spray water during construction</p>
Surface water management including water quality	<p>Undertake equipment and/or vehicle maintenance off site where feasible to prevent potential for releases and spills of oils/solvents/hydrocarbons</p> <p>No groundwater abstractions without prior approval/permits from authorized body</p> <p>Use of waste bins/proper waste management</p>
Noise management	<p>Identify and implement appropriate PPE requirements</p> <p>Design noise barriers or other noise attenuation into the design if necessary</p> <p>Inform nearby dwellings on the timing and duration of works and when the noisiest stages are likely to occur (ongoing through process)</p>

<i>Impacts</i>	<i>Mitigation Measures</i>
Landscape and visual impact management	<p>Switch off equipment when not in use</p> <p>Limit vehicle speeds on site and access roads particularly along the northern boundary of the site (10km per hour)</p> <p>Implement good housekeeping practices including stockpile areas and dust suppression measures</p> <p>Be careful when locating construction compounds Construct installations with sustainable materials materials to reduce the visual impact and material that enhances the aesthetics of the Project area</p> <p>Minimise external lighting</p> <p>Be careful when locating construction compounds</p> <p>Restrict the extent of all disturbed areas as far as practicable</p>
Traffic and transport management	<p>Employ safe traffic control measures including road signs and flag persons to warn of dangerous conditions</p> <p>Ensure that normal load heavy goods vehicles use a defined route which will need to be agreed on prior to Project works</p> <p>All vehicles should turn directly into the site or to a pre agreed /defined layby area of the main road</p> <p>Adopt best transport safety practices across all aspects of Project activities with the goal of preventing traffic accidents and minimizing injuries suffered by Project personnel</p> <p>Emphasize safety aspects among drivers (specific induction training for all drivers)</p>
Land contamination materials and waste management	<p>Identify waste handling facilities for the Project to accept/ treat waste</p> <p>Identify and implement appropriate PPE requirements</p> <p>Develop an emergency response plan including spill control plan</p> <p>Liquid wastes/oil/chemicals to be stored in tanks or drums located in bunded areas which can hold 110% of the total storage volume and in accordance with national safety requirements</p> <p>Implement good housekeeping and operating practices including inventory control to reduce the amount of waste resulting from materials that are out of date off specification contaminated damaged or excess to plant needs</p>
Ecological management including habitat removal and restoration and soil mitigation	<p>Use indigenous plants as much as possible for replanting programs</p> <p>Develop a reforestation plan with 10:1 reforestation ratio</p> <p>Store topsoil in dedicated sites within site boundary</p> <p>Develop a habitat removal and restoration plan (HRRP) to include revegetation replanting</p>
Occupational health and safety management	<p>Ensure all employees carry out induction health and safety training prior to commencement of work</p> <p>Provide appropriate and legally required signage and PPEs to all staff</p>

<i>Impacts</i>	<i>Mitigation Measures</i>
	Develop accident and emergency preparedness and response plan and carry out procedure training and drills with workers and local health authorities on a regular basis related to site hazards and risks
	Set up a telecommunications procedure specifying the hierarchy of who to contact in the case of an emergency

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co ordination (Impact Assessment and Audit) Regulations 2003 the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent GIZ is proposing to construct a Decentralized Treatment Facility and associated infrastructure in Kakuma for refugee and host communities on a 20 acre piece of land sited at Nayanae Ngitura village in Lonyoduk Sub location Kalobeyei Location of Oropoi/Kalobeyei Ward Turkana West Sub County Turkana County

The following are the anticipated impacts and proposed mitigation measures

<i>Impacts</i>	<i>Mitigation Measures</i>
Construction wastes generation	Landscape the area once construction is complete to incorporate as many trees as possible
	Develop a waste management plan and implement it
	Excavation should be carried out such that drainage is controlled and water is not allowed to accumulate
	Establish controls for surface runoff during excavation
	Control excavation activities to limit excavation to land which is required for

<i>Impacts</i>	<i>Mitigation Measures</i>
	construction
	Cordoning the site off using iron sheets or other appropriate materials to protect passersby and control noise
	Control any likelihood of occurrence of risks
Noise and dust	Water sprinkling and use of screens to control dust
	Maintenance of equipment for efficiency minimizing noise production emissions and spills
	Cordoning the site off
Soil degradation and surface water pollution	Develop a solid waste management plan prior to project
	commencing identifying optimal waste re use options and licensed disposal areas
	Waste should not be burned on site or dumped in undesignated waste disposal areas
	Minimise waste production by utilizing best available techniques for site preparation
	Re use construction waste to the maximum extent possible
	Excavation activities and dumping of spoil should be properly managed such that land which is not required for the project is left undisturbed
Loss of vegetation cover soil erosion	Areas with exposed soil should be replanted with grass as soon as possible after construction to help mitigate against flash flood caused soil erosion
	Waste generated during the site clearance/construction phases of the project must be disposed of at an approved disposal site (County dump site)
	Suitable trees should be planted at the periphery of project site and near the River bank
	No unnecessary removal of any vegetation shall be done
Occupation health and safety	Carefully plan for construction sanitary facilities
	Provide personal protective equipment (PPE) appropriate to working area for staff and visitors to the site
	Regular site reporting on health safety and environment (HSE) issues by an appointed HSE representative
	Develop a monitoring programme to assess noise performance in accordance with the revised Noise Prevention and Control Rules (April 2005) and NEMA Noise Control Regulations 2009
	Assessment of HSE mitigation measures and recording of any matters arising as per Legal Notice No 40 The Factories (Building Operations and Works of Engineering Construction) Rules
	A lead person should be identified and appointed to be responsible for emergencies occurring on the site This person should be clearly identified to the construction workers

<i>Impacts</i>	<i>Mitigation Measures</i>
	Make prior arrangements with health care facilities such as a Health Centre in proximity a private doctor or the Provincial Hospital to accommodate any eventualities
	Material Safety Data Sheets (MSDS) should be store onsite
Soil loss and sedimentation of the local stream	Minimize vegetation disturbance Reinstate site immediately after construction Put bunds to prevent soil and any material from getting to the local stream
Interference with traffic flow including pedestrians	Adequate and appropriate road signs should be erected to warn road users of the construction activities For example reduced speed near the entrance roads This should be done in conjunction with the Ministry of Transport Raw materials such as sand murram and cement should be adequately covered within the trucks to prevent any escaping into the air and along the route to the site The movement of equipment (trucks) during the construction of the system should be limited to the working hours 8 00 a m – 5 00 p m per day Equipment should be transported early morning (6 a m – 7 a.m) with proper care being taken The use of flagmen should be employed to regulate when trucks have access to the main roads
Obstruction caused by laying of sewer lines to persons and vehicles	The laying of sewer pipes across any access road should be done when traffic volumes are lowest for example early morning or on weekends (specifically on Saturdays and Sunday) Adequate notices should be placed along the route Adequate signs and flagmen should be put in place

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co ordination (Impact Assessment and Audit) Regulations 2003 the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent Kenya Conference of Catholic Bishops proposes to develop a total of 1164 Units of hostels (81No Quads units 334No Triplex units 100No Single units 532No Suite units 118No Executive units) waste water treatment plant associated facilities and amenities on Plot L R No 24832/4 off Lang ata Road along Seminary Road Karen in Nairobi City County

The following are the anticipated impacts and proposed mitigation measures

Possible Impacts Mitigation measures

CONSTRUCTION PHASE

Solid waste generation Through accurate estimation of the sizes and quantities of materials required order materials in the sizes and quantities they will be needed rather than cutting them to size or having large quantities of residual materials

Ensure that construction leftovers at the end of construction will be used in other projects rather than being disposed off

Ensure that damaged materials including cabinets doors plumbing and lighting fixtures marbles and glass will be recovered for refurbishing and use in other projects

Donate recyclable/reusable or residual materials to local community groups institutions and individual local residents or home owners

Use of durable long lasting materials that will not need to be replaced as often thereby reducing the amount of construction waste generated over time

Provide facilities for proper storage of construction materials to reduce the amount that is damaged

Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste

Use construction materials containing recycled content when possible and in accordance with accepted standards

Reuse packaging materials such as cartons cement bags empty metal and plastic containers to reduce waste at the site

Dispose waste more responsibly by dumping at designated dumping sites or landfills only and ensure that only registered firms are contracted to dispose of

Air pollution

Ensure strict enforcement of on site speed limit regulations

Avoid excavation activities in dry windy conditions

Avoid excavation works in extremely dry weather

Construct a hoarding fence around the proposed project site to ensure no dust is emitted from the site

<i>Possible Impacts</i>	<i>Mitigation measures</i>	<i>Possible Impacts</i>	<i>Mitigation measures</i>
	<p>Provide a side netting for the upper floors to ensure that no dust is carried away</p> <p>Ensure proper planning of transportation of raw materials to ensure less trips are made to the construction site</p> <p>Ensure that workers at the construction site are provided with the necessary protective gear such as face masks to avoid inhaling the dust adequately protected from inhalation of dust</p> <p>Ensure that construction workers are provided with an adequate supply of wholesome drinking water which should be maintained at suitable and accessible points</p>		<p>reaching the ground The areas shall be covered to avoid storm from carrying away spilled oils into the soil/water systems</p> <p>Routine inspection and regular maintenance of all machinery shall be done to avoid any oil leaks to the project site</p> <p>Proper disposal of oil handling materials such as drums oily materials and cans at designated areas</p> <p>All drainage facilities shall be fitted with adequate functional oil water separators and silt traps</p>
Noise pollution	<p>Ensure that all the construction activities are limited to between 8am and 5pm to avoid any disturbance to the neighbouring residents</p> <p>Provide workers in areas with elevated noise and vibration levels with suitable ear protection equipment such as ear muffs</p> <p>Suitable overalls safety footwear dust masks gas masks respirators gloves ear protection equipment etc should be made available and construction personnel must be trained to use the equipment</p> <p>Provide workers in areas with elevated noise and vibration levels with suitable ear protection equipment such as ear muffs</p> <p>Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels</p>	Employee health and safety	<p>Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency</p> <p>Such procedures must be tested at regular intervals</p> <p>Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent and serious danger to health and safety and to evacuate workers</p> <p>Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site</p> <p>Provide measures to deal with emergencies and accidents including adequate first aid arrangements</p> <p>Well stocked first aid box which is easily available and accessible should be provided within the premises</p> <p>Firefighting equipment such as portable fire extinguishers must be provided at strategic locations within the construction area</p> <p>Regular inspection and servicing of the equipment must be undertaken by a reputable service provider and records of such inspections maintained</p>
Eco system disturbance	<p>Identification of rare plant species and conservation of same</p> <p>Preserve during construction and replanting of trees and grasses on completion of construction</p> <p>If necessary protect any available ecosystem to avoid any pollution which might endanger the animals within them</p>		<p>Provide workers in areas with elevated noise and vibration levels with suitable ear protection equipment such as ear muffs</p> <p>Suitable protective gear such as overalls safety footwear dust masks gas masks respirators gloves ear protection equipment etc should be made available to all employees on site and train them on how to use them and ensure they are worn while on site</p>
Waste generation	<p>The proponent should retain the existing sanitary facilities to be used by the construction employees while construction activities are ongoing and demolish them once they are done</p> <p>Ensure the facilities are cleaned on a daily basis and effluent properly managed</p>		
Increased Traffic congestion	<p>Ferry building materials during off peak hours</p> <p>Employ traffic marshals to control traffic in and out of site</p> <p>Provide billboards at the site/entrance to notify motorists and the general public about the proposed project</p> <p>Enforce speed limits for construction vehicles especially along the roads leading to the site</p> <p>Develop a traffic management plan to ensure that the site vehicles do not interfere with the regular traffic along the access roads</p> <p>Ensure that the vehicles comply with axle load limits</p> <p>Employ well trained and experienced drivers</p>		
Oil pollution	<p>Maintenance shall be carried out in a well designed and protected area and where oils/grease is completely restrained from</p>		
			OPERATION PHASE
		Solid waste generation	<p>Ensure that the constructed solid waste handling cubicle at the ground floor is properly maintained and cleaned</p> <p>Ensure that all the solid waste generated at the proposed project is regularly disposed of appropriately at authorized dumping sites if possible twice a week</p> <p>Ensure that only registered solid waste handling companies are contracted to collect all the solid waste from the project for disposal</p> <p>Encourage the tenants to reduce the amount of solid waste generated from their individual houses</p>
		Waste water management	<p>Ensure that the constructed waste water treatment plant is properly maintained and</p>

<i>Possible Impacts</i>	<i>Mitigation measures</i>
	regularly checked to ensure it is working as intended
	<ul style="list-style-type: none"> Conduct regular inspections for the waste water pipes for any blockages or damages and if detected fix them appropriately Ensure that all the recycled water from the waste water treatment plant is properly tested before reusing it within the proposed site
Energy consumption	Switch off electrical appliances and lights when not being used
	Install occupation sensing lighting at various locations such as security lighting across the site which goes off automatically once they sense natural light
	Encourage tenants to use energy saving lighting bulbs in their individual houses to help reduce the amount of electricity used at the proposed project
	Monitor energy use during the operation of the project and set targets for efficient energy use
	<ul style="list-style-type: none"> Install solar panels at the proposed development to provide alternative energy
Water use within the proposed development	<ul style="list-style-type: none"> Promptly detect and repair of water pipe and tank leaks Ensure that all the waste water in recycled and reused within the development Ensure taps are not running when not in use Install water conserving taps that turn off automatically when water is not being used Install a discharge meter at water outlets to determine and monitor total water usage

DECOMMISSION PHASE

Solid waste generation	<p>All building machinery equipment structures and partitions that will not be used for other purposes must be removed and recycled/reused as far as possible</p> <p>All foundations must be removed and recycled reused or disposed of at a licensed disposal site</p> <p>Where recycling/reuse of the machinery equipment implements structures partitions and other demolition waste is not possible the materials should take to a licensed waste disposal site</p> <p>Donate reusable demolition waste to charitable organizations individuals and institutions</p>

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MTWAPA SLUDGE HANDLING FACILITY ON PLOT NUMBER KILIFI/MTWAPA/508 KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co ordination (Impact Assessment and Audit) Regulations 2003 the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent Kilifi Water and Sewerage Company Limited is proposing to install a sludge handling facility for waste water treatment Kizingitini Area on Plot No Kilifi/Mtwapa/508 at the outskirts of Mtwapa Town within Kilifi South Sub county in Kilifi County

The following are the anticipated impacts and proposed mitigation measures

<i>Environmental/ Social Impact</i>	<i>Proposed Mitigation Measures</i>
Air emissions	<p>Decreasing the number of trips carried out by the vehicles will minimize air pollution</p> <p>Vehicles to be used during the construction phase are to be kept in good working condition and should not be the source of excessive fumes</p>
Noise pollution	<p>Road traffic movements shall be scheduled to normal working hours (0800 Hrs -1700Hrs)</p> <p>All equipment and vehicles on the site should be equipped with noise suppressing measures and kept in proper working order</p> <p>Delivery of materials in bulk to avoid repetitive movements of delivery vehicles will be encouraged</p> <p>Silencers on equipment such as generators will be properly designed</p> <p>Temporary noise pollution due to construction works will be controlled by proper maintenance of equipment and vehicles and tuning of engines and mufflers</p> <p>Noise problems during operation phase shall be reduced to normally acceptable levels by incorporating low noise equipment in the design and/or locating such mechanical equipment in properly acoustically lined buildings or enclosures</p>
Dust Pollution	<p>Dust and air pollution due to dust when excavated material is stock piled should be limited by means of wetting (particularly dry season) covering with foil or working in small sections so that the trenches are backfilled with excavated soil within shortest possible period (maximum 2 3 days)</p> <p>Settled areas within project access routes will be identified and maximum speeds of project vehicles will be established within these areas</p> <p>Speed limit of 15km per hour will be posted and enforced to reduce airborne fugitive dust caused by vehicular traffic</p> <p>Construction materials will be delivered in bulk to avoid repetitive movements of delivery vehicles</p>

<i>Environmental/ Social Impact</i>	<i>Proposed Mitigation Measures</i>
	Construction materials and stockpiled soils will be covered if they are a source of fugitive dust
	Transportation of materials will be done in such a manner that they do not fly or fall off the vehicle by covering or wetting friable materials
Surface and ground water contamination from wastewater and sludge	Effluent /wastewater quality will be tested on a regular basis to ensure that its characteristics are within the set standards Set out in the third schedule of Water Quality Regulations 2006
	Proper measures will be taken to avoid accidental surface runoff intrusion from the manholes of the sewerage network which can overburden the plant and cause discharge of partially treated wastewater from the wetland
	Trucks ferrying the sludge to disposal sites should be well maintained to avoid discharging of the waste materials along the way to the site
	Proper handling and drying of sludge will be done in drying beds during dry season
	With continuous sampling and laboratory tests the performance of the DTF will be optimized
	The greasy material from the grease trap will be regularly removed and stored in proper barrels and then collected and appropriately disposed with the municipal solid waste
Odors as a result of mismanagement of solid wastes	The greasy material from the grease and sand trap will be regularly removed and stored in proper barrels and then collected and disposed of with the municipal solid waste
	The staff of the plant will be properly trained to enable them to handle grease and sand removal and taking samples for lab testing
	Produced residuals will be stored in closed containers and transported in enclosed container trucks to landfill site
	Aeration tanks will always be kept at an optimum aeration rate
	Proper landscape around the facility will be done to serve as a natural windbreaker and minimize potential odour dispersions if present
	Odours will be reduced or prevented through normal housekeeping and improved operation and maintenance design procedures
	Sludge transfer systems such as conveyors screw pumps and conduits will be kept clean in order not to generate odours
	Regular cleaning of aeration tank walls and floors washing weirs and removing scum regularly will be done to help in odour reduction
	Where odour emissions could lead to complaints the provision of covers to the odour sources will be considered especially for sludge holding tanks and sludge dewatering systems
	Flow regulating chambers drainage valves standby pumps as well as electric standby generators shall be provided to reduce the possibility of wastewater flooding within the wastewater treatment plant site which results in possible generation of obnoxious smell
	The presence of multiple aeration basins in the plant also reduces overflowing problems

<i>Environmental/ Social Impact</i>	<i>Proposed Mitigation Measures</i>
	The current solid waste facility shall be relocated to an ideal location
	When odour becomes an evident public nuisance synthetic windbreakers (e.g walls) shall be employed to maintain odour nuisance within each site
Impacts on water	In general the DTF systems produce a highly treated and well nitrified effluent that typically meets the required effluent quality standards Disinfection with chlorine will further suppress bacterial population in the discharged effluent Thus the proposed facilities discharge effluent quality is expected to meet the Minimum Standards contained in Water Quality Regulations 2006
	The implementation of training recommendations maintenance plans and process and effluent monitoring programs will be mandatory
	<ul style="list-style-type: none"> Sufficient instrumentation and standby equipment (blowers pumps and electric generators) shall be provided to ensure an uninterrupted and controlled operation thus avoid inefficient process performance
	To attain the expected safe effluent discharge skilled and trained operator will be available for proper process loading optimization control and thus performance
	Continuous sampling and laboratory tests will ensure that the performance of the DTF will be optimized
	The greasy material from the grease trap will be regularly removed and stored in proper barrels and then collected and disposed with the municipal solid waste
Impacts on soil	Periodic tests will be done to assure the quality of effluent wastewater to avoid partially treated wastewater to reach the soils
	Effluent will be appropriately disposed of by ensuring that they meet the required standard prior to discharge taking place
	Effluent quality will be monitored on a continuous basis to avoid partially treated wastewater reaching the soils
	Excavated soil will be utilized for landscaping and then tree planting purposes
Impact on Flora	To avoid loss of biodiversity proper management of DTF outputs will be done
	Limits of construction zones will be identified and marked and all activity will be kept within marked boundaries
	When detected sensitive species or habitats shall be conserved
Impacts on the fauna	Tree planting will be done to maintain habitats for avifauna
	No snaring or hunting will be allowed on or around the site
	Contact details for someone who can be called if catching and relocation of snakes spiders or other unwanted species is needed will be kept at the site
	Labourers will be educated as to the importance of not simply killing all snakes and other fauna that is perceived as dangerous

<i>Environmental/ Social Impact</i>	<i>Proposed Mitigation Measures</i>
Health and safety impacts	<p>The Contractor shall conform to all the stipulations of the Occupational Health and Safety Act 2007. The Act requires the designation of a Health and Safety representative when more than 20 employees are employed.</p> <p>The contractor shall provide ample warning signs, guard rails, warning tape, etc., around open excavations, stacks of material, debris, etc., and shall be held liable for all claims as a result of neglect of such precautions and provisions.</p> <p>Proper access control shall be enforced to ensure that no unauthorised persons enter the site.</p> <p>Material delivery vehicles shall be under the control of competent personnel. It will be ensured that persons handling equipment and materials are suitably trained, supervised, and adequately instructed.</p> <p>Railing will be installed around all process tanks and pits. The use of a life line will be required, and personal flotation device (PFD) when workers are inside the railing, and it will be ensured that rescue buoys and throw bags are readily available.</p> <p>A confined spaces entry program that is consistent with applicable national requirements and internationally accepted standards will be implemented.</p>

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED STEEL MINI - MILL FOR STEEL
PRODUCTS MANUFACTURING FROM MOLTEN SCRAP
METAL ON PLOT L.R. NO LARI/KIRENGA/1414 AND 1415
LARI SUB COUNTY, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Park Steel Mill Limited proposes to develop a Steel Mini - Mill for Steel Products Manufacturing from Molten Scrap Metal on Plot L.R. No Lari/Kirenga/1414 and 1415 Lari Sub County, Kiambu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Air quality	<p>Use of an automated air control system for cleaning of the flue gas using a wet scrubber (water vacuum technology) and centrifugal cyclone (Bag house). The system is efficient and effective in the removal of particulate matter and dust as sludge.</p> <p>Secure the entire construction site with appropriate dust screens to trap fine dust particles.</p> <p>Sprinkle water to arrest fugitive dust.</p> <p>Provide all construction staff with appropriate personal protective equipment (PPEs) such as dust masks, overalls, helmet, dust coats, safety boots, and goggles.</p> <p>Ensure all construction workers make proper use of the PPEs provided.</p> <p>Periodically monitor air quality levels at the construction site by measuring local particulate matter.</p>
Traffic management	<p>Develop and implement a traffic marshal plan for the construction site.</p> <p>Provide sufficient parking/holding area for traffic.</p>
Energy consumption	<p>Ensure no flicker and harmonic distortion electricity supply within the local surrounding area common power system side effects of arc furnace operation.</p> <p>Maximizing of operations during the off peak hours when there is abundant power supply.</p>
Increased competition for water in the area	<p>Explore alternative sources of water that can be used such as roof catchment, rock catchment, and collection from neighboring quarry pits to minimize drawing water from local pipeline for industrial use.</p> <p>Provide adequate water storage tanks on site to store water from roof catchment from the extensive roofs of the Godowns during rainy season that can be used in cooling of plant and equipment.</p> <p>Minimize water demand by ensuring used water from the cooling circuit is routed through an adequately sized and effective cooling tower and pressure filter to filter the water for recycling purpose.</p>
Ecological sensitive ecosystem	<p>Observation of the 60 M riparian reserve within the Lari swamp.</p> <p>Ensuring no any basic slag, refractory waste, mill scale, dust, sludge, or industrial oil spillages find their way to the swamp.</p>
Noise pollution	<p>Increased noise and vibration mostly during steel production processes like tilting of the induction furnace, steel rolling, storage, and dispatch of steel rods.</p> <p>Control vehicular movement within and outside the plant.</p>

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	Develop and implement a comprehensive noise conservation programme that includes training equipment maintenance engineering controls use of PPEs noise measurements among others
	Ensure the construction site is secured by appropriate noise attenuators
	Provide all construction staff with appropriate noise preventions PPEs such as ear plugs and ear mufflers
	Enforce proper use of the provided noise protective PPEs by all workers
	Ensure equipment used are well maintained and serviceable
Waste management	Proper management of the solid waste produced like coke and coal dust BF slag SMS slag mill scale scrap oil sludge fly ash acid sludge refractory wastes through recycling and safe disposal of unrecyclable material
	Embrace Cleaner Production technologies (CP) and Life Cycle Assessment (LCA)
	Ensure all waste generated at the construction site is managed and disposed as per the provisions of the Environmental Management and Coordination (Waste Management) Regulations 2006
	Provide appropriate receptacles for dropping waste
	Ensure only NEMA licensed vehicles collect waste from the construct on site
	Management to try to minimize waste generation by practicing the principles of refusing to generate waste reducing waste generation reusing generated waste recycling generated waste and reusing and or recycling most of generated waste
Occupational health safety	Provision of PPE to the workers
	Training of staff on fire safety
	Provision of signage all over the plant
	Regular medical checkup of the staff
	Develop an Environmental Health and Safety policy
Waste water management	Utilization of septic tank for both black and grey water
	Provide appropriate containment structures around all IDO and furnace oil storage tanks to collect any spills
	Provide for oil spill absorbents for quick absorption of any accidental spills
Social economic	Enhance awareness among the staff and locals against HIV Aids due to opening of the area economically
	Enhance security within the facility and local surrounding
	Capacity development and empowerment of the locals as part of corporate social development in diversification from depending only on agricultural and livestock farming activities
	Provision of Employment to the locals
