THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MWACHE TRUNK MAIN AND SOUTH MAINLAND WATER, KWALE COUNTY.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proposed trunk section of the Mwache Water Transmission pipelines covers the 5.1km long pipeline section from the WTP to the west main land reservoir located within Kasemeni Location of Kinango Sub-county in Kwale County. The start point elevation of the Trunk Main at the WTP is 115 msl, which is the adopted clear water tank outlet level. From the WTP, the Mwache Tank main traverses south-east, through undeveloped land and small scale cultivated lands to the Mwache Forest. Within the Mwache Forest, the trunk main is proposed to be laid between the newly constructed Standard Gauge Railway (SGR) and the Mwache River. The section of the trunk main within the forest is approximately 1.7km in length. This section of the trunk main has a high cross-fall slope between the SGR and the Mwache River.

The South Mainland Transmission Main (Kaya Bombo Pipeline) which is 27.7km of a single DN 1000 Pipeline branches off from the Mwache trunk main at Ch. 2+900 of the Trunk Main and traverses in the S.W direction, through the Mwache Forest to the Mwache Creek. The Pipeline section within the Mwache Forest is approx. 1.9km from Ch. 0+740 to Ch. 2+640 where it crosses the Mwache Creek. The transmission line traverses Kasemeni and Gandini locations in Kinango Sub-County and N'gombeni Location of Matuga Sub-County in Kwale County.

The proposed Mwache creek crossing is approx. 450m upstream of the existing Marere Pipeline Bridge Crossing. The length of the crossing from the high tide level on the LHS bank to the high tide level on the RHS bank is approx. 400m. Upon crossing the creek, the pipeline on the RHS bank turns S.E. along the shoreline for approx. 470m before turning south to the alignment of the existing DN 500 Marere Pipeline at Ch. 3+200.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>	<i>Possible Impacts</i>	<i>Mitigation Measures</i>

Impacts on soil resources	- Vegetation clearing and topsoil disturbance will be minimized. - Sheet and rill erosion of soil shall be prevented where necessary through the use of sand bags, diversion berms, culverts, or other physical means. - Topsoil shall be stockpiled separate from subsoil. Stockpiles shall not exceed 2m height, shall be located away from drainage lines, shall be protected from rain and wind erosion, and shall not be contaminated. - Accelerated erosion from storm events during construction shall be minimized through managing storm water runoff (e.g., velocity control measures). - Soil backfilled into excavations shall be replaced in the order of removal in order to preserve the soil profile. - Prepare Specific Construction Environment and Social Management Plan (C-ESMP) which will include among other Soil and Sedimentation Control Plan, Spoil Management Control Plan and Waste Management Plan. If being re-used, cover or vegetate if possible. - Impose speed limits on haul routes and in construction compounds to reduce dust generation. - Undertake watering to attenuate dust near sensitive receptors.	Community health safety and security impacts	- Contractor will develop and monitor the implementation of a Community Health and Safety Management Plan (CHSMP). - Contractor will develop Emergency Response Plans (ERPs) in cooperation with local emergency authorities and hospitals. - Contractor will extend the Worker Code of Conduct to include guidelines on worker – community interactions and will provide training on the worker code of conduct to all employees including drivers as part of the induction process. - Contractor will provide primary health care and first aid at construction office sites. - Contractor will implement a Community Grievance Mechanism.
