THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED EXPORT PROCESSING ZONE TEA
WAREHOUSES ON PLOT L.R. NO. 29437/34 IN BONJE, KWALE
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Coordination Act, 1999, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Wilson Smithett (EPZ) Limited proposes to construct 2 No. interconnected warehouse complexes (EPZ 1 comprising of raw material warehouse, packaging material warehouse, finished product warehouse, finished product warehouse, blending/compiling area, engineering store, power utility area, supervision offices, cold storage, palletizing area, flavour blending and EPZ 2 comprising of raw material warehouse, packaging material warehouse, finished product warehouse, finished product warehouse, blending/compiling area, workshop, compressor room, canteen), a 3No. Storey office block, boundary wall, associated facilities and amenities and on a 7.73 acre industrial plot at Colfax industrial park on Plot L.R. No. 29437/34 in Bonje, Kwale County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

Construction waste	<ul style="list-style-type: none"> • Avoid overloading trucks and cover trucks to minimize dust and loss of load from trucks during transportation. • For aggregate and sand, use water sprays or covered chutes to reduce dust emission during loading and unloading of materials from barges. • Maintain mixing plants in good working condition to reduce emissions from the plant. • As far as possible, plan truck trips to material sources and to the sites during low-traffic hours. • Implement safety procedures to reduce the potential for road accidents. • Construction waste is not to enter the biophysical or socio-economic environment. • Contractors to have waste management plans to mitigate potential impacts.
Noise and vibration pollution	<ul style="list-style-type: none"> • Schedule noisy activities during the normal working hours of between 8 a.m. to 5 p.m. • No work should be undertaken at night or very early in the morning. • Switch off idle machines and equipment. • Ensure machinery is well serviced to reduce the noise emitted. • The contractor should adhere to the provision in the Environmental Management and Co-ordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009. • Provide workers with appropriate PPEs when working in noisy environments.
Air pollution	<ul style="list-style-type: none"> • Practice dust management techniques, including watering and spraying to suppress dust. • Move earth and sand in covered vehicles/transport to avoid it being blown by wind increasing suspended particulate matter in the atmosphere. • All power plants are to be of good condition with acceptable smoke emissions. • Set up dust barriers/screens at strategic locations. • Provide and enforce the use of Personal Protective Equipment (PPE) for staff.

Environmental Impacts Mitigation Measures

Water shortages	<ul style="list-style-type: none"> • The contractor should sensitize construction workers on the importance of proper water management. Replace or repair leaking pipes supplying water to the construction sites to minimize wastage. • The Contractor should ensure the provision of adequate water storage facilities on the construction site to meet project needs during periods of high demand externally and refill storage tanks during periods of low demand.
Pollution/contamination of ground and surface water	<ul style="list-style-type: none"> • No mixing of concrete to occur on exposed /bare ground. Concrete mixing should be done on a bounded surface to avoid soil pollution and contaminating the ground and surface water. • Appropriate containment structures are to be provided to store contaminated water from the construction site. The contractor should ensure this water are properly disposed of and not allowed to be drained on site. • The concrete batching area should be bounded to prevent contamination of soils and surface water features. • All fuel storage to be appropriately banded and provided with a canopy; and • Ablutions for construction workers to enable proper disposal of faecal matter and avoid contamination of surface water features which could be a cause of waterborne diseases.
Generation of storm water	<ul style="list-style-type: none"> • Leakages if any shall be attended to immediately. • Storm water at the site to be managed properly. • Provide adequate drainage system such as designated storm water drains to discharge the surface water to industrial drainage system for discharging the wastewater and storm/surface water to avoid clogging. • Regular maintenance of the drainage. • Regular cleaning and checking. • Sheds to be provided to avoid mixing of storm water with any spilled material.
Transportation and traffic disruption	<ul style="list-style-type: none"> • The vehicles used for transporting materials/products shall follow the applicable guidelines given in The Motor Vehicles Act. • Trained transporters to be engaged for transport of raw materials/products, spill control and other emergency actions. • Avoiding of horn when not necessary. • Vehicular movement only during day time should be ensured. • Transportation by covered vehicles will be ensured. • Regular maintenance and optimum use of the vehicles will be ensured. • Record maintenance of material. • Optimization in raw material consumption.

Environmental Impacts Mitigation Measures

- Public risk and safety
- Firefighting equipment/system and extinguishers will be installed as per the requirement of the fire risk in all plants/sections/ departments.
 - To minimize the adverse health effects all necessary/suitable personal protective equipment will be provided for working personnel.
 - All suggested/proposed pollution control devices/measures should be installed and operated/maintained properly on a regular basis.
 - The proponent will be committed towards the Health and Safety of workers.
 - Drinking water supply for the employees to be provided.
 - Proper sanitary facilities will be made available by the proponent.
 - Periodical training programme to inform the employees about their task, associated risk, and safe –working practices will be undertaken including information on accident prevention, proper control and maintenance of equipment and safe material handling practices.
- Increased waste water
- Management to ensure proper handling of the spillages during transfer operation.
 - Training to be imparted to workers.
 - The spillages, if any, during handling to be attended immediately.
 - Besides, the management will also ensure proper usage of the Personnel Protective Equipment by the workers during handling of wastewater.
 - Proper ventilation to be provided in storage area to prevent the bad odors.

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126–00100, Nairobi.

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED FOUR-STAR RADISSON AIRPORT
HOTEL ON PLOT L.R. NO. 9042/300 WITHIN JOMO KENYATTA
INTERNATIONAL AIRPORT, OFF MOMBASA ROAD, NAIROBI
CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Coordination Act, 1999, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Esiway Investments Limited intends to develop a Four-Star Airport Hotel that will be referred to as Radisson Hotel. The proposed development will be a 5-storey building comprising of 233 No.guest rooms. Other support facilities include; basement car parking, lobby lounge and bar, retail shop, restaurant and bar, meeting and boardrooms, conference rooms, gym, spa treatment rooms, indoor and outdoor kids club, courtyard and swimming pool. The proposed project site is located on plot L.R. No. 9042/300 within Jomo Kenyatta International Airport, Embakasi Sub-County, Nairobi City County and within G.P.S co-ordinates 1°20'23.8"S 36°54'48.7"E; 1°20'22.8"S 36°54'50.4"E and 1°20'26.1"S 36°54'50.2"E..

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Soil erosion	<ul style="list-style-type: none"> • Control earthworks. • Install drainage structures to control flow of storm water. • Ensure and management of excavation activities.
Loss of vegetation	<ul style="list-style-type: none"> • Only area earmarked for development should be cleared. • Plant trees, shrubs and flowers on remaining open spaces.
Interference with storm water drainage systems and surface hydrology	<ul style="list-style-type: none"> • The drainage system should ensure that surface flow is drained suitably into the public drains to control flooding within the site. • Adopt Green roofing Practices that capture and store rainfall in an engineered growing media that is designed to support plant growth. • Implementation of roof water harvesting which can be combined with a secondary (down-gradient) storm water practice to enhance storm water retention and/or provide treatment of overflow from the rainwater harvesting system. • Provide water storage tanks to collect storm water for cleaning uses. • Adopt permeable pavement systems that capture and temporarily store the Storm water Retention Volume by filtering runoff through voids in the pavement surface into an underlying stone reservoir. • Existing trees can be preserved, or new trees can be planted to reduce storm water runoff.

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>	<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> The drainage channels should be installed in all areas that are expected to generate or receive surface water such as car parking, driveways and along the building block-edges of the roofs. The channels should be covered with gratings or other suitable and approved materials to prevent occurrence of accidents and entry dirt that would compromise flow of run-off. During the rainy seasons, vigilant drainage monitoring will be crucial to prevent blockages and potential property. Proper waste management especially the excavated material to prevent drainage blockages. 		<ul style="list-style-type: none"> Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition safety education and training shall be emphasized. Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used do comply with safety and health standards and be appropriately installed maintained and safeguarded. Ensure that equipment and work tasks are adapted to fit workers and their ability including protection against mental strain. The area around which elevated work is taking place should be barricaded to prevent unauthorized access. Working under personnel on elevated structures should be avoided.
Air pollution	<ul style="list-style-type: none"> Erection of dust screens around the construction site. Dust control measures should be adopted by providing adequate PPE to staffs, canopying loading points and erecting dust screens around the plant. Regular Sprinkling of water on dry and dusty surfaces regularly including the access road. Comply with personal protective clothing requirement for dusty areas such as dust masks and protective glasses. Slowing the speed of traffic by using clearly marked road signs may contribute to reducing dust levels. Covering heaps and berms of soil. Regular and prompt maintenance of construction machinery and equipment to minimize generation of hazardous gases. Monitor the air pollution levels regularly as per the provisions of the Environmental Management and Co-ordination (Air Quality) Regulations, 2014. 		<ul style="list-style-type: none"> All machines and other moving parts of equipment must be enclosed or guarded to protect all workers from injury. Arrangements must be in place to train and supervise inexperienced workers regarding construction machinery use and other procedures/operations. Equipment such as fire extinguishers must be examined by a government authorized person. The equipment may only be used if a certificate of examination has been issued. All floors, steps, stairs and passages of the premises must be of sound construction and properly maintained. Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency. Such procedures must be tested at regular intervals. Provide measures to deal with emergencies and accidents including adequate first aid arrangements. Provision must be made for persons to be trained in first aid, with a certificate issued. Provision of a First aid room with a full-time nurse to attend to any injuries on site. Appoint a trained health and safety team for the duration of the construction work. Provide workers with adequate and appropriate PPEs.
Noise pollution	<ul style="list-style-type: none"> Ensure sound insulation technologies are employed during the construction phase work effectively towards minimizing high noise levels from external environment in the vicinity. Using equipment with low noise ratings or noise reduction technologies such as silencers for the generators. Erecting signs and notifying other users of noisy activities. Conducting all noisy activities during the day when permissible levels are higher. Provision of PPEs such as ear plugs for employees working in noisy conditions or with noisy equipment. 		
Public health, occupational health and safety	<ul style="list-style-type: none"> Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the Directorate of Occupational Safety and Health (DOSHS) are in place. Training of workers on construction safety, including but not limited to; work at heights, ergonomics, chemical safety, occupational first aid, fire safety, machine safety, transport safety, use of high-visibility safety apparel and emergency management. 	Traffic disruption	<ul style="list-style-type: none"> Minimize the haulage and transportation of construction of materials during peak hours. Adopt a Traffic Management Plan and Delivery Management plan to enhance the traffic movement within the site and along the first freight lane. Ensure Installation and maintenance of all construction signs, signals, markings, and other devices used to regulate traffic at strategic locations. Employ traffic marshals to control the movement of vehicles during the construction phase of the project. Heavy Commercial Vehicles (HCVs) delivering construction materials should observe designated speed limits for the area.

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • Ensure the construction doesn't occupy the road reserves and complies with traffic and land demarcation obligations. • Ensure provision of adequate parking spaces for the vehicles transporting workers and heavy trucks offloading the construction materials. • Construct acceleration and deceleration lanes to channel delivery trucks to the site without creating a backlog of traffic behind them as they navigate turns of entry. • Selection of construction areas should be based on the existing road layout and the location of access to the various commercial and residential properties. • Any change in the normal programming of activities that will significantly disrupt normalcy along the abutting project roads should be timely communicated.
Insecurity	<ul style="list-style-type: none"> • Provision of security guards, CCTV cameras, security lights and other security apparatus during the entire project cycle. • Construction work timings shall only in line with the NEMA licensing conditions.
Increased water usage	<ul style="list-style-type: none"> • An alternative water source shall be provided. The proponent shall drill a borehole at the proposed site. • Management of water usage. Avoid unnecessary wastage. • Recycling of water at the construction phase where possible. • Make use of roof catchments to provide water i.e. for general purpose.
Increased waste generation	<ul style="list-style-type: none"> • Provide mechanisms to segregate wastes at source to enable recycling. • Engage a NEMA licensed waste handling firm to collect solid wastes on regular basis and dispose of in approved dumping sites. • Use of an Integrated Solid Waste Management System (ISWMS); through a hierarchy of options including source reduction, recycling, composting and reuse. • Develop and implement a Solid Waste Management Plan before start of the project. • Composting of vegetation waste for reuse as a landscaping fertilizer. • Provide a central waste receptacle. • Efficient use of building material to reduce waste and recycle/reuse where feasible. • Management of all paint materials suspected or confirmed of containing lead as a hazardous waste. • Comply with provisions of the Environmental Management and Co-ordination, Waste Management Regulations, 2006.

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.

The proponent, Africa Union (Inter-African Bureau for Animal Resources) proposes to establish an office block comprising of (a ground floor, upper ground floor, 1st -5th floor and an office roof terrace), conference building with (ground floor, upper ground floor, first and second floor), hostel suits (lower ground floor 01 and 02, ground floor, upper ground floor, 1st to 4th floor), and gate house (upper ground floor and the ground floor), parking spaces, water borehole, high speed lifts, playground, associated amenities and facilities on plot L.R. No. 22375/8 along Kapenguria Road in Loresho Sub-Location, Kitisuru Location, Westlands Sub- County, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> • Install dust screens around the construction site. • Use of low-sulphur diesel for diesel-operated machinery. • Prohibition of burning of waste onsite. • Sensitise truck drivers to avoid unnecessary racing of vehicle engines. • All vehicles and plant shall be regularly serviced in accordance with the manufacturer's recommendations. • Sprinkle water on loose surfaces and materials as appropriate to curb dust pollution at Project sites • Speed limit signs to be erected in unpaved areas on site
Noise pollution and excessive vibration	<ul style="list-style-type: none"> • Control of speed and movement of construction vehicles. • Use of ear protection aids by construction workers.

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>	<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> No unnecessary hooting by Project and Occupants' vehicles. Restriction of construction activities to day time. Use of attenuated equipment. Hoarding of the entire construction site. Limit pickup trucks and other small machinery to an idling time when necessary, observe a common-sense approach to vehicle use, and encourage workers to shut off vehicle engines whenever possible. Construction works to be done during the day between 8am-6pm Mondays to Fridays and 8am-1pm on Saturdays. Carry out noise baseline survey before construction. The number of construction equipment operating simultaneously shall be minimized through efficient management practices. 		<ul style="list-style-type: none"> Proper containment and disposal of solid waste. Contracting a licensed waste collection and disposal company. Creation of awareness on proper solid waste disposal. Reuse of timber off-cuts and wooden support for fuel. Comply with the requirements of the Environmental Management (Waste Management) Regulations Legal Notice No. 120.
Deforestation	<ul style="list-style-type: none"> Maintaining of grass around the site. Proper demarcation of the Project area to be affected. Site vegetation growing/elaborate greenery as a policy. 	Increased energy demand	<ul style="list-style-type: none"> Identify and use equipment/systems having minimum energy consumption. Install energy efficient lighting in common areas such as staircases, driveways and security lights. Use alternative energy sources such as solar power for water heating and lighting.
Disturbance of soil structure	<ul style="list-style-type: none"> Install soil traps around perimeter fence and on steep areas. Elaborate landscaping on site as a policy guided by a competent landscape Architect. Maintaining specified routes for construction vehicles. Control earthworks. Use of light machinery and equipment. 	Occupational safety and health risks	<ul style="list-style-type: none"> Maintaining safe systems of work at the workplace. Use of suitable PPEs. Site to be sprinkled with water to minimize dust. Use of stable ladders and other climbing/support structures. Sensitize workers on occupational safety. Maintain cleanliness and organization at the construction site. Fencing or covering of risky areas such as deep pits. Safety signage. Safety induction to all staff on site. Engagement of skilled labourers. Insurance of workers. Designate and mark smoking areas. Workers to be trained as fire marshals. Fire escape routes to be shown clearly. Provide enough first aid kits within the Project site. Train workers in administering first aid and Placing visible and readable signs around where there are risks. Ensure use of the provided sanitary facilities by construction staff. Proper handling and disposal of solid waste. Control of visitors to the site. Installation of adequate water supply. Controlled developments around the facility. Designated area for taking meals. Provision of hand wash stations and soap.
Destruction of habitat	<ul style="list-style-type: none"> Restrict vehicular movement to set out paths. Maintaining of vegetation on areas not affected Elaborate site greenery as a policy. 	Fire hazards and accidents	<ul style="list-style-type: none"> Acquire firefighting facilities.
Increased water demand	<ul style="list-style-type: none"> Notices and information signs to be posted on site on need to conserve water. Encourage water reuse and recycle during construction and operations. Rain water harvesting (roof catchment and surface runoff) mechanisms. Provision of water storage tanks. Install water meters to ensure accountability and responsibility. Install water-saving devices in the appropriate places. Regularly maintain plumbing fixtures and piping in order to avoid losses due to leakages. 		
Generation of solid waste	<ul style="list-style-type: none"> Provision of waste collection bins. Designated waste collection area that is well labelled for the different waste streams. Re-use of soil, construction debris and other reusable waste. 		

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • Sensitize workers on fire safety. • No storage of flammable substances on site. • Good housekeeping on site. • Designated fire assembly point. • Keep well stocked first aid box. • Proper handling and use of tools and machinery.
Traffic disruption	<ul style="list-style-type: none"> • Set driving speed limits. • Use of traffic marshals. • Fleet Management Plan when doing deliveries on site. • Implementation of one-way system on site. • Designate pedestrian walkways on site. • Adequate road warning signs to be posted as per the traffic regulations. • Provision of both exit and entry for vehicles accessing the construction site. • Emphasizing on safety aspects among driver. • Adopting limits for trip duration and arranging driver rosters to avoid overtiredness. • Avoiding dangerous routes and times of day to reduce the risk of accidents. • Use of speed control devices (governors) on trucks, and remote monitoring of driver actions. • Delivery of materials during off pick hours and weekends. • Ensure that the Entry/Exit to the project site is located where it will cause minimal traffic. • All transportation of construction raw materials and excavated materials are to be conducted at traffic off peak hours only. • Cover all trucks hauling soil, sand and other loose materials to avoid spillage and dust emissions that may interfere with smooth motoring.
Oil spills	<ul style="list-style-type: none"> • Provision of spill kits in all areas where chemicals are stored. • Training of chemical handlers on site on safe use and disposal of the chemicals. • Emergency procedures to control spills. • Provision of material safety data sheets (MSDS) at all areas where the chemicals are handled. • Refuelling within the site shall be restricted to the excavators. • Vehicles to be fuelled to the maximum to reduce frequency of refuelling. • Fuel storage at the site shall be minimised, and • Designates area for servicing and maintenance of machinery on site.
Insecurity	<ul style="list-style-type: none"> • Guarding of site by a reputable security firm.

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • Adequate screening of visitors to the site. • Collaboration with existing security machinery. • Partnership with neighbours and police in community policing. • Installation of CCTV camera on site. • Site well secured with a fence.
Storm water run off	<ul style="list-style-type: none"> • Proper maintenance of the drainage system. • Design to allow seepage of surface run off. • Runoff shall be harvested as a sustainability measure. • Storm water management plan that minimizes impervious area infiltration. • Develop a local storm water management plan.
Generation of liquid waste	<ul style="list-style-type: none"> • Proper connection of wastewater and sewerage system to existing sewer line as per approved design. • Install a wastewater treatment plan on site to facilitate wastewater reuse on site.

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED ACCESS ROAD TO LINK THE OLKARIA
GEOTHERMAL FIELD TO THE STANDARD GAUGE RAILWAY
(SGR) LOCATED IN OLKARIA NAIVASHA, NAKURU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Coordination Act, 1999, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Electricity Generating Company PLC (KenGen) proposes to construct a 16.74km access road to link the Olkaria Geothermal Field to the Standard Gauge Railway (SGR) terminal in Naivasha. The project starts at the proposed green energy park(9898762.709 Northing, 204708.247 Easting) and joins the Mai Mahiu -Narok Road near the ICD (98886123.826 Northing, 210594.11 Easting), the project will be located in Olkaria Naivasha, Nakuru County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>	<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Occupational health and safety	<ul style="list-style-type: none"> • Provide training to workers to ensure that they understand the requirements of the environmental management plan as applicable to their responsibilities. • Conduct drills to check on preparedness and response time to emergencies. • Comply with the OSHA, 2007 and other relevant health and safety regulations. • Control access to the construction sites to prevent access by unauthorised personnel. • Provide appropriate signage and warnings in work areas. • Provide appropriate personnel protective equipment. • Provide adequate First Aid facilities. • Training in emergency response, and clearly display emergency contacts on site. • Provide adequate sanitary facilities. • Develop and implement site-specific Health and Safety and Emergency Response Plans. • Develop a comprehensive STDS, HIV/AIDs control, prevention and awareness programme. 	Noise pollution and vibrations	<ul style="list-style-type: none"> • Install portable hoods to shield compressors and other small stationary equipment where necessary. • Endeavour to use equipment installed with noise abatement devices as much as practicable. • Reduce idling time on trucks and other noisy equipment. • Encourage drivers to turn off vehicle engines when not in use. • Provide personal protective equipment such as ear muffs to workers at the site as necessary. • Carry out construction work during the day only.
Ecology and biodiversity disturbance	<ul style="list-style-type: none"> • Minimize the width of construction right of way for construction of the road. • Avoid unnecessary removal/destruction of vegetation in site clearance. • Development and implementation of a Reinstatement Plan. • Re-vegetation of disturbed grounds with indigenous species. • Incorporate existing vegetation into landscaping plans where possible and ensure that proper care is taken for this vegetation before and after construction. • Ensure the prevention of vegetation and soil contamination by hydrocarbon/chemical pollution events through development and implementation of pollution prevention plans and emergency response plans. • Road safety measures into design, including provision of longer sight lines that allow adequate reaction time for drivers, speed control/ regulation features, culverted crossings with the needs of wildlife, especially "small" ones to easily cross through. 	Soil erosion	<ul style="list-style-type: none"> • Salvage, stockpile and ensure re-use of native topsoil during re-vegetation activities in disturbed areas. • Develop and implement a reinstatement plan. • Ensure that clearance of vegetation is limited to the road width and plinth of proposed structures to prevent soil erosion that would ensue after loss of vegetation. • Ensure that construction vehicles use predetermined tracks at the site to reduce ground compaction. • Stabilize and maintain access roads created to access project sites to minimize erosion and dust from vehicular traffic. • Stabilize construction sites and camp(s) entrances/exits to reduce the amount of sediment tracked off-site by construction vehicles. • Oil, fuels, paints and any hazardous materials to be stored in accordance with their respective MSDS's, and in such a manner to avoid spillages or leakages. • Seeding and planting of trees, shrubs and ground cover for temporary or permanent stabilization of soil in areas such as: cleared areas without on-going construction activity; open space and fill areas; spoil piles or temporary stockpile of fill material.
Increased energy demand	<ul style="list-style-type: none"> • Maintain equipment and machinery to manufacturers' specifications by regular servicing to maintain efficiency in combustion and reduce carbon emissions. • Use environmentally friendly fuels such as low sulphur diesel. • Minimise the period for machinery idling to save on fuel. • Specify and procure the most energy efficient plant options fit for purpose and avoid use of plant with unnecessary and excess capacity. 	Water pollution	<ul style="list-style-type: none"> • Develop and implement a site construction waste and wastewater management plan to minimize environmental damage from construction activities. • Provide appropriate sanitary facilities at construction camp and sites, worker compounds and other construction facilities. • Install secondary containment measures in areas where fuels, oils, lubricants etc. are stored and loaded or unloaded, including filling points. • Implement soil erosion control measures. • Install and regularly empty sediment traps in surface drains around construction areas. • Minimize soil disturbance and excavation during wet season. • Obtain appropriate consents for any abstractions.

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Traffic disruption	<ul style="list-style-type: none"> • Contractor to ensure that construction vehicles do not cause nuisance to the public through obstructions, and that speed limits are observed. • Develop a traffic management plan to ensure that site vehicles do not interfere with the regular traffic along the main roads, or pose safety hazards to site workers or the public. • Set up traffic control/warning signs near construction sites informing other motorists of potential hazards. • Recruit traffic marshals to control traffic especially near active construction sites.
Solid and liquid waste	<ul style="list-style-type: none"> • Isolate woody vegetation cleared and facilitate collection by residents. • Ensure excavated soil is used as much as possible in landscaping at sites or disposed appropriately to prevent nuisance. • Avoid mixing excess concrete if possible and discard excess concrete in designated area. • Provide appropriate and adequate concrete wash out areas/ management. • Runoff from onsite concrete wash areas should be contained in temporary pits where concrete can set. • Provide waste segregation bins/ facilities and sensitize workers on segregation practice. • Procure the services of a licensed waste handlers. • Ensure appropriate sanitary facilities are provided at construction sites.

The full report of the proposed project is available for inspection during working hours at:

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Coordination Act, 1999, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Wimax Homes Limited, proposes to construct 3No.blocks of residential apartments comprising 3No.basements for parking space, ground floor for parking space, recreational facilities, and 19No. floors with a total of 323No.units (76No. one bedroom, 114No. one bedroom with study, 76No. two bedroom with DSQ, 38No. three bedroom with DSQ, 19No. four bedroom with DSQ units),other associated facilities and amenities on Plot L.R. No. Nairobi Block 3/63 along St. Michael's Road in Westlands, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Soil erosion	<ul style="list-style-type: none"> • Control earthworks. • Install drainage structures to control flow of storm water. • Ensure and management of excavation activities.
Loss of vegetation	<ul style="list-style-type: none"> • Only area earmarked for development should be cleared. • Plant trees, shrubs and flowers on remaining open spaces.
Changes in hydrology/ impended drainage/deep excavations	<ul style="list-style-type: none"> • proper Installation of drainage structures. • Install cascades to break the impact of water flowing in the drains. • Ensure efficiency of drainage structures through proper design and maintenance. • Provide gratings to the drainage channels. • A geotechnical survey shall be conducted and the recommendations thereof followed. There shall be no blasting during excavation. • A methodology for excavation shall be generated as required by NCA.
Air pollution	<ul style="list-style-type: none"> • Stockpiles of earth should be sprayed with water or covered during dry seasons. • Provide dust masks for personnel in dusty areas. • Sensitize construction workers on pollution control measures. • Cover all trucks hauling soil, sand and other loose materials.
Noise pollution	<ul style="list-style-type: none"> • Install suitable barriers to shield compressors and other small stationary equipment where necessary. • Display signs to indicate construction activities. • Maintain all equipment. • Adhere to provisions of Noise Prevention and Control Rules 2005, Legal Notice no. 24 regarding noise limits at the workplace as well as NEMA Noise Excessive Vibration Pollution Control Regulations, 2000.

Environmental Impacts Mitigation Measures

- Public health, occupational health and safety
- Train staff/workers on occupational health and safety.
 - Provide full protective gear and workmen's compensation cover in addition to the right tools and operational instructions and manuals during construction.
 - Design of sewerage system should be as provided in the plans and should be constructed to approved size and design, standard and of approved materials.
 - Ensure use of standard construction materials and to the specifications. Avoid undesirable, substandard, hazardous or unauthorized materials during construction and maintenance.
 - Sensitized staff on social/health issues such as drugs.
- Road traffic disruption
- No overloading of trucks and good driving practices to be practiced.
 - Suitable junction/access point to be provided.
 - Use of appropriate and legible signage.
 - Employment of formal flagmen/ women to ensure the public safety.
 - Follow the traffic management plan throughout the project cycle.
- Insecurity
- Provision of security guards, CCTV cameras, security lights and other security apparatus during the entire project cycle.
 - Construction work timings shall only in line with the NEMA licensing conditions.
- Increased water usage
- An alternative water source shall be provided. The proponent shall drill a borehole at the proposed site.
 - Management of water usage. Avoid unnecessary wastage.
 - Recycling of water at the construction phase where possible.
 - Make use of roof catchments to provide water i.e. for general purpose.
- Increased waste generation
- Adopt waste minimization at source.
 - Monitoring the fate of disposed wastes to ensure they are legally land filled at a recognized controlled site.
 - Adhering to waste management regulations of 2006.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be Clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
