Notes:

* This connection fee provides for the connection of a customer that is not more than 80 meters away from an existing 230/400 volt power supply with enough capacity. If this is not the case, true cost will be asked as connection fee.

** Business choosing single phase pre-paid meters has always been given the benefit of a subsidized tariff. The subsidized tariff has been structured for domestic customers being supplied with electricity for the first time. It is proposed that businesses pay a cost reflective connection fee.

A business is defined as premise exclusively used for "formal business". If the business is an extension of the customers home, it will be defined as "domestic".

*** True cost for a pre-paid connection (PP - 1) is N\$ 1 626.28
The shortfall will be N\$ 1 526.28 per connection.
The shortfall will partly be funded from Northern Electricity's contractual obligation, the Electrification Fund included in this tariff and other funds made available.
