ORDINARY SUMMONS

Suit No. CM/22/1972

BETWEEN
THE ATTORNEY-GENERAL OF THE FEDERATION PLAINTIFF
AND
TRANS ARAB LIMITED DEFENDANT

You are hereby summoned to appear at a court to be holden at CT. 1 on the 2nd day of March, 1972, at the hour of 9.00 in the fore noon, to answer the plaintiff's claim for £337-7s-7d (the particulars of which are hereto annexed.)

Claim	£	337	s	7	d
Fee		10	18	0	
Total amount of claim and costs	£	348	5	7	

If the claim is for money only and you pay into court the total amount of the claim and costs within 7 days after the service on you of this summons you will incur no further costs.

If you dispute the claim or have a counterclaim you should, within eight days inclusive of the day of service, send to the registrar a defence or counterclaim for which the form below may be used. If you dispute part only of the claim you may pay into court the amount admitted.

If you admit the whole or part of the claim and desire time for payment you should within the said eight days send to the registrar an admission (for which the form below may be used).

Sending the form to the registrar does not relieve you from appearing in court on the day named but delay in sending a defence or admission or in paying into court may add to the costs.

To the Defendant.

Vacancy announcement.—No. 637-AGP-61.

Date issued.—16th February, 1972.

Closing date.—12th April, 1972.

Duty station.—Athens-Greece.

Duration.—36 months.

Starting date.—As soon as possible.

Background.—The purpose of the project is to assist the Government of Greece in intensifying its current olive pests research programme; including trials on a practical farming scale in selected pilot areas.

In particular the project will:

- Conduct ecological investigations of the main olive pests and diseases;

- develop low-cost mass rearing techniques for the olive fly and possibly for the olive moth and the black scale;

- carry out research in the field of biotic control;
- conduct research in biogenetic (autocidal) control of the olive fly and possibly the olive moth;
- carry out investigations on chemical and physical means of modifying the behaviour of the insect pests;

- conduct research in chemical control with due consideration to human; animal and wildlife hazards;

- test and demonstrate in selected areas those control measures found most promising;

- provide training for Greek nationals specializing in olive pests and their control as well as of foreign research workers and technicians from olive-producing countries in the Mediterranean area.

The project has a duration of 5 years. Its Headquarters are in Kifissia (Athens) and there are sub-centres in Chania (Crete) and Corfu, in order to cover the various ecological conditions under which olive is grown in Greece.

Duties.—Under the general direction of the Project Manager and in collaboration with the other members of the Project Team, particularly the two Insect Ecologists, the Biotic Control Expert will be responsible for conducting research into the biotic control of the main olive pests for the purpose of assisting the Government of Greece in intensifying its current olive pests research programme. His main duties will include:

research into biotic control, including survey of the indigenous parasites and predators of the main olive pests, investigations of interspecific competition, study of insect population dynamic, exploration of the possibilities of introducing exotic parasites from areas outside Greece, evaluation of the efficiency of the released entomophagous species in the pilot areas, and use of entomopathogens ;

to assist the project manager in developing low-cost mass rearing and release techniques for parasites of the olive fly, the olive moth and the black scale ;

to give due consideration to an integrated pest control approach to solve the olive tree protection problems, in relation to the control of olive diseases and cultural practices ;

to train Greek nationals specializing in the biotic control of olive pests as well as foreign research workers and technicians from olive-producing countries in the Mediterranean area.

Duty station.—Seoul or Suwon, Korea.

Duration.—36 months.

Starting date.—December 1972.

Duties.—Under the general direction of the Project Manager and in collaboration with other members of the project team, the plant protection extension expert will work closely with the plant protection extension workers and form a close liaison with plant protection research workers. He will be responsible for demonstrating research findings, for converting these findings into educational material understandable to farmers, and for the introduction of improved means of communication. The specialist will work closely with personnel in the Rural Guidance Bureau at the national and provincial level. His duties will include:

Review existing extension activities in the field of plant protection and introduce new techniques, including modern organization and planning of specialized courses for training extension personnel.

Strengthen existing field-plot demonstration programmes at the farm and village level, and demonstrate project results through these programmes.

To introduce and/or expand the use of appropriate visual aids and demonstration materials in future plant protection extension programmes.

To assist local counterparts in implementing pest and disease control schemes based on the integrated control approach to plant protection.

To train local counterparts in modern plant protection extension activities and based on research findings, to prepare appropriate technical papers and practical brochures for use by extension service personnel and growers.

Qualifications.—University degree in agronomy, entomology or plant pathology.

Experience.—At least seven years' experience in plant protection and extension work, with broad background in pests and diseases and their control; experience in working with research workers and presenting their findings to farmers.

Languages.—Very good knowledge of English.

Other.—Strong background in the development of demonstration plots; and enough knowledge of agricultural economics to assess the economic feasibility of various control procedures.

Work experience in the Far East.

ANNOUNCEMENT OF FIELD POST VACANCY IN THE FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

Post title (Post No., Project).—AGRICULTURAL OFFICER (PEST CONTROL—NON-CHEMICAL) STRENGTHENING PLANT PROTECTION RESEARCH AND TRAINING KOR/32.

Vacancy announcement.—No. 649-AGP-71.

Date issued.—17th February, 1972.

Closing date.—13th April, 1972.

Duty station.—Seoul or Suwon—Korea.

Duration.—30 months.

Starting date.—As soon as possible.

Background.—The project aims to assist the Government in strengthening the extension, research, regulatory and control activities in crop protection, thereby reducing losses from crop pests and diseases and increasing the quantity and quality of food and fibre.

The project's duration is four years and field operations commenced in August 1971.

Duties.—Under the general direction of the Project Manager and in collaboration with the other members of the project team, in particular with the plant pathologist, the expert will be responsible for conducting research into the control of plant insect pests with natural-occurring mortality factors and cultural practices. His main duties will include:

To evaluate existing ecological data and conduct additional studies as needed to strengthen the pest forecasting system.

To conduct research into control methods of economically important pests by phytophagous insects, predators, cultural practices, mechanical and physical means, pheromones and substances changing behaviour.

Develop integrated pest control programmes in collaboration with the applied insect toxicologists, the pest forecasting and the plant protection extension experts, and eventually with plant breeders and soil scientists.

To train Korean counterpart personnel from the Office of Rural Development, Rural Guidance Bureau, Agricultural Production Bureau and Forestry Protection Division in developing integrated pest control programmes. These duties will require a considerable amount of work in the field and frequent travel in Korea.

Qualifications.—University degree in entomology or animal ecology or in agronomy with specialization in entomology.

Experience.—Seven years' experience in biological and integrated control of agricultural pests.

Language.—Very good knowledge of English.

Other.—Experience in pest control in the Far East, mainly on rice, desirable.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Closing date.—17th April, 1972.

Duty station.—Arcoverde—Brazil.

Duration.—24 months, extendable.

Starting date.—June 1972.

Background.—In the north-east of Brazil local demand for meat and dairy products exceeds supply; the main problem of the area being periodic droughts. The project is therefore expected to result in an evaluation in the State of Pernambuco of alternative livestock production techniques to arrive at economically attractive production systems; identification of capital requirements and possible extension to other states in the north-east. The activities will be centred on dual purpose dairy/beef enterprises in the Agreste and sheep and goat production in the Sertao.

Duties.—Assist in carrying out a survey of commercial livestock production activities in the ecological zones of the State of Pernambuco with a view to obtaining accurate information on actual production methods and resource potential.

Assist in the design and execution of experiments to derive at reliable input/output data.

Analyse the actual system of price/cost incentives to livestock producers and propose improvements where feasible.

Estimate possible capital investment requirements supported by projections of operating results and cash flows.

Establish contacts with farmers so that they can participate directly in and benefit from the project.

Train counterpart staff in the execution of similar work.

Perform any other duties as requested by the Team Leader.

Qualifications.—M.S. or Ph.D. in agricultural economics, preferably with concentration on the economics of livestock production.

Experience.—Five years' advisory and/or research work on economic problems of livestock production.

Languages.—Very good knowledge of either English, French or Spanish and working knowledge of Portuguese.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Government Notice No. 614

ANNOUNCEMENT OF FIELD POST VACANCY IN THE FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

Post title (Post No. Project).—PROJECT MANAGER Central Agmark Research and Training Institute (IND 125).

Vacancy announcement.—No. 654-ESR-31.

Date issued.—22nd February, 1972.

Closing date.—18th April, 1972.

Duty station.—Nagpur—India.

Duration.—Initially one year with possible extension for 3½ years.

Starting date.—As soon as possible.

Background.—The fourth Five-year Plan (1969-74) of India envisages large increases in the production of not only cereals, pulses and commercial crops, but also of perishables like fruits and vegetables. The present marketing system results in higher cost to the farmer and higher prices for the consumer. In addition, transit losses and shortage reduce substantially the gains which might be derived from increased output. A more efficient marketing system is needed to serve both the domestic market in India and to realize the considerable potential for export particularly of tropical and off-season fruits and vegetables to Europe. An All-India Seminar on the planning of fruit and vegetable production was held in 1968 and its recommendations provided the basis for the present project request.

Duties.—The Project Manager will direct the implementation of the Project, the purpose of which is to assist the Government of India in establishing and operating a Central Agricultural Marketing Research and Training Institute. The project is expected to determine, through practical trials and demonstrations, the technical and economic feasibility and advantages under India conditions of improved techniques and methods for marketing agricultural products, especially perishables. The Central Agmark Research and Training Institute will be established for this purpose and will have the ultimate objective of stimulating and advising on the adoption of these new techniques by operational marketing enterprises (e.g. co-operatives, private enterprises, publicly-sponsored organizations, etc.) in selected areas of the country. In addition, the Institute will:

- Provide technical guidance in the design of new market facilities for local assembly and central distribution markets.

- Experiment with the application of advanced equipment for grading, packing and related treatments in the marketing of fruit and vegetables.

- Conduct studies and demonstrations on refrigerated transport as a guide to large scale investment.

- Develop specialised storage techniques for a wide range of perishable products.

- Provide advice and assistance in the establishment of an integrated marketing system.

- Carry out research to determine the markets and marketing channels for which the adoption of new marketing techniques would be advantageous and organize trial shipments to test and confirm market research indications.

Provide training through instruction, demonstration and actual work experience for managers, marketing technicians and field advisers. This training would initially be designed to serve the immediate needs of the Project, but would subsequently train staff from other parts of the country, and eventually lead to a full management training and demonstration programme.

The Project will begin with a preliminary study by the Project Manager, with the assistance of international consultants and Indian counterpart staff, to determine the specific areas, products and problems on which research should be concentrated and to prepare a detailed work plan. Following this, marketing systems will be developed through research and experimentation. Finally, demonstration areas will be established and training programmes set up.

After this preliminary study, the Project Manager will be assisted by the services of experts in the fields of marketing management, market research, market design, packaging and transport, and product handling, consultant services for advice on marketing and export development of specific items, refrigeration, storage, quality control, etc. and administrative support personnel. Under the training component of the Project, fellowships are provided for the training of counterpart personnel in the fields of transport, grading, packing, marketing management, market research, refrigeration, and others still to be determined.

Qualifications.—Degree in agricultural economics with specialization in agricultural marketing.

Experience.—At least ten years' broad experience in marketing management and organization with up-to-date knowledge of the application of packaging, transport, storage, special equipment for marketing of perishables, etc.

Language.—English.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Method of application.—Applications to reach Chief, Recruitment Section, Personnel Division, FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 18th April, 1972. Quote 654-ESR-31.

Post title (Post No., Project).—INSECT ECOLOGIST.
Project: Research on the control of coconut palm Rhinoceros Beetle (REG 291).

Vacancy announcement.—No. 677-AGP-83.

Date issued.—2nd March, 1972.

Closing date.—27th April, 1972.

Duty station.—Apia, Western Samoa.

Duration.—3 years.

Starting date.—July 1972.

Background.—The prime objective of the project is to contribute to the increase of coconut production in the islands of the South Pacific region infested by rhinoceros beetle by developing suitable control techniques of this serious pest of the coconut palm, the most important cash crop in the region.

Research into the problem of controlling the coconut palm rhinoceros beetle was started in 1964 with the assistance of UNDP and has been continuing. Although the methods, other than plantation clearing, for the practical control of the beetle have not yet been finalized, considerable progress has been made in research on the biology of the beetle and on biological and chemical control methods. Research will continue throughout a 3 years follow-up project.

Duties.—Under the general direction of the project manager and in collaboration with the other insect ecologist and the economic entomologist, the

insect ecologist will continue research on the rhinoceros beetle and its natural enemies. His duties will include:

investigating the life habits of the rhinoceros beetle and completing life tables;

assessing the effect of natural enemies on the beetle population;

collaborating in the development of field experiments and demonstration of integrated control programmes of the rhinoceros beetle;

training of counterpart personnel.

Qualifications.—University degree in Biology, Zoology or Entomology. Specialisation in animal ecology.

Experience.—Seven years' experience in the ecological study of agricultural insect pests.

Background.—The UNDP, in co-operation with the Government of Uganda, has established a project with the purpose of assisting the Government in the improvement of tick control methods by reinforcing the national dipping programme and by studying tick ecology, physiology and genetics with a view to finding ways of making dipping more efficient, as well as training national personnel in related techniques.

Duties.—Under the general supervision of the Project Manager, the tick ecologist will be required:

To study tick ecology of the main vector of East Coast Fever by carrying out comprehensive tick surveys:

on pasture at selected areas;

on livestock, to determine changes in tick distribution and effect of the dipping programme;

on the wild hosts.

To participate in investigations on tick susceptibility to acaricide.

To train counterpart personnel.

To carry out any other duties within his competence as requested by the Project Manager.

Qualifications.—A degree in zoology with post graduate specialization in tick ecology or a degree in veterinary science with post graduate qualifications in entomology, including acarology.

Experience.—A minimum of seven years' experience in entomological research preferably in the field of tick ecology, some experience of the problem associated with tickborne diseases and tick control in Africa would be advantageous.

Language.—A good knowledge of English.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Method of application.—Applications to reach Chief, Recruitment Section, Personnel Division, FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 24th April, 1972. Quote 667-AGA-256.

ANNOUNCEMENT OF FIELD POST VACANCY IN THE FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

Post title (Post No., Project).—FOUR POSTS: AGRICULTURIST (CEREAL PRODUCTION). ELIMINATION OF FALLOWING AND DEVELOPMENT OF WINTER CEREALS—AGL-37.

Vacancy announcement.—No. 634-AGP-59.

Date issued.—16th February, 1972.

Closing date.—12th April, 1972.

Duty station.—(a) Algiers; (b) Annaba; (c) Constantine and (d) Tiaret.

Duration.—One year with possibility of extension.

Starting date.—(a) As soon as possible; (b), (c) and (d) 1st October, 1972.

Background.—The project's purposes are the determination and application of methods for cereal production improvement in Algeria through:

introduction of high-yielding varieties;

crop-growing demonstration and field cropping of these varieties;

crop diversification and intensive production techniques by devising better crop rotations in which forage and fodder crops as well as industrial crops are included; research on better use of machinery, application of fertilizers, weeding, etc.

Duties.—Under the Project Manager, the officer's duties will comprise:

observation, data collection and analysis on the cereal production programme planned, undertaken and carried through by the Government. This relates in particular to the special programme for recently introduced high-yielding cereal varieties which have not been sufficiently experimented with to determine their cultivation possibilities;

field demonstration and extension work on growing of these crops on private, operator-managed farms relying on agronomic research and scientific findings in Algeria on foreign and local varieties that have already been tried in the country and for which adequate experimentation has already been done;

study of forage and fodder crops and industrial legume crops for inclusion in crop rotations;

study of crop rotations and experimentation with certain types in the light of the land capability and irrigation potential of various regions;

putting into practice rotations for which accurate trials have been made, particularly in the area with over 600 mm. rainfall.

Qualifications.—University-level degree in agriculture (*Diplôme supérieur d'études or Ingénieur Grandes Ecoles*).

Experience.—Seven years of practical experience in cereal production and knowledge of forage and fodder crops and industrial legume crops. Experience in cultural trials and extension work.

Languages.—Good knowledge of French. Knowledge of Arabic desirable.

Other.—Knowledge and experience with recently discovered varieties of high-yielding cereals.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Method of application.—Applications to reach Chief, Recruitment Section, Personnel Division, FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 12th April, 1972. Quote 634-AGP-59.

ANNOUNCEMENT OF FIELD POST VACANCY IN THE FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

Post title (Post No., Project).—ANIMAL PRODUCTION OFFICER (Lecturer in Animal Husbandry Industry). Training School for Animal Health Assistants SOM/9.

Vacancy announcement.—No. 664-AGA-254.

Date issued.—28th February, 1972.

Closing date.—24th April, 1972.

Duty station.—Mogadiscio, Somalia.

Duration.—12 months initially.

Starting date.—15th May, 1972.

Background.—The purpose of the project is to assist the Government of Somalia in establishing a School for the training of animal health assistants.

The School has been in operation now for 4 years. A phase II is envisaged. The School offers a two-year technical course in animal disease control and livestock husbandry; and provides short training courses for in-service lay assistants and veterinary guards.

Duties.—Under the general direction of the Project Manager:

Participate in the organization and conduct of practical and theoretical training in animal production including range management at the Training School for Animal Health Assistants, TSAHA, Somalia:

Assist in the establishment of practical training facilities with particular reference to cattle and poultry production and small ruminants;

Train counterpart staff;

Perform such other duties in his field of specialization as may be assigned to him by the Project Manager.

Qualifications.—University degree in Animal Production or a Veterinary degree supplemented by specialized studies in the field of Animal Production.

Experience.—7 years' minimum professional experience in the field of Animal Production including teaching, preferably in a developing country.

Language.—English.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Method of application.—Applications to reach Chief Recruitment Section, Personnel Division, FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 24th April, 1972. Quote 664-AGA-254.

Post title (Post No., Project).—VITICULTURIST
Accelerated training of agricultural technicians—SF/ALG/30.

Vacancy announcement.—No. 644-AGP-66.

Date issued.—16th February, 1972.

Closing date.—12th April, 1972.

Duty station.—Algiers, Algeria.

Duration.—12 months.

Starting date.—As soon as possible.

Background.—This Algiers-based project is responsible for 30 training centres located in various parts of Algeria. Close liaison with farmers has already been established under the project, important tasks having devolved upon agricultural extension and model farms. It is at these centres that instructors are trained and a training follow-up programme has been organized to supervise their training work in the field.

Duties.—Under the direction of the Project Manager (ALG/30) the viticulturist, in collaboration with the Algerian authorities in this field and officers assigned to project ALG/30, especially those concerned with methodology of accelerated training and extension work as well as all experts on other projects involving activities pertinent to his specialty, will have the following duties:

the study of posts and jobs at all levels with which he will be concerned during his assignment to the project, taking into account work already done under project ALC/8, by the CNPA or in any other sector;

the assessment of the country's requirements for technicians in the field of viticulture, considering the guidelines of the four-year plan 1970-73 and any other studies that have been conducted in this field;

the planning of training of such technicians in the light of the country's requirements, existing training centres and training staff;

the preparation of syllabuses for training of instructors and technicians at all levels in this specialty of viticulture taking due account of the work done under project ALG/30 and all other pertinent documents;

the compilation of instruction handbooks or manuals at all levels jointly with the expert in pedagogy especially, as well as with experts and specialists in the field of viticulture; undertaking revision and updating of available documents; assisting in the production of teaching materials (films, slides, etc.);

jointly with the Algerian authorities, particularly those of the Division de l'Education agricole-DEA (Division of Agricultural Education) the selection of instructors and technicians; this entails preparation of tests, examination subjects and qualifications for selection, correcting test papers, participating in the deliberations of the selection boards, etc. and participating in all final examinations and tests;

the training of instructors, participating and assisting in the training of technicians in the specialty of viticulture;

the periodic evaluation of the training and, whenever necessary, revision of the above described work;

the training of Algerian counterparts;

such other services as may be requested of him within his terms of reference.

Qualifications.—University-level degree in either agriculture or horticulture with specialization in viticulture (i.e. the French degrees-Diplome supérieur d'études agricoles or horticoles, or else, ingénieur Grandes Ecoles).

Experience.—Seven years' experience in viticulture with specialization in education and extension work in this specialty.

Languages.—Excellent knowledge of French. Knowledge of Arabic desirable.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Method of application.—Applications to reach Chief, Recruitment Section, Personnel Division, FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 12th April, 1972. Quote 644-AGP-66.

ANNOUNCEMENT OF FIELD POST VACANCY IN THE FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

Post title (Post No., Project).—ECONOMIC ENTOMOLOGIST Project: Research on the control of coconut palm Rhinoceros Beetle (REG 291).

Vacancy announcement.—No. 676-AGP-82.

Date issued.—2nd March, 1972.

Closing date.—27th April, 1972.

Duty station.—Apia-Western Samoa.

Duration.—3 years.

Starting date.—July 1972.

Background.—The prime objective of the project is to contribute to the increase of coconut production in the islands of the South Pacific region infested by rhinoceros beetle by developing suitable control techniques of this serious pest of the coconut palm, the most important cash crop in the region.

Research into the problem of controlling the coconut palm rhinoceros beetle was started in 1964 with the assistance of UNDP and has been continuing. Although the methods, other than plantation clearing, for the practical control of the beetle have not yet been finalized, considerable progress has been made in research on the biology of the beetle and on biological and chemical control methods. Research will continue throughout a 3 years' follow-up project.

Duties.—Under the general direction of the Project Manager and in collaboration with the insect ecologists, the economic entomologist will develop control techniques of the rhinoceros beetle based on the use of chemicals. His duties will include:

Continuing investigations on the use of attractants and insecticides;

collaborating in the development, field experiments and demonstration of integrated control programmes of the rhinoceros beetle;

training of counterpart personnel.

Qualifications.—University degree in Biology, Zoology or Entomology.

Experience.—Seven years' experience in the control of agricultural insect pests.

Languages.—Good knowledge of English.

Other.—Working experience in plant pest control in the tropics. Experience in coconut pest control desirable.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Method of application.—Applications to reach Chief, Recruitment Section, Personnel Division, FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 27th April 1972. Quote 676-AGP-82.

ANNOUNCEMENT OF FIELD POST VACANCY IN THE FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

Post title (Post No., Project).—FISHERY BIOLOGIST (Pelagic) UNDP/FS Fisheries Research and Development Project—CUB 4.

Vacancy announcement.—No. 665-FID-53.

Date issued.—28th February, 1972.

Closing date.—24th April, 1972.

Duty station.—Havana-Cuba.

Duration.—27 months.

Starting date.—As soon as possible.

Background.—One of the main objectives of the Project is to assist the Government in the planning and execution of biological research on the stocks of fish and shellfish of interest to the Cuban fisheries and the evaluation of such resources as a basis for their development and management.

Duties.—To formulate and implement a research programme for the evaluation of demersal fish exploited by the Cuban fleets. In particular:

to initiate an extensive biological sampling programme aboard commercial and research vessels, adequate for stock assessment purposes, and for the study of the behaviour of the resources in relation to environmental factors;

to analyse data already collected from the fishing fleet;

to assist in the training of counterpart scientists in disciplines related to fish population dynamics.

Qualifications.—University degree in marine biology or fisheries with experience in the collection and analysis of data for fish stock assessment.

Experience.—At least five years of experience in this field of activity.

Languages.—Very good knowledge of Spanish or English with working knowledge of the other.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Method of application.—Applications to reach Chief, Recruitment Section, Personnel Division, FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 24th April, 1972. Quote 665-FID-63.
