EXPLANATORY NOTE

Programme for strengthening the Agrometeorological and Hydrological Services of the Sahelian Countries and establishment of a Centre for training and applications of Agrometeorology/Operational Hydrology

The strengthening of national Services and the setting up of the Centre are among the medium-term and long-term measures intended to minimize the effects of climatological disasters and to improve the living conditions of the inhabitants of this area. The seven countries affected by the drought have set up a joint body in order to combine their efforts: the Permanent Inter-State Committee for the Fight Against Drought in the Sahel (CILSS). These countries are: the Gambia, Upper Volta, Mali, Mauritania, Niger, Senegal and Chad.

The present programme consists of:

Seven national projects intended to develop the agrometeorological and hydrological observational networks, to strengthen services for data processing and providing users with short-term forecasts, and lastly, the training of technical personnel required for these tasks;

a regional Centre to provide training for these personnel. This Centre will subsequently have personnel and equipment for data processing on a regional basis.

Each national project comprises:

the services of an expert for two years, responsible for supervising meteorological and agrometeorological activities undertaken in the country;

the supply of equipment for strengthening the networks;

granting fellowships;

hydrological activities undertaken under a sub-contract with ORSTOM (except the Gambia)

The Centre comprises:

the services of a Programme Manager responsible for the management and implementation of the entire programme;

the services of four instructors in meteorology (2), agrometeorology (1) and climatology (1);

the services of two experts in operational hydrology responsible for planning and supervising the work of the sub-contractor;

the supply of didactic material.

It is also proposed to add data processing facilities on a regional scale by attaching two experts, providing data processing equipment and a telecommunication network for the collection and redistribution of these data.

The duration of these operations will be five years for the Centre and two years for the national projects.
