computer software and firmware for analyzing and filtering of network traffic and for the detection, filtering, and/or removal of computer intrusions, viruses, spam, or other malicious applications or threats, and for providing virtual private networking and security functions; electronic software updates, namely, downloadable computer software and associated data files for updating computer software in the fields of computer intrusions, viruses, spam, or other malicious applications or threats and security functions protecting the integrity of computer hardware, software, networks and electronic data, provided via computer and communication networks; computer software for protecting computer systems and mobile devices and cloud edge, to promote network efficiency, security, and integrity, for the detection, filtering and removal of computer intrusions, viruses, spam, spyware, malware and other malicious applications or threats; network data processors for use in the field of data and network security to accelerate data traffic and to accelerate firewall and VPN functions; embedded computer software for use in the encryption and decryption of digital files and digital data sold as a component of computer hardware and data processing equipment; microcontrollers for internet of things (IoT) enabled devices; home automation hubs comprised of voice-activated speakers, computer hardware, and recorded software for controlling networked devices in the internet of things (IoT), operating internet-enabled and connected lighting apparatus and home security alarms, etc.; smart home hubs comprised of voice-activated speakers, computer hardware, and downloadable software for controlling networked devices in the internet of things (IoT), operating internet-enabled and connected lighting apparatus and home security alarms, etc.; home automation hubs using artificial intelligence (AI) comprised of voice-activated speakers, computer hardware, and recorded software for controlling networked devices in the internet of things (IoT), operating internet-enabled and connected lighting apparatus and home security alarms, etc.; downloadable software for connecting, operating, and managing networked cars, kitchen appliances, HVAC systems, etc. in the internet of things (IoT); user-facing, network-connected hardware items for use in managing edge sensors such as temperature, humidity, noise, air quality in IoT within Enterprise setting (non-residential); User-facing, network-connected hardware items for use in controlling points of ingress and egress such as door access, security checkpoints, server room access and other workspaces in IoT within Enterprise setting (non-residential); downloadable software for connecting, operating, and managing networked devices to collect data within workspace such as temperature, humidity, air quality and operating in the internet of things (IoT) within Enterprise (non-residential); downloadable mobile-based software for connecting, operating, and managing networked devices and sensors such as power measurement, environmental metrics operating in the internet of things (IoT) with Enterprise (non-residential); user-facing, network-connected hardware items for use in controlling, measuring, managing and optimizing power consumption and power control within IoT Enterprise setting (non-residential); artificial Intelligence and machine learning-based software providing user insights via collected IoT data for the operationalization and management of edge-compute device hardware such as cameras, sensors and actuators within IOT Enterprise space (non-residential); network servers; internet servers; computer servers; digital media servers; communications servers [computer hardware]; servers for web hosting; downloadable computer software designed to be deployed on web servers for data analysis, storage, querying, and backup; recorded computer software designed to be deployed on web servers for data analysis, storage, querying, backup, and prevention of data loss and leakage; network routers; ethernet switches; wireless access points; computer hardware; computer software for planning, configuring, deploying, operating, managing, and monitoring of communication devices; data storage apparatus; VOIP phones; video cameras; video recorders; electric switches; electric plugs; video cameras; video decoder; parking management devices; door access; attendance equipment; intercom; alarm devices; server for storage and management. and (42) Computer security consultancy; internet security consultancy; data security consultancy; telecommunication network security consultancy; computer software and network security research and development services; computer software and network security management and analysis, namely, remote and on-line system management and analysis of the information technology (IT) systems and networks of others; computer software and network security management and analysis services that allows users to view risk posture and network performance, to track network activity and to access reports regarding the same; computer network security management and analysis, namely, scanning and penetration testing of computers and networks to assess information security vulnerability; computer network security management and analysis in the field of updating of computer software relating to computer security and prevention of computer risks; technical support services related to the provision of antivirus, anti-spam, anti-spyware, anti-malware, web-content filtering and/or intrusion detection and prevention for network cloud edge and computer security; troubleshooting of computer software and hardware problems and monitoring of network systems; providing temporary use of non-downloadable cloud-based software

for connecting, operating, and managing networked cars, kitchen appliances, HVAC systems, etc. in the internet of things (IoT); server hosting; rental of web servers; infrastructure as a service (IAAS) services, namely, hosting servers for use by others; computer co-location services, namely, providing facilities for the location of computer servers with the equipment of others; computer services, namely, providing virtual and non virtual application servers, web servers, file servers, co-location servers, load balancing servers, redundancy servers, media servers and database servers of variable capacity to third party computing and data storage facilities; computer services, namely, providing virtual and non-virtual application, load balancing, call flow, IPTV flow, surveillance flow servers to others; technical support services, namely, technical administration of servers for others and troubleshooting in the nature of diagnosing server problems; infrastructure as a service (IAAS) services, namely, hosting software for operating virtual servers for use by others.
