systems, apparatus and equipment; computer software for enabling functionality of sensors for use in automotive, consumer, industrial and medical applications; computer software for managing computer networks; computer software for tracking; computer software, hardware and chipsets for use with wireless communication apparatuses, consumer electronic devices, smart phones, digital cameras, IP cameras, drones, unmanned aerial vehicles (UAVS) and wearable mobile computers; computer peripherals for processing digital signals, for processing background data and information on computer operating systems, for tracking user activity and location, for enabling activation by speech and touch and for detecting sensory cues and launching applications that correspond to specific sensory cues and computer software, hardware and chipsets for use with these goods; computer software, hardware, and chipsets for streaming music and for synchronizing audio speakers in consumer electronics devices; computer software, namely compilers, linkers, support software to assist in the development of stand-alone programs, and software for assisting in the development of object oriented software applications, such as database systems; computer software, namely operating systems, board support packages (BSPs), virtualization technology software, hypervisor software; embedded software, applications programming interface (API) software, software libraries used to create other computer software; applications software for automotive, consumer, health care, medical, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications, protocol stacks, configuration software, and optimization software; content filtering software, namely, computer software for controlling content made available to a user; control plane software; data plane software; data processing apparatus and software for enabling, controlling, managing and monitoring all aspects of a paperless payment and/or access system employing RFID (radio frequency identification) and/or NFC (near field communication) technology, including allowing users to recharge their payment accounts remotely; deep packet inspection software; downloadable computer software for developing computer hardware and software for chipsets for wireless devices; enterprise security software for use in gateway and other networking devices to provide network security; firewall software; integrated networking, security, and collaboration software; internet security software; intrusion detection and prevention software; load balancing software; VPN (virtual private network) operating software; integrated circuits, computer hardware and software for signal processing in wireless communication apparatuses, consumer electronics devices, portable media devices, mobile gaming devices, pocket computing devices, and smart phones; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers; recording discs; computer network interfaces devices; electronic, electro technical and electromagnetic modules; data processing equipment; data storage apparatus; interfaces for computers; smart cards; smart card integrated circuits; RFID chips and tags; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID chips and tags; contactless smart cards; dual interface smart cards; dual interface integrated circuits that provide a link between contactless cards and contact cards; writers and readers for wireless transmission to and from transponder chips; electronic apparatus for writing and reading of wireless transmission to and from transponder chips; computer programs for controlling transmission of data to and reading of data from transponder chips; data processing machines for fare determination using transponder chips; encoded smart cards; computer hardware, software and peripheral devices used for access control and authentication purposes; wearable activity trackers; wearable computer peripherals; smartphones; wearable telecommunication apparatus; multicore processors; application-specific integrated circuits (ASICs); integrated circuits embedded with software; signal processors; digital signal processors (DSPs); vector processors; vector signal processors; communications processors; network processors used in network and telecommunications equipment; application-specific hardware accelerators; wireless baseband processors; base stations on a chip, namely wireless base stations on a chip; integrated circuits, namely system basis chips and systems on a chip (SOC); multicore microcontrollers; semiconductor chip sets comprised primarily of semiconductor chips; integrated circuit modules in the form of semiconductor packages and packaging, namely redistributed chip packaging (RCP), and systems-in-package (SiP); radio frequency (RF) power transistors; radio frequency semiconductors; sensors, namely, inertial sensors, pressure sensors, magnetic sensors, touch sensors all for use in automotive, consumer, and industrial

applications; proximity sensors; radar sensors; capacitive sensors; acceleration sensors; gyro sensors; sensors for computer interfaces featuring software, firmware and electronic integrated circuit chips; sensor systems comprised of sensors, computer software, microprocessors, microcontrollers, and logic or wireless protocols for enabling functionality of sensors for use in automotive, consumer, and industrial applications; electronic test instruments for developing and testing microprocessor-based systems; semiconductor memories; semiconductor devices, microcontrollers, integrated circuits, circuit boards, chipsets, all for management of operating frequency, voltage and power, optimization of static and dynamic power, power management, power optimization or power reduction; semiconductors, sensors and software for use in automotive, consumer, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications; semiconductors and software for use in healthcare and medical applications; semiconductors, sensors and software for use in wireless connectivity, battery management, smart grid, smart metering applications, engine control units (ECUs) and tire pressure monitoring systems (TPMS); microcontrollers, firmware, sensors, and radio frequency (RF) and analog circuitry devices for use with energy efficient wireless chargers; printed circuit boards, namely evaluation boards and reference design kits consisting of software for semiconductors, sensors and software; semiconductors and software for use in portable medical devices, diagnostic and patient monitoring devices, therapy devices, and medical imaging devices; computer application software, namely, computer software for use in applications for multimedia, graphics video, audio and numerically intensive computations; computer network switching software; computer convergence network software; computer network collaboration software; quality of service software; network access software; networking software for operation of chipsets; networking software for content processing; computer software, namely, firmware, applications and development tools, for use in network content processing; failover prevention software; stateful packet inspection software; stateful application inspection software; enterprise security software; wireless radio controller software; command line management software; voice over IP software; video over IP software; networking and security software for use with unified threat management equipment, gateways, integrated access devices, routers, switches, controllers, base stations, hubs, and security appliances; utility software for facilitating computer use at remote locations and for facilitating communications among mobile users over networks; computer software for providing security to remote users and for implementing computer, software, and network security measures for remote users; component-based software modeling tool featuring a graphical user interface, automatic code generators and built-in knowledge-base for use in the rapid design, development, implementation, verification and optimization of embedded applications; software for use in developing other software titles; downloadable, searchable electronic publications, namely reference manuals, user guides, application notes and product specifications on the subject of semiconductors, sensors and software; user manuals in electronic format supplied with the foregoing in the name of QUALCOMM INCORPORATED of 5775 Morehouse Drive, San Diego, CA 92121, United States of America.
