**SOUTH AFRICAN HERITAGE RESOURCES AGENCY****DECLARATION OF THE OHLANGE HERITAGE SITE, INANDA, ETHEKWINI, KWAZULU-NATAL AS A NATIONAL HERITAGE SITE**

By virtue of the powers vested in the South African Heritage Resources Agency, in terms of section 27 (5) of the National Heritage Resources Act (No. 25 of 1999) SAHRA hereby declares the Ohlange Heritage Site, Inanda, Ethekwini, Kwazulu-Natal as a National Heritage Site.

***Statement of Significance***

The site holds high historical significance in its association to the life and work of a person (John L Dube) and organisation (ANC) of importance in history, as well as its association to historical events (the first vote in the 1994 elections). The site is further significant in its association to the achievement of a particular period, being the first education institution for Africans by Africans and the coming of democracy.

The modest, colonial-styled original house of John Langalibalele Dube (the first ANC president), bears testimony to his life, work and aspirations to encourage his people to enter the modern world through education. As the first school established and directed by Africans, the site further testifies to the pioneering of African education in South Africa.

The Old School Hall, built by Dube, was the venue where the first democratically elected President, Nelson Mandela, cast his first vote in South Africa's first democratic elections in 1994. With this historical association, the Old School Hall, together with John L Dube's first home represents the full circle of the liberation struggle and the achievement of its aims – freedom and equality for all South Africans.

## SOUTH AFRICAN HERITAGE RESOURCES AGENCY

DECLARATION OF THE BUSHMANSKLOOF ROCK PAINTING LANDSCAPE,  
CLANWILLIAM, WESTERN CAPE AS A NATIONAL HERITAGE SITE

By virtue of the powers vested in the South African Heritage Resources Agency, in terms of section 27 (5) of the National Heritage Resources Act (No. 25 of 1999) SAHRA hereby declares the Bushmanskloof Rock Painting Landscape as a National Heritage Site.

**Statement of Significance**

*Bushmanskloof encompasses a Rock Painting Archaeological Landscape that bears graphic testimony to the complete social, political, spiritual and economic history of Stone Age hunter gatherers and Khoekhoe-speaking pastoralists, who inhabited the region for at least the past 10 000 years.*

*The first instances in the world of direct dating of rock art by Accelerator Mass Spectrometry was achieved from one of the rock painting sites on the reserve during the 1980s, and the exceptional state of preservation of material used at the painted sites provides rare opportunities for direct dating of the art. The rock paintings coupled with the existence of undisturbed, related archaeological deposits within numerous painted shelters, makes Bushmanskloof a landscape with exceptional archaeological research potential.*

*Numerous sites are characterised by painted imagery that exhibits outstanding clarity of colours and remarkably high levels of detail, along with a great volume of painted figures and a profusion of physically large figures and other, enigmatic imagery, making Bushmanskloof a Rock Painting Landscape of outstanding aesthetic significance.*

*The sites are located within a near-pristine natural environment with effective access control, and where scientific research is actively encouraged. Site visits are facilitated by trained guides, and benefit from regular conservation monitoring, as part of a conservation management plan that been implemented for more than a decade. Allowing for unique research into the efficacy of preventative heritage conservation measures.*

*Bushmanskloof therefore represents a unique combination of extraordinary aesthetic value and scientific research value, in a single, undisturbed landscape.*

## DEPARTMENT OF PUBLIC WORKS

NO. 1181

20 SEPTEMBER 2019

# THE SCOPE OF WORK FOR CATEGORIES OF REGISTRATION OF THE PROJECT AND CONSTRUCTION MANAGEMENT PROFESSIONS

## PREAMBLE

### 1. Background

The Council for the Built Environment (the CBE) is a statutory body established in terms of the Council for the Built Environment Act, 43 of 2000 (the CBE Act). The CBE is an entity of the Department of Public Works and Infrastructure (DPWI). The CBE is an overarching body, regulating the activities of the six councils for the following built environment professions (the CBEP): engineering, architecture, landscape architecture, quantity surveying, property valuation and project and construction management.

The CBE Act impels the CBE to, after consultation with the Competition Commission (CC) and in consultation with the Councils for the Built Environment Professions (CBEP), identify the scope of work for each category of registration (section 21 of the CBE Act). The consultation with the CC was conducted. The CBE is keen to continuously engage the CC on the process of regulating the built environment professions. The CBE will also seek collaboration with the CC on the development and communication of an advocacy position on the regulation on the built environment professions.

### 2. Ambit of scope of work and the regulation of the built environment professions

In the context of this process, scope means “*the range of work performed by a registered person in terms of a specific piece of legislation other than the legislation that created the councils for the professions, or the statutory duties which may be performed by a registered person.*”

The CBEP have *inter alia* the statutory mandate to accredit learning programs at educational institutions, register applicants in appropriate categories of registration, exercise oversight over the professional conduct of registered persons and express the intention to have the

CBEP regulate their respective professions. The identified scope of work for each category of registration is seen as a component of a framework for such regulation.

The CBE acknowledges the mandate of the CC to ensure full and free participation in the economy, as embodied in the preamble of the Competition Act, 89 of 1998. The need for an efficient, competitive economic environment, balancing the interests of workers, owners and consumers and focussed on development to benefit all South Africans is also recognised.

The regulation of professions should therefore not:

- (i) limit the range of suppliers available
- (ii) limit the ability of suppliers to compete
- (iii) reduce the incentive for suppliers to compete
- (iv) limit the choices and information available to customers

Factors (i) to (iv) above should be pro-actively addressed through information and advocacy processes.

## 6 SCOPE OF WORK PER CANDIDATE CATEGORY

A person who is registered in the category of candidate must perform work in the Project and Construction Management Profession only under the supervision and control of a professional of a category as prescribed.

## DEPARTMENT OF PUBLIC WORKS

NO. 1182

20 SEPTEMBER 2019

# THE SCOPE OF WORK FOR CATEGORIES OF REGISTRATION OF THE LANDSCAPE ARCHITECTURAL PROFESSION

## PREAMBLE

### 1. Background

The Council for the Built Environment (the CBE) is a statutory body established in terms of the Council for the Built Environment Act, 43 of 2000 (the CBE Act). The CBE is an entity of the Department of Public Works and Infrastructure (DPWI). The CBE is an overarching body, regulating the activities of the six councils for the following built environment professions (the CBEP): engineering, architecture, landscape architecture, quantity surveying, property valuation and project and construction management.

The CBE Act impels the CBE to, after consultation with the Competition Commission (CC) and in consultation with the Councils for the Built Environment Professions (CBEP), identify the scope of work for each category of registration (section 21 of the CBE Act). The consultation with the CC was conducted. The CBE is keen to continuously engage the CC on the process of regulating the built environment professions. The CBE will also seek collaboration with the CC on the development and communication of an advocacy position on the regulation on the built environment professions.

### 2. Ambit of scope of work and the regulation of the built environment professions

In the context of this process, scope means “*the range of work performed by a registered person in terms of a specific piece of legislation other than the legislation that created the councils for the professions, or the statutory duties which may be performed by a registered person.*”

The CBEP have *inter alia* the statutory mandate to accredit learning programs at educational institutions, register applicants in appropriate categories of registration, exercise oversight over the professional conduct of registered persons and express the intention to have the CBEP regulate their respective professions. The identified scope of work for each category of registration is seen as a component of a framework for such regulation.

The CBE acknowledges the mandate of the CC to ensure full and free participation in the economy, as embodied in the preamble of the Competition Act, 89 of 1998. The need for an efficient, competitive economic environment, balancing the interests of workers, owners and consumers and focussed on development to benefit all South Africans is also recognised.

The regulation of professions should therefore not:

- (i) limit the range of suppliers available
- (ii) limit the ability of suppliers to compete
- (iii) reduce the incentive for suppliers to compete
- (iv) limit the choices and information available to customers

Factors (i) to (iv) above should be pro-actively addressed through information and advocacy processes.
