HIGH ALERT: SCAM WARNING!!!

TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works* (*GPW*).

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*'. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

PROCUREMENT@GPW-GOV.ORG

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

GPW has an official email with the domain as @gpw.gov.za

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

GPW will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

Government Printing Works gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR.

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at www.qpwonline.co.za
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

EXTRAORDINARY GAZETTES

3. Extraordinary Gazettes can have only one publication date. If multiple publications of an Extraordinary Gazette are required, a separate Z95/Z95Prov Adobe Forms for each publication date must be submitted.

Notice Submission Process

- 4. Download the latest *Adobe* form, for the relevant notice to be placed, from the **Government Printing Works** website www.gpwonline.co.za.
- 5. The Adobe form needs to be completed electronically using Adobe Acrobat / Acrobat Reader. Only electronically completed Adobe forms will be accepted. No printed, handwritten and/or scanned Adobe forms will be accepted.
- 6. The completed electronic *Adobe* form has to be submitted via email to submit.egazette@gpw.gov.za. The form needs to be submitted in its original electronic *Adobe* format to enable the system to extract the completed information from the form for placement in the publication.
- Every notice submitted must be accompanied by an official GPW quotation. This must be obtained from the eGazette Contact Centre.
- 8. Each notice submission should be sent as a single email. The email **must** contain **all documentation** relating to a particular notice submission.
 - 8.1. Each of the following documents must be attached to the email as a separate attachment:
 - 8.1.1. An electronically completed Adobe form, specific to the type of notice that is to be placed.
 - 8.1.1.1. For National *Government Gazette* or *Provincial Gazette* notices, the notices must be accompanied by an electronic Z95 or Z95Prov *Adobe* form
 - 8.1.1.2. The notice content (body copy) **MUST** be a separate attachment.
 - 8.1.2. A copy of the official **Government Printing Works** quotation you received for your notice. (Please see Quotation section below for further details)

 - 8.1.5. Any additional notice information if applicable.

- 9. The electronic *Adobe* form will be taken as the primary source for the notice information to be published. Instructions that are on the email body or covering letter that contradicts the notice form content will not be considered. The information submitted on the electronic *Adobe* form will be published as-is.
- To avoid duplicated publication of the same notice and double billing, Please submit your notice ONLY ONCE.
- 11. Notices brought to **GPW** by "walk-in" customers on electronic media can only be submitted in *Adobe* electronic form format. All "walk-in" customers with notices that are not on electronic *Adobe* forms will be routed to the Contact Centre where they will be assisted to complete the forms in the required format.
- 12. Should a customer submit a bulk submission of hard copy notices delivered by a messenger on behalf of any organisation e.g. newspaper publisher, the messenger will be referred back to the sender as the submission does not adhere to the submission rules.

QUOTATIONS

- 13. Quotations are valid until the next tariff change.
 - 13.1. Take note: GPW's annual tariff increase takes place on 1 April therefore any quotations issued, accepted and submitted for publication up to 31 March will keep the old tariff. For notices to be published from 1 April, a quotation must be obtained from GPW with the new tariffs. Where a tariff increase is implemented during the year, GPW endeavours to provide customers with 30 days' notice of such changes.
- 14. Each quotation has a unique number.
- 15. Form Content notices must be emailed to the eGazette Contact Centre for a quotation.
 - 15.1. The *Adobe* form supplied is uploaded by the Contact Centre Agent and the system automatically calculates the cost of your notice based on the layout/format of the content supplied.
 - 15.2. It is critical that these *Adobe* Forms are completed correctly and adhere to the guidelines as stipulated by **GPW**.

16. APPLICABLE ONLY TO GPW ACCOUNT HOLDERS:

17. APPLICABLE ONLY TO CASH CUSTOMERS:

- 17.1. Cash customers doing **bulk payments** must use a **single email address** in order to use the **same proof of payment** for submitting multiple notices.
- 18. The responsibility lies with you, the customer, to ensure that the payment made for your notice(s) to be published is sufficient to cover the cost of the notice(s).
- 19. Each quotation will be associated with one proof of payment / purchase order / cash receipt.
 - 19.1. This means that the quotation number can only be used once to make a payment.

Notice	The draft regulation provides for the detail requirements that must be contained in an infringement notice, details of the infringer, time periods for service and other matters relating to the notice. The option to elect to appear in court has been moved later in the AARTO process. Persons who wish to make representations must submit an AARTO 08 form. The option to elect to appear in court

	may be exercised if the representation is rejected and the appeal to the Tribunal was not successful. The option to present a matter to court has therefore not been removed from the AARTO process but streamlined to ensure that only matters that could not be finalised in the representations process and the appeal tribunal process are eligible for court procedures. This principle is in line with section 2(c) of the Act that states that one of the objects of the act is to alleviate the burden on the courts.

17(5). Infringement Notice

5. Nominating the Driver or Person in control

The provisions of section 17(5) of the Act were amended to change the failure of the owner of a motor vehicle to collect the information on the driver of the vehicle, from an offence to a liability on the owner. If an owner fails to nominate the driver, such owner remains liable for the penalty and demerit points. See draft regulation 18 for further information on allocation of demerit points.

An owner must also ascertain the email and business address of the driver. This is in line with the definition of *electronic service* in section 1 of the act as well as the Electronic Communications and Transactions Act, 2002 that allows for electronic service instead of physical service.

Owners are not required to pay penalties for drivers where such drivers are nominated for the infringements. The aim of this provision is to ensure that the driver that is responsible for the commission of an infringement is nominated by the owner. This will ensure accountability of the driver for the offence or infringement. In the case where drivers are not nominated the owner will retain liability.

	Nomination of drivers is free.
18.	6. Representations
Representations	The normal representation process has not been amended from the previous regulation. Provision is made for the re-issue of infringement notices in terms of section 18(1)(b) of the Act where an alleged infringer receives such notice after the 40-day service period. 34. Regulations 17. Penalties payable by Issuing Authorities and the Authority **Points** 24. 18. Demerit Points demerit system The allocation of demerit points is addressed by this provision. One demerit point is equal to a three-month period for purposes of disqualification, suspension or reduction of points. If the maximum points are exceeded, a driving licence, operator card or vehicle licence will be disqualified/suspended for a period of three months for every point exceeding the maximum points. The section of the Act provides for three different types of entities to be allocated demerit points -Natural persons are owners of private vehicles that are licensed in the name of a person and not a legal entity - a natural person will be allocated demerit points against the driving licence or ID document of the person - a maximum of 15 points are allowed; a learner driver is allowed a maximum of 6 points. Private owners will not receive any demerit points against a vehicle, the points are allocated to the driver record. Operators are owners of taxis, buses, breakdown vehicles and goods vehicles with a GVM above 3 500 kg (see reg 265 of the NRT Regulations) – maximum points for a vehicle of an

operator is 15 points. The proxy nominated by the operator will receive the notices. If demerit points are allocated, it will be allocated against the operator card of the vehicle and not against the proxy's driver record. The company receives the demerit points, not the person. Operators are punished not vehicles.

• Juristic persons who are not operators (owner of a vehicle that is licensed in the name of a company, close corporation, trust that is not an operator) – typically pool vehicles, company bakkies, representative vehicles, etc.) – the maximum points for the licence disc of a juristic person who is not an operator is 15 points. The proxy nominated by the juristic person will receive the notices. If demerit points are allocated, it will be allocated against the vehicle licence and not against the proxy's driver record. The company receives the demerit points, not the person. Juristic persons are punished not vehicles.

The reduction of demerit points is addressed by regulation 18(7) – One demerit point will be subtracted for every three months that a person does not accrue any further demerit points.

The regulation also provides for rehabilitation programmes. If a person completes a rehabilitation programme, four demerit points will be deducted from the driver record. This will allow a person to reclaim his/her driving licence and allow him/her to drive again. This is only available to a driver once every 12 months.

Drivers with foreign driving licences will not receive demerit points but will not be allowed a discount.

33. Access to information

19. Access to Demerit Point Information

Employers may access the demerit point information of the drivers in their employ. See Schedule 2 for the costs for the access to information.

31. Electronic service

The Electronic Communications Act, 2005 and the Electronic Communications and Transactions Act, 2002 already catered for electronic service since 2002. The Acts provide for electronic communication to be used and is copied here for ease of reference. The Act applies to all acts that still require older methods of service. The AARTO Act was specifically updated to accommodate modern technology. Communication by electronic message is also available to the infringers who wish to communicate with the RTIA and issuing

authorities. See regulation 34.

"electronic communications" means the emission, transmission or reception of information, including without limitation, voice, sound, data, text, video, animation, visual images, moving images and pictures, signals or a combination thereof by means of magnetism, radio or other electromagnetic waves, optical, electromagnetic systems or any agency of a like nature, whether with or without the aid of tangible conduct, but does not include content service:

Electronic Communications and Transactions Act, 2002

- **19.** Other requirements.—(1) A requirement in a law for multiple copies of a document to be submitted to a single addressee at the same time, is satisfied by the submission of a single data message that is capable of being reproduced by that addressee.
- (2) An expression in a law, whether used as a noun or verb, including the terms "document", "record", "file", "submit", "lodge", "deliver", "issue", "publish", "write in", "print" or words or expressions of similar effect, must be interpreted so as to include or permit such form, format or action in relation to a data message unless otherwise provided for in this Act.
- (3) Where a seal is required by law to be affixed to a document and such law does not prescribe the method or form by which such document may be sealed by electronic means, that requirement is met if the document indicates that it is required to be under seal and it includes the advanced electronic signature of the person by whom it is required to be sealed.
- (4) Where any law requires or permits a person to send a document or information by registered or certified post or similar service, that requirement is met if an electronic copy of the document or information is sent to the South African Post Office Limited, is registered by the said Post Office and sent by that Post Office to the electronic address provided by the sender.

18(1)(b). Representations	32. Re-service of documents. Provision is made for the re-issue of infringement notices in terms of section 18(1)(b) of the Act where an alleged infringer receives such notice after the 40-day service period.
34. Regulations	33. Manner of application, appeal, notification, submission, or enquiry This provision allows for various options of communication. This improves on the original legislation where all communication had to be submitted by registered mail.
34. Regulations	34. Suspect Infringement Notices, Inconclusive Postal Addresses, Returned mail and Cancellation of Notices and Submissions

	This provision allows for errors to be corrected and notices to be
	cancelled in the case where there are conflicting data on the notice
	and the eNaTIS system.
	An example of such a scenario is where a person was charged for
	driving a goods vehicle without a fire extinguisher in terms of
	regulation 260 of the Regulations, but regulation 260 only requires
	buses and minibuses used for reward to carry a fire extinguisher.
	The notice may then be cancelled by the Registrar.
13(1)(dA)	35. Infringement Penalty Levy
	This levy was approved as part of the 2019 Amendment Act. The principle is that infringers will pay for the administration of the system. If an infringer makes a successful representation, the levy would not be payable.

Schedule 3 1.

The amended version of Schedule 3 contains 12 columns.

The Rand value of a Penalty Unit has been changed to R 100-00 from R 50-00. There has not been any increases in the AARTO penalties since 2008.

The current maximum admission of guilt amount in the Criminal Procedure system is R 5 000 – 00 with no provision for discounts.

The new proposed AARTO penalties will have a maximum penalty amount of R 3 750-00 with a 50% built-in discount for early payment which results in a maximum penalty of R 1 875-00

Column 7 is an amendment to the original schedule and provides for demerit points for operators and juristic persons who are not operators if they fail to nominate a driver for camera related infringements and parking infringements.

Columns 10 and 11 set out the operator charges and column 12 indicates the alternative charges to the main charges.

The charges for speeding infringements and offences have been redrafted to cater for smaller increments between charges. This results in a fairer system.

Overload charges have been subdivided for small vehicles up to 3 500 kg GVM and heavy vehicles with a GVM exceeding 3 500 kg to allow for differentiated charging.

The allocation of demerit points will be introduced in three phases to ensure road users are gradually introduced to the implications of the points demerit system. This will avoid a situation where huge volumes of vehicles are suspended, and numerous drivers are disqualified shortly after implementation of the system. Such could have a negative impact on the economy as well as the social wellbeing of road users.

At the same time, it is necessary to change the behaviour of drivers and create a safer road environment. The phased approach seeks to create this balance.

Phase 1 will implement demerit points for speeding, dangerous overtaking, and other hazardous driving behaviour such as failing to stop at traffic lights and stop signs, other road sign infringements, as well as roadworthy offences and infringements for faulty brakes, lamps, etc. It will also include offences and infringements for failing to drive with a valid driving licence or professional driving permit, as well as failure to have a roadworthy certificate for a vehicle.

Phase 2 will be introduced once the effect of the

allocation of demerit points have been evaluated by the Agency/Authority. Demerit points will be allocated to offences and infringements of economic significance and includes the protection of roads and bridges through overload control, cross border road transport permits and operating licences in terms of the national land transport legislation. Demerit points will also be allocated to overloaded vehicles because of tyre and manufacturer specification transgressions, and offences and infringements relating to the transportation of dangerous goods.

Vehicles that do not comply with the requirements for maximum dimensions and projections will also be allocated demerit points in phase 2.

Failure to pay licence fees will also be added to the list of offences and infringements that carry demerit points.

Phase 3 will add offences and infringements relevant to the failure to update address, proxy and other relevant information of owners, operators, drivers, cross-border road transport permit holders and operating licence holders and any other offences and infringements identified during phases 1 and 2 that the Minister through the Authority determine warrant the allocation of demerit points.

All offences and infringements prosecuted by means of cameras and parking related offences and infringements that are charged in terms of the provisions of section 73 of the National Road Traffic Act, 1996 (owner presumption - due to the driver being unknown at the time of offence or infringement), will carry demerit points for the vehicle of the corporate owner, where such owner fails to nominate the driver in terms of section 17(5) and regulation 5 of the AARTO Act and

Regulations. This will encourage the owners of corporate vehicles to nominate the drivers who commit offences and infringements instead of paying the notices in the corporate body's name and failing to identify the driver who committed the offence or infringement.

Driving without a driving licence and operating a motor vehicle without it being registered and licenced are classified as offences. This principle also applies to failure to have an operator card, cross-border road transport permit or operating licence. These documents are extremely important and in terms of section 25 of the AARTO Act are suspended when the maximum of 15 demerit points is exceeded.

Road traffic sign infringements where different user types such as heavy motor vehicle drivers, light motor vehicle drivers, pedal cyclists and pedestrians can transgress a road sign, different penalties, and demerit points, if applicable, are set for each user type.

Schedule 3 is linked with the National Road Traffic legislation (NRTA) and will in future also be linked to the National Land

Transport legislation (NLTA) and the Cross-border Road Transport legislation (CBRTA). Any future amendments to the NRTA, NLTA or CBRTA or the regulations made in terms of these three acts must be changed in Schedule 3 of AARTO and published simultaneously with the amendments. If the amendments are published, and Schedule 3 is not updated, the legislation would be unenforceable until Schedule 3 is updated.

1. Definition of Schedule 4 – SAPS issuing authority

Memorandum 2

Explanatory Memorandum on Schedule 3 Demerit points and penalties

The AARTO draft Regulations, including Schedule 3, are published for comment. The draft regulations were published for comment in October 2019, but the publication did not include Schedule 3 of the Regulations, which deals with the demerit points and penalty units. Many comments were received on various aspects of the legislation and numerous publications by stakeholders were issued in the course of the last few months.

Unfortunately, many of the articles contained conflicting and sometimes incorrect information. To provide the public with the best information and to allow for a proper understanding of the system the following explanation is provided on the AARTO system and the demerit points.

1. THE AARTO SYSTEM - IMPLEMENTATION AND GENERAL INFORMATION

The Administrative Adjudication of Road Traffic Offences Act, 1998 (AARTO) was accepted by Parliament in 1998. Amendment Acts were approved in 1999, 2000, 2002 and 2019.

The Act was implemented on 1 July 2008 in Tshwane and 1 November 2008 in Johannesburg.

The legislation is currently in force in the Tshwane and Johannesburg Metro area.

The Act is due for a national roll-out on 1 July 2021.

The allocation of demerit points will be introduced in three phases to ensure road users are gradually introduced to the implications of the demerit point system. This will avoid a situation where many vehicles are suspended, and numerous drivers are disqualified shortly after implementation of the system. This will have a huge impact on the economy as well as the social wellbeing of road users.

At the same time, it is necessary to change the behaviour of drivers and create a safer road environment. The phased approach seeks to create this balance.

Phase One will allow for demerit points for speeding, dangerous overtaking, and other hazardous driving behaviour such as failing to stop at traffic lights and stop signs, other road sign infringements, as well as roadworthy offences and infringements for faulty brakes, lamps, etc.

It will also include offences and infringements for failing to drive with a valid driving licence or professional driving permit and failure to have a roadworthy certificate for a vehicle.

Phase Two will be introduced once the effect of the allocation of demerit points have been evaluated by the Road Traffic Infringement Agency.

Demerit points will be allocated to offences and infringements of economic significance and includes the protection of roads and bridges through overload control, cross border road transport permits and operating licences in terms of the national land transport legislation. Demerit points will also be allocated to overloaded vehicles because of tyre and manufacturer specification transgressions, and offences and infringements relating to the transportation of dangerous goods.

Vehicles that do not comply with the requirements for maximum dimensions and projections will also be allocated demerit points in phase two. Failure to pay licence fees will also be added to the list of offences and infringements that carry demerit points.

Phase Three will add offences and infringements relevant to the failure to update address, proxy and other relevant information of owners, operators, drivers, cross-border road transport permit holders and operating licence holders and any other offences and infringements identified during phases one and two that the Minister through the Agency determine warrant the allocation of demerit points.

All offences and infringements prosecuted by means of cameras and parking related offences and infringements that are charged in terms of the provisions of section 73 of the National Road Traffic Act, 1996 (owner presumption - due to the driver being unknown at the time of offence or infringement), will carry demerit points for the vehicle of the corporate owner, where such owner fails to nominate the driver in terms of section 17(5) and regulation 5 of the AARTO Act and Regulations. This

will encourage the owners of corporate vehicles to nominate the drivers who commit offences and infringements instead of paying the notices in the corporate body's name and failing to identify the driver who committed the offence or infringement.

Driving without a driving licence and operating a motor vehicle without it being registered and licences are classified as offences. This principle also applies to failure to have an operator card, cross-border road transport permit or operating licence. These documents are extremely important and in terms of section 25 of the AARTO Act are suspended when the maximum of 15 demerit points is exceeded.

Road traffic sign infringements where different user types such as *heavy motor* vehicle drivers, light motor vehicle drivers, pedal cyclists and pedestrians can transgress a road sign, different penalties, and demerit points, if applicable, are set for each user type.

Schedule 3 is linked with the National Road Traffic legislation (NRTA) and will in future also be linked to the National Land Transport legislation (NLTA) and the Cross-border Road Transport legislation (CBRTA). Any future amendments to the NRTA, NLTA or CBRTA or the regulations made in terms of these three acts must be changed in Schedule 3 of AARTO and published simultaneously with the amendments.

2. THE ADMINISTRATIVE SYSTEM

The AARTO system is used for traffic offences where an alleged offender has the option of paying a fine.

In the AARTO system, an offender is referred to as an infringer and a fine is referred to as a penalty.

Section 341-notices and section 56-notices in terms of the Criminal Procedure Act (CPA) are replaced by the AARTO 01, 02, 03 and 03a infringement notices, as well as an AARTO 31 for parking infringements. No section 341-or 56-notice may be issued where AARTO is in force. See section 35 of the Act.

The Road Traffic Infringement Authority (RTIA) has been established to administer the system. The sole purpose of the Authority is to finalise traffic cases and promote

road safety. The Authority employs representation officers who are responsible for all representations for infringements. The 2019-amendment act changes the reference from the Road Traffic Infringement Agency to the Road Traffic Infringement Authority.

The 2019-amendment changes the process and removes the initial option to *elect* to appear in court. A person may submit a representation to request a matter to be withdrawn and provide the reasons for the request. If the representation is rejected by the RTIA, a person may appeal the decision to the Appeals Tribunal. If the appeal is unsuccessful, the person may take the matter to a municipal court to be adjudicated. The process therefore does not remove the option to appear in court, but the option is the last process allowed to ensure that one of the objectives of the act, namely, to alleviate the burden on the courts, is adhered to. Matters such as incorrect service and nomination of drivers are then addressed outside the court system.

Public prosecutors do not attend to representations and reductions of penalties in the AARTO system. A prosecutor only handles matters classified as road traffic offences in Schedule 3 of the AARTO Regulations.

The legislation provides for various administrative processes to finalise a specific case.

The process *prescribed* in the legislation is:

- An infringement notice AARTO 01, 02 or 03, is issued with a penalty and demerit points.
- A levy payable to the RTIA is also included in the notice.
- If a person pays his/her penalty within the first 32 days after he has received
 it, he will be entitled to a discount of 50% of the penalty.
- If a person ignores the notice, he/she will receive a courtesy letter AARTO
 12 that again allows him/her to pay the penalty, no discount is allowed at this stage and an administrative fee is added to the amount.
- If a person ignores the courtesy letter, an enforcement order AARTO 13 is issued. Administrative fees will again be added to the amount to be paid. An

enforcement order does not prescribe and will remain on the National Road Traffic Offences Register until it is addressed by the infringer.

An eNaTIS block is generated against the infringer. The outstanding penalties
are linked to the motor vehicle licence, operator card and the person's driving
licence card will be refused until he/she pays the penalty or successfully
requests a revocation of the enforcement order.

Offences are adjudicated by the courts in the criminal justice system. The offences are among others, drunken driving, reckless driving, severe overloading, severe speeding and driving while disqualified due to the number of demerit points.

The owner is compelled to keep information on persons driving his/her vehicles.

Section 17(5) of the AARTO Act makes the owner liable if such owner does not obtain the following particulars of any person who drives or is in charge of his vehicle (the vehicle is parked – person who drove the vehicle to that point):

Full names

Residential address

Postal address

A copy of the person's acceptable identification (ID or driving licence card).

Business address

Email address

The owner is also presumed to have driven the vehicle if the driver is not known to the authorities – section 73 of the National Road Traffic Act, 1996 applies.

The original AARTO Act allows for service by registered mail. The 2019Amendment Act also allows for service by electronic mail.

The presumption in section 30 of the Act states that 10 days after posting a notice by registered mail it is presumed a person has received it. This means that a person must provide evidence by means of an affidavit that he/she has not received a notice by way of an affidavit.

Section 18 of the Act is amended in the 2019-amendment to allow the issuing authorities to re-issue a notice that was not served in the 40 days required if a

representation is made in this regard. The notice may be served up to 180 days after the infringement was committed.

Drivers must complete AARTO 27 forms to allow their employers to access to their demerit points. The form is valid for a 12-month period.

Companies must nominate the drivers who are responsible for infringements on an AARTO 07 form. The issuing authority must then withdraw the notice against the company and charge the driver for the infringement. If the nomination is not successful, the notice will be re-issued to the company. A driver who is nominated may not re-nominate and the initial nomination must contain the correct driver information.

Representations are made on AARTO 08 and may not include a request for a reduction of the penalty.

Once AARTO is implemented in the entire country the penalties for infringements will be the same everywhere.

AARTO is aimed at changing driver behaviour to ensure safer roads. It also places a duty on owners of vehicles to control the use of their vehicles.

3. THE POINTS DEMERIT SYSTEM

The AARTO Act provides for a system whereby a person, operator or juristic person who is not an operator, pays the penalty and incur points when a traffic infringement is committed.

The demerit points are allocated to the operators and owners of motor vehicles. If a vehicle is suspended it may not be sold or used on a public road. If an operator or juristic person does sell a vehicle or scrap or export such vehicle, the demerit points will remain against the record of the operator/juristic person and be allocated to the next vehicle the company purchases. Vehicles are not punished by the system, the operator/juristic person is held responsible for the use of its vehicle.

Provisions for a *juristic person who is not an operator* was added in 2019. The term refers to companies, close corporations, trusts, etc. that have motor vehicles that are licensed in the juristic person's name, but do not require operator cards. Typically pool vehicles, delivery vehicles, vehicles of representatives, etc. fall within

this category. The licence disc of these vehicles will be suspended if the vehicle accrues more than 15 demerit points.

The offender/infringer receives a penalty, and in addition to the penalty, he/she also receives the demerit points allocated in Schedule 3 to the specific infringement or offence. If the demerit points exceed the maximum points (15 points), a person, operator or juristic person who is not an operator will be disqualified from driving or using the vehicle for a period of time (3 months for every point exceeding 15 points).

- The points for the offences and infringements range between 6 and 1.
- The maximum points for a person or operator card or a licence disc for a juristic person who is not an operator are 15 Points.
- The maximum points for a learner driver are 6 points.
- The time value of each point is three months for disqualification or reduction purposes.

If demerit points are allocated to a person or vehicle record and no further demerit points are accrued in three months after receiving the previous demerit point, a reduction of 1 point on the total number of demerit points will be recorded on the system.

A person's driving licence card and the operator card of a motor vehicle must be handed in for the disqualification period.

Upon a third disqualification, the licences will be cancelled. A person must apply for a new learner's licence and driving licence once the disqualification period is over.

Approval for the ordering of forms and books must be obtained in writing from the Agency prior to the placing of orders. South African Police Service

- Section 1 of the Act read together with section 1 of National Road Traffic Act, 93 (Act No. 93 of 1996) both as amended, define members of The South African Police Service (SAPS) as authorised officers. In terms of section 17 (1) of the Act, authorised officer must serve infringement notices to the infringers. Accordingly, this schedule aims to regulate the administrative services that accompany the full AARTO process following the issuance of infringement notice by members of the SAPS in line with their responsibilities within the Act and NRTA Act.
- 2. This schedule therefore establishes co-operation between the Authority, the SAPS and provincial and municipal issuing authorities to ensure that the prescribed and administrative functions relating to an Issuing Authority in respect of infringement notices issued by members of the SAPS are processed as prescribed by the provisions of the Act.
- In order to give effect to the above, all SAPS police stations will be linked with its nearest provincial or municipal issuing authority, regardless of provincial and municipal boundaries.
- 4. The functions of the Authority, the SAPS and provincial and municipal issuing authorities in this regard shall be as follows:
 - 4.1 Functions of the Authority:
 - Ensure that the identified members of the SAPS are registered on eNaTIS;
 - 4.2 Functions of the SAPS:
 - a) Provide training to members of the SAPS with regard to the AARTO Act, AARTO regulations, completion of AARTO forms and the processes and procedures relating to the duties of authorised SAPS officers as prescribed in Standard Operating Procedure No. 4.2: South African Police Service Officers:

- Ensure that all AARTO Notice Books provided by the provincial and municipal issuing authorities to which they are linked, are collected at the time and place as agreed to by the SAPS station and its linked issuing authority;
- Ensure that the identified members of SAPS are issued with the required AARTO Notice Books in accordance with the registration detail provided by its linked issuing authority;
- d) Issue the prescribed notices in accordance with the Regulations under the AARTO Act:
- e) Submit the issued notice forms at its linked issuing authority in concurrence with the time frames stipulated in the relevant SOPs; and
- f) To issue, in consultation with the Issuing Authorities, internal directives to its members to regulate and monitor the day-to-day administration of the SAPS functions.
- 4.3 Functions of linked provincial or municipal issuing authorities :
 - Supplying the SAPS stations to which they are linked with the prescribed AARTO Notice Books necessary for members of the SAPS to perform their functions as authorised officers; and
 - b) The capturing and processing of notices issued by members of the SAPS and all other related issuing authority functions on the NCR.

5. Financial Arrangements

- 5.1 The Authority shall perform its functions as per 4.1 above, at its own cost:

SCHEDULE

RESERVE DETERMINATION OF WATER RESOURCES FOR THE CROCODILE WEST AND MARICO CATCHMENT IN TERMS OF SECTION 16(1) AND (2) OF THE NATIONAL WATER ACT, 1998 (ACT NO. 36 OF 1998)

1. DESCRIPTION OF WATER RESOURCE

1.1 The Reserve is determined for all or part of every significant water resource within the catchments of the Crocodile (West) and Marico, as set out below:

Water Management Area: Limpopo

Drainage Region: A21 to A24, A31 & A32 Tertiary Drainage Region River(s): Crocodile (West) and Marico river systems

- 1.2 The Minister has in terms of section 12 of the National Water Act, 1998 (Act No.36 of 1998) ("the Act"), prescribed a system for classifying water resources by issuing Government Notice No. R. 810, published in Government Gazette No. 33541 dated 17 September 2010. In terms of section 16(1) of the Act, the Minister must, as soon as reasonably practicable after the class of all or part of a water resource has been determined, by Notice in the Gazette, determine the reserve for all or part of that water resource.
- 1.3 The Minister, in terms of section 16(3) of the Act, proposes, for the purpose of section 16(1) of the Act, the following Reserves for the Crocodile West and Marico catchments.
- 2. PROPOSED RESERVE DERMINATION AS REQUIRED IN TERMS OF SECTION 16(1) AND (2) OF THE NATIONAL WATER ACT, 1998

A summary of the quantity component for the Rivers which include the EWR (**Figure 1**) and the BHN in terms of section 16(1) of the Act for the Crocodile (West) and Marico catchment is set out in Section 4. **Table 4.1 & 4.2** includes the results of the EWR sites and the biophysical nodes. A summary of the quality component for the River at EWR sites in terms of section 16(1) of the Act for the Crocodile (West) and Marico catchments is set out in **Table 5.1-5.24**.

A summary of the groundwater contribution to the Reserve for Water Quantity in terms of section 16(1) of the Act for the Crocodile (West) and Marico catchment is set out in **Table 6.1**.

3.2. Definitions

Baseflow is a sustained low flow in rivers during dry or fair weather conditions, but not necessarily all contributed by groundwater; and includes contribution from delayed interflow and groundwater discharge.

EWR (Ecological Water Requirements) refers to the flow patterns (magnitude, timing and duration) and water quality needed to maintain a riverine ecosystem in a particular condition.

Recharge the addition of water to the zone of saturation, either by downward percolation of precipitation or surface water and/ or the lateral migration of groundwater from adjacent aquifers.

Reserve the quantity and quality of the water required to satisfy the basic human needs by securing a basic water supply and to protect the aquatic ecosystem in order to secure ecologically sustainable development and use of the relevant water resource.

4. SURFACE-WATER - QUANTITY COMPONENT FOR RIVERS

Proposed results for the Reserve determination and ecological categorisation for the Crocodile (West) and Marico catchment, where the Reserve amounts are expressed as a percentage of the NMAR for the respective catchments (cumulative) in terms of section (16)(1).

7. GROUNDWATER - QUALITY COMPONENT

Groundwater quality per quaternary catchment was determined from the data sets obtained from the Water Management System of the Department of Water and Sanitation. Groundwater quality was defined by the water quality specifications in Table 7.1 below.

Table 7.1: Water Quality Specifications

Chemical Parameter		Target Water	Quality Ranges 1)

¹⁾ Ref: Quality of Domestic Water Supplies, Volume 1: Assessment Guide, 2nd Ed.1998. Water Research Commission Report No: TT 101/98. Pretoria, South Africa.

NOTE:

- Class 0 This is ideal water quality, suitable for lifetime use, with no adverse health effects on the user. This class is essentially the same as the target water quality range in the 2nd edition of the *South African Water Quality Guidelines for Domestic Use* (DWAF, 1996).
- Class I Water in this class is safe for lifetime use, but falls short of the ideal water quality in that there may be instances of adverse health effects, but these are usually mild, and overt health effects are almost sub-clinical and difficult to demonstrate. Water in Class I does not cause health effects under normal circumstances. Aesthetic effects may, however, be apparent.
- Class II Water in this class is defined as that where adverse health effects are unusual for limited short-term use. Adverse health effects may become more common particularly with prolonged use over many years, or with lifetime use. This class represents water suitable for short-term or emergency use only, but not necessarily suitable for continuous use over a lifetime.
- Class III This water has constituents in a concentration range where serious health effects might be anticipated, particularly in infants or elderly people with short-term use, and even more so with longer term use. The water in this class is not suitable for use as drinking water without adequate treatment to shift the water into a lower and safer class.

Based on data obtained from the National Groundwater Archive. Values reported are the statistical median of each parameter.

A total of 6 quaternary catchments do not have groundwater chemistry data, and are as highlighted in red in Table 7.2 above. The ambient groundwater quality was extrapolated from neighbouring quaternary catchments with a similar geology because geology has a huge bearing on the water quality of an area.

^aRef. Quality of Domestic Water Supplies, Volume 1: Assessment Guide, 2nd Ed.1998. Water Research Commission Report No: TT 101/98. Pretoria, South Africa (Set for a Class 1).

Where a difference in the water quality values for the ambient groundwater quality and basic human needs was found, the lesser or more protective value was selected for the groundwater quality Reserve, the value was scaled up by 10 per cent provided that the value does not exceed the BHN Reserve.
