## HIGH ALERT: SCAM WARNING!!!

### TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works (GPW)*.

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

[PROCUREMENT@GPW-GOV.ORG](mailto:PROCUREMENT@GPW-GOV.ORG)

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

*GPW* has an official email with the domain as [@gpw.gov.za](mailto:@gpw.gov.za)

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

*GPW* will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

*Government Printing Works* gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

## Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

### How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at [www.gpwonline.co.za](http://www.gpwonline.co.za)
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

**Subject:** Monl Frames Solid Wall Building System

**Certificate holder:** Monl Frames Steel (Pty) Ltd

**Description:** Monl Frames Solid Wall Building System consists of cold rolled light gauge steel frames that are designed in accordance with **SANS 517**. The frames are usually between 2600 mm to 2800 mm high with studs at 600 mm centres and 1 200 mm centres Noggings or as determined by the design engineer. The frame is manufactured from galvanised steel-lipped channel profile with a size of 89 mm x 41 mm x 11 mm x 0.8 mm thick. The steel frame members have a graded strength of 550 MPa minimum yield strength with a Z275 coating.

The foundations and the floor slab are conventional raft foundations with thickened-edged beams and are always the responsibility of a registered competent person.

The external wall frames are clad with a 1 mm thick expanded metal grid with 4 mm x 8 mm openings to each face which acts as a plaster key. The wall frames are then finished with the first layer of a 15 mm thick plaster and followed by a 20 mm thick plaster on the outer face and a 24 mm thick Cellulose Light-weight Concrete (CLC) plaster on the inner faces. The cladding encapsulates Cellulose Light-weight Concrete (CLC) fibre core infill of 89 mm thick with a density of 900 kg/m<sup>3</sup> and a concrete strength of 6 Mpa. The overall thickness of the external composite wall is 150 mm thick.

The internal walls are constructed similarly to the external walls with the exception that both faces of walls are finished with a 15 mm thick Cellulose Light-weight Concrete plaster applied to the expanded metal grid. The overall thickness of the internal composite wall is 121 mm thick.

Agrément Certificate 2023/644

- Subject:** Tri-Fluid Spray System
- Certificate holder:** Fire Design House (Pty) Ltd
- Description:** Tri-Fluid Spray System is a deluge liquid extinguishant spray system that provides fire protection to Class A combustible materials in storage racks. The system is capable to extinguish Class A fires or suppress and control fires of goods with a classification of Category 1 to Category 3, with reference to **SANS 10287**. The following describes the working of the system and its main components:

The tubing system is a wet tubing system up to the storage racks requiring protection, and dry tubing in the storage racks from the activation assembly further on.

A storage tank with a capacity of not less than 40 000 litres and not more than 60 000 litres that contains an extinguishing liquid consisting of 99.9% of water and 0.1% surfactant called Silv-ex Plus to increase the efficiency of the water to suppress, control or extinguish fire in Class A combustible materials. The tank complies with **NFPA 22: Standard for water tanks for private fire protection**.

A dual pump supply provides the fire suppression system with an extinguishant. The dual pump supply is electronically configured in various configurations. The primary pump will also act as a jockey pump that maintains the designed static pressure.

A pressure switch continuously monitors the in-tube pressure and should the in-tube pressure drop below a pre-set value the active pump shall kick in to bring the static pressure back to the designed pressure. If any in-rack assembly has activated, this pressure setting shall not be achieved, and it shall not be possible to lift the system pressure to the designed static pressure and the pump shall keep running to supply the activated assemblies with extinguishant.

The Tri-Fluid Spray System is also provided with a fire pump connection and an in-line pressure control valve, which is also one-way, ensuring that water is pumped through the system to the designated area, without creating backpressure or other problems.

The spray assembly inside the racks consists essentially of an activation strapping that is installed to cover all four sides of the perimeter of the rack. The system activates within seconds after the flame impingement onto the polymeric strap that holds the spring-loaded valve in a closed position. On flame impingement, the polymeric strap melts and releases the spring-loaded valve to open automatically and feed through the nozzles onto the goods. The time from the valve activation until the water sprays from the nozzles is less than 10 seconds.

A local alarm is triggered once the system activates. Additional alarm units are installed at designated areas. The alarm sound is at 116 decibel units and simultaneously activates a stroboscopic light combination which comply with **BS &EN 54-3**.

The main supply is pumped by two pumps, equal in capacity, in flow, and pressure. The drop in pressure of the system causes the main supply pumps to start automatically to feed the system. Should the first (primary) pump fail to start, the pressure will drop to a point at which the second pump starts.

The nozzles spray the extinguishant in a manner that the liquid is sprayed onto the goods stored in the racks below. Though the nozzles are aiming downwards some water particles would wet goods immediately above the nozzles.

Tri-Fluid Spray System is designed to protect up to 0.8 m rack width and simultaneously protect an aisle of up to 3 m wide. The maximum in rack storage height that can be protected by a single spray assembly is 2.4 m.

Every rack shall be protected individually whether in solid shelving or slatted shelving. The other provision is that a spray assembly cannot protect a rack more than 2.5 m in height.

The installation of all fittings, tubing and other items shall be as per the design.

**DEPARTMENT OF TRANSPORT**  
**GENERAL NOTICE 2010 OF 2023**

**Another CMTP Inspired Legislative Reform initiative: Maritime Stakeholder's Consultation**

The National Ports Act 2005 (Act No. 12 of 2005) is almost 20 years since it was enacted into law in 2005. The Department of Transport is releasing this initial draft of the National Ports Amendment Bill, 2023 for purposes of maritime stakeholder's consultation before the Bill is processed for Cabinet's consideration. This consultation is compulsory prior the further processing of the Bill to next stages.

In drafting these proposed amendments, we have taken into consideration among others; the implementation lessons learnt since enactment; the international and domestic policy developments and performance trends impacting on South African ports; the relevant provisions of the Comprehensive Maritime Transport Policy (CMTP) in particular the CMTP vision 2030 which envisages South Africa to grow into an International Maritime Centre.

The other proposed changes were necessary in the aftermath of the caving-out of Ports Regulator provisions to the Single Transport Economic Regulator Bill. We have had to realign the stakeholder consultation provisions acknowledging the unavoidable change in status of the Authority into being a Comprehensive Port Authority.

Some of the proposed amendments address areas that have been problematic in implementing e.g. corporatisation, etc. Lastly the Bill incorporates some of the recent pronouncements relating to the future reporting and governance arrangements of transport state-owned entities and upgrades the Ports Authority into being a Comprehensive Ports Authority of South Africa.

Maritime stakeholders are therefore invited to consider the proposed draft amendments and submit their comments and inputs to reach the Department of Transport by no later than the 5<sup>th</sup> of October 2023. The Department is planning a hybrid consultation meeting to be held by October 2023.

Written submissions must be directed as follows:
