The main objective of the project is to alleviate the overload problem on the 132kV Lusaka Ring in the short medium term.

The project works shall comprise three (3) Lots as follows;

**Lot No. 1: Supply and Delivery of HTLS conductor**

About 100km of the HTLS conductor shall be required to be procured by ZESCO Limited. This conductor shall be installed on the 132kV Leopards Hill - Coventry street transmission line using the existing towers and foundations. Therefore, the mechanical properties of the HTLS conductor must be equivalent to the ones for the existing Wolf conductor.

The delivery period shall be approximately sixteen (16) weeks

**Lot No. 2: Supply of the 132kV transformers**

ZESCO shall require procuring two(2) X 45MVA 132/11kV transformers complete with the associated power cables on the low voltage side. These transformers are required to be installed at Coventry street substation.

The delivery period shall be approximately sixteen (16) weeks

**Lot No. 3: Installation of the HTLS Conductor**

ZESCO shall require engaging a local contractor to install the HTLS conductor that will be procured under the contract on the 132kV Leopards Hill - Coventry street transmission line. These works shall involve the recovering of the existing Wolf conductor and replacing it with the new HTLS conductor and accessories without making any modifications to the existing towers and foundations.

The delivery period shall be approximately six (6) weeks
